

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

**NPTEL : NOC:Programming, Data Structures and Algorithms (Computer Science and Engineering)**

**Co-ordinators : Prof. Hema A Murthy, Prof. Shankar Balachandran, Dr. N.S. Narayanaswamy**

Lecture 1 - Introduction to Computers and Programming

Lecture 2 - Writing your first program

Lecture 3 - Variables, Operators and Expressions

Lecture 4 - Variable declarations, more operators and precedence

Lecture 5 - Input and Output Statements

Lecture 6 - Conditionals

Lecture 7 - Loops

Lecture 8 - Video Solution to Digital Root Programming Assignment

Lecture 9 - Introduction to arrays

Lecture 10 - Working with 1D arrays

Lecture 11 - Find prime numbers

Lecture 12 - Debugging demo

Lecture 13 - Multi-dimensional arrays

Lecture 14 - Pointers

Lecture 15 - More on pointers

Lecture 16 - Arrays and pointer arithmetic

Lecture 17 - Introduction to Strings

Lecture 18 - More on Strings

Lecture 19 - Video Solution to Print Elements of a Matrix in Spiral Order Programming Assignment

Lecture 20 - Introduction to functions

Lecture 21 - More details on functions

Lecture 22 - Arguments, variables and parameters

Lecture 23 - Pass parameters by reference

Lecture 24 - Recursive functions

Lecture 25 - Running time of a program

Lecture 26 - Computing time complexity

Lecture 27 - Video Solution to Palindrome Checker Programming Assignment

Lecture 28 - Algorithms and Powering

Lecture 29 - Polynomial evaluation and multiplication

Lecture 30 - Linear and Binary Search Analysis

Lecture 31 - Analysis of minimum and maximum in an array

**HTML Links for 1,14,300+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai**

Lecture 1 - A Simple C Program for Sorting

Lecture 2 - Review of Structures, Pointers and Functions

Lecture 3 - Recursion

Lecture 4 - Abstract Data Types-Data + Methods

Lecture 5 - List Data Type

Lecture 6 - Access and update methods

Lecture 7 - Doubly Linked List Data Type

Lecture 8 - Doubly Linked Lists and Arrays

Lecture 9 - ADT Stacks

Lecture 10 - Checking of Balanced Parenthesis

Lecture 11 - Infix and Postfix expressions and Expression evaluation

Lecture 12 - Queue ADT Definition and Implementation

Lecture 13 - Merging using Queue ADT and Queue types

Lecture 14 - Tree ADT and Traversals

Lecture 15 - Binary Tree ADT and traversals

Lecture 16 - Tree Applications

Lecture 17 - Binary Search Trees

Lecture 18 - Heaps

Lecture 1 - Course Outline

Lecture 2 - Example: Air Travel

Lecture 3 - Example: Xerox shop

Lecture 4 - Example: Document similarity

Lecture 5 - Introduction and motivation

Lecture 6 - Input size, worst case, average case

Lecture 7 - Quantifying efficiency:  $O()$ ,  $\Omega()$ ,  $\Theta()$

Lecture 8 - Examples: Analysis of iterative and recursive algorithms

Lecture 9 - Arrays and lists

Lecture 10 - Searching in an array

Lecture 11 - Selection Sort

Lecture 12 - Insertion sort

Lecture 13 - Merge sort

Lecture 14 - Merge sort - analysis

Lecture 15 - Quicksort

Lecture 16 - Quicksort - analysis

Lecture 17 - Sorting - Concluding remarks

Lecture 18 - Introduction to graphs

Lecture 19 - Representing graphs

Lecture 20 - Breadth first search (BFS)

Lecture 21 - Depth first search (DFS)

Lecture 22 - Applications of BFS and DFS

Lecture 23 - Directed acyclic graphs: topological sort

Lecture 24 - Directed acyclic graphs: longest paths

Lecture 25 - Single source shortest paths: Dijkstras algorithm

Lecture 26 - Dijkstras algorithm: analysis

Lecture 27 - Negative edge weights: Bellman-Ford algorithm

Lecture 28 - All pairs shortest paths

Lecture 29 - Minimum Cost Spanning Trees

Lecture 30 - Prims Algorithm

Lecture 31 - Kruskals algorithm

[Lecture 32 - Union-Find using arrays](#)

[Lecture 33 - Union-Find using pointers](#)

[Lecture 34 - Priority queues](#)

[Lecture 35 - Heaps](#)

[Lecture 36 - Heaps: Updating values, sorting](#)

[Lecture 37 - Counting inversions](#)

[Lecture 38 - Closest pair of points](#)

[Lecture 39 - Binary Search Trees](#)

[Lecture 40 - Balanced search trees](#)

[Lecture 41 - Interval scheduling](#)

[Lecture 42 - Scheduling with deadlines: minimizing lateness](#)

[Lecture 43 - Huffman codes](#)

[Lecture 44 - Introduction to dynamic programming](#)

[Lecture 45 - Memoization](#)

[Lecture 46 - Grid Paths](#)

[Lecture 47 - Common subwords and subsequences](#)

[Lecture 48 - Edit distance](#)

Lecture 1 - Introduction

Lecture 2 - Answer to the puzzle

Lecture 3 - Introduction to Python - 1

Lecture 4 - Introduction to Python - 2

Lecture 5 - Introduction to Networkx - 1

Lecture 6 - Introduction to Networkx - 2

Lecture 7 - Social Networks: The Challenge

Lecture 8 - Google Page Rank

Lecture 9 - Searching in a Network

Lecture 10 - Link Prediction

Lecture 11 - The Contagions

Lecture 12 - Importance of Acquaintances

Lecture 13 - Marketing on Social Networks

Lecture 14 - Introduction to Datasets

Lecture 15 - Ingredients Network

Lecture 16 - Synonymy Network

Lecture 17 - Web Graph

Lecture 18 - Social Network Datasets

Lecture 19 - Datasets : Different Formats

Lecture 20 - Datasets : How to Download?

Lecture 21 - Datasets : Analysing Using Networkx

Lecture 22 - Datasets : Analysing Using Gephi

Lecture 23 - Introduction : Emergence of Connectedness

Lecture 24 - Advanced Material : Emergence of Connectedness

Lecture 25 - Programming Illustration : Emergence of Connectedness

Lecture 26 - Summary to Datasets

Lecture 27 - Introduction

Lecture 28 - Granovetter's Strength of weak ties

Lecture 29 - Triads, clustering coefficient and neighborhood overlap

Lecture 30 - Structure of weak ties, bridges, and local bridges

Lecture 31 - Validation of Granovetter's experiment using cell phone data

[Lecture 32 - Embededness](#)

[Lecture 33 - Structural Holes](#)

[Lecture 34 - Social Capital](#)

[Lecture 35 - Finding Communities in a graph \(Brute Force Method\)](#)

[Lecture 36 - Community Detection Using Girvan Newman Algorithm](#)

[Lecture 37 - Visualising Communities using Gephi](#)

[Lecture 38 - Tie Strength, Social Media and Passive Engagement](#)

[Lecture 39 - Betweenness Measures and Graph Partitioning](#)

[Lecture 40 - Strong and Weak Relationship - Summary](#)

[Lecture 41 - Introduction to Homophily - Should you watch your company ?](#)

[Lecture 42 - Selection and Social Influence](#)

[Lecture 43 - Interplay between Selection and Social Influence](#)

[Lecture 44 - Homophily - Definition and measurement](#)

[Lecture 45 - Foci Closure and Membership Closure](#)

[Lecture 46 - Introduction to Fatman Evolutionary model](#)

[Lecture 47 - Fatman Evolutionary Model - The Base Code \(Adding people\)](#)

[Lecture 48 - Fatman Evolutionary Model - The Base Code \(Adding Social Foci\)](#)

[Lecture 49 - Fatman Evolutionary Model - Implementing Homophily](#)

[Lecture 50 - Quantifying the Effect of Triadic Closure](#)

[Lecture 51 - Fatman Evolutionary Model - Implementing Closures](#)

[Lecture 52 - Fatman Evolutionary Model - Implementing Social Influence](#)

[Lecture 53 - Fatman Evolutionary Model - Storing and analyzing longitudinal data](#)

[Lecture 54 - Spatial Segregation : An Introduction](#)

[Lecture 55 - Spatial Segregation : Simulation of the Schelling Model](#)

[Lecture 56 - Spatial Segregation : Conclusion](#)

[Lecture 57 - Schelling Model Implementation - 1 \(Introduction\)](#)

[Lecture 58 - Schelling Model Implementation - 2 \(Base Code\)](#)

[Lecture 59 - Schelling Model Implementation - 3 \(Visualization and Getting a list of boundary and internal nodes\)](#)

[Lecture 60 - Schelling Model Implementation - 4 \(Getting a list of unsatisfied nodes\)](#)

[Lecture 61 - Schelling Model Implementation - 5 \(Shifting the unsatisfied nodes and visualizing the final graph\)](#)

[Lecture 62 - Chapter - 5 Positive and Negative Relationships \(Introduction\)](#)

[Lecture 63 - Structural Balance](#)

[Lecture 64 - Enemy'S Enemy is a Friend](#)

- Lecture 65 - Characterizing the Structure of Balanced Networks
- Lecture 66 - Balance Theorem
- Lecture 67 - Proof of Balance Theorem
- Lecture 68 - Introduction to positive and negative edges
- Lecture 69 - Outline of implementation
- Lecture 70 - Creating graph, displaying it and counting unstable triangles
- Lecture 71 - Moving a network from an unstable to stable state
- Lecture 72 - Forming two coalitions
- Lecture 73 - Forming two coalitions (Continued...)
- Lecture 74 - Visualizing coalitions and the evolution
- Lecture 75 - The Web Graph
- Lecture 76 - Collecting the Web Graph
- Lecture 77 - Equal Coin Distribution
- Lecture 78 - Random Coin Dropping
- Lecture 79 - Google Page Ranking Using Web Graph
- Lecture 80 - Implementing PageRank Using Points Distribution Method - 1
- Lecture 81 - Implementing PageRank Using Points Distribution Method - 2
- Lecture 82 - Implementing PageRank Using Points Distribution Method - 3
- Lecture 83 - Implementing PageRank Using Points Distribution Method - 4
- Lecture 84 - Implementing PageRank Using Random Walk Method - 1
- Lecture 85 - Implementing PageRank Using Random Walk Method - 2
- Lecture 86 - DegreeRank versus PageRank
- Lecture 87 - We Follow
- Lecture 88 - Why do we Follow?
- Lecture 89 - Diffusion in Networks
- Lecture 90 - Modeling Diffusion
- Lecture 91 - Modeling Diffusion (Continued...)
- Lecture 92 - Impact of Communities on Diffusion
- Lecture 93 - Cascade and Clusters
- Lecture 94 - Knowledge, Thresholds and the Collective Action
- Lecture 95 - An Introduction to the Programming Screencast (Coding 4 major ideas)
- Lecture 96 - The Base Code
- Lecture 97 - Coding the First Big Idea - Increasing the Payoff

- Lecture 98 - Coding the Second Big Idea - Key People
- Lecture 99 - Coding the Third Big Idea - Impact of Communities on Cascades
- Lecture 100 - Coding the Fourth Big Idea - Cascades and Clusters
- Lecture 101 - Introduction to Hubs and Authorities (A Story)
- Lecture 102 - Principle of Repeated Improvement (A story)
- Lecture 103 - Principle of Repeated Improvement (An example)
- Lecture 104 - Hubs and Authorities
- Lecture 105 - PageRank Revisited - An example
- Lecture 106 - PageRank Revisited - Convergence in the Example
- Lecture 107 - PageRank Revisited - Conservation and Convergence
- Lecture 108 - PageRank, conservation and convergence - Another example
- Lecture 109 - Matrix Multiplication (Pre-requisite 1)
- Lecture 110 - Convergence in Repeated Matrix Multiplication (Pre-requisite 1)
- Lecture 111 - Addition of Two Vectors (Pre-requisite 2)
- Lecture 112 - Convergence in Repeated Matrix Multiplication- The Details
- Lecture 113 - PageRank as a Matrix Operation
- Lecture 114 - PageRank Explained
- Lecture 115 - Introduction to Powerlaw
- Lecture 116 - Why do Normal Distributions Appear?
- Lecture 117 - Power Law emerges in WWW graphs
- Lecture 118 - Detecting the Presence of Powerlaw
- Lecture 119 - Rich Get Richer Phenomenon
- Lecture 120 - Summary So Far
- Lecture 121 - Implementing Rich-getting-richer Phenomenon (Barabasi-Albert Model) - 1
- Lecture 122 - Implementing Rich-getting-richer Phenomenon (Barabasi-Albert Model) - 2
- Lecture 123 - Implementing a Random Graph (Erdos-Renyi Model) - 1
- Lecture 124 - Implementing a Random Graph (Erdos-Renyi Model) - 2
- Lecture 125 - Forced Versus Random Removal of Nodes (Attack Survivability)
- Lecture 126 - Rich Get Richer - A Possible Reason
- Lecture 127 - Rich Get Richer - The Long Tail
- Lecture 128 - Epidemics- An Introduction
- Lecture 129 - Introduction to epidemics (Continued...)
- Lecture 130 - Simple Branching Process for Modeling Epidemics

- Lecture 131 - Simple Branching Process for Modeling Epidemics (Continued...)
- Lecture 132 - Basic Reproductive Number
- Lecture 133 - Modeling epidemics on complex networks
- Lecture 134 - SIR and SIS spreading models
- Lecture 135 - Comparison between SIR and SIS spreading models
- Lecture 136 - Basic Reproductive Number Revisited for Complex Networks
- Lecture 137 - Percolation model
- Lecture 138 - Analysis of basic reproductive number in branching model (The problem statement)
- Lecture 139 - Analyzing basic reproductive number - 2
- Lecture 140 - Analyzing basic reproductive number - 3
- Lecture 141 - Analyzing basic reproductive number - 4
- Lecture 142 - Analyzing basic reproductive number - 5
- Lecture 143 - Small World Effect - An Introduction
- Lecture 144 - Milgram's Experiment
- Lecture 145 - The Reason
- Lecture 146 - The Generative Model
- Lecture 147 - Decentralized Search - I
- Lecture 148 - Decentralized Search - II
- Lecture 149 - Decentralized Search - III
- Lecture 150 - Programming illustration- Small world networks : Introduction
- Lecture 151 - Base code
- Lecture 152 - Making homophily based edges
- Lecture 153 - Adding weak ties
- Lecture 154 - Plotting change in diameter
- Lecture 155 - Programming illustration- Myopic Search : Introduction>
- Lecture 156 - Myopic Search
- Lecture 157 - Myopic Search comparison to optimal search
- Lecture 158 - Time Taken by Myopic Search
- Lecture 159 - PseudoCores : Introduction
- Lecture 160 - How to be Viral
- Lecture 161 - Who are the right key nodes?
- Lecture 162 - finding the right key nodes (the core)
- Lecture 163 - Coding K-Shell Decomposition

[Lecture 164 - Coding cascading Model](#)

[Lecture 165 - Coding the importance of core nodes in cascading](#)

[Lecture 166 - Pseudo core](#)

Lecture 1 - Introduction to Probability - A box of chocolates

Lecture 2 - Introduction to Probability - Axiomatic Approach to Probability Theory

Lecture 3 - Introduction to Probability - Verifying Matrix Multiplication (Statement, Algorithm and Independence)

Lecture 4 - Introduction to Probability - Verifying Matrix Multiplication (Correctness and Law of Total Probability)

Lecture 5 - Introduction to Probability - How Strong is your Network?

Lecture 6 - Introduction to Probability - How to Understand the World? Play with it!

Lecture 7 - Tutorial 1

Lecture 8 - Tutorial 2

Lecture 9 - Discrete Random Variables - Basic Definitions

Lecture 10 - Discrete Random Variables - Linearity of Expectation and Jensen's Inequality

Lecture 11 - Discrete Random Variables - Conditional Expectation I

Lecture 12 - Discrete Random Variables - Conditional Expectation II

Lecture 13 - Discrete Random Variables - Geometric Random Variables and Collecting Coupons

Lecture 14 - Discrete Random Variables - Randomized Selection

Lecture 15 - Tail Bounds I - Markov's Inequality

Lecture 16 - Tail Bounds I - The Second Moment, Variance and Chebyshev's Inequality

Lecture 17 - Tail Bounds I - Median via Sampling

Lecture 18 - Tail Bounds I - Median via Sampling - Analysis

Lecture 19 - Tail Bounds I - Moment Generating Functions and Chernoff Bounds

Lecture 20 - Tail Bounds I - Parameter Estimation

Lecture 21 - Tail Bounds I - Control Group Selection

Lecture 22 - Applications of Tail Bounds - Routing in Sparse Networks

Lecture 23 - Applications of Tail Bounds - Analysis of Valiant's Routing

Lecture 24 - Applications of Tail Bounds - Random Graphs

Lecture 25 - Live Session 2

Lecture 26 - Live Session

Lecture 1 - Introduction to Human Computer Interaction

Lecture 2 - What is HCI? Commonalities and Differences in Interfaces

Lecture 3 - Door handle, Elevators, Contextual Inquiry, Affinity Diagrams

Lecture 4 - Lab Session Contextual Inquiry

Lecture 5 - Lab Session Affinity Diagram

Lecture 6 - Tutorial on Photoshop

Lecture 7 - Tutorial on UI Designing using Photoshop

Lecture 8 - Institutional Review Board, Ethics committee, IRB documents / application, consent form

Lecture 9 - Tutorial on Proto.io

Lecture 10 - Tutorial on Lookback

Lecture 11 - How to understand user needs? Surveys, Questionnaire

Lecture 12 - How to understand user needs? Surveys, Questionnaire - Continues

Lecture 13 - Prototyping: Low fidelity and High fidelity

Lecture 14 - User-Centered Design

Lecture 15 - Lab Session: Task Analysis

Lecture 16 - Design Patterns

Lecture 17 - Lab Session: Material Design

Lecture 18 - Usable security

Lecture 19 - Lab Session: Task Analysis - 2

Lecture 20 - Continuity of Usable Security

Lecture 21 - Visual Design

Lecture 22 - Visual Design - 2

Lecture 23 - Crypto price Tracker App

Lecture 24 - Interacto

Lecture 25 - Tech Hinder

Lecture 26 - busKARO

Lecture 27 - MayMayMe

Lecture 28 - noWhinge

Lecture 1 - WISE Gen and The IT Revolution - 1

Lecture 2 - WISE Gen and The IT Revolution - 1 (Continued...)

Lecture 3 - WISE GEN - Next Step

Lecture 4 - Network Security : A Re-cap

Lecture 5 - Symmetric Key Cryptography and Digital Signatures

Lecture 6 - Basic Network Security Components

Lecture 7 - Internet Security Threats

Lecture 8 - History of Kali Linux

Lecture 9 - Penetration Testing with Kali Linux

Lecture 10 - Network Security and Forensics Introduction - I

Lecture 11 - Network Security and Forensics Introduction - II

Lecture 12 - Penetration Testing: An Introduction

Lecture 13 - Penetration testing steps in Kali Linux

Lecture 14 - Kali Linux Installation

Lecture 15 - Reconnaissance - Part I

Lecture 16 - Reconnaissance - Part II

Lecture 17 - Serverside Attacks: Tools in Kali Linux

Lecture 18 - Serverside Attacks: Tools in Kali Linux (Continued...)

Lecture 19 - Serverside Attacks: Tools in Kali Linux (Continued...)

Lecture 20 - Serverside Attacks: Tools in Kali Linux (Continued...)

Lecture 21 - Serverside Attacks: Tools in Kali Linux (Continued...)

Lecture 22 - Serverside Attacks: Tools in Kali Linux (Continued...)

Lecture 23 - Client Side Attacks - Tools in Kali Linux - 1

Lecture 24 - Client Side Attacks - Tools in Kali Linux - 2

Lecture 25 - Client Side Attacks - Tools in Kali Linux - 3

Lecture 26 - Client Side Attacks - Tools in Kali Linux - 4

Lecture 27 - Authentication Based Attacks - Tools in Kali Linux - 1

Lecture 28 - Authentication Based Attacks - Tools in Kali Linux - 2

Lecture 29 - Authentication Based Attacks - Tools in Kali Linux - 3

Lecture 30 - Authentication Based Attacks - Tools in Kali Linux - 4

Lecture 31 - Authentication Based Attacks - Tools in Kali Linux - 5

[Lecture 465 - Summary](#)

[Lecture 466 - Conclusion](#)

Lecture 1 - Biological Neuron

Lecture 2 - From Spring to Winter of AI

Lecture 3 - The Deep Revival

Lecture 4 - From Cats to Convolutional Neural Networks

Lecture 5 - Faster, higher, stronger

Lecture 6 - The Curious Case of Sequences

Lecture 7 - Beating humans at their own games (literally)

Lecture 8 - The Madness (2013)

Lecture 9 - (Need for) Sanity

Lecture 10 - Motivation from Biological Neurons

Lecture 11 - McCulloch Pitts Neuron, Thresholding Logic

Lecture 12 - Perceptrons

Lecture 13 - Error and Error Surfaces

Lecture 14 - Perceptron Learning Algorithm

Lecture 15 - Proof of Convergence of Perceptron Learning Algorithm

Lecture 16 - Deep Learning (CS7015): Linearly Separable Boolean Functions

Lecture 17 - Deep Learning (CS7015): Representation Power of a Network of Perceptrons

Lecture 18 - Deep Learning (CS7015): Sigmoid Neuron

Lecture 19 - Deep Learning (CS7015): A typical Supervised Machine Learning Setup

Lecture 20 - Deep Learning (CS7015): Learning Parameters: (Infeasible) guess work

Lecture 21 - Deep Learning (CS7015): Learning Parameters: Gradient Descent

Lecture 22 - Deep Learning (CS7015): Representation Power of Multilayer Network of Sigmoid Neurons

Lecture 23 - Feedforward Neural Networks (a.k.a multilayered network of neurons)

Lecture 24 - Learning Parameters of Feedforward Neural Networks (Intuition)

Lecture 25 - Output functions and Loss functions

Lecture 26 - Backpropagation (Intuition)

Lecture 27 - Backpropagation: Computing Gradients w.r.t. the Output Units

Lecture 28 - Backpropagation: Computing Gradients w.r.t. Hidden Units

Lecture 29 - Backpropagation: Computing Gradients w.r.t. Parameters

Lecture 30 - Backpropagation: Pseudo code

Lecture 31 - Derivative of the activation function

[Lecture 32 - Information content, Entropy and cross entropy](#)

[Lecture 33 - Recap: Learning Parameters: Guess Work, Gradient Descent](#)

[Lecture 34 - Contours Maps](#)

[Lecture 35 - Momentum based Gradient Descent](#)

[Lecture 36 - Nesterov Accelerated Gradient Descent](#)

[Lecture 37 - Stochastic And Mini-Batch Gradient Descent](#)

[Lecture 38 - Tips for Adjusting Learning Rate and Momentum](#)

[Lecture 39 - Line Search](#)

[Lecture 40 - Gradient Descent with Adaptive Learning Rate](#)

[Lecture 41 - Bias Correction in Adam](#)

[Lecture 42 - Eigenvalues and Eigenvectors](#)

[Lecture 43 - Linear Algebra : Basic Definitions](#)

[Lecture 44 - Eigenvalue Decompositon](#)

[Lecture 45 - Principal Component Analysis and its Interpretations](#)

[Lecture 46 - PCA: Interpretation 2](#)

[Lecture 47 - PCA: Interpretation 3](#)

[Lecture 48 - PCA: Interpretation 3 \(Continued...\)](#)

[Lecture 49 - PCA: Practical Example](#)

[Lecture 50 - Singular Value Decomposition](#)

[Lecture 51 - Introduction to Autocoders](#)

[Lecture 52 - Link between PCA and Autoencoders](#)

[Lecture 53 - Regularization in autoencoders \(Motivation\)](#)

[Lecture 54 - Denoising Autoencoders](#)

[Lecture 55 - Sparse Autoencoders](#)

[Lecture 56 - Contractive Autoencoders](#)

[Lecture 57 - Bias and Variance](#)

[Lecture 58 - Train error vs Test error](#)

[Lecture 59 - Train error vs Test error \(Recap\)](#)

[Lecture 60 - True error and Model complexity](#)

[Lecture 61 - L2 regularization](#)

[Lecture 62 - Dataset augmentation](#)

[Lecture 63 - Parameter sharing and tying](#)

[Lecture 64 - Adding Noise to the inputs](#)

Lecture 65 - Adding Noise to the outputs

Lecture 66 - Early stopping

Lecture 67 - Ensemble Methods

Lecture 68 - Dropout

Lecture 69 - A quick recap of training deep neural networks

Lecture 70 - Unsupervised pre-training

Lecture 71 - Better activation functions

Lecture 72 - Better initialization strategies

Lecture 73 - Batch Normalization

Lecture 74 - One-hot representations of words

Lecture 75 - Distributed Representations of words

Lecture 76 - SVD for learning word representations

Lecture 77 - SVD for learning word representations (Continued...)

Lecture 78 - Continuous bag of words model

Lecture 79 - Skip-gram model

Lecture 80 - Skip-gram model (Continued...)

Lecture 81 - Contrastive estimation

Lecture 82 - Hierarchical softmax

Lecture 83 - GloVe representations

Lecture 84 - Evaluating word representations

Lecture 85 - Relation between SVD and Word2Vec

Lecture 86 - The convolution operation

Lecture 87 - Relation between input size, output size and filter size

Lecture 88 - Convolutional Neural Networks

Lecture 89 - Convolutional Neural Networks (Continued...)

Lecture 90 - CNNs (success stories on ImageNet)

Lecture 91 - CNNs (success stories on ImageNet) (Continued...)

Lecture 92 - Image Classification continued (GoogLeNet and ResNet)

Lecture 93 - Visualizing patches which maximally activate a neuron

Lecture 94 - Visualizing filters of a CNN

Lecture 95 - Occlusion experiments

Lecture 96 - Finding influence of input pixels using backpropagation

Lecture 97 - Guided Backpropagation

[Lecture 98 - Optimization over images](#)

[Lecture 99 - Create images from embeddings](#)

[Lecture 100 - Deep Dream](#)

[Lecture 101 - Deep Art](#)

[Lecture 102 - Fooling Deep Convolutional Neural Networks](#)

[Lecture 103 - Sequence Learning Problems](#)

[Lecture 104 - Recurrent Neural Networks](#)

[Lecture 105 - Backpropagation through time](#)

[Lecture 106 - The problem of Exploding and Vanishing Gradients](#)

[Lecture 107 - Some Gory Details](#)

[Lecture 108 - Selective Read, Selective Write, Selective Forget - The Whiteboard Analogy](#)

[Lecture 109 - Long Short Term Memory \(LSTM\) and Gated Recurrent Units \(GRUs\)](#)

[Lecture 110 - How LSTMs avoid the problem of vanishing gradients](#)

[Lecture 111 - How LSTMs avoid the problem of vanishing gradients \(Continued...\)](#)

[Lecture 112 - Introduction to Encoder Decoder Models](#)

[Lecture 113 - Applications of Encoder Decoder models](#)

[Lecture 114 - Attention Mechanism](#)

[Lecture 115 - Attention Mechanism \(Continued...\)](#)

[Lecture 116 - Attention over images](#)

[Lecture 117 - Hierarchical Attention](#)

Lecture 1 - Introduction to the Course

Lecture 2 - CMOS Transistors and Gates

Lecture 3 - Basic Gates

Lecture 4 - Building Gates Using Simulator

Lecture 5 - Hierarchical Design and Verification

Lecture 6 - Building Blocks of a Digital Computer

Lecture 7 - Binary Number Systems

Lecture 8 - Signed Number Systems

Lecture 9 - Twos Complement Number System

Lecture 10 - Binary Adder Circuits

Lecture 11 - Building the ALU of HACK

Lecture 12 - HACK ALU Functionality

Lecture 13 - Tips for Project P1

Lecture 14 - Sequential Logic Design

Lecture 15 - Latches and Flipflops

Lecture 16 - The Memory Hierarchy

Lecture 17 - Design of Program Counter

Lecture 18 - Introduction to Computer Organization: The HACK Instruction Set Architecture (ISA)

Lecture 19 - Memory Mapped I/O

Lecture 20 - Tips for Projects P2 and P3

Lecture 21 - Tips for Project 4

Lecture 22 - Tips for Project 4

Lecture 23 - Introduction to Computer Architecture

Lecture 24 - The HACK Microarchitecture

Lecture 25 - The HACK CPU - A Deep Dive - Part 1

Lecture 26 - The HACK CPU - A Deep Dive - Part 2

Lecture 27 - The Data Memory

Lecture 28 - The HACK Computer

Lecture 29 - The Assembler Construction

Lecture 30 - Understanding the Working of Assembler

Lecture 31 - Assembler : Symbol Table Construction

[Lecture 32 - Assembler : Pass 1](#)

[Lecture 33 - Assembler : Pass 2](#)

[Lecture 34 - Project 6 : Demonstration](#)

[Lecture 35 - Virtual Machines - What and Why?](#)

[Lecture 36 - The VM Instruction Set Architecture](#)

[Lecture 37 - The execution of a VM Program](#)

[Lecture 38 - How powerful is the VM?](#)

[Lecture 39 - Project 7 : VM ISA to HACK Mnemonic Translation](#)

[Lecture 40 - Project 7 : Demo](#)

[Lecture 41 - Deep Understanding of VM ISA using VM Emulator](#)

[Lecture 42 - Virtual Machine II - Program flow commands and Introduction to Function Calls](#)

[Lecture 43 - Implementation of Function Call](#)

[Lecture 44 - Working of the Virtual Machine](#)

[Lecture 45 - Project 8 : Translation of Program Flow and Function Call to HACK Mnemonic](#)

[Lecture 46 - Handling Static Variables](#)

[Lecture 47 - Project 8 : Implementation tips in a Nut Shell](#)

[Lecture 48 - Introduction to The JACK Programming Language](#)

[Lecture 49 - Project 9 : Basic Steps](#)

[Lecture 50 - Understanding Syntax of JACK using Examples](#)

[Lecture 51 - Project 9 : More Examples](#)

[Lecture 52 - The JACK Syntax - Language Specification](#)

[Lecture 53 - Application Development using JACK](#)

[Lecture 54 - JACK Compiler: Lexical Analysis - Tokenization](#)

[Lecture 55 - Project 10 : Compiler for JACK - Part-1 Demo](#)

[Lecture 56 - The JACK Grammar](#)

[Lecture 57 - Compiler for JACK: Parsing the JACK Program](#)

[Lecture 58 - The Token Analyzer](#)

[Lecture 59 - Testing the Correctness](#)

[Lecture 60 - The Jack Compiler - Back-end Introduction](#)

[Lecture 61 - The Jack Compiler - Handling Variables](#)

[Lecture 62 - The Jack Compiler - Handling Expressions](#)

[Lecture 63 - The Jack Compiler - Handling Flow of Control](#)

[Lecture 64 - The Jack Compiler - Handling Objects](#)

[Lecture 65 - The Jack Compiler - Handling Arrays](#)

[Lecture 66 - The Jack Compiler Backend: An XML guided approach](#)

[Lecture 67 - The Jack Compiler Backend: Populating the Class and Subroutine Symbol tables.](#)

[Lecture 68 - The Jack Compiler Backend: Code Generation - 1](#)

[Lecture 69 - The Jack Compiler Backend: Code Generation - 2](#)

[Lecture 70 - The Jack Compiler Backend: Code Generation - 3](#)

[Lecture 71 - The Jack Compiler Backend: Code Generation - 4](#)

[Lecture 72 - Jack Compiler: Code Generation - 5](#)

[Lecture 73 - Jack Compiler: Code Generation - 6](#)

[Lecture 74 - Jack Compiler: Code Generation - 7](#)

[Lecture 75 - Understand the Operating System - Compiler Interactions](#)

[Lecture 76 - Project 12 - One sample journey from Jack to Hack](#)

[Lecture 77 - Concluding Remarks](#)

Lecture 1 - Introduction to the Course History of Artificial Intelligence

Lecture 2 - Overview of Machine Learning

Lecture 3 - Why Linear Algebra ? Scalars, Vectors, Tensors

Lecture 4 - Basic Operations

Lecture 5 - Norms

Lecture 6 - Linear Combinations Span Linear Independence

Lecture 7 - Matrix Operations Special Matrices Matrix Decompositions

Lecture 8 - Introduction to Probability Theory Discrete and Continuous Random Variables

Lecture 9 - Conditional, Joint, Marginal Probabilities Sum Rule and Product Rule Bayes' Theorem

Lecture 10 - Bayes' Theorem - Simple Examples

Lecture 11 - Independence Conditional Independence Chain Rule Of Probability

Lecture 12 - Expectation

Lecture 13 - Variance Covariance

Lecture 14 - Some Relations for Expectation and Covariance (Slightly Advanced)

Lecture 15 - Machine Representation of Numbers, Overflow, Underflow, Condition Number

Lecture 16 - Derivatives, Gradient, Hessian, Jacobian, Taylor Series

Lecture 17 - Matrix Calculus (Slightly Advanced)

Lecture 18 - Optimization 1 Unconstrained Optimization

Lecture 19 - Introduction to Constrained Optimization

Lecture 20 - Introduction to Numerical Optimization Gradient Descent - 1

Lecture 21 - Gradient Descent 2 Proof of Steepest Descent Numerical Gradient Calculation Stopping Criteria

Lecture 22 - Introduction to Packages

Lecture 23 - The Learning Paradigm

Lecture 24 - A Linear Regression Example

Lecture 25 - Linear Regression Least Squares Gradient Descent

Lecture 26 - Coding Linear Regression

Lecture 27 - Generalized Function for Linear Regression

Lecture 28 - Goodness of Fit

Lecture 29 - Bias-Variance Trade Off

Lecture 30 - Gradient Descent Algorithms

Lecture 31 - Introduction to Week 5 (Deep Learning)

- Lecture 32 - Logistic Regression
- Lecture 33 - Binary Entropy cost function
- Lecture 34 - OR Gate Via Classification
- Lecture 35 - NOR, AND, NAND Gates
- Lecture 36 - XOR Gate
- Lecture 37 - Differentiating the sigmoid
- Lecture 38 - Gradient of logistic regression
- Lecture 39 - Code for Logistic Regression
- Lecture 40 - Multinomial Classification - Introduction
- Lecture 41 - Multinomial Classification - One Hot Vector
- Lecture 42 - Multinomial Classification - Softmax
- Lecture 43 - Schematic of multinomial logistic regression
- Lecture 44 - Biological neuron
- Lecture 45 - Structure of an Artificial Neuron
- Lecture 46 - Feedforward Neural Network
- Lecture 47 - Introduction to back prop
- Lecture 48 - Summary of Week 05
- Lecture 49 - Introduction to Convolution Neural Networks (CNN)
- Lecture 50 - Types of convolution
- Lecture 51 - CNN Architecture Part 1 (LeNet and Alex Net)
- Lecture 52 - CNN Architecture Part 2 (VGG Net)
- Lecture 53 - CNN Architecture Part 3 (GoogleNet)
- Lecture 54 - CNN Architecture Part 4 (ResNet)
- Lecture 55 - CNN Architecture Part 5 (DenseNet)
- Lecture 56 - Train Network for Image Classification
- Lecture 57 - Semantic Segmentation
- Lecture 58 - Hyperparameter optimization
- Lecture 59 - Transfer Learning
- Lecture 60 - Segmentation of Brain Tumors from MRI using Deep Learning
- Lecture 61 - Activation Functions
- Lecture 62 - Learning Rate decay, Weight initialization
- Lecture 63 - Data Normalization
- Lecture 64 - Batch Norm

[Lecture 65 - Introduction to RNNs](#)

[Lecture 66 - Example - Sequence Classification](#)

[Lecture 67 - Training RNNs - Loss and BPTT](#)

[Lecture 68 - Vanishing Gradients and TBPTT](#)

[Lecture 69 - RNN Architectures](#)

[Lecture 70 - LSTM](#)

[Lecture 71 - Why LSTM Works](#)

[Lecture 72 - Deep RNNs and Bi- RNNs](#)

[Lecture 73 - Summary of RNNs](#)

[Lecture 74 - Introduction.](#)

[Lecture 75 - Knn](#)

[Lecture 76 - Binary decision trees](#)

[Lecture 77 - Binary regression trees](#)

[Lecture 78 - Bagging](#)

[Lecture 79 - Random Forest](#)

[Lecture 80 - Boosting](#)

[Lecture 81 - Gradient boosting](#)

[Lecture 82 - Unsupervised learning and Kmeans](#)

[Lecture 83 - Agglomerative clustering](#)

[Lecture 84 - Probability Distributions- Gaussian, Bernoulli](#)

[Lecture 85 - Covariance Matrix of Gaussian Distribution](#)

[Lecture 86 - Central Limit Theorem](#)

[Lecture 87 - Naïve Bayes](#)

[Lecture 88 - MLE Intro](#)

[Lecture 89 - PCA - Part 1](#)

[Lecture 90 - PCA - Part 2](#)

[Lecture 91 - Support Vector Machines](#)

[Lecture 92 - MLE, MAP and Bayesian Regression](#)

[Lecture 93 - Introduction to Generative model](#)

[Lecture 94 - Generative Adversarial Networks \(GAN\)](#)

[Lecture 95 - Variational Auto-encoders \(VAE\)](#)

[Lecture 96 - Applications: Cardiac MRI - Segmentation and Diagnosis](#)

[Lecture 97 - Applications: Cardiac MRI Analysis - Tensorflow code walkthrough](#)

[Lecture 98 - Introduction to Week 12](#)

[Lecture 99 - Application 1 description - Fin Heat Transfer](#)

[Lecture 100 - Application 1 solution](#)

[Lecture 101 - Application 2 description - Computational Fluid Dynamics](#)

[Lecture 102 - Application 2 solution](#)

[Lecture 103 - Application 3 description - Topology Optimization](#)

[Lecture 104 - Application 3 solution](#)

[Lecture 105 - Application 4 Solution of PDE/ODE using Neural Networks](#)

[Lecture 106 - Summary and road ahead](#)

Lecture 1 - Secure Systems Engineering

Lecture 2 - Program Binaries

Lecture 3 - Buffer Overflows in the Stack

Lecture 4 - Buffer Overflows

Lecture 5 - Gdb - Demo

Lecture 6 - Skip instruction - Demo

Lecture 7 - Buffer Overflow - Demo

Lecture 8 - Buffer Overflow (create a shell) - Demo

Lecture 9 - Preventing buffer overflows with canaries and W^X

Lecture 10 - Return-to-libc attack

Lecture 11 - ROP Attacks

Lecture 12 - Demonstration of Canaries, W^X, and ASLR to prevent Buffer Overflow Attacks

Lecture 13 - Demonstration of a Return-to-Libc Attack

Lecture 14 - Demonstration of a Return Oriented Programming (ROP) Attack

Lecture 15 - ASLR - Part 1

Lecture 16 - ASLR - Part 2

Lecture 17 - Buffer overreads

Lecture 18 - Demonstration of Load Time Relocation

Lecture 19 - Demonstration of Position Independent Code

Lecture 20 - PLT Demonstration

Lecture 21 - Format string vulnerabilities

Lecture 22 - Integer Vulnerabilities

Lecture 23 - Heap

Lecture 24 - Heap exploits

Lecture 25 - Demo of Integer Vulnerabilites - I

Lecture 26 - Demo of Integer Vulnerabilites - II

Lecture 27 - Demo of Format String Vulnerabilities

Lecture 28 - Access Control

Lecture 29 - Access control in linux

Lecture 30 - Mandatory access Control

Lecture 31 - Confinement in Applications

- [Lecture 32 - Software fault isolation](#)
- [Lecture 33 - Trusted Execution Environments](#)
- [Lecture 34 - ARM Trustzone](#)
- [Lecture 35 - SGX - Part 1](#)
- [Lecture 36 - SGX - Part 2](#)
- [Lecture 37 - PUF - Part 1](#)
- [Lecture 38 - PUF - Part 2](#)
- [Lecture 39 - PUF - Part 3](#)
- [Lecture 40 - Covert Channels](#)
- [Lecture 41 - Flush+Reload Attacks](#)
- [Lecture 42 - Prime+Probe](#)
- [Lecture 43 - Meltdown](#)
- [Lecture 44 - Spectre Variant - 1](#)
- [Lecture 45 - Spectre variant - 2](#)
- [Lecture 46 - rowhammer](#)
- [Lecture 47 - Heap demo - 1](#)
- [Lecture 48 - Heap demo - 2](#)
- [Lecture 49 - Heap demo - 3](#)
- [Lecture 50 - PowerAnalysisAttacks](#)
- [Lecture 51 - Hardware Trojans](#)
- [Lecture 52 - FANCI : Identification of Stealthy Malicious Logic](#)
- [Lecture 53 - Detecting Hardware Trojans in ICs](#)
- [Lecture 54 - Protecting against Hardware Trojans](#)
- [Lecture 55 - Side Channel Analysis](#)
- [Lecture 56 - Fault Attacks on AES](#)
- [Lecture 57 - Demo: Cache timing attack on T-table implementation of AES](#)
- [Lecture 58 - Demo: Cache-timing based Covert Channel - Part 1](#)
- [Lecture 59 - Demo: Cache-timing based Covert Channel - Part 2](#)

Lecture 1 - Introduction

Lecture 2 - Medium vs. Modality

Lecture 3 - Multimedia and Multimodality

Lecture 4 - Modality Relations

Lecture 5 - Characteristics of Multimodal Systems

Lecture 6 - Introduction

Lecture 7 - Speech Production

Lecture 8 - Hearing - Ear

Lecture 9 - Hearing - Perception

Lecture 10 - Introduction

Lecture 11 - The Human Eye

Lecture 12 - Gestalt Perception

Lecture 13 - Resolution and Sensitivity

Lecture 14 - Depth Perception

Lecture 15 - Reading

Lecture 16 - Introduction

Lecture 17 - Haptics

Lecture 18 - Smell

Lecture 19 - Taste

Lecture 20 - Memory

Lecture 21 - Motorsystem

Lecture 22 - Introduction

Lecture 23 - Processing Multiple Signals

Lecture 24 - Multimodal Dual-Tasks

Lecture 25 - Effects of Discongruent Signals

Lecture 26 - Relevance

Lecture 27 - Introduction 1

Lecture 28 - Introduction 2

Lecture 29 - Gesture to Space

Lecture 30 - Turn Taking

Lecture 31 - Conclusion

[Lecture 32 - Introduction](#)

[Lecture 33 - Overview](#)

[Lecture 34 - Automatic Speech Recognition](#)

[Lecture 35 - Emotion Recognition](#)

[Lecture 36 - Text Recognition](#)

[Lecture 37 - Introduction1](#)

[Lecture 38 - Icons](#)

[Lecture 39 - Text Generation](#)

[Lecture 40 - Text to Speech](#)

[Lecture 41 - Speech Generation](#)

[Lecture 42 - Introduction .](#)

[Lecture 43 - Multimodal Interactive Systems Development](#)

[Lecture 44 - Introduction . .](#)

[Lecture 45 - Virtual Reality](#)

[Lecture 46 - Introduction to Audio for Virtual Reality](#)

[Lecture 47 - Spatial Hearing](#)

[Lecture 48 - Dummy Heads](#)

[Lecture 49 - Individuality of HRTFs](#)

[Lecture 50 - Sterophony](#)

[Lecture 51 - Crosstalk Cancelation](#)

[Lecture 52 - Ambisonics](#)

[Lecture 53 - Sound Field Synthesis](#)

[Lecture 54 - Challenges with Projection-based Systems](#)

[Lecture 55 - Capturing of Sound Scenes](#)

[Lecture 56 - Closing Remarks](#)

Lecture 1 - Recap of Probability Theory

Lecture 2 - Why are we interested in Joint Distributions

Lecture 3 - How do we represent a joint distribution

Lecture 4 - Can we represent the joint distribution more compactly

Lecture 5 - Can we use a graph to represent a joint distribution

Lecture 6 - Different types of reasoning encoded in a Bayesian Network

Lecture 7 - Independencies encoded by a Bayesian Network (Case 1: Node and it's parents)

Lecture 8 - Independencies encoded by a Bayesian Network (Case 2: Node and it's non-parents)

Lecture 9 - Independencies encoded by a Bayesian Network (Case 3: Node and it's descendants)

Lecture 10 - Bayesian Networks : Formal Semantics

Lecture 11 - I-Maps

Lecture 12 - Markov Networks: Motivation

Lecture 13 - Factors in Markov Network

Lecture 14 - Local Independencies in a Markov Network

Lecture 15 - Joint Distributions

Lecture 16 - The concept of a latent variable

Lecture 17 - Restricted Boltzmann Machines

Lecture 18 - RBMs as Stochastic Neural Networks

Lecture 19 - Unsupervised Learning with RBMs

Lecture 20 - Computing the gradient of the log likelihood

Lecture 21 - Motivation for Sampling

Lecture 22 - Motivation for Sampling - Part 2

Lecture 23 - Markov Chains

Lecture 24 - Why do we care about Markov Chains ?

Lecture 25 - Setting up a Markov Chain for RBMs

Lecture 26 - Training RBMs Using Gibbs Sampling

Lecture 27 - Training RBMs Using Contrastive Divergence

Lecture 28 - Revisiting Autoencoders

Lecture 29 - Variational Autoencoders: The Neural Network Perspective

Lecture 30 - Variational Autoencoders: The Graphical model perspective

Lecture 31 - Neural Autoregressive Density Estimator

Lecture 16 - Quantum Algorithms: Bernstein Vazirani Algorithm

Lecture 17 - Quantum Algorithms: Grover's Search

Lecture 18 - Grover's algorithm Programming

Lecture 19 - NISQ-era quantum algorithms

Lecture 20 - Variational Quantum Algorithms

Lecture 21 - Variational Quantum Eigensolver

Lecture 22 - Quantum Generative Adversarial Networks (QGANs)

Lecture 23 - Fixing quantum errors with quantum tricks: A brief introduction to QEC - Part 1

Lecture 24 - Fixing quantum errors with quantum tricks: A brief introduction to QEC - Part 2

Lecture 25 - Fixing quantum errors with quantum tricks: A brief introduction to QEC - Part 3

Lecture 1 - Introduction to Computer Security - Part 1

Lecture 2 - Introduction to Computer Security - Part 2

Lecture 3 - Malicious Software - Part 1

Lecture 4 - Malicious Software - Part 2

Lecture 5 - Social Engineering and Phishing Attacks - Part 1

Lecture 6 - Social Engineering and Phishing Attacks - Part 2

Lecture 7 - Operating System Security - Part 1

Lecture 8 - Operating System Security - Part 2

Lecture 9 - Operating System Security - Part 3

Lecture 10 - Operating System Security - Part 4

Lecture 11 - Email Security - Part 1

Lecture 12 - Email Security - Part 2

Lecture 13 - Transport Layer Security - Part 1

Lecture 14 - Transport Layer Security - Part 2

Lecture 15 - IP Security - Part 1

Lecture 16 - IP Security - Part 2

Lecture 17 - Security and Usability Overview

Lecture 18 - User Privacy and Usability

- Lecture 1 - Online Privacy
- Lecture 2 - Privacy concepts and studies
- Lecture 3 - Fair Information Practices
- Lecture 4 - Right to Privacy Contextual Integrity
- Lecture 5 - Privacy Policy - Part I
- Lecture 6 - Privacy Policy - Part II
- Lecture 7 - Privacy-based technologies and decision making
- Lecture 8 - Social Media Privacy
- Lecture 9 - Identity resolution
- Lecture 10 - Privacy Nudges
- Lecture 11 - Cookies
- Lecture 12 - Ethics about studying Online Privacy
- Lecture 13 - Anonymization techniques and Differential Privacy
- Lecture 14 - Conducting (user, lab, online) studies
- Lecture 15 - Research paper reading
- Lecture 16 - Voter and Browser Privacy Leaks, Profiling form PII - Part I
- Lecture 17 - Voter and Browser Privacy Leaks, Profiling form PII - Part II
- Lecture 18 - Online Privacy Tools (Hands-on) - Part I
- Lecture 19 - Online Privacy Tools (Hands-on) - Part II
- Lecture 20 - Mobile numbers, home location, Location-based social networks
- Lecture 21 - Location-based social networks
- Lecture 22 - Privacy laws and regulations - Part I
- Lecture 23 - Privacy laws and regulations - Part II
- Lecture 24 - Privacy standards
- Lecture 25 - Look back

Lecture 1 - Paradigms of Machine Learning

Lecture 2 - Few more examples

Lecture 3 - Types of Learning

Lecture 4 - Types of supervised learning

Lecture 5 - Mathematical tools

Lecture 6 - Three Fundamental spaces

Lecture 7 - Conditional Probability

Lecture 8 - Bayes Theorem

Lecture 9 - Continuous Probability

Lecture 10 - Introduction to vectors

Lecture 11 - Span of vectors

Lecture 12 - Linear Independence

Lecture 13 - Basis of vector space

Lecture 14 - Orthogonality and Projection

Lecture 15 - Introduction to Regression

Lecture 16 - Linear regression

Lecture 17 - Geometrical Interpretation

Lecture 18 - Visual Guide to Orthogonal Projection

Lecture 19 - Iterative solution: Gradient descent

Lecture 20 - Gradient Descent

Lecture 21 - Choosing Step size

Lecture 22 - Taylor Series

Lecture 23 - Stochastic Gradient Descent and basis functions

Lecture 24 - Regularization Techniques

Lecture 25 - Binary Classification

Lecture 26 - K-Nearest Neighbour Classification

Lecture 27 - Distance metric and Cross-Validation

Lecture 28 - Computational efficiency of KNN

Lecture 29 - Introduction to Decision Trees

Lecture 30 - Level splitting

Lecture 31 - Measure of Impurity

Lecture 32 - Entropy and Information Gain

Lecture 33 - Generative vs Discriminative models

Lecture 34 - Naive Bayes classifier

Lecture 35 - Conditional Independence

Lecture 36 - Classifying the test point and summary

Lecture 37 - Discriminative models

Lecture 38 - Logistic Regression

Lecture 39 - Summary and big picture

Lecture 40 - Maximum likelihood estimation

Lecture 41 - Linear separability

Lecture 42 - Perceptron and its learning algorithm

Lecture 43 - Perceptron : A thing of past

Lecture 44 - Support Vector Machine

Lecture 45 - Optimizing weights

Lecture 46 - Handling Outliers

Lecture 47 - Dual Formulation

Lecture 48 - Kernel formulation

Lecture 49 - Introduction to Ensemble methods

Lecture 50 - Bagging

Lecture 51 - Bootstrapping

Lecture 52 - Limitations of bagging

Lecture 53 - Introduction to boosting

Lecture 54 - Ada boost

Lecture 55 - Unsupervised learning

Lecture 56 - K-means Clustering

Lecture 57 - Lloyd's Algorithms

Lecture 58 - Convergence and Initialization

Lecture 59 - Representation Learning

Lecture 60 - Orthogonal Projection

Lecture 61 - Covariance Matrix and Eigen direction

Lecture 62 - PCA and mean centering

Lecture 1 - Introduction - Part 1, Programming languages and compilers

Lecture 2 - Introduction - Part 2, Language translators

Lecture 3 - Introduction - Part 3, Phases of a compiler

Lecture 4 - Introduction - Part 4, Static vs Dynamic contexts,Parameter passing

Lecture 5 - Lexing - Part 1, Terminology, Regex, flex tool- Part 1

Lecture 6 - Lexing - Part 2, Lexical errors, Input buffering

Lecture 7 - flex tool- Part 2

Lecture 8 - Lexing - Part 3, Lookahead, KMP string matching

Lecture 9 - Lexing - Part 4, Regex to DFA conversion - Part 1

Lecture 10 - Lexing - Part 5, Regex to DFA conversion - Part 2, Prasing - Part 1

Lecture 11 - Parsing - Part 2, CFG, Parse tree, Precedence, Ambiguity

Lecture 12 - flex tool - Part 3

Lecture 13 - Parsing - Part 3, Sentinel forms, Error recovery, if-else ambiguity

Lecture 14 - Parsing - Part 4, Left recursion, Recursive descent parsing

Lecture 15 - Parsing - Part 5, First and Follow, Predictive parsing table

Lecture 16 - Parsing - Part 6, Predictive parsing table, LL(1) grammars

Lecture 17 - Discussions and doubts clarification - Part 1

Lecture 18 - Parsing - Part 6, Bottom-up, Shift-reduce parsing, SLR parsing

Lecture 19 - Parsing - Part 6, LR(0) automaton, SLR parsing using automaton

Lecture 20 - Parsing - Part 7, SLR(1) parsing table, SLR(1) parsing algorithm

Lecture 21 - Parsing - Part 8, Viable prefixes, LR(1) parsing, LR(1) automaton

Lecture 22 - Parsing - Part 9, LALR parsing, SDT- Part 1, attributes

Lecture 23 - Syntax Directed Translation - Part 2, S- and L-attributed SDD

Lecture 24 - Syntax Directed Translation - Part 3, L-attributed SDD, Applications

Lecture 25 - Syntax Directed Translation - Part 4, Actions within productions

Lecture 26 - Discussions and doubts clarification - Part 2

Lecture 27 - Quiz-1 discussion, SDT - Part 5, Code generation for while loop

Lecture 28 - Intermediate Code Generation - Part 1, Syntax trees and DAGs

Lecture 29 - Intermediate Code Generation - Part 2, Three-address code

Lecture 30 - Discussions and doubts clarification Part 3

Lecture 31 - Intermediate Code Generation - Part 3, Static single assignment

- Lecture 32 - Intermediate Code Generation - Part 4, IR for type expressions
- Lecture 33 - Intermediate Code Generation - Part 4, IR for array expressions
- Lecture 34 - Intermediate Code Generation - Part 4, IR for boolean expressions
- Lecture 35 - Intermediate Code Generation - Part 4, IR for break, continue, switch
- Lecture 36 - Code Generator - Part 1, Introduction, IR and target code
- Lecture 37 - Code Generator - Part 2, Instruction selection, ordering
- Lecture 38 - Code Generator - Part 2, Basic blocks and CFG
- Lecture 39 - x86 assembly code
- Lecture 40 - Code optimizer - Part 1, Local optimizations within a basic block
- Lecture 41 - Code optimizer - Part 2, Array references, Peephole optimization
- Lecture 42 - Discussions and doubts clarification - Part 4
- Lecture 43 - Code optimizer - Part 3, Register allocation, Liveness
- Lecture 44 - Code optimizer - Part 4, Register allocation as graph coloring
- Lecture 45 - Discussions and doubts clarification - Part 5
- Lecture 46 - Code optimizer - Part 5, Data flow analysis, Reaching definitions
- Lecture 47 - Discussions and doubts clarification - Part 6
- Lecture 48 - Code optimizer - Part 6, DFA for reaching definitions, Live variables

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

**NPTEL : NOC:Applied Accelerated Artificial Intelligence (Computer Science and Engineering)**

**Co-ordinators : Prof. Satyadhyan Chickerur, Prof. Bharatkumar Sharma, Prof. Adesuyi Tosin, Prof. Satyajit Das**

Lecture 1 - Introduction to AI Systems Hardware - Part 1

Lecture 2 - Introduction to AI Systems Hardware - Part 2

Lecture 3 - Introduction to AI Accelerators, GPUs

Lecture 4 - Introduction to Operating Systems, Virtualization, Cloud - Part 1

Lecture 5 - Introduction to Operating Systems, Virtualization, Cloud - Part 2

Lecture 6 - Introduction to Containers and IDE Dockers - Part 1

Lecture 7 - Introduction to Containers and IDE Dockers - Part 2

Lecture 8 - Scheduling and Resource Management - Part 1

Lecture 9 - Scheduling and Resource Management - Part 2

Lecture 10 - DeepOps: Deep Dive into Kubernetes with deployment of various AI based Services - Part 1

[Lecture 38 - Ethics in Affective Computing - 2](#)

[Lecture 39 - Course Finale](#)

Lecture 1 - Basics of Linear Algebra: Linear Independence

Lecture 2 - Linear Algebra: Rank of a matrix

Lecture 3 - Linear Algebra - Subspaces of a matrix - 1

Lecture 4 - Linear Algebra - Subspaces of a matrix - 2

Lecture 5 - Linear Algebra - Null space

Lecture 6 - Linear Algebra - Eigen Vectors/Values of a matrix - 1

Lecture 7 - Linear Algebra - Eigen Vectors/Values of a matrix - 2

Lecture 8 - Programming Eigen Decomposition using Python

Lecture 9 - Singular Value Decomposition - 1

Lecture 10 - Singular Value Decomposition - 2

Lecture 11 - Principal Component Analysis - 1

Lecture 12 - Principal Component Analysis - 2

Lecture 13 - Principal Component Analysis - 3

Lecture 14 - Principal Component Analysis - Coding

Lecture 15 - Machine Learning - Overview

Lecture 16 - Optimisation Problems

Lecture 17 - Gradient of a Vector Valued Function - 1

Lecture 18 - Gradient of a Vector Valued Function - 2

Lecture 19 - Neural Networks - Overview

Lecture 20 - Neural Networks - Backpropagation

Lecture 21 - Optimisation - Introduction to optimisation problems

Lecture 22 - Optimisation - Relaxation and approximate convergence

Lecture 23 - Optimisation - First Order Optimality Condition

Lecture 24 - Optimisation - Second Order Optimality Condition

Lecture 25 - Proof of Second Order Optimality Condition, Gradient Methods

Lecture 26 - Gradient Descent - 2

Lecture 27 - Variants of Gradient Descent - 1

Lecture 28 - Variants of Gradient Descent - 2

Lecture 29 - Variants of Gradient Descent - 3

Lecture 30 - Convex Sets

Lecture 31 - Convex Functions

[Lecture 32 - Duality and Lagrangian - Part 1](#)

[Lecture 33 - Duality and Lagrangian - Part 2](#)

[Lecture 34 - Duality and Lagrangian - Part 3](#)

[Lecture 35 - Coding: Introduction to Pytorch](#)

[Lecture 36 - Guest Lecture: Support Vector Machine](#)

Lecture 1 - Introduction to AI/ML/DS

Lecture 2 - Introduction to Probability; Introduction to machine learning - Part 1

Lecture 3 - Introduction to Probability; Introduction to machine learning - Part 2

Lecture 4 - Introduction to Probability; Introduction to machine learning - Part 3

Lecture 5 - Introduction to Probability; Introduction to machine learning - Part 4

Lecture 6 - Python for AI/ML/DS - Part 1

Lecture 7 - Python for AI/ML/DS - Part 2

Lecture 8 - Descriptive statistics and Inferential statistics - Part 1

Lecture 9 - Descriptive statistics and Inferential statistics - Part 2

Lecture 10 - Descriptive statistics and Inferential statistics - Part 3

Lecture 11 - Descriptive statistics and Inferential statistics - Part 4

Lecture 12 - Descriptive statistics and Inferential statistics - Part 5

Lecture 13 - Distribution, Data visualization, Plotting libraries - Part 1

Lecture 14 - Distribution, Data visualization, Plotting libraries - Part 2

Lecture 15 - Distribution, Data visualization, Plotting libraries - Part 3

Lecture 16 - Linear Algebra for Data science

Lecture 17 - Identification of linear relationship among attributes

Lecture 18 - Solving Linear Equations - 1

Lecture 19 - Solving Linear Equations - 2

Lecture 20 - Linear Algebra - Distance, Hyperplanes and Halfspaces, Eigenvalues, Eigenvectors - Part 1

Lecture 21 - Linear Algebra - Distance, Hyperplanes and Halfspaces, Eigenvalues, Eigenvectors - Part 2

Lecture 22 - Linear Algebra - Part 1

Lecture 23 - Linear Algebra - Part 2

Lecture 24 - Linear Algebra - Part 3

Lecture 25 - Regression Models, Models Selection and Evaluation - Part 1

Lecture 26 - Regression Models, Models Selection and Evaluation - Part 2

Lecture 27 - Regression Models, Models Selection and Evaluation - Part 3

Lecture 28 - Regression Models, Models Selection and Evaluation - Part 4

Lecture 29 - Regression - Part 1

Lecture 30 - Regression - Part 2

[Lecture 38 - Nonlinear FE Analysis](#)

[Lecture 39 - Computation of Forces using Maxwell Stress Tensor](#)

[Lecture 40 - Computation of force using virtual work method](#)

Lecture 1 - Introduction: Digital signal processing and its objectives

Lecture 2 - Introduction to sampling and Fourier Transform

Lecture 3 - Sampling of sine wave and associate complication

Lecture 4 - Review of Sampling Theorem

Lecture 5 - Idealized Sampling, Reconstruction

Lecture 6 - Filters And Discrete System

Lecture 7 - Answering questions from previous lectures

Lecture 8 - Desired requirements for discrete system

Lecture 9 - Introduction to phasors

Lecture 10 - Advantages of phasors in discrete systems

Lecture 11 - What do we want from a discrete system?

Lecture 12 - Linearity - Homogeneity and Additivity

Lecture 13 - Shift Invariance and Characterization of LTI systems

Lecture 14 - Characterization of LSI system using its impulse response

Lecture 15 - Introduction to convolution

Lecture 16 - Convolution: Deeper ideas and understanding

Lecture 17 - Characterisation of LSI systems, Convolution-properties

Lecture 18 - Response of LSI Systems to Complex Sinusoids

Lecture 19 - Convergence of Convolution and Bibo Stability

Lecture 20 - Commutativity and Associativity

Lecture 21 - BIBO Stability of an LSI system

Lecture 22 - Causality and memory of an LSI system

Lecture 23 - Frequency response of an LSI system

Lecture 24 - Introduction and conditions of Stability

Lecture 25 - Vectors and Inner Product

Lecture 26 - Interpretation of Frequency Response as Dot Product

Lecture 27 - Interpretation of Frequency Response as Eigenvalues

Lecture 28 - Discrete time fourier transform

Lecture 29 - DTFT in LSI System and Convolution Theorem.

Lecture 30 - Definitions of sequences and Properties of DTFT

Lecture 31 - Introduction to DTFT, IDTFT

Lecture 32 - Dual to convolution property

Lecture 33 - Multiplication Property, Introduction to Parseval's theorem

Lecture 34 - Introduction and Property of DTFT

Lecture 35 - Review of Inverse DTFT

Lecture 36 - Parseval's Theorem and energy and time spectral density

Lecture 37 - Discussion on Unit Step

Lecture 38 - Introduction to Z transform

Lecture 39 - Example of Z transform

Lecture 40 - Region of Convergence

Lecture 41 - Properties of Z transform

Lecture 42 - Z- Transform

Lecture 43 - Rational System

Lecture 44 - Introduction and Examples of Rational Z Transform and their Inverses

Lecture 45 - Double Pole Examples and their Inverse Z Transform

Lecture 46 - Partial Fraction Decomposition

Lecture 47 - LSI System Examples

Lecture 48 - Why are Rational Systems so important?

Lecture 49 - Solving Linear constant coefficient difference equations which are valid over a finite range of time

Lecture 50 - Introduction to Resonance in Rational Systems

Lecture 51 - Characterization of Rational LSI system

Lecture 52 - Causality and stability of the ROC of the system function

Lecture 53 - Recap of Rational Systems and Discrete Time Filters

Lecture 54 - Specifications for Filter Design

Lecture 55 - Four Ideal Piecewise Constant Filters

Lecture 56 - Important Characteristics Of Ideal Filters

Lecture 57 - Synthesis of Discrete Time Filters, Realizable specifications

Lecture 58 - Realistic Specifications for low pass filter. Filter Design Process

Lecture 59 - Introduction to Filter Design. Analog IIR Filter, FIR discrete-time filter, IIR discrete-time filter

Lecture 60 - Analog to discrete transform

Lecture 61 - Intuitive transforms, Bilinear Transformation

Lecture 62 - Steps for IIR filter design

Lecture 63 - Analog filter design using Butterworth Approximation

Lecture 64 - Butterworth filter Derivation And Analysis of butterworth system function

Lecture 65 - Chebychev filter Derivation

Lecture 66 - Midsem paper review discussion

Lecture 67 - The Chebyshev Approximation

Lecture 68 - Next step in design: Obtain poles

Lecture 69 - Introduction to Frequency Transformations in the Analog Domain

Lecture 70 - High pass transformation

Lecture 71 - Band pass transformation

Lecture 72 - Frequency Transformation

Lecture 73 - Different types of filters

Lecture 74 - Impulse invariant method and ideal impulse response

Lecture 75 - Design of FIR of length  $(2N+1)$  by the truncation method, Plotting the function  $V(w)$

Lecture 76 - IIR filter using rectangular window, IIR filter using triangular window

Lecture 77 - Proof that frequency response of an fir filter using rectangular window function centred at 0 is real

Lecture 78 - Introduction to window functions

Lecture 79 - Examples of window functions

Lecture 80 - Explanation of Gibbs Phenomenon and its application

Lecture 81 - Comparison of FIR And IIR Filter

Lecture 82 - Comparison of FIR And IIR Filter

Lecture 83 - Comparison of FIR And IIR Filter

Lecture 84 - Introduction and approach to realization (causal rational system)

Lecture 85 - Comprehension of Signal Flow Graphs and Achievement of Pseudo Assembly Language Code

Lecture 86 - Introduction to IIR Filter Realization and Cascade Structure

Lecture 87 - Cascade Parallel Structure

Lecture 88 - Lattice Structure

Lecture 89 - Recap And Review of Lattice Structure, Realization of FIR Function

Lecture 90 - Backward recursion, Change in the recursive equation of lattice

Lecture 91 - Lattice structure for an arbitrary rational system

Lecture 92 - Example realization of lattice structure for rational system

[Lecture 39 - Methods of Improving Stability - Part-1](#)

[Lecture 40 - Methods of Improving Stability - Part-2](#)

Lecture 1 - Review of DC Models of Diodes & BJT's

Lecture 2 - Review of DC Models of BJT (Continued...) and FET

Lecture 3 - FET Characteristics and Models

Lecture 4 - Problem Session-1 on DC Analysis of BJT Circuits

Lecture 5 - BJT Biasing and Bias Stability

Lecture 6 - BJT Bias Stability (Continued...)

Lecture 7 - FET Biasing, Current Sources

Lecture 8 - Problem Session-2 on FET and BJT Characteristics and Biasing

Lecture 9 - Current Mirrors; BJT Small Signal Models

Lecture 10 - Small Signal Amplifiers: Mid Frequency Analysis

Lecture 11 - Mid Frequency Analysis of the CE and CB Amplifier

Lecture 12 - Problem Session-3 on Mid- Frequency Analysis of CE Amplifiers

Lecture 13 - Midband Analysis of CB and CC Amplifiers

Lecture 14 - Midband Analysis of FET Amplifiers

Lecture 15 - Problem Session-4 on Midband Analysis of Amplifiers

Lecture 16 - High Frequency Response of Small Signal Amplifiers

Lecture 17 - High Frequency Response of Small Signal Amplifiers (Continued...)

Lecture 18 - Low Frequency Response of Small Signal Amplifiers

Lecture 19 - Problem Session-5 on Frequency Response of Small Signal Amplifiers

Lecture 20 - Differential Amplifiers

Lecture 21 - Differential Amplifiers (Continued...)

Lecture 22 - Discussion on Minor-1 Problems and Differential Amplifiers (Continued...)

Lecture 23 - Problem Session-6 on Frequency Response of Small Signal Amplifiers (Continued...) and Differential Amplifiers

Lecture 24 - Use of Current Mirrors in Differential Amplifiers

Lecture 25 - FET Differential Amplifiers and Introduction to Power Amplifiers

Lecture 26 - Class B, Class AB and Class A Power Amplifiers

Lecture 27 - Class A Power Amplifiers; Efficiency Considerations

Lecture 28 - Problem Session-7 on Deferential and Power Amplifiers

Lecture 29 - Introduction to Feedback Amplifiers

Lecture 30 - Advantages of Negative Feedback Amplifiers

Lecture 31 - Analysis of Feedback Amplifiers

- Lecture 32 - Analysis of the Series - Series and Other Feedback Configurations
- Lecture 33 - Problem Session-8 on Feedback Amplifiers
- Lecture 34 - Sinusoidal Oscillators : An Example of Positive Feedback
- Lecture 35 - More on Oscillators
- Lecture 36 - Solutions to Minor-2 Exam and Concluding Discussions on Oscillators
- Lecture 37 - Problem Session-9 on Oscillators
- Lecture 38 - Tuned (or Narrowband) Amplifiers
- Lecture 39 - Widebanding Techniques : Introduction & Use of Inductors
- Lecture 40 - Widebanding By Using an Inductance
- Lecture 41 - Problem Session-10 on Tuned Amplifiers
- Lecture 42 - Widebanding by Using Compound Devices
- Lecture 43 - Cascode Configuration as Wideband Amplifier
- Lecture 44 - Widebanding by Local Feedback
- Lecture 45 - Problem Session-11 on Minor-3 Problems & Widebanding by Compound Devices
- Lecture 46 - Widebanding by Local Feedback and Feedback Cascades
- Lecture 47 - Widebanding by Overall Feedback and Dual Loop Feedback
- Lecture 48 - The Differential Pair and the Gilbert Cell as Wideband Amplifiers
- Lecture 49 - Correction to Gilbert Cell Analysis and Operational Amplifier Imperfections
- Lecture 50 - Op-Amp offsets, Compensation and Slew Rate
- Lecture 51 - Op-Amp Compensation, Slew Rate and Some Problems

Lecture 1 - Introduction to the Course

Lecture 2 - Digital Representation of Analog Signals, Delta Modulation

Lecture 3 - Digital Representation of Analog Signals, Pulse Code Modulation

Lecture 4 - Digital Representation of Analog Signals

Lecture 5 - Quantization Noise in Delta Modulation (Continued...) and Time Division Multiplexing

Lecture 6 - Introduction to Line Coding

Lecture 7 - Spectral Properties of Line Codes: General Relations

Lecture 8 - Spectral Properties of Line Codes: On-off / Polar / Bipolar Signalling

Lecture 9 - Spectral Properties of Line Codes: Duobinary Manchester and HDB Codes

Lecture 10 - Baseband Pulse Shaping: Nyquist's First Criterion

Lecture 11 - Baseband Pulse Shaping; Raised Cosine Family of Pulses

Lecture 12 - Partial Response Signalling: Duobinary and Modified Duobinary Pulse Shaping

Lecture 13 - Precoding for Duobinary and Modified Duobinary Systems

Lecture 14 - Precoding for Modified Duobinary Systems (Continued...) and General Partial Response Signalling

Lecture 15 - Binary Baseband Digital Modulation Techniques

Lecture 16 - M-ary Baseband Digital Modulation Techniques

Lecture 17 - Passband Digital Modulations - I : PSK and QPSK

Lecture 18 - Passband Digital Modulations - II : Offset QPSK

Lecture 19 - Passband Digital Modulations - III : Minimum Shift Keying (MSK)

Lecture 20 - Passband Digital Modulations - IV : MSK (Continued...) : Passband Waveforms for M-ary Signalling

Lecture 21 - Passband Modulations for Band Limited Channels

Lecture 22 - Baseband and Passband Digital Demodulations : General Issues and Concepts

Lecture 23 - Digital Modulation Part - II Matched Filters

Lecture 24 - Matched Filters and Coherent Demodulation-I

Lecture 25 - Coherent Demodulation for Binary Wave Form

Lecture 26 - Demodulators for Binary Waveforms (Continued...) : Coherent and Noncoherent Receivers for Orthogonal Signalling (OOK and FSK)

Lecture 27 - Performance Analysis of Binary Digital Modulations: Signal and Noise Statistics in Coherent and Noncoherent Receivers

Lecture 28 - Error Rates for Binary Signalling : Coherent Receivers

Lecture 29 - Performance of Non Coherent FSK and Differential Phase Shift Keying

Lecture 30 - Demodulation of DPSK and M-ary Signals

[Lecture 42 - Tutorial-IV](#)

Lecture 1 - Introduction

Lecture 2 - Control structures and performance measures

Lecture 3 - Time and frequency domain performance measures

Lecture 4 - Design of controller

Lecture 5 - Design of controller for SISO system

Lecture 6 - Controller design for TITO processes

Lecture 7 - Limitations of PID controllers

Lecture 8 - PI-PD controller for SISO system

Lecture 9 - PID-P controller for Two Input Two Output system

Lecture 10 - Effects of measurement noise and load

Lecture 11 - Identification of dynamic models of plants

Lecture 12 - Relay control system for identification

Lecture 13 - Off-line identification of process dynamics

Lecture 14 - On-line identification of plant dynamics

Lecture 15 - State space based identification

Lecture 16 - State space analysis of systems

Lecture 17 - State space based identification of systems - 1

Lecture 18 - State space based identification of systems - 2

Lecture 19 - Identification of simple systems

Lecture 20 - Identification of FOPDT model

Lecture 21 - Identification of second order plus dead time model

Lecture 22 - Identification of SOPDT model

Lecture 23 - Steady state gain from asymmetrical relay test

Lecture 24 - Identification of SOPDT model with pole multiplicity

Lecture 25 - Existence of limit cycle for unstable system

Lecture 26 - Identification procedures

Lecture 27 - Identification of underdamped systems

Lecture 28 - Off-line identification of TITO systems

Lecture 29 - On-line identification of TITO systems

Lecture 30 - Review of time domain based identification

Lecture 31 - DF based analytical expressions for on-line identification

[Lecture 32 - Model parameter accuracy and sensitivity](#)

[Lecture 33 - Improved identification using Fourier series and wavelet transform](#)

[Lecture 34 - Reviews of DF based identification](#)

[Lecture 35 - Advanced Smith predictor controller](#)

[Lecture 36 - Design of controllers for the advanced Smith predictor](#)

[Lecture 37 - Model-free controller design](#)

[Lecture 38 - Model Based PID controller Design - I](#)

[Lecture 39 - Model Based PI-PD controller Design - II](#)

[Lecture 40 - Tuning of reconfigurable PID controllers](#)

- Lecture 1 - Introduction to Digital VLSI Design Flow
- Lecture 2 - High-level Synthesis (HLS) flow with an example
- Lecture 3 - Automation of High-level Synthesis Steps
- Lecture 4 - Impact of Coding Style on HLS Results
- Lecture 5 - Impact of Compiler Optimizations on HLS Results
- Lecture 6 - RTL Optimizations for Timing
- Lecture 7 - Retiming

Lecture 1 - Inductance, Self and Mutual

Lecture 2 - Relationship of Inductances in Transformer

Lecture 3 - Equivalent Circuit from Circuit KVL Equations

Lecture 4 - Co-efficient of Coupling , Energy Stored in Coupled Coils

Lecture 5 - A Single Conductor Generator and Motor

Lecture 6 - Analysis of Single Conductor Generator and Motor

Lecture 7 - Analysis of Single Conductor Generator and Motor (Continued...)

Lecture 8 - Flux Density Distribution in Space and Nature emf

Lecture 9 - Flux Density Distribution in Space and Nature emf (Continued...)

Lecture 10 - From Linear to Rotating Machine

Lecture 11 - From Linear to Rotating Machine (Continued...)

Lecture 12 - Basic Underlying Principle of Operation of Rotating Machine

Lecture 13 - Basic Underlying Principle of Operation of Rotating Machine (Continued...)

Lecture 14 - Flux Density Distribution along the Air Gap

Lecture 15 - Flux Density Distribution along the Air Gap (Continued...)

Lecture 16 - Induced Voltage in a Coil in a Rotating Machine

Lecture 17 - Induced Voltage in a Coil in a Rotating Machine (Continued...)

Lecture 18 - Induced Voltage in a Coil in a Rotating Machine (Continued...)

Lecture 19 - Induced Voltage due to Fundamental and Harmonic Components of Flux Density Distribution

Lecture 20 - Distributed Coils Connected in Series Resultant Voltage

Lecture 21 - Distribution Factor

Lecture 22 - Pitch Factor and Winding Factor

Lecture 23 - How to decide about Short Pitch Angle  $\hat{\mu}$

Lecture 24 - Double Layer 3-phase Winding - An Introduction

Lecture 25 - Winding Table for 3-phase Distributed Winding

Lecture 26 - Winding Table for 3-phase Distributed Winding with Examples

Lecture 27 - Winding Table for 3-phase Distributed Winding with Examples (Continued...)

Lecture 28 - 120 degree Phase Spread Winding with Examples

Lecture 29 - Winding Table of 120 degree Phase Spread Coils and Group Connection

Lecture 30 - Introduction to Rotating Magnetic Field

Lecture 31 - Rotating Magnetic Field (Continued...), Mechanical and Electrical Speed

- Lecture 32 - Speed and Direction of Rotating Field
- Lecture 33 - Synchronous Speed and How to Calculate Induced Voltage in a Coil
- Lecture 34 - Introduction to Induction Motor
- Lecture 35 - Introduction to Induction Motor (Continued...)
- Lecture 36 - General Expression of Torque in Terms of Stator and Rotor Fields
- Lecture 37 - Torque Angle and Torque Expression
- Lecture 38 - How to Fix Up Positions of Net Field, Rotor Field and Stator Field
- Lecture 39 - Slip: Its Importance and Range for Motor Operation
- Lecture 40 - Equivalent Circuit of 3-Phase Induction Motor
- Lecture 41 - Equivalent Circuit of 3-Phase Induction Motor (Continued...)
- Lecture 42 - Equivalent Circuit of 3-Phase Induction Motor (Continued...)
- Lecture 43 - Expression for Electromagnetic Torque in terms of Equivalent Circuit Parameters
- Lecture 44 - Maximum Electromagnetic Torque and Slip at Which it Occurs
- Lecture 45 - Typical Torque Slip Characteristic and Operating Point
- Lecture 46 - Change in Torque-slip Characteristic as Supply Voltage and Rotor Resistance are Varied
- Lecture 47 - Types of Induction Motor - Slip Ring Type
- Lecture 48 - Introduction to Cage Induction Motor
- Lecture 49 - Cage Motor Can Operate for Different Stator Poles
- Lecture 50 - Core Loss in Induction Motor and Simplified Equivalent Circuit
- Lecture 51 - Torque Expression from Simplified Equivalent Circuit and Introduction to Circle Diagram
- Lecture 52 - Circle Diagram (Continued...)
- Lecture 53 - Exact Power Flow Diagram and Circle Diagram
- Lecture 54 - Circle Diagram (Continued...)
- Lecture 55 - Circle Diagram: Slip Line
- Lecture 56 - Circle Diagram from Test Data
- Lecture 57 - Starting of 3 Phase Induction Motor - Introduction
- Lecture 58 - DOL and Reactor Starting
- Lecture 59 - DOL and Auto Transformer Starting
- Lecture 60 - Introduction to Speed Control
- Lecture 61 - Idea of VVVF Speed Control of Induction Motor
- Lecture 62 - Speed Control Using Two Motors
- Lecture 63 - Electrical Braking of 3 Phase Induction Motor
- Lecture 64 - Braking (Continued...)

- Lecture 65 - Introduction to Single Phase Induction Motor - Sequence Currents
- Lecture 66 - Development of Equivalent Circuit
- Lecture 67 - Development of Equivalent Circuit (Continued...)
- Lecture 68 - Torque-slip Ch. of 1 ph. I-M Running on Single Winding
- Lecture 69 - Introduction to Starting of 1ph. Induction Motor
- Lecture 70 - Expression for Starting Torque and Need for Phase Splitting
- Lecture 71 - Resistor Split 1 ph. Induction Motor
- Lecture 72 - Capacitor Split 1 ph Induction Motor
- Lecture 73 - Starting of 1 ph. Induction Motor (Continued...)
- Lecture 74 - Synchronous Machine Construction
- Lecture 75 - Synchronous Generator - Introduction
- Lecture 76 - Synchronisation
- Lecture 77 - Expression for Induced Voltage and O.C. Phasor Diagram
- Lecture 78 - Loaded Synchronous Generator - Resultant Field
- Lecture 79 - Armature Reaction and Synchronous Reactance. Basic Phasor Diagram
- Lecture 80 - General Mode of Operation - Retro Field, Stator Field and Resultant Field
- Lecture 81 - Complete Phasor Diagram and Expression for Complex Power
- Lecture 82 - Synchronous Motor Operation, Phasor Diagram and Power Expression
- Lecture 83 - Effect of Variation of Field Current in Generator
- Lecture 84 - Effect of Variation Field Current in Synchronous Motor, Introduction to Salient Pole Machine
- Lecture 85 - Analysis of Salient Pole Synchronous Machine
- Lecture 86 - Phasor Diagram of Salient Pole Synchronous Machine for Generator and Motor Mode
- Lecture 87 - Expression for Load Angle and Expression for Power
- Lecture 88 - Phasor Diagrams of Salient Pole Synchronous Generator under Various Conditions
- Lecture 89 - Phasor Diagrams of Salient Pole Synchronous Motor under Various Conditions
- Lecture 90 - O.C and S.C Test on Synchronous Generator

Lecture 1 - Introduction

Lecture 2 - Transistor as a switch

Lecture 3 - Performance Issues and Introduction to TTL

Lecture 4 - Transistor Transistor Logic (TTL)

Lecture 5 - CMOS Logic

Lecture 6 - Basic Gates and their representations

Lecture 7 - Fundamentals of Boolean Algebra

Lecture 8 - Boolean Function to Truth Table and Implementaion Issues

Lecture 9 - Truth Table to Boolean Function and Implementaion Issues

Lecture 10 - Karnugh Map and Digital Circuit Realization

Lecture 11 - Karnaugh Map to Entered Variable Map

Lecture 12 - Quine - McClusky (QM) Algorithm

Lecture 13 - Cost Criteria and Minimization of Multiple Output Functions

Lecture 14 - Static 1 Hazard

Lecture 15 - Static 0 Hazard and Dynamic Hazard

Lecture 16 - Multiplexer: Part I

Lecture 17 - Multiplexer: Part II

Lecture 18 - Demultiplexer / Decoder

Lecture 19 - Decoder with BCD Input and Encoder

Lecture 20 - Parity Generator and Checker

Lecture 21 - Number System

Lecture 22 - Negative Number and 2s Complement Arithmetic

Lecture 23 - Arithmetic Building Blocks - I

Lecture 24 - Arithmetic Building Blocks - II

Lecture 25 - Overflow Detection and BCD Arithmetic

Lecture 26 - Magnitude Comparator

Lecture 27 - Arithmetic Logic Unit (ALU)

Lecture 28 - Unweighted Code

Lecture 29 - Error Detection and Correction Code

Lecture 30 - Multiplication and Division

Lecture 31 - SR Latch and Introduction to Clocked Flip-Flop

Lecture 32 - Edge-Triggered Flip-Flop

Lecture 33 - Representations of Flip-Flops

Lecture 34 - Analysis of Sequential Logic Circuit

Lecture 35 - Conversion of Flip-Flops and Flip-Flop Timing Parameters

Lecture 36 - Register and Shift Register: PIPO and SISO

Lecture 37 - Shift Register: SIPO, PISO and Universal Shift Register

Lecture 38 - Application of Shift Register

Lecture 39 - Linear Feedback Shift Register

Lecture 40 - Serial Addition, Multiplication and Division

Lecture 41 - Asynchronous Counter

Lecture 42 - Decoding Logic and Synchronous Counter

Lecture 43 - Cascading: Mod 2, 3, 5 to Mod 6, 10, 1000 Counter

Lecture 44 - Counter Design with Asynchronous Reset and Preset

Lecture 45 - Counter Design as Synthesis Problem and Few Other Uses of Counter

Lecture 46 - Synthesis of Sequential Logic Circuit: Moore Model and Mealy Model

Lecture 47 - Moore Model and Mealy Model: Realization of Digital Logic Circuit

Lecture 48 - Algorithmic State Machine (ASM) Chart and Synthesis of Sequential Logic Circuit

Lecture 49 - Circuit Realization from ASM Chart and State Minimization

Lecture 50 - State Minimization by Implication Table and Partitioning Method

Lecture 51 - Digital to Analog Conversion - I

Lecture 52 - Digital to Analog Conversion - II

Lecture 53 - Analog to Digital Conversion - I

Lecture 54 - Analog to Digital Conversion - II

Lecture 55 - Certain Performance Issue of ADC and DAC

Lecture 56 - Introduction to Memory

Lecture 57 - Static Random Access Memory (SRAM)

Lecture 58 - Dynamic RAM (DRAM) and Memory Expansion

Lecture 59 - Read Only Memory (ROM)

Lecture 60 - PAL, PLA, CPLD, FPGA

Lecture 1 - Power System stability

Lecture 2 - Power System stability (Continued...)

Lecture 3 - Power System stability (Continued...)

Lecture 4 - Power System stability (Continued...)

Lecture 5 - Power System stability (Continued...)

Lecture 6 - Power System Stability (Continued...)

Lecture 7 - Power System Stability (Continued...)

Lecture 8 - Power System Stability (Continued...)

Lecture 9 - Power System Stability (Continued...)

Lecture 10 - Power System Stability (Continued...)

Lecture 11 - Power System Stability (Continued...)

Lecture 12 - Power System Stability (Continued...)

Lecture 13 - Power System Stability (Continued...)

Lecture 14 - Power System Stability (Continued...)

Lecture 15 - Power System Stability (Continued...)

Lecture 16 - Power System Stability (Continued...)

Lecture 17 - Power System Stability (Continued...)

Lecture 18 - Power System Stability (Continued...)

Lecture 19 - Power System Stability (Continued...)

Lecture 20 - Power System Stability (Continued...)

Lecture 21 - Power System stability (Continued...)

Lecture 22 - Power System stability, Eigen properties of the state matrix

Lecture 23 - Power System stability, Eigen properties of the state matrix (Continued...)

Lecture 24 - Power System stability, Eigen properties of the state matrix (Continued...)

Lecture 25 - Power System stability, Eigen properties of the state matrix (Continued...)

Lecture 26 - Power System stability, Eigen properties of the state matrix (Continued...)

Lecture 27 - Power System stability, Eigen properties of the state matrix, Transient stability

Lecture 28 - Transient stability

Lecture 29 - Transient stability (Continued...)

Lecture 30 - Transient stability (Continued...)

Lecture 53 - Problem Solving

Lecture 54 - Decision Making

Lecture 55 - Frontal cortex in decision making

Lecture 56 - Topics in current research - I

Lecture 57 - Topics in current research - II

Lecture 58 - Topics in current research - III

Lecture 59 - Topics in current research - IV

Lecture 60 - Topics in current research - V

Lecture 1 - Digital Control in Switched Mode Power Converters - Course Introduction

Lecture 2 - Digital Control of SMPCs - Course Instructions, Guidelines and Resources

Lecture 3 - Examples of Some Commercial Digital Control Solutions

Lecture 4 - Overview of Digital Control Implementation Platforms

Lecture 5 - Introducing Basic Digitization in Power Electronic Converters

Lecture 6 - Recap of Feedback and Feedforward Control Methods in SMPCs

Lecture 7 - Recap of Fixed and Variable Frequency Modulation Techniques

Lecture 8 - Levels of Digitization in Single-loop Feedback Control in SMPCs

Lecture 9 - Levels of Digitization in Multi-loop Feedback Control in SMPCs

Lecture 10 - SMPC Topologies and Power Stage Design for Hardware Demonstrations

Lecture 11 - Basics of Sampling under Fixed and Variable Frequency Modulation

Lecture 12 - Voltage Mode Digital Pulse Width Modulators and Sampling Methods

Lecture 13 - Overview of Digital Pulse Width Modulator Architectures

Lecture 14 - Sampling Methods under Fixed Frequency Current Mode Control

Lecture 15 - Overview of Fixed Frequency Current Mode Control Architectures

Lecture 16 - Sampling Methods under Constant On/Off - Time Digital Modulation

Lecture 17 - Constant On/Off- Time Mixed-Signal Current Mode Control Architectures

Lecture 18 - Sampling Methods under Digital Hysteresis Control Methods

Lecture 19 - Overview of Digital Hysteresis Control Architectures

Lecture 20 - Summary of Digital Current Mode Control Architectures

Lecture 21 - Recap of Voltage and Current Mode Control Implementation using MATLAB

Lecture 22 - MATLAB Model Development for Basic Digital Control Blocks

Lecture 23 - MATLAB Model Development for Fixed Frequency Digital Control

Lecture 24 - MATLAB Models for Digital Controllers using Difference Equations

Lecture 25 - MATLAB Model Development for Digital Voltage Mode Control

Lecture 26 - MATLAB Model Development for Mixed-Signal Current Mode Control

Lecture 27 - MATLAB Model Development for Fully Digital Current Mode Control

Lecture 28 - MATLAB Model Development for Constant-On Time Control

Lecture 29 - MATLAB Model Development for Constant-Off Time Control

Lecture 30 - MATLAB Model Development for Digital Current Hysteresis Control

Lecture 31 - Continuous-Time Small-Signal Modeling under Digital Control

- Lecture 32 - Discrete Time Modeling with Closed Current Loop
- Lecture 33 - State-Space Modeling and Steps For Deriving Discrete-Time Models
- Lecture 34 - Derivation of Discrete-Time Large-Signal Models
- Lecture 35 - Validation of Discrete-Time Large-Signal Models using MATLAB - Part I
- Lecture 36 - Validation of Discrete-Time Large-Signal Models using MATLAB - Part II
- Lecture 37 - Derivation of Discrete-Time Small-Signal Models - I
- Lecture 38 - Derivation of Discrete-Time Small-Signal Models - II
- Lecture 39 - Discrete-Time Transfer Functions and Closed Loop Block Diagrams
- Lecture 40 - Model Accuracy with MATLAB Case Studies - Comparative Study
- Lecture 41 - Continuous-Time to Discrete-Time Conversion Methods - A Summary
- Lecture 42 - Recap of Frequency Domain Design of Analog VMC and CMC
- Lecture 43 - Design under Digital Voltage Mode Control - Frequency Domain Approaches
- Lecture 44 - Design under Digital Current Mode Control - Frequency Domain Approaches
- Lecture 45 - Design Case Study and MATLAB Simulation of Digital Voltage Mode Control
- Lecture 46 - Design Case Study and MATLAB Simulation of Digital Current Mode Control
- Lecture 47 - Time Optimal Control of a Buck Converter and Identifying Performance Limits
- Lecture 48 - Trajectory based CMC Design for Proximate Time Optimal Recovery
- Lecture 49 - Trajectory based Digital CMC Tuning and MATLAB Case Studies
- Lecture 50 - Digital Pulse Skipping Control and MATLAB Simulation Case Studies
- Lecture 51 - Selection of ADC and DAC in Digitally Controlled SMPCs
- Lecture 52 - High Frequency Current Sensing Techniques in Digitally Controlled SMPCs
- Lecture 53 - Current Sensing Techniques in Digitally Controlled High Power Converters
- Lecture 54 - Signal Conditioning Circuits and PCB Design for Mixed-Signal Implementation
- Lecture 55 - Reference Power Stage Design and Schematic for Buck and Boost Converters - I
- Lecture 56 - Reference Power Stage Design and Schematic for Buck and Boost Converters - II
- Lecture 57 - Step-by-Step Guidelines for Digital Control Implementation using FPGA
- Lecture 58 - Test and Measurement of a Buck Converter using Digital Storage Oscilloscope
- Lecture 59 - Functionalities in Mixed Signal Oscilloscope for Validating Digital Control
- Lecture 60 - Power Spectrum Analysis of SMPCs using Mixed-Signal Oscilloscope
- Lecture 61 - Introduction to Verilog Hardware Description Language (HDL)
- Lecture 62 - Guidelines for Verilog HDL Programming - Some Key Rules
- Lecture 63 - Structural and Dataflow Modeling in Verilog HDL for Combinational Logics
- Lecture 64 - Behavioral Modeling in Verilog HDL for Sequential Digital Circuits

- Lecture 65 - Simulation of Verilog-HDL based Design using Xilinx Webpack - I
- Lecture 66 - Simulation of Verilog-HDL based Design using Xilinx Webpack - II
- Lecture 67 - Fixed Point Implementation in Embedded Control System
- Lecture 68 - Fixed Point Arithmetic and Concept of Q Format
- Lecture 69 - Counter-based DPWM with Deadtime and Verilog HDL Programming
- Lecture 70 - Simulating Counter-based DPWM with Deadtime using Xilinx ISE Simulator
- Lecture 71 - Top Down Design Methodology in Digital Voltage Mode Control - I
- Lecture 72 - Top Down Design Methodology in Digital Voltage Mode Control - II
- Lecture 73 - Digital PID Control Implementation using Verilog HDL Programming
- Lecture 74 - Digital PID Controller - Hardware Implementation and Experimental Results
- Lecture 75 - Top Down Design Methodology in Mixed-Signal Current Mode Control
- Lecture 76 - Top Down Design Method and Verilog HDL Programming of Mixed-Signal CMC
- Lecture 77 - Verilog HDL based Digital PI Control Implementation of Mixed-Signal CMC
- Lecture 78 - Hardware Implementation of Mixed-Signal CMC and Experimental Results
- Lecture 79 - Voltage based Digital Pulse Skip Modulation and Top Down Design Method
- Lecture 80 - Implementing Digital Pulse Skip Modulation and Experimental Results
- Lecture 81 - STM32 Overview and STM32G4x ecosystem
- Lecture 82 - Getting started with STM32CubeMX - Part I

Lecture 6 - Discrete Sample Spaces

Lecture 7 - Union and Partition

Lecture 8 - Examples: Probability Calculation for Equally likely Outcomes

Lecture 9 - Definition and Basic Properties

Lecture 10 - Bayes' Rule for Partitions

Lecture 11 - Examples: Conditional probability

Lecture 12 - Example of Detection

Lecture 13 - Example: Coloured Cards from a Box

Lecture 14 - Independence of Events

Lecture 15 - Examples: Independence

Lecture 16 - Combining Independent Experiments

Lecture 17 - Conditional Independence

Lecture 18 - Examples and Computations with Conditional Independence

Lecture 19 - Binomial and Geometric Models

Lecture 20 - Examples: Binomial and Geometric Model

Lecture 21 - Definition and Discrete Setting

Lecture 22 - Random Variables and Events

Lecture 23 - Examples: Discrete random variables

Lecture 24 - Important distributions

Lecture 25 - Examples: Discrete PMFs

Lecture 26 - Real-life modeling example

Lecture 27 - More Distributions

Lecture 28 - Conditional PMFs, Conditioning on an event, Indicator random variables

Lecture 29 - Example: Conditioning on an event, Indicator random variables

Lecture 30 - Multiple random variables and joint distribution

Lecture 31 - Example: Two random variables

Lecture 32 - Marginal PMF

Lecture 33 - Trinomial joint PMF

Lecture 34 - Events and Conditioning with Two Random Variables

Lecture 35 - Example: compute marginal and conditional PMFs, probability of events

Lecture 36 - Independent random variables

Lecture 37 - More on independence

Lecture 38 - Example: IID Repetitions

Lecture 39 - Addition of Random Variables

Lecture 40 - Sum, Difference and Max of Two Random Variables

Lecture 41 - More Computations: Min of Two Random Variables

Lecture 42 - Example:  $X+Y$ ,  $X-Y$ ,  $\min(X,Y)$ ,  $\max(X,Y)$

Lecture 43 - Real line as sample space

Lecture 44 - Probability density function (pdf)

Lecture 45 - Cumulative distribution function (CDF)

Lecture 46 - Continuous random variables

Lecture 47 - pdf and CDF of continuous random variables

Lecture 48 - Spinning pointer example

Lecture 49 - Important continuous distributions

Lecture 50 - More continuous distributions

Lecture 51 - Two-dimensional real sample space

Lecture 52 - Joint pdf and joint CDF

Lecture 53 - More on assigning probability to regions of x-y plain

Lecture 54 - Darts example and marginal pdfs

Lecture 55 - Independence to two continuous random variables

Lecture 56 - Examples: two independent continuous random variables

Lecture 57 - Prob[  $X > Y$  ]: computation of probability of a non-rectangular region

Lecture 58 - Transformations of random variables

Lecture 59 - CDF method

Lecture 60 - pdf method

Lecture 61 - Examples

Lecture 62 - One-to-one transformations

Lecture 63 - Expected Value or Mean of a Random Variable

Lecture 64 - Properties of Expectation

[Lecture 65 - Expectation Computations for Important Distributions](#)

[Lecture 66 - Variance](#)

[Lecture 67 - Examples of Variance](#)

[Lecture 68 - Expectations with Two Random Variables](#)

[Lecture 69 - Correlation and Covariance](#)

[Lecture 70 - Examples: Continuous Distributions](#)

[Lecture 71 - Examples: Symmetry](#)

[Lecture 72 - Examples: Discrete Distributions](#)

Lecture 1 - Introduction to PMIC - Part 1

Lecture 2 - Introduction to PMIC - Part 2

Lecture 3 - Linear versus Switching Regulators

Lecture 4 - Performance Parameters of Regulators

Lecture 5 - Local vs Remote Feedback, Point of Load Regulators

Lecture 6 - Kelvin Sensing, Droop Compensation

Lecture 7 - Current Regulator Applications, Introduction to Bandgap Voltage References, PTAT and CTAT voltage

Lecture 8 - Adding PTAT and CTAT Voltages

Lecture 9 - Bandgap Voltage Reference Circuit, Brokaw Bandgap Circuit

Lecture 10 - Sub-1-volt Bandgap Circuit

Lecture 11 - Generating Multiple Reference Voltages; Applications of Linear Regulators

Lecture 12 - Designing a Linear Regulator, Negative and Positive Feedback

Lecture 13 - First-Order Systems, Phase Margin

Lecture 14 - Closed-Loop Response of Second-Order Systems

Lecture 15 - Relationship between Damping Factor and Phase Margin, Frequency Compensation, MOS Parasitic Capacitances

Lecture 16 - Finding the Poles of the Error Amplifier - Part 1

Lecture 17 - Finding the Poles of the Error Amplifier - Part 2

Lecture 18 - Dominant Pole Frequency Compensation

Lecture 19 - Dominant Pole Compensation at No-Load

Lecture 20 - Dominant Pole Compensation using Miller Effect, RHP zero due to Miller Capacitor

Lecture 21 - Intuitive Method of Finding the Poles, Pole Splitting after Miller Compensation

Lecture 22 - Effect of RHP zero on Stability, Mitigating the Effect of RHP zero, LDO with NMOS Pass Element

Lecture 23 - Output Impedance of PMOS LDO

Lecture 24 - Line Regulation and PSRR of PMOS LDO

Lecture 25 - PSRR of PMOS versus PSRR of NMOS LDO

Lecture 26 - Sources of Error in Linear and Switching Regulators

Lecture 27 - Offset in Amplifiers; Real Life Analogy; Static Offset Cancellation

Lecture 28 - Dynamic Offset Cancellation Techniques (Chopping, Auto-zeroing)

Lecture 29 - Digital LDO, Technique to Avoid Limit Cycle Oscillations in Digital LDO

Lecture 30 - Hybrid LDO, Short-Circuit Protection

Lecture 31 - Hiccup Mode and Foldback Current Limit

Lecture 32 - Introduction to Switching Regulators

Lecture 33 - volt-second Balance, Non-Idealities in the Power Stage of a Buck Converter

Lecture 34 - Transformer Model of a Buck Converter, Conduction Efficiency, Efficiency of an LDO versus Efficiency of a Switching Regulator

Lecture 35 - Synchronous versus Non-Synchronous Switching Regulators, PWM Control Techniques

Lecture 36 - Losses in Switching Regulators (Conduction Loss, Gate-Driver Switching Loss)

Lecture 37 - Dead-Time Switching Loss in DC-DC Converters

Lecture 38 - Hard Switching Loss in DC DC Converters

Lecture 39 - Magnetic Loss in DC-DC Converters, Relative Significance of Losses as a Function of the Load Current

Lecture 40 - Output Voltage Ripple of a Buck Converter

Lecture 41 - Choosing the Inductor and Capacitor for a Buck Converter

Lecture 42 - CCM Vs DCM Operation in DC DC Converters

Lecture 43 - CCM DCM Boundary Condition, Voltage Conversion Ratio in DCM

Lecture 44 - Concept of Pulse Frequency Modulation PFM

Lecture 45 - Classification of Pulse Width Modulators

Lecture 46 - DC - DC Converter Control Techniques, Stability Analysis of Voltage Mode Buck Converter - Part 1

Lecture 47 - Stability Analysis of Voltage Mode Buck Converter - Part 2

Lecture 48 - Stability Analysis of Voltage Mode Buck Converter - Part 3

Lecture 49 - Dominant Pole Compensation (Type-I with Gm-C Architecture)

Lecture 50 - Dominant Pole Compensation (Type-I with Op Amp-RC Architecture)

Lecture 51 - Introduction to Type-II Compensation

Lecture 52 - Type-II Compensator using Gm-C Architecture - Part 1

Lecture 53 - Type-II Compensator using Gm-C Architecture - Part 2

Lecture 54 - Type-II Compensator using Gm-C Architecture - Part 3

Lecture 55 - Type-II Compensator using Op Amp-RC Architecture

Lecture 56 - Introduction to Type-III Compensator

Lecture 57 - Type-III Compensator using Op Amp-RC Architecture

Lecture 58 - Simulation of DC-DC Converter with Type-III Compensator

Lecture 59 - Type-III Compensator using Gm-C Architecture

Lecture 60 - Feed-Forward Line Compensation, Loop Gain Compensation by Modulating Gm

Lecture 61 - Designing a Buck Converter, Power Loss Budgeting

Lecture 62 - Sizing Power MOSFETs

Lecture 63 - Estimating Switching Losses and Choosing the Switching Frequency

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 64 - Choosing Inductance and Capacitance Values

Lecture 65 - Choosing 'C' Depending on Factors that Limit the Load Transient Response

Lecture 66 - Inductor and Capacitor Characteristics, Reducing the Effect of Capacitor ESL

Lecture 67 - Gate Buffer and Non-Overlap Clock Generator in Gate-Driver Circuit

Lecture 68 - Pulse-Width Modulator- Trailing Edge, Leading Edge and Dual Edge; Triangle Wave Generator

Lecture 69 - Average Ramp Voltage of Single-Edge PW Modulator, Design Considerations of EA

Lecture 70 - Delays Associated with PW Modulator, PFM and PSM Operation, DCM Operation using NMOS

Lecture 71 - Designing a Zero-Cross Comparator, Inverter-Based Auto-Zeroed Comparator, Simulation Demo

Lecture 72 - Current Mode Control- Peak, Valley, Emulated; VMC versus CMC; Sub-Harmonic Oscillation

Lecture 73 - Ramp-Adaptive Slope Compensation to Avoid Current Loop Instability

Lecture 74 - Non-Linear Control of DC-DC Converters, Phase-Shift between  $i_L$  and  $v_C$

Lecture 75 - Stabilising a Voltage-Mode Hysteretic Converter using  $R_{esr}$ , Relation between  $F_{sw}$  and the Hysteresis Window

Lecture 76 - Hysteretic Converter - Simulation Demo

Lecture 77 - Current-Mode Hysteretic Converter, Using R-C as Ripple Generator

Lecture 78 - Controlling the Switching Frequency of a Hysteretic Converter, Delay in the Hysteretic Comparator

Lecture 79 - Frequency and Voltage Regulation Loops in a Fixed-Frequency Hysteretic Converter

Lecture 80 - Resetting the Capacitor Voltage in a Hysteretic Converter, Constant ON-Time Control

Lecture 81 - Introduction to Boost Converter, RHP Zero in a Boost Converter

Lecture 82 - Introduction to Buck-Boost Converter

Lecture 83 - Tri-Mode Buck-Boost Converter (Buck, Buck-Boost and Boost)

Lecture 84 - Boundary Conditions for Mode Transition in a Tri-Mode Buck-Boost Converter

Lecture 85 - Generating Buck and Boost Duty Cycles in a Tri-Mode Buck-Boost Converter

Lecture 86 - Introduction to Switched-Capacitor DC-DC Converters, Switched-Capacitor DC-DC Converter with  $V_o = 2*V_{DD}$

Lecture 87 - Applications of Switched-Capacitor DC-DC Converters in Open-Loop, Regulating the Output using Feedback Control

Lecture 88 - H-Bridge Switched-Capacitor DC-DC Converter, SC DC-DC converter with Multiple Gain Settings

Lecture 89 - Current Sensing Techniques in DC-DC Converters

Lecture 90 - Analog Layout Techniques - Part 1

Lecture 91 - Analog Layout Techniques - Part 2

Lecture 92 - Digital Control of DC-DC Converters, ADC Architectures

Lecture 93 - Digital Pulse-Width Modulator Architectures, Adaptive Compensation

Lecture 94 - Limitations of Analog and Digital Controllers, Time-Based Controller for Buck Converter

Lecture 95 - Time-Based Controller for Buck Converter and for LDO, Issues with Time-Based Control

Lecture 96 - Multi-Phase DC-DC Converters

Lecture 1 - Introduction to the Course

Lecture 2 - Vector Spaces: Introduction

Lecture 3 - Linear Combinations and Span

Lecture 4 - Subspaces, Linear Dependence and Independence

Lecture 5 - Basis and Dimension

Lecture 6 - Sums, Direct Sums and Gaussian Elimination

Lecture 7 - Linear Maps and Matrices

Lecture 8 - Null space, Range, Fundamental theorem of linear maps

Lecture 9 - Column space, null space and rank of a matrix

Lecture 10 - Algebraic operations on linear maps

Lecture 11 - Invertible maps, Isomorphism, Operators

Lecture 12 - Solving Linear Equations

Lecture 13 - Elementary Row Operations

Lecture 14 - Translates of a subspace, Quotient Spaces

Lecture 15 - Row space and rank of a matrix

Lecture 16 - Determinants

Lecture 17 - Coordinates and linear maps under a change of basis

Lecture 18 - Simplifying matrices of linear maps by choice of basis

Lecture 19 - Polynomials and Roots

Lecture 20 - Invariant subspaces, Eigenvalues, Eigenvectors

Lecture 21 - More on Eigenvalues, Eigenvectors, Diagonalization

Lecture 22 - Eigenvalues, Eigenvectors and Upper Triangularization

Lecture 23 - Properties of Eigenvalues

Lecture 24 - Linear state space equations and system stability

Lecture 25 - Discrete-time Linear Systems and Discrete Fourier Transforms

Lecture 26 - Sequences and counting paths in graphs

Lecture 27 - PageRank Algorithm

Lecture 28 - Dot product and length in  $C^n$ , Inner product and norm in  $V$  over  $F$

Lecture 29 - Orthonormal basis and Gram-Schmidt orthogonalisation

Lecture 30 - Linear Functionals, Orthogonal Complements

Lecture 31 - Orthogonal Projection

Lecture 32 - Projection and distance from a subspace

Lecture 33 - Linear equations, Least squares solutions and Linear regression

Lecture 34 - Minimum Mean Squared Error Estimation

Lecture 35 - Adjoint of a linear map

Lecture 36 - Properties of Adjoint of a Linear Map

Lecture 37 - Adjoint of an Operator and Operator-Adjoint Product

Lecture 38 - Self-adjoint Operator

Lecture 39 - Normal Operators

Lecture 40 - Complex Spectral Theorem

Lecture 41 - Real Spectral Theorem

Lecture 42 - Positive Operators

Lecture 43 - Quadratic Forms, Matrix Norms and Optimization

Lecture 44 - Isometries

Lecture 45 - Classification of Operators

Lecture 46 - Singular Values and Vectors of a Linear Map

Lecture 47 - Singular Value Decomposition

Lecture 48 - Polar decomposition and some applications of SVD

Lecture 1 - Preliminaries

Lecture 2 - Current

Lecture 3 - Voltage

Lecture 4 - Electrical elements and circuits

Lecture 5 - Kirchoff's current law (KCL)

Lecture 6 - Kirchoff's voltage law (KVL)

Lecture 7 - Voltage source

Lecture 8 - Current source

Lecture 9 - Resistor

Lecture 10 - Capacitor

Lecture 11 - Inductor

Lecture 12 - Mutual inductor

Lecture 13 - Linearity of elements

Lecture 14 - Series connection-Voltage sources in series

Lecture 15 - Series connection of R, L, C, current source

Lecture 16 - Elements in parallel

Lecture 17 - Current source in series with an element; Voltage source in parallel with an element

Lecture 18 - Extreme cases: Open and short circuits

Lecture 19 - Summary

Lecture 20 - Voltage controlled voltage source (VCVS)

Lecture 21 - Voltage controlled current source (VCCS)

Lecture 22 - Current controlled voltage source (CCVS)

Lecture 23 - Current controlled current source (CCCS)

Lecture 24 - Realizing a resistance using a VCCS or CCCS

Lecture 25 - Scaling an element's value using controlled sources

Lecture 26 - Example calculation

Lecture 27 - Power and energy absorbed by electrical elements

Lecture 28 - Power and energy in a resistor

Lecture 29 - Power and energy in a capacitor

Lecture 30 - Power and energy in an inductor

Lecture 31 - Power and energy in a voltage source

Lecture 32 - Power and energy in a current source

Lecture 33 - Goals of circuit analysis

Lecture 34 - Number of independent KCL equations

Lecture 35 - Number of independent KVL equations and branch relationships

Lecture 36 - Analysis of circuits with a single independent source

Lecture 37 - Analysis of circuits with multiple independent sources using superposition

Lecture 38 - Superposition: Example

Lecture 39 - What is nodal analysis

Lecture 40 - Setting up nodal analysis equations

Lecture 41 - Structure of the conductance matrix

Lecture 42 - How do elements circuit appear in the nodal analysis formulation

Lecture 23 - Understanding SPP Dispersion Diagram

Lecture 24 - Exciting Surface Plasmon Polaritons

Lecture 25 - Analytical Calculation of Scattering Coefficients - IPython code overview

Lecture 26 - EM Waves in Multilayer Stack - T Matrix formulation

Lecture 27 - Photonic Bandgap in 1D

Lecture 28 - EM Waves in 1D Photonic Crystal

Lecture 29 - Diffracton Grating

Lecture 30 - Applications of Photonic Crystals

Lecture 31 - PhC in 1D - T-matrix examples

- Lecture 32 - Introduction to Metamaterials
- Lecture 33 - Metamaterials at GHz and THz frequencies
- Lecture 34 - Negative index materials at optical frequencies
- Lecture 35 - Plasmonic Metasurfaces
- Lecture 36 - Dielectric Metasurfaces
- Lecture 37 - Tunable and Active Metamaterials
- Lecture 38 - Radiative Absorption and Emission
- Lecture 39 - Miniaturization of Integrated Photonic Devices
- Lecture 40 - Recent trends in nanoscale lasers
- Lecture 41 - Non-Hermitian Systems
- Lecture 42 - Resonant light-atom interactions
- Lecture 43 - Experimental observation of Rabi oscillations
- Lecture 44 - Atom-Cavity Interaction - Weak and strong coupling regimes
- Lecture 45 - Experimental observation of weak and strong coupling
- Lecture 46 - Fabrication of nanophotonic structures - 1
- Lecture 47 - Fabrication of nanophotonic structures - 2
- Lecture 48 - Measuring light quanta
- Lecture 49 - Photon Statistics
- Lecture 50 - Photodetection and shot noise limit
- Lecture 51 - Second order correlation function
- Lecture 52 - Hanbury Brown-Twiss Experiment with Photons
- Lecture 53 - EM Waves as harmonic oscillator
- Lecture 54 - Vacuum fluctuations
- Lecture 55 - Coherent and squeezed states
- Lecture 56 - Squeezed and photon number states
- Lecture 57 - Application of squeezed states
- Lecture 58 - Preliminaries for quantum theory of light
- Lecture 59 - Quantum theory of light
- Lecture 60 - Operator solution of quantum harmonic oscillator
- Lecture 61 - Photon number states
- Lecture 62 - Field quadratures and operators
- Lecture 63 - Uncertainty relations for quantum light
- Lecture 64 - Applications of quantum light - Quantum Key Distribution

- Lecture 1 - Introduction Linear and Nonlinear Network
- Lecture 2 - Small Signal Analysis of Nonlinear Networks
- Lecture 3 - Small Signal Analysis
- Lecture 4 - Incremental Model for Common Two Terminal Element Passive Two Terminal Elements
- Lecture 5 - Linear and Nonlinear Two Ports and the Incremental Y Matrix
- Lecture 6 - Graphical Representation of the Y Matrix
- Lecture 7 - Nonlinear Two Ports With Incremental Gain
- Lecture 8 - IV Characteristic of a Nonlinear 2 port with Incremental Gain
- Lecture 9 - The MOSFET and its Characteristics
- Lecture 10 - Deriving the Common V Source Amplifier - Part 1
- Lecture 11 - The Common Source Amplifier
- Lecture 12 - Large Signal Behaviour of the Common Source Amplifier
- Lecture 13 - The Common Source Amplifier Swing Limits
- Lecture 14 - Introduction to Robust Biasing
- Lecture 15 - Robust Biasing Part 1 Common Source Amplifier with DC Drain Feedback
- Lecture 16 - Robust Biasing with the Current Mirror and Drain Gate Resistor
- Lecture 17 - Robust Biasing With Source Feedback - Part 1
- Lecture 18 - Robust Biasing with Source Feedback - Part 2
- Lecture 19 - Robust Biasing with Source Degeneration
- Lecture 20 - Introduction to Negative Feedback
- Lecture 21 - The Ideal Operational Amplifier
- Lecture 22 - Negative Feedback (Continued...)
- Lecture 23 - Robust Biasing with Drain Measurement and Source Feedback
- Lecture 24 - Robust biasing with source measurement and gate feedback
- Lecture 25 - The Incremental Voltage Controlled Voltage Source The Common drain Amplifier Incremental Picture
- Lecture 26 - Biasing of the Common Drain Amplifier and Signal Swings
- Lecture 27 - The VCVS Continued, the Incremental
- Lecture 28 - Introducing the Current Controlled Voltage Source
- Lecture 29 - The Incremental Current Controlled Voltage Source Transimpedance Amplifier
- Lecture 30 - The Transimpedance amplifier (Continued...)
- Lecture 31 - The Incremental current controlled current source, the common gate amplifier

Lecture 32 - Summary of controlled Sources and finite output Impedance of the Transistor

Lecture 33 - Effect of Finite Output Resistance on the Basic Building Blocks - Part 1

Lecture 34 - Effect of Finite Output Resistance on the Basic Building Blocks - Part 2

Lecture 35 - Effect of Finite Output Resistance on the Basic Building Blocks - Part 3

Lecture 36 - Finite output Effect in current Mirrors the Cascode Current Mirror

Lecture 37 - Comparison of Current Mirrors The High Swing Cascode

Lecture 38 - Precision High Swing Cascode

Lecture 39 - The PMOS transistor

Lecture 40 - Small Signal Model and Bias Stabilization

Lecture 41 - Basic Building Blocks with PMOS Devices

Lecture 42 - Fixed Transconductance Bias Circuits from First Principles

Lecture 43 - Limitation of a Resistive Load

Lecture 44 - The Active Load

Lecture 45 - The Active Load (Continued...)

Lecture 46 - The CMOS Inverter

Lecture 47 - The CMOS Inverter (Continued...)

Lecture 48 - The Differential Amplifier

Lecture 49 - Half - Circuit Analysis

Lecture 50 - The Different Amplifier with Active Load - Part 1

Lecture 51 - The Different Amplifier with Active Load - Part 2

Lecture 52 - Large Signal Behaviour of the Different Pair

Lecture 53 - The two Stage Opamp and Single Supply Operation

Lecture 54 - The two Stage Opamp (Continued...)

Lecture 55 - The Two Stage Opamp (Continued...)

Lecture 56 - Swing Limits of the Two Stage OTA

Lecture 57 - The Two-Stage Opamp

Lecture 58 - The Bandgap Reference Principle

Lecture 59 - The Bandgap Reference - Part 1

Lecture 60 - The Bandgap Reference - Part 2

Lecture 61 - Memory Effects in MOS Transistors

Lecture 62 - The Common Source Amplifier with Parasitic Capacitances

Lecture 63 - The Common Source Amplifier with Parasitic Capacitances

Lecture 64 - Frequency Response of the Common Drain Amplifier

- Lecture 65 - Frequency Response of the Common Gate Amplifier
- Lecture 66 - Stability of Negative Feedback System The First Order Forward Amplifier
- Lecture 67 - Stability of Second Order Feedback System
- Lecture 68 - Stability of Third Order Negative Feedback System
- Lecture 69 - Dominant Pole Compensation - Part 1
- Lecture 70 - Dominant Pole Compensation - Part 2
- Lecture 71 - Phase Margin
- Lecture 72 - Example Phase Margin Calculations
- Lecture 73 - Dominant Pole Compensation Summary
- Lecture 74 - Phase Margin Example
- Lecture 75 - The 2 Stage Miller Compensated Amplifier
- Lecture 76 - 2 Stage Operational Amplifier and Miller Compensation (Continued...)
- Lecture 77 - Intuition Behind the Dominant and Second Poles in a Miller Compensated OTA
- Lecture 78 - 2 Stage Operational Amplifier and Miller Compensation Cancelling the RHP Zero
- Lecture 79 - Miller Compensation OTA Schematic
- Lecture 80 - Bipolar Junction Transistor Circuits-Device Equations and Small Signal Model
- Lecture 81 - BJT Biasing and Basic Building Blocks
- Lecture 82 - Bipolar Junction Transistor Circuits Swing Limits and Two Stage Opamp
- Lecture 83 - Input Stage of the 741 Opamp
- Lecture 84 - Basic Analysis of the 741

- Lecture 1 - Course introduction - 1
- Lecture 2 - Course introduction - 2

Lecture 1 - Introduction and Objectives of the course

Lecture 2 - Definition of a system and history of semiconductors

Lecture 3 - Products and levels of packaging

Lecture 4 - Packaging aspects of handheld products; Case studies in applications

Lecture 5 - Case Study (continued); Definition of PWB, summary and Questions for review

Lecture 6 - Basics of Semiconductor and Process flowchart; Video on "Sand-to-Silicon"

Lecture 7 - Wafer fabrication, inspection and testing

Lecture 8 - Wafer packaging; Packaging evolution; Chip connection choices

Lecture 9 - Wire bonding, TAB and flipchip-1

Lecture 10 - Wire bonding, TAB and flipchip-2; Tutorials

Lecture 11 - Why packaging? & Single chip packages or modules (SCM)

Lecture 12 - Commonly used packages and advanced packages; Materials in packages

Lecture 13 - Advances packages (continued); Thermal mismatch in packages; Current trends in packaging

Lecture 14 - Multichip modules (MCM)-types; System-in-package (SIP); Packaging roadmaps; Hybrid circuits; Quiz on packages

Lecture 15 - Electrical Issues " I; Resistive Parasitic

Lecture 16 - Electrical Issues " II; Capacitive and Inductive Parasitic

Lecture 17 - Electrical Issues " III; Layout guidelines and the Reflection problem

Lecture 18 - Electrical Issues " IV; Interconnection

Lecture 19 - Quick Tutorial on packages; Benefits from CAD; Introduction to DFM, DFR & DFT

Lecture 20 - Components of a CAD package and its highlights

Lecture 21 - Design Flow considerations; Beginning a circuit design with schematic work and component layout

Lecture 22 - Demo and examples of layout and routing; Technology file generation from CAD; DFM check list and design rules; Design for Reliability

Lecture 23 - Review of CAD output files for PCB fabrication; Photo plotting and mask generation

Lecture 24 - Process flow-chart; Vias; PWB substrates

Lecture 25 - Substrates continued; Video highlights; Surface preparation

Lecture 26 - Photoresist and application methods; UV exposure and developing; Printing technologies for PWBs

Lecture 27 - PWB etching; Resist stripping; Screen-printing technology

Lecture 28 - Through-hole manufacture process steps; Panel and pattern plating methods

Lecture 29 - Video highlights on manufacturing; Solder mask for PWBs; Multilayer PWBs; Introduction to microvias

Lecture 30 - Microvia technology and Sequential build-up technology process flow for high-density interconnects

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 31 - Conventional Vs HDI technologies; Flexible circuits; Tutorial session

Lecture 32 - SMD benefits; Design issues; Introduction to soldering

Lecture 33 - Reflow and Wave Soldering methods to attach SMDs

Lecture 34 - Solders; Wetting of solders; Flux and its properties; Defects in wave soldering

Lecture 35 - Vapour phase soldering, BGA soldering and Desoldering/Repair; SMT failures

Lecture 36 - SMT failure library and Tin Whiskers

Lecture 37 - Tin-lead and lead-free solders; Phase diagrams; Thermal profiles for reflow soldering; Lead-free alloys

Lecture 38 - Lead-free solder considerations; Green electronics; RoHS compliance and e-waste recycling issues

Lecture 39 - Thermal Design considerations in systems packaging

Lecture 40 - Introduction to embedded passives; Need for embedded passives; Design Library; Embedded resistor processes

Lecture 41 - Embedded capacitors; Processes for embedding capacitors; Case study examples; Summary of materials in packaging

Lecture 42 - Chapter-wise summary

- Lecture 1 - Course introduction and overview
- Lecture 2 - Distributed generation technologies
- Lecture 3 - Distributed storage technologies
- Lecture 4 - Distribution system protection
- Lecture 5 - Circuit breaker coordination
- Lecture 6 - Symmetrical component analysis and sequence excitation
- Lecture 7 - Modeling of distribution system components
- Lecture 8 - Protection components
- Lecture 9 - Impact of distributed generation of distribution protection
- Lecture 10 - Consumption and distribution grounding
- Lecture 11 - Islanding of distribution systems
- Lecture 12 - Modeling of islanded distribution systems
- Lecture 13 - Distribution system problems and examples
- Lecture 14 - Distribution system problems and examples continued
- Lecture 15 - Anti-islanding methods
- Lecture 16 - Solid state circuit switching
- Lecture 17 - Relaying for distributed generation
- Lecture 18 - Feeder voltage regulation
- Lecture 19 - Grounding, distribution protection coordination problems and examples
- Lecture 20 - Ring and network distribution
- Lecture 21 - Economic evaluation of DG systems
- Lecture 22 - Design for effective initial cost
- Lecture 23 - Single phase inverters
- Lecture 24 - DC bus design in voltage source inverter
- Lecture 25 - Electrolytic capacitor reliability and lifetime
- Lecture 26 - Inverter switching and average model
- Lecture 27 - Common mode and differential mode model of inverters
- Lecture 28 - Two leg single phase inverter
- Lecture 29 - Distribution system problems, and examples
- Lecture 30 - DG evaluation problems and examples
- Lecture 31 - Switch selection in two level voltage source inverters and loss evaluation

[Lecture 32 - Thermal model, management and cycling failure of IGBT modules](#)

[Lecture 33 - Semiconductor switch design reliability considerations](#)

[Lecture 34 - AC filters for grid connected inverters](#)

[Lecture 35 - AC inductor design and need for LCL filter](#)

Lecture 4 - Controlled sources; Determining the characteristics of a two terminal element; Realizing a resistor using a VCCS or a CCVS

Lecture 5 - Nodal analysis of a network with conductances and current sources; Setting up the equations; Conductance matrix; Superposition

Lecture 6 - Circuit analysis; Number of KCL and KVL equations in a circuit; Nodal analysis of a network with conductances and current sources; Setting up the equations; Conductance matrix;

Lecture 7 - Nodal analysis with voltage sources and controlled sources; Brief introduction to modified nodal analysis; Use of supernode to solve circuits with voltage sources; Superposition theorem

Lecture 8 - Mesh analysis of a circuit with resistors and voltage sources; Comparison with nodal analysis; Mesh analysis of circuits with current sources-supermesh

Lecture 9 - Choice of nodal versus mesh analysis; Circuit theorems: Pushing a voltage source through a node, splitting a current source, substitution theorem, superposition

Lecture 10 - Thevenin and Norton (theorem and) equivalent circuits; Power conservation in a circuit

Lecture 11 - Tellegen's theorem; Reciprocity theorem

Lecture 12 - Compensation Theorem; Two ports

Lecture 13 - Two port parameters-y parameters

Lecture 14 - Two port parameters(z, h, and g); Reciprocal two ports

Lecture 15 - Opamp, ideal opamp circuits, non-inverting and inverting amplifiers; Ensuring that the opamp has negative feedback

Lecture 16 - RC circuit natural response; First order differential equation

Lecture 17 - RC (first-order) circuit, complete response with step inputs; Transient(natural) and steady state(forced) responses; Zero-state and zero-input responses

Lecture 18 - Step response of RC circuit with loops of voltage sources and capacitors; RL circuits; RLC circuits

Lecture 19 - Second order(RLC circuit) natural response; Series and parallel RLC circuits; Differential equation-characteristic equation and solutions; Forced response of a second order circuit

Lecture 20 - General formulation of second order(RLC circuit) natural response; Natural frequency and damping/quality factor; Series/parallel RLC circuits; R, L, C in sinusoidal steady state

Lecture 21 - Sinusoidal steady state response of RC and RLC circuits

Lecture 1 - Preliminaries

Lecture 2 - Current

Lecture 3 - Voltage

Lecture 4 - Electrical elements and circuits

Lecture 5 - Kirchoff's current law (KCL)

Lecture 6 - Kirchoff's Voltage law (KVL)

Lecture 7 - Voltage Source

Lecture 8 - Current Source

Lecture 9 - Resistor

Lecture 10 - Capacitor

Lecture 11 - Inductor

Lecture 12 - Mutual Inductor

Lecture 13 - Linearity of Elements

Lecture 14 - Solutions to the assignment on units 1 and 2

Lecture 15 - Series connection-Voltage sources in series

Lecture 16 - Series connection of R, L, C, current source

Lecture 17 - Elements in parallel

Lecture 18 - Current source in series with an element; Voltage source in parallel with an element

Lecture 19 - Extreme cases: Open and short circuits

Lecture 20 - Summary

Lecture 21 - Voltage controlled voltage source (VCVS)

Lecture 22 - Voltage controlled current source (VCCS)

Lecture 23 - Current controlled voltage source (CCVS)

Lecture 24 - Current controlled current source (CCCS)

Lecture 25 - Realizing a resistance using a VCCS or CCCS

Lecture 26 - Scaling an element's value using controlled sources

Lecture 27 - Example calculation

Lecture 28 - Solution to the assignment on units 3 and 4

Lecture 29 - Power and energy absorbed by electrical elements

Lecture 30 - Power and energy in a resistor

Lecture 31 - Power and energy in a capacitor

- Lecture 32 - Power and energy in an inductor
- Lecture 33 - Power and energy in a voltage source
- Lecture 34 - Power and energy in a current source
- Lecture 35 - Goals of circuit analysis
- Lecture 36 - Number of independent KCL equations
- Lecture 37 - Number of independent KVL equations and branch relationships
- Lecture 38 - Analysis of circuits with a single independent source
- Lecture 39 - Analysis of circuits with multiple independent sources using superposition
- Lecture 40 - Superposition: Example
- Lecture 41 - Solution to the assignment on units 5 and 6
- Lecture 42 - What is nodal analysis
- Lecture 43 - Setting up nodal analysis equations
- Lecture 44 - Structure of the conductance matrix
- Lecture 45 - How elements appear in the nodal analysis formulation
- Lecture 46 - Completely solving the circuit starting from nodal analysis
- Lecture 47 - Nodal analysis example
- Lecture 48 - Matrix inversion basics
- Lecture 49 - Nodal analysis with independent voltage sources
- Lecture 50 - Supernode for nodal analysis with independent voltage sources
- Lecture 51 - Nodal analysis with VCCS
- Lecture 52 - Nodal analysis with VCVS
- Lecture 53 - Nodal analysis with CCVS
- Lecture 54 - Nodal analysis with CCCS
- Lecture 55 - Nodal analysis summary
- Lecture 56 - Solution to the assignment on units 7 and 8
- Lecture 57 - Planar circuits
- Lecture 58 - Mesh currents and their relationship to branch currents
- Lecture 59 - Mesh analysis
- Lecture 60 - Mesh analysis with independent current sources-Supermesh
- Lecture 61 - Mesh analysis with current controlled voltage sources
- Lecture 62 - Mesh analysis with current controlled current sources
- Lecture 63 - Mesh analysis using voltage controlled sources
- Lecture 64 - Nodal analysis versus Mesh analysis

- Lecture 65 - Superposition theorem
- Lecture 66 - Pushing a voltage source through a node
- Lecture 67 - Splitting a current source
- Lecture 68 - Substitution theorem: Current source
- Lecture 69 - Substitution theorem: Voltage source
- Lecture 70 - Substituting a voltage or current source with a resistor
- Lecture 71 - Solutions
- Lecture 72 - Extensions to Superposition and Substitution theorem
- Lecture 73 - Thevenin's theorem
- Lecture 74 - Worked out example: Thevenin's theorem
- Lecture 75 - Norton's theorem
- Lecture 76 - Worked out example: Norton's theorem
- Lecture 77 - Maximum power transfer theorem
- Lecture 78 - Preliminaries.
- Lecture 79 - Two port parameters
- Lecture 80 - y parameters
- Lecture 81 - y parameters: Examples
- Lecture 82 - Solutions.
- Lecture 83 - z parameters
- Lecture 84 - z parameters: Examples
- Lecture 85 - h parameters
- Lecture 86 - h parameters: Examples
- Lecture 87 - g parameters
- Lecture 88 - g parameters: Examples
- Lecture 89 - Calculations with a two-port element
- Lecture 90 - Calculations with a two-port element.
- Lecture 91 - Degenerate cases
- Lecture 92 - Relationships between different two-port parameters
- Lecture 93 - Equivalent circuit representation for two ports
- Lecture 94 - Reciprocity
- Lecture 95 - Proof of reciprocity of resistive two-ports
- Lecture 96 - Proof for 4-terminal two-ports
- Lecture 97 - Reciprocity in terms of different two-port parameters

- Lecture 98 - Reciprocity in circuits containing controlled sources
- Lecture 99 - Examples
- Lecture 100 - Solutions..
- Lecture 101 - Feedback amplifier using an opamp
- Lecture 102 - Ideal opamp
- Lecture 103 - Negative feedback around the opamp
- Lecture 104 - Finding opamp signs for negative feedback
- Lecture 105 - Example: Determining opamp sign for negative feedback
- Lecture 106 - Analysis of circuits with opamps
- Lecture 107 - Inverting amplifier
- Lecture 108 - Summing amplifier
- Lecture 109 - Instrumentation amplifier
- Lecture 110 - Negative resistance and Miller effect
- Lecture 111 - Finding opamp signs for negative feedback-circuits with multiple opamps
- Lecture 112 - Opamp supply voltages and saturation
- Lecture 113 - KCL with an opamp and supply currents
- Lecture 114 - Solutions...
- Lecture 115 - Circuits with storage elements (capacitors and inductors)
- Lecture 116 - First order circuit with zero input-natural response
- Lecture 117 - First order RC circuit with zero input-Example
- Lecture 118 - First order circuit with a constant input
- Lecture 119 - General form of the first order circuit response
- Lecture 120 - First order RC circuit with a constant input-Example
- Lecture 121 - First order circuit with piecewise constant input

Lecture 57 - Introduction to Repeaters in Interconnect Engineering

Lecture 58 - Repeater Design

Lecture 59 - Energy and delay analysis for interconnectwith repeaters

Lecture 60

Lecture 61 - Introduction to Power

Lecture 62 - Switching Power and Energy Estimation

Lecture 63 - Activity factor and estimating dynamic power for a combinational circuit design

Lecture 64 - Analyzing Dynamic Power

Lecture 65 - Energy estimation through driving factor

Lecture 66 - Energy expression in terms of delay

Lecture 67 - Voltage Scaling

Lecture 68 - DVFS

Lecture 69 - Introduction to subthreshold leakage current model

Lecture 70 - Subthreshold leakage current and Gate leakage current

Lecture 71 - Estimating Static Power

Lecture 72 - Introduction to CMOS Latch design

Lecture 73 - CMOS Latch Design

Lecture 74 - CMOS Latch and flipflop design

Lecture 75 - Static Timing Analysis

Lecture 76 - Static Timing Analysis (Continued...)

Lecture 77 - Static Timing Analysis - Part 2

Lecture 78 - Static Timing Analysis - Part 2.1

Lecture 79 - Static Timing Analysis - Part 3

Lecture 80 - TPDQ and TPCQ

Lecture 81 - Static Timing Analysis - Part 4

Lecture 82 - Static Timing Analysis - Part 5

Lecture 83 - Static Timing Analysis - Part 6

Lecture 84 - SET and CLEAR enabled Latch and Flipflop Design

Lecture 85 - 1-bit Adder design

Lecture 86 - Adder-Part2

Lecture 87 - PG architecture - Part 1

Lecture 88 - PG architecture - Part 2

Lecture 89 - Carry Skip Adder

Lecture 90 - Carry Look Ahead and Carry Increment Adder

Lecture 91 - Other Adder Subsystems

Lecture 92 - Approximate Multipliers - Part 1

Lecture 93 - Approximate Multipliers - Part 2

Lecture 94 - Approximate Adder

Lecture 1 - Introduction to Digital Relays - I

Lecture 2 - Introduction to Digital Relays - II

Lecture 3 - Components of Digital Relays

Lecture 4 - Fundamentals of Digital Relays

Lecture 5 - Phasor Estimation Algorithm - I

Lecture 6 - Phasor Estimation Algorithm - II

Lecture 7 - Phasor Estimation Algorithm - III

Lecture 8 - Phasor Estimation Algorithm - IV

Lecture 9 - Phasor Estimation Algorithm - V

Lecture 10 - Frequency Estimation Algorithm

Lecture 11 - Digital Protection of Transformer - I

Lecture 12 - Digital Protection of Transformer - II

Lecture 13 - Digital Protection of Transformer - III

Lecture 14 - Digital Protection of Transformer - IV

Lecture 15 - Digital Protection of Transformer - V

Lecture 16 - Digital Protection of Induction Motors - I

Lecture 17 - Digital Protection of Induction Motors - II

Lecture 18 - Digital Protection of Induction Motors - III

Lecture 19 - Digital Protection of Generators - I

Lecture 20 - Digital Protection OF Generators - II

Lecture 21 - Coordination of Overcurrent Relays for Distribution Network - I

Lecture 22 - Coordination of Overcurrent Relays for Distribution Network - II

Lecture 23 - Coordination of Overcurrent Relays for Distribution Network - III

Lecture 24 - Coordination of Overcurrent Relays for Distribution Network - IV

Lecture 25 - Coordination of Overcurrent Relays for Distribution Network - V

Lecture 26 - Coordination of Overcurrent Relays for Distribution Network - VI

Lecture 27 - Load Shedding and Frequency Relaying - I

Lecture 28 - Load Shedding and Frequency Relaying - II

Lecture 29 - Islanding Detection

Lecture 30 - Digital Distance Relaying Scheme for transmission Line - I

Lecture 31 - Digital Distance Relaying Scheme for transmission Line - II

[Lecture 32 - Introduction to Phasor Measurement Unit - I](#)

[Lecture 33 - Introduction to Phasor Measurement Unit - II](#)

[Lecture 34 - Introduction to Phasor Measurement Unit - III](#)

[Lecture 35 - Introduction to IEC 61850 - I](#)

[Lecture 36 - Introduction to IEC 61850 - II](#)

[Lecture 37 - Application of Big-Data Analytics in Power System Protection](#)

[Lecture 38 - Cyber Security Issues in Power System Network](#)

[Lecture 39 - Protection of Hybride AC/DC Microgrid: Issues and Challenges](#)

[Lecture 40 - Application of AI-Based Techniques in Digital Protection](#)

Lecture 1 - Introduction

Lecture 2 - Introduction and Course Overview

Lecture 3 - Basics of Quantum Mechanics

Lecture 4 - Electron in a Potential Well

Lecture 5 - Electrons in Solids

Lecture 6 - KP Model

Lecture 7 - KP Model, Effective Mass

Lecture 8 - Bands, Effective Mass, DOS

Lecture 9 - Effective Mass, DOS

Lecture 10 - Density of States

Lecture 11 - Density of States

Lecture 12 - Density of States - 3D, 2D

Lecture 13 - Density of States - 2D, 1D, 0D

Lecture 14 - DOS, Fermi Function

Lecture 15 - Fermi- Dirac Distribution

Lecture 16 - Fermi Function, General Model of Transport

Lecture 17 - General Model of Transport - I

Lecture 18 - General Model of Transport - II

Lecture 19 - General Model of Transport - III

Lecture 20 - General Model of Transport, Modes

Lecture 21 - Modes - I

Lecture 22 - Modes - II

Lecture 23 - Modes, Diffusive Transport

Lecture 24 - Diffusive Transport

Lecture 25 - Diffusive Transport, Conductance

Lecture 26 - Conductance, Bulk Transport - I

Lecture 27 - Conductance, Bulk Transport - II

Lecture 28 - Resistance: Ballistic and Diffusive Cases - I

Lecture 29 - Resistance: Ballistic and Diffusive Cases - II

Lecture 30 - Resistance: Ballistic and Diffusive Cases - III

Lecture 31 - Resistance: Diffusive Case

- Lecture 32 - The Idea of Mobility
- Lecture 33 - Voltage Drop in Ballistic Conductor
- Lecture 34 - 1D and 2D Realistic Conductors

- Lecture 45 - MOSFET: Landauer Transport
- Lecture 46 - Landauer Transport and Ballistic MOSFET
- Lecture 47 - Ballistic MOSFET
- Lecture 48 - Ballistic Injection Velocity
- Lecture 49 - Velocity Saturation in Ballistic MOSFET and Electrostatics
- Lecture 50 - MOS Electrostatics
- Lecture 51 - MOS Electrostatics
- Lecture 52 - MOSFET: Electrostatics, Threshold Voltage
- Lecture 53 - MOSFET: 2D Electrostatics
- Lecture 54 - MOSFET: 2D Electrostatics and Quantum Confinement
- Lecture 55 - ETSOI MOSFETs, Quantum Confinement, Strain Engineering
- Lecture 56 - Strain Engineering, Thermoelectric Effects
- Lecture 57 - Thermoelectric Effects
- Lecture 58 - Thermoelectric Effects, Quantum Dot Devices
- Lecture 59 - Quantum Dot Devices
- Lecture 60 - Quantum Dot Devices - IV Characteristics, DFT, Course Summary

Lecture 1 - Transistor Amplifier

Lecture 2 - Transistor Op-amp and Transistor Based Voltage Regulator

Lecture 3 - Some applications of transistor - I

Lecture 4 - Some applications of transistor - II

Lecture 5 - Transformer design & Heat sink design

Lecture 6 - Op-amp Based Linear Voltage Regulator

Lecture 7 - Short circuit protection for linear power supply

Lecture 8 - Temperature indicator design using Op-amp

Lecture 9 - On & off Temperature controller design

Lecture 10 - Proportional Temperature Controller Design

Lecture 11 - PID - Temperature Controller Design

Lecture 12 - Heater Drive for Various Temperature Controllers

Lecture 13 - Short Circuit Protection of Power MOSFET

Lecture 14 - Error budgeting for temperature Indicator

Lecture 15 - PID Temperature Controllers with Error Budgeting

Lecture 16 - Error Budgeting for Constant Current Sources

Lecture 17 - Error Budgeting for Thermo Couple Amplifier

Lecture 18 - Error Budgeting for Op amp Circuits

Lecture 19 - Gain Error Calculation in Op amp Circuits

Lecture 20 - Input Resistance Calculations for Op amp

Lecture 21 - Output Resistance Calculations for Op amp

Lecture 22 - Error Budgeting for Different Circuits

Lecture 23 - 4-20 mA current Transmitter design

Lecture 24 - Error budgeting for 4-20mA Current Transmitters

Lecture 25 - LVDT Based Current Transmitters

Lecture 26 - Constant Current Source Design

Lecture 27 - 4-20 MA Based Temperature Transmitter

Lecture 28 - 3-Wire Current Transmitter

Lecture 29 - Various Resistance Measurement Techniques

Lecture 30 - Ratio Transformer Technique to Measure Resistance and capacitance

Lecture 31 - Capacitive Sensor Circuit Design Examples

[Lecture 32 - Capacitive Sensor Circuit With High Impedance Amplifier](#)

[Lecture 33 - AC- applications of the Op-Amp and Lock in Amplifier Design](#)

[Lecture 34 - Design of lock in Amplifier Circuit with example](#)

[Lecture 35 - Dual Slopes ADC " Design Examples](#)

[Lecture 36 - Dual Slope ADC and Successor approximation ADC](#)

[Lecture 37 - MC based ADC](#)

[Lecture 38 - Digital to analog Converter design and working, Flash ADC](#)

[Lecture 39 - Flash ADC and ADC Converter errors](#)

[Lecture 40 - Sigma delta ADC working Principle](#)

Lecture 1 - Course Contents, Objective

Lecture 2 - Revision of Prerequisite

Lecture 3 - Design of Synchronous Sequential Circuits

Lecture 4 - Analysis of Synchronous Sequential Circuits

Lecture 5 - Top-down Design

Lecture 6 - Controller Design

Lecture 7 - Control algorithm and State diagram

Lecture 8 - Case study 1

Lecture 9 - FSM issues 1

Lecture 10 - FSM Issues 2

Lecture 11 - FSM Issues 3

Lecture 12 - FSM Issues 4

Lecture 13 - FSM Issues 5

Lecture 14 - Synchronization 1

Lecture 15 - Synchronization 2

Lecture 16 - Case study 2

Lecture 17 - Case study on FPGA Board

Lecture 18 - Entity, Architecture and Operators

Lecture 19 - Concurrency, Data flow and Behavioural models

Lecture 20 - Structural Model, Simulation

Lecture 21 - Simulating Concurrency

Lecture 22 - Classes and Data types

Lecture 23 - Concurrent statements and Sequential statements

Lecture 24 - Sequential statements and Loops

Lecture 25 - Modelling flip-flops, Registers

Lecture 26 - Synthesis of Sequential circuits

Lecture 27 - Libraries and Packages

Lecture 28 - Operators, Delay modelling

Lecture 29 - Delay modelling

Lecture 30 - VHDL Examples

Lecture 31 - VHDL coding of FSM

[Lecture 32 - VHDL Test bench](#)

[Lecture 33 - VHDL Examples, FSM Clock](#)

[Lecture 34 - Evolution of PLDs](#)

[Lecture 35 - Simple PLDs](#)

[Lecture 36 - Simple PLDs: Fitting](#)

[Lecture 37 - Complex PLDs](#)

[Lecture 38 - FPGA Introduction](#)

[Lecture 39 - FPGA Interconnection, Design Methodology](#)

[Lecture 40 - Xilinx Virtex FPGA's CLB](#)

[Lecture 41 - Xilinx Virtex Resource Mapping, IO Block](#)

[Lecture 42 - Xilinx Virtex Clock Tree](#)

[Lecture 43 - FPGA Configuration](#)

[Lecture 44 - Altera and Actel FPGAs](#)

Lecture 1 - Course Overview & Basics

Lecture 2 - Example Codes and their Parameters

Lecture 3 - Mathematical Preliminaries: Groups

Lecture 4 - Subgroups and Equivalence Relations

Lecture 5 - Cosets, Rings & Fields

Lecture 6 - Vector Spaces, Linear Independence and Basis

Lecture 7 - Linear Codes, & Linear independence

Lecture 8 - Spanning & Basis

Lecture 9 - The Dual Code

Lecture 10 - Systematic Generator Matrix

Lecture 11 - Minimum Distance of a Linear Code

Lecture 12 - Bounds on the size of a Code

Lecture 13 - Asymptotic Bounds

Lecture 14 - Standard Array Decoding

Lecture 15 - Performance Analysis of the SAD

Lecture 16 - State and Trellis

Lecture 17 - The Viterbi Decoder

Lecture 18 - Catastrophic Error Propagation

Lecture 19 - Path Enumeration

Lecture 20 - Viterbi Decoder over the AWGN Channel

Lecture 21 - Generalized Distributive Law

Lecture 22 - The MPF Problem

Lecture 23 - Further Examples of the MPF Problem

Lecture 24 - Junction Trees

Lecture 25 - Example of Junction Tree Construction

Lecture 26 - Message passing on the Junction tree

Lecture 27 - GDL Approach to Decoding Convolutional Codes

Lecture 28 - ML Code-Symbol Decoding of the Convolutional Code

Lecture 29 - LDPC Codes

Lecture 30 - LDPC Code Terminology

Lecture 31 - Gallager Decoding Algorithm A

[Lecture 32 - BP Decoding of LDPC Codes](#)

[Lecture 33 - BP Decoding \(Continued\)](#)

[Lecture 34 - Density Evolution under BP decoding](#)

[Lecture 35 - Convergence & Concentration Theorem - LDPC Codes](#)

[Lecture 36 - A Construction for Finite Fields](#)

[Lecture 37 - Finite Fields: A Deductive Approach](#)

[Lecture 38 - Deductive Approach to Finite Fields](#)

[Lecture 39 - Subfields of a Finite field](#)

[Lecture 40 - Transform Approach to Cyclic Codes](#)

[Lecture 41 - Estimating the Parameters of a Cyclic Code](#)

[Lecture 42 - Decoding Cyclic Codes](#)

Lecture 1 - Introduction to Nanoelectronics

Lecture 2 - CMOS Scaling Theory

Lecture 3 - Short Channel Effects

Lecture 4 - Subthreshold Conduction

Lecture 5 - Drain Induced Barrier Lowering

Lecture 6 - Channel and Source / Drain Engineering

Lecture 7 - CMOS Process Flow

Lecture 8 - Gate oxide scaling and reliability

Lecture 9 - High-k gate dielectrics

Lecture 10 - Metal gate transistor

Lecture 11 - Industrial CMOS Technology

Lecture 12 - Ideal MOS C-V Characteristics

Lecture 13 - Effect of non idealities on C-V

Lecture 14 - MOS Parameter Extraction from C-V Characteristics

Lecture 15 - MOS Parameter Extraction from I-V Characteristics

Lecture 16 - MOSFET Analysis, sub-threshold swing  $\hat{A}^{\wedge}S^{\wedge}$

Lecture 17 - Interface state density effects on  $\hat{A}^{\wedge}S^{\wedge}$ . Short Channel Effects (SCE) and Drain Induced Barrier Lowering (DIBL)

Lecture 18 - Velocity Saturation, Ballistic transport, and Velocity Overshoot Effects and Injection Velocity

Lecture 19 - SOI Technology and comparisons with Bulk Silicon CMOS technology

Lecture 20 - SOI MOSFET structures, Partially Depleted (PD) and Fully Depleted (FD) SOI MOSFETs

Lecture 21 - FD SOI MOSFET: Operation Modes and Threshold Voltages and Electric Fields

Lecture 22 - Sub-threshold Slope & SCE suppression in FD SOI MOSFET, Volume Inversion and Ultra thin (UTFD) SOI MOSFET and quantization Effect, FINFET

Lecture 23 - Need for MS contact Source/Drain Junction in Nano scale MOSFETs

Lecture 24 - Rectifying and Ohmic contacts and challenges in MS junction source drain MOSFET Technology

Lecture 25 - Effect of Interface states and Fermi level pinning on MS contacts on Si and passivation techniques for MS S/D MOSFETs

Lecture 26 - Germanium as an alternate to silicon for high performance MOSFETs and the challenges in Germanium Technology

Lecture 27 - Germanium MOSFET technology and recent results on surface passivated Ge MOSFETs

Lecture 28 - Compound semiconductors and hetero junction FETs for high performance

Lecture 29 - GaAs MESFETs: Enhancement and depletion types. Velocity Overshoot effects in GaAs MESFETs

Lecture 30 - Hetero-junctions and High Electron Mobility Transistors (HEMT)

[Lecture 31 - Introduction to Nanomaterials](#)

[Lecture 32 - Basic Principles of Quantum Mechanics](#)

[Lecture 33 - Basic Principles of Quantum Mechanics \(Continued...\)](#)

[Lecture 34 - Energy bands in crystalline solids](#)

[Lecture 35 - Quantum structures and devices](#)

[Lecture 36 - Crystal growth and nanocrystals](#)

[Lecture 37 - Nanocrystals and nanostructured thin films](#)

[Lecture 38 - Nanowires and other nanostructures](#)

[Lecture 39 - Carbon Nanostructures and CVD](#)

[Lecture 40 - Atomic layer deposition \(ALD\)](#)

[Lecture 41 - Characterisation of nanomaterials](#)

Lecture 1 - Introduction to Statistical Pattern Recognition

Lecture 2 - Overview of Pattern Classifiers

Lecture 3 - The Bayes Classifier for minimizing Risk

Lecture 4 - Estimating Bayes Error; Minimax and Neymann-Pearson classifiers

Lecture 5 - Implementing Bayes Classifier; Estimation of Class Conditional Densities

Lecture 6 - Maximum Likelihood estimation of different densities

Lecture 7 - Bayesian estimation of parameters of density functions, MAP estimates

Lecture 8 - Bayesian Estimation examples; the exponential family of densities and ML estimates

Lecture 9 - Sufficient Statistics; Recursive formulation of ML and Bayesian estimates

Lecture 10 - Mixture Densities, ML estimation and EM algorithm

Lecture 11 - Convergence of EM algorithm; overview of Nonparametric density estimation

Lecture 12 - Convergence of EM algorithm, Overview of Nonparametric density estimation

Lecture 13 - Nonparametric estimation, Parzen Windows, nearest neighbour methods

Lecture 14 - Linear Discriminant Functions; Perceptron -- Learning Algorithm and convergence proof

Lecture 15 - Linear Least Squares Regression; LMS algorithm

Lecture 16 - AdaLinE and LMS algorithm; General nonlinear least-squares regression

Lecture 17 - Logistic Regression; Statistics of least squares method; Regularized Least Squares

Lecture 18 - Fisher Linear Discriminant

Lecture 19 - Linear Discriminant functions for multi-class case; multi-class logistic regression

Lecture 20 - Learning and Generalization; PAC learning framework

Lecture 21 - Overview of Statistical Learning Theory; Empirical Risk Minimization

Lecture 22 - Consistency of Empirical Risk Minimization

Lecture 23 - Consistency of Empirical Risk Minimization; VC-Dimension

Lecture 24 - Complexity of Learning problems and VC-Dimension

Lecture 25 - VC-Dimension Examples; VC-Dimension of hyperplanes

Lecture 26 - Overview of Artificial Neural Networks

Lecture 27 - Multilayer Feedforward Neural networks with Sigmoidal activation functions;

Lecture 28 - Backpropagation Algorithm; Representational abilities of feedforward networks

Lecture 29 - Feedforward networks for Classification and Regression; Backpropagation in Practice

Lecture 30 - Radial Basis Function Networks; Gaussian RBF networks

Lecture 31 - Learning Weights in RBF networks; K-means clustering algorithm

Lecture 32 - Support Vector Machines -- Introduction, obtaining the optimal hyperplane

Lecture 33 - SVM formulation with slack variables; nonlinear SVM classifiers

Lecture 34 - Kernel Functions for nonlinear SVMs; Mercer and positive definite Kernels

Lecture 35 - Support Vector Regression and  $\epsilon$ -insensitive Loss function, examples of SVM learning

Lecture 36 - Overview of SMO and other algorithms for SVM;  $\nu$ -SVM and  $\nu$ -SVR; SVM as a risk minimizer

Lecture 37 - Positive Definite Kernels; RKHS; Representer Theorem

Lecture 38 - Feature Selection and Dimensionality Reduction; Principal Component Analysis

Lecture 39 - No Free Lunch Theorem; Model selection and model estimation; Bias-variance trade-off

Lecture 40 - Assessing Learnt classifiers; Cross Validation;

Lecture 41 - Bootstrap, Bagging and Boosting; Classifier Ensembles; AdaBoost

Lecture 42 - Risk minimization view of AdaBoost

- Lecture 1 - Introduction to Sensors, Signals and Systems
- Lecture 2 - Role of Analog Signal Processing in Electronic Products - Part I
- Lecture 3 - Role of Analog Signal Processing in Electronic Products - Part II
- Lecture 4 - Analog Signal Processing using One Port Networks
- Lecture 5 - Analog Signal Processing using One Port Networks, Passive Two Ports and Ideal amplifiers
- Lecture 6 - Synthesis of Amplifiers using Nullators and Norators
- Lecture 7 - Passive Electronic Devices for Analog Signal Processing
- Lecture 8 - Active Devices for Analog Signal Processing Systems

Lecture 1 - Introduction to Photonic Integrated Circuits

Lecture 2 - Optical Waveguide Theory - Symmetric Waveguides

Lecture 3 - Optical Waveguide Theory - Asymmetric Waveguides

Lecture 4 - Vector Modes

Lecture 5 - Channel Waveguide

Lecture 6 - Directional Coupler and Coupled Mode Theory

Lecture 7 - Passive Devices and Beam Propagation Method

Lecture 8 - Dynamic Devices

Lecture 9 - Integrated optical Systems and Applications

Lecture 10 - Fabrication and Characterisation

Lecture 11 - MOEMS

Lecture 12 - Ring Resonators

Lecture 13 - Photonic Band Gap Devices

Lecture 14 - Lecture Summary

- Lecture 1 - Course Outline and Scope
- Lecture 2 - Biological Information Systems
- Lecture 3 - Analogy between Living Systems with Semiconductor Structures
- Lecture 4 - Action Potential - I
- Lecture 5 - Action Potential - II
- Lecture 6 - Synaptic Potential
- Lecture 7 - Threshold and Action Potential Propagation
- Lecture 8 - Anatomy of a Neuron
- Lecture 9 - Neuro Muscular Junction
- Lecture 10 - Spatial and Temporal Summation of neuronal electrical activities
- Lecture 11 - Brain Anatomy Introduction
- Lecture 12 - Architecture of the Nervous System
- Lecture 13 - Architecture of the Nervous System (Continued...)
- Lecture 14 - Analog and Digital Processing in the Neuron - I
- Lecture 15 - Analog and Digital Processing in the Neuron - II
- Lecture 16 - Energy Sources of Neuronal Systems
- Lecture 17 - Skull Demonstration
- Lecture 18 - Brain Anatomy: Skull
- Lecture 19 - Brain Anatomy 3D - I
- Lecture 20 - Brain Anatomy 3D - II
- Lecture 21 - Brain Anatomy 3D - III
- Lecture 22 - Basics of Brain Imaging Techniques
- Lecture 23 - Brain anatomy using MR images - I
- Lecture 24 - Brain anatomy using MR images - II
- Lecture 25 - Spinal Cord Anatomy
- Lecture 26 - Reflexes: Introduction
- Lecture 27 - Monosynaptic Reflexes
- Lecture 28 - Polysynaptic Reflexes
- Lecture 29 - Criteria for electrode material
- Lecture 30 - Introduction to brain stimulation
- Lecture 31 - Brain Stimulation: Device fabrication - Illustration

[Lecture 32 - Brain Stimulation: Electronic Systems \(Current Mirrors\)](#)

[Lecture 33 - Brain regions and associated functions](#)

[Lecture 34 - Human vision system - II](#)

[Lecture 35 - Network analysis during visual processing](#)

[Lecture 36 - Control of eye movements](#)

[Lecture 37 - COMSOL Multiphysics for Medical Devices](#)

[Lecture 38 - COMSOL Brain Electrical Stimulation Demo](#)

[Lecture 39 - Human vision system - III](#)

[Lecture 40 - Human auditory system - I](#)

[Lecture 41 - Human auditory system - II](#)

[Lecture 42 - Human auditory system - III](#)

[Lecture 43 - The human balance system](#)

[Lecture 44 - Movement: Introduction](#)

[Lecture 45 - Movement: Synchronization](#)

[Lecture 46 - Movement: Role of Spinall Cord](#)

[Lecture 47 - Movement: Role of Cerebellum](#)

[Lecture 48 - Memory and Learning - I](#)

[Lecture 49 - Memory and Learning - II](#)

[Lecture 50 - Microengineering devices for Neural Signal Acquisiton](#)

[Lecture 51 - Microfabrication Process for Multi Electrode Array](#)

[Lecture 52 - Introduction and Applications of Event Related Potentials](#)

[Lecture 53 - ERP Extraction Demonstration](#)

Lecture 1 - The Seven Concerns

Lecture 2 - Design Thinking and Collaboration

Lecture 3 - Challenges to Innovation

Lecture 4 - Understanding Users

Lecture 5 - Arriving at Design Insights

Lecture 6 - Prototyping for User Feedback

Lecture 7 - 1st C The Cause

Lecture 8 - Crossing the First Pitfall

Lecture 9 - Trial and Error

Lecture 10 - User Feedback for Development

Lecture 11 - New users, new needs to meet

Lecture 12 - Knowing the Context

Lecture 13 - 2nd C The Context

Lecture 14 - The Basic Need

Lecture 15 - Ingenious Attempts

Lecture 16 - Further Insights

Lecture 17 - The Working Rig

Lecture 18 - Concepts generation

Lecture 19 - Experiencing the Product

Lecture 20 - Refinements

Lecture 21 - 3rd C - The Comprehension

Lecture 22 - Understanding Constraints

Lecture 23 - Positioning the Product

Lecture 24 - Exploring Possibilities

Lecture 25 - More Experiments

Lecture 26 - Understanding the Technology

Lecture 27 - At the 2nd Valley of Death

Lecture 28 - Finishing Touches

Lecture 29 - The Check

Lecture 30 - The Cause

Lecture 31 - The Product, the Users and the Context

[Lecture 32 - The Prototyping](#)

[Lecture 33 - User needs](#)

[Lecture 34 - The Crucial Step Missed](#)

[Lecture 35 - 5th C The Conception](#)

[Lecture 36 - Synchronic Studies](#)

[Lecture 37 - One product, many problems](#)

[Lecture 38 - Concept Clusters](#)

[Lecture 39 - From idea to product](#)

[Lecture 40 - Prototyping](#)

[Lecture 41 - Materials and Technologies](#)

[Lecture 42 - Collaborative Efforts](#)

[Lecture 43 - 6th C - The Crafting](#)

[Lecture 44 - Recap](#)

[Lecture 45 - The Manufacturing Challenge](#)

[Lecture 46 - The User Feedback](#)

[Lecture 47 - The Iterative Process](#)

[Lecture 48 - 7th C - The Connection](#)

[Lecture 49 - The Seed for Innovation](#)

[Lecture 50 - Pinnacle for Innovation](#)

[Lecture 51 - The Innovation Timeline](#)

[Lecture 52 - The Innovation Champions](#)

[Lecture 53 - The Innovation Domains](#)

[Lecture 54 - The Innovation Templates](#)

[Lecture 55 - The Serial Innovation](#)

Lecture 1 - An Introduction to Design

Lecture 2 - The many notions of design

Lecture 3 - Design as a process and a product

Lecture 4 - The evolution of design

Lecture 5 - Design engages with many disciplines

Lecture 6 - Design is concerned with the user

Lecture 7 - Good design, bad design

Lecture 8 - Users and Contexts

Lecture 9 - Multiple users, differing contexts

Lecture 10 - Understanding user experience

Lecture 11 - Design for a meaningful impact

Lecture 12 - Design and Society

Lecture 13 - Community and Collaboration

Lecture 14 - Understanding Contexts

Lecture 15 - Knowledge and Access

Lecture 16 - Meeting Needs: Necessity or Luxury?

Lecture 17 - Function, Context and Consequences

Lecture 18 - Design and Sustainability

Lecture 19 - The cost of looking the other way

Lecture 20 - Sustainability practices in daily life

Lecture 21 - The perspective of engineering

Lecture 22 - Understanding embodied energy

Lecture 23 - The user's role in sustainability

Lecture 24 - Framing the world's future

Lecture 25 - Design and industry

Lecture 26 - Understanding varied user needs

Lecture 27 - Success through new materials and manufacturing

Lecture 28 - Pushing the boundaries of mass production

Lecture 29 - A Classic chair for all times

Lecture 30 - Breaking familiar assumptions

Lecture 31 - Design and Collaboration

[Lecture 32 - Team work](#)

[Lecture 33 - Collaborating with unlikely partners](#)

[Lecture 34 - Principles of collaboration](#)

[Lecture 35 - Design thinking](#)

[Lecture 36 - Feedback and assessment](#)

[Lecture 37 - Innovation by Design](#)

[Lecture 38 - Facilitating the reach of a traditional craft](#)

[Lecture 39 - Pitfalls of innovation](#)

[Lecture 40 - The seven concerns of innovation](#)

[Lecture 41 - From a concern to a palki](#)

[Lecture 42 - A little design goes a long way](#)

Lecture 1 - Jaipur Foot - A classic innovation - Part 1

Lecture 2 - Jaipur Foot - A classic innovation - Part 2

Lecture 3 - User Centred Helmet Design - Part 1

Lecture 4 - User Centred Helmet Design - Part 2

Lecture 5 - Challenges of Reaching a Million Users - Part 1

Lecture 6 - Challenges of Reaching a Million Users - Part 2

Lecture 7 - Challenges of Reaching a Million Users - Part 3

Lecture 8 - Technology to Solution - Part 1

Lecture 9 - Technology to Solution - Part 2

Lecture 10 - A Collaborative Excellence - Part 1

Lecture 11 - A Collaborative Excellence - Part 2

Lecture 12 - Collaborative Innovation Methods - Part 1

Lecture 13 - Collaborative Innovation Methods - Part 2

Lecture 14 - Collaborative Innovation Methods - Part 3

Lecture 15 - Learnings from Grassroot Innovation - Part 1

Lecture 16 - Learnings from Grassroot Innovation - Part 2

Lecture 17 - Systemic Approach to Biomed Innovations - Part 1

Lecture 18 - Systemic Approach to Biomed Innovations - Part 2

Lecture 19 - Systemic Approach to Biomed Innovations - Part 3

Lecture 20 - Research to Innovation - Part 1

Lecture 21 - Research to Innovation - Part 2

Lecture 22 - Smartcane for the Blind - A Success Story - Part 1

Lecture 23 - Smartcane for the Blind - A Success Story - Part 2

Lecture 1 - Introduction

Lecture 2 - Situating Ethnography

Lecture 3 - Engaging with the Other

Lecture 4 - Equality and Empathy

Lecture 5 - Notions of Reality

Lecture 6 - Objectivity and Subjectivity

Lecture 7 - Conclusion

Lecture 8 - Introduction

Lecture 9 - The Ethnographic Process

Lecture 10 - Ethnography: Process or Product

Lecture 11 - Fundamental Concepts

Lecture 12 - Fundamental Concepts (Continued...)

Lecture 13 - Conclusion

Lecture 14 - Introduction

Lecture 15 - The Research Question

Lecture 16 - Is Ethnography the Method?

Lecture 17 - Accessing Existing Knowledge

Lecture 18 - Designing Fieldwork

Lecture 19 - Case Studies: Research Question and Applying Ethnography

Lecture 20 - Case Studies: The Value of Existing Knowledge

Lecture 21 - Case Studies: Identifying Participants, Places, Activities

Lecture 22 - Case Studies: Access and Impact

Lecture 23 - Conclusion

Lecture 24 - Access: Not Just Consent

Lecture 25 - Challenges of Access

Lecture 26 - Building Rapport

Lecture 27 - Gaining Trust

Lecture 28 - Limits to Access

Lecture 29 - Immersion

Lecture 30 - The Ethics of Engaging

Lecture 31 - Conclusion: Covert and Overt Research

[Lecture 32 - Introduction](#)

[Lecture 33 - Types of Observation](#)

[Lecture 34 - \(ALM\) LxT 1: Observing Imponderabilia](#)

[Lecture 35 - What to Observe](#)

[Lecture 36 - Participant Observation](#)

[Lecture 37 - Degrees of Participation](#)

[Lecture 38 - Ethnographic Records](#)

[Lecture 39 - Conclusion: Types of Ethnographic Records](#)

[Lecture 40 - Introduction](#)

[Lecture 41 - Forms of Interviews](#)

[Lecture 42 - \(ALM\) LxT 1: Oral History and Ethnography](#)

[Lecture 43 - Characteristics of Interviews](#)

[Lecture 44 - Listening and Speaking](#)

[Lecture 45 - Reflexivity in Interviewing](#)

[Lecture 46 - Designing the Interview](#)

[Lecture 47 - Designing the Core Discussion - I](#)

[Lecture 48 - Designing the Core Discussion - II](#)

[Lecture 49 - Doing the Interview - I](#)

[Lecture 50 - Doing the Interview - II](#)

[Lecture 51 - Conclusion](#)

[Lecture 52 - Introduction](#)

[Lecture 53 - Researching THE Visual - I](#)

[Lecture 54 - Researching THE Visual - II](#)

[Lecture 55 - Researching WITH the Visual](#)

[Lecture 56 - Choosing the Visual Medium](#)

[Lecture 57 - Representation through Visuals](#)

[Lecture 58 - \(ALM\) LxT 1: Part I: Presentation by Anjali Monteiro and KP Jayasankar](#)

[Lecture 59 - Reflexivity in Visual Ethnography - I](#)

[Lecture 60 - Reflexivity in Visual Ethnography - II](#)

[Lecture 61 - Conclusion](#)

[Lecture 62 - Introduction](#)

[Lecture 63 - Designing Information for HIV-AIDS Affected Persons - Prof. Anirudha Joshi](#)

[Lecture 64 - A New Approach to Urban Housing - Prof. Uday Athavankar](#)

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

[Lecture 65 - Cognitive Ethnography - Prof. Sahana Murthy](#)

[Lecture 66 - Participative Design for Language Learning - Prof. Alka Hingorani](#)

[Lecture 67 - Conclusion](#)

Lecture 1 - Introduction to Entrepreneurship

Lecture 2 - Hand holding for Entrepreneurship

Lecture 3 - Methodology for Innovation

Lecture 4 - Team Building

Lecture 5 - Problem Statement presentation

Lecture 6 - IDEAS program DSSE IITB

Lecture 7 - From Users to Customers: Solar Oven case-study

Lecture 8 - IITH Student projects: Customer Discovery

Lecture 9 - Healthcare and Innovation

Lecture 10 - Med-Tech success Stories

Lecture 11 - The Innovation Process

Lecture 12 - Human Centered Innovation

Lecture 13 - Creating User Experience Design

Lecture 14 - Humanizing Technology

Lecture 15 - Business Model Canvas

Lecture 16 - Introduction to SINE Incubator

Lecture 17 - Lean Model Canvas SINE

Lecture 18 - Start-up Success Story Atomberg

Lecture 19 - itic incubator IITH

Lecture 20 - Success stories of CfHE

Lecture 21 - Entrepreneurship: Plan to action

Lecture 22 - From Corporate to Entrepreneurship

Lecture 23 - Creative Ideation

Lecture 24 - Building Proof of Concept

Lecture 25 - Network Entrepreneurship

Lecture 26 - Start-up Project Presentation 1

Lecture 27 - Start-up Project Presentation 2

Lecture 1 - Introduction

Lecture 2 - Design today - human aid to lifestyle

Lecture 3 - Journey, fitting task to man

Lecture 4 - Domain, philosophy and objective

Lecture 5 - Mutual task comfort: two way dialogue, communication model

Lecture 6 - Ergonomics/ human factors fundamentals

Lecture 7 - Physiology, (work physiology) and stress

Lecture 8 - Human body - structure and function, anthropometrics

Lecture 9 - Anthropometry: body growth and somatotypes

Lecture 10 - Static and dynamic anthropometry: standing

Lecture 11 - Anthropometry landmark: sitting postures

Lecture 12 - Anthropometry : squatting and cross-legged postures

Lecture 13 - Measuring techniques

Lecture 14 - Statistical treatment of data and

Lecture 15 - Human body-structure and function

Lecture 16 - Posture and job relation

Lecture 17 - Posture and body supportive devices

Lecture 18 - Chair characteristics

Lecture 19 - Vertical work surface

Lecture 20 - Horizontal work surface

Lecture 21 - Movement

Lecture 22 - Work Counter

Lecture 23 - Communication and cognitive issues

Lecture 24 - Psycho-social behaviour aspects,

Lecture 25 - Information processing and perception

Lecture 26 - Cognitive aspects and mental workload

Lecture 27 - Human error and risk perception

Lecture 28 - Visual performance

Lecture 29 - Visual displays

Lecture 30 - Environmental factors influencing

Lecture 31 - Ergonomics design methodology

[Lecture 32 - Ergonomics criteria/check](#)

[Lecture 33 - Design process involving](#)

[Lecture 34 - Some checklist for task easiness](#)

[Lecture 35 - Occupational safety and stress at workplace](#)

[Lecture 36 - Workstation design](#)

[Lecture 37 - Furniture support](#)

[Lecture 38 - Vertical arm reach and relevant](#)

[Lecture 39 - Humanising design :Design and human compatibility, comfort and adaptability aspects](#)

[Lecture 40 - Scope for exploration](#)

Lecture 1 - Sustainability and Sustainable Development - Understanding Un-sustainability and need for Sustainability

Lecture 2 - Sustainability and Sustainable Development - Definitions

Lecture 3 - Sustainability and Sustainable Development - Pathway

Lecture 4 - Systems Approach to Design

Lecture 5 - Evolution of sustainability within Design

Lecture 6 - Diverse Approaches to Design for Sustainability - Part A

Lecture 7 - Diverse Approaches to Design for Sustainability - Part B

Lecture 8 - Relationship between approaches to Design for Sustainability and the application context

Lecture 9 - Product Life Cycle Design - Methods and Strategies

Lecture 10 - Product Life Cycle Assessment - Part A

Lecture 11 - Product Life Cycle Assessment - Part B

Lecture 12 - Life Cycle Assessment using Software

Lecture 13 - Design for Product Life Cycle

Lecture 14 - Product-Service System Design - Definition and Types

Lecture 15 - Sustainable Product-Service System Design - Definition and Examples

Lecture 16 - Sustainable Product-Service System Design - Examples

Lecture 17 - Khadi Movement as a precursor to PSS thinking

Lecture 18 - Sustainable Product-Service System Design - Transition Paths, Strategy and Challenges

Lecture 19 - Sustainable Product-Service System Design - Methods and Tools - Part A

Lecture 20 - Sustainable Product-Service System Design - Methods and Tools - Part B

Lecture 21 - Sustainable Product-Service System Design - Methods and Tools - Part C

Lecture 22 - Sustainable Product-Service System Design - Methods and Tools - Part D

Lecture 23 - Sustainable Product-Service System Design - Methods and Tools - Part E

Lecture 24 - Sustainable Product-Service System Design - Methods and Tools - Part F

Lecture 25 - Sustainable Product-Service System Design - Methods and Tools - Part G

Lecture 26 - Sustainable Product-Service System Design - Methods and Tools (Summary)

Lecture 27 - Sufficiency Economy Philosophy applied to Sustainable PSS Thinking

Lecture 28 - LCA of PSS

Lecture 29 - Sustainable Product-Service System Design Applied to Distributed Economy

Lecture 30 - Other Design for Sustainability Tools and approaches - Architecture

Lecture 31 - Other Design for Sustainability Tools and approaches - Agriculture

[Lecture 32 - Other Design for Sustainability Tools and approaches - Cities and communities](#)

[Lecture 34 - Co-design Session](#)

[Lecture 35 - Design for Sustainability - Engineering Design Criteria and Guidelines](#)

[Lecture 36 - Design for Sustainability - Engineering Design Criteria and Guidelines \(ICS Toolkit\)](#)

[Lecture 37 - Design for Sustainability - Concluding Lecture - Part A](#)

[Lecture 38 - Design for Sustainability - Concluding Lecture - Part B](#)

Lecture 1 - Introduction to Innovation

Lecture 2 - Design Inspired Innovation and User Innovation

Lecture 3 - Product Design - Part I

Lecture 4 - Product Design - Part II

Lecture 5 - Product Design - Part III

Lecture 6 - Introduction to User study and Problem and need Identification

Lecture 7 - Contextual Enquiry

Lecture 8 - Physical model

Lecture 9 - Creative Techniques and tools for concept generation, concept evaluation

Lecture 10 - Importance and Overview of Human Factors/Ergonomics in Product Design

Lecture 11 - Physical Ergonomics Principles and Issues (Part 1) - Anthropometry

Lecture 12 - Physical Ergonomics Principles and Issues (Part 2) - Biomechanics

Lecture 13 - Cognitive and Emotional aspects of Human Factors with respect to Product Design and Innovation

Lecture 14 - Tools and Techniques for Prototyping

Lecture 15 - Evaluation Tools and Techniques for User-Product Interaction

Lecture 1 - Basic Definitions and Concepts in Interaction Design

Lecture 2 - Relevance of goals in Interaction Design

Lecture 3 - System model, mental model, and representation model

Lecture 4 - Interaction Models and Interaction Paradigms

Lecture 5 - Interaction paradigm

Lecture 6 - Overview of Goal Directed Design Process

Lecture 7 - The Research phase in Goal Directed Design Process - Part 1

Lecture 8 - The Research phase in Goal Directed Design Process - Part 2

Lecture 9 - The Research phase in Goal Directed Design Process - Part 3

Lecture 10 - The Modeling phase in Goal Directed Design Process

Lecture 11 - The Requirement definition phase in Goal Directed Design Process - Part 1

Lecture 12 - The Requirement definition phase in Goal Directed Design Process - Part 2

Lecture 13 - The Framework definition and refinement phase in Goal Directed Design Process - Interaction framework

Lecture 14 - The Framework definition and refinement phase in Goal Directed Design Process - Visual design and industrial design framework

Lecture 15 - Design evaluation and testing

Lecture 1 - Introduction to Automotive Ergonomics

Lecture 2 - Driver Information Acquisition and Processing

Lecture 3 - Anthropometric and Biomechanical Data in Automotive Design

Lecture 4 - Occupant Packaging : Basics and Details

Lecture 5 - Principles of Control and Display Design

Lecture 6 - Usability evaluation of In-vehicle control and displays

Lecture 7 - Human Fields of View and Driver's Fields of View

Lecture 8 - Vehicle Entry and Exit : Basics and Details

Lecture 9 - Driver Distraction and Driving Performance Measurement

Lecture 10 - Driver Workload Measurement

Lecture 11 - Virtual Ergonomics Evaluation Technique and its application in Automotive Design

Lecture 12 - Automotive Craftsmanship

Lecture 1 - Introduction to Ergonomics Workplace Assessment - I

Lecture 2 - Introduction to Ergonomics Workplace Assessment - II

Lecture 3 - Task Analysis

Lecture 4 - Physiological Fundamentals of Workplace Evaluation

Lecture 5 - Biomechanics in Workplace Evaluation

Lecture 6 - Assessment of Physical Job Demand

Lecture 7 - Assessment of Physical and Cognitive Work with Psychophysiological Methods

Lecture 8 - Assessment of Physical and Cognitive Work with Psychophysiological Methods

Lecture 9 - Assessment of Mental Workload

Lecture 10 - Neuroergonomics in Work Evaluation

Lecture 11 - Psychosocial Aspect of Workplace Analysis

Lecture 12 - Assessment of Thermal Environment

Lecture 13 - Assessment of Visual Environment

Lecture 14 - Analysis of Auditory Environment and Noise Pollution

Lecture 1 - Course Introduction

Lecture 2 - Introduction

Lecture 3 - Plan for Identifying av Belastnings faktorer (PLIBEL) method

**NPTEL : Introduction to Japanese Language and Culture (General)**

**Co-ordinators : Mrs. Vatsala Misra**

Lecture 1 - Introduction to Japanese scripts

Lecture 2 - Jiko shoukai (Self introduction)

Lecture 3 - Dochira kara desu ka ( Where are you from?)

Lecture 4 - Senmon wa nan desu ka (What is your specialization?)

Lecture 5 - Kore wa hon desu (This is a book)

Lecture 6 - Ikura desu ka (How much is it?)

Lecture 7 - Ima nan-ji desu ka (What is the time now?)

Lecture 8 - Kaigi wa roku-ji-han kara desu (The meeting is from 6:30)

Lecture 9 - Ashita Tokyo e ikimasu. (I will go to Tokyo tomorrow)

Lecture 10 - Watashi wa mainichi roku-ji ni okimasu (I wake up at 6 o'clock everyday)

Lecture 11 - Itsu Kanpur e kimashita ka (When did you come to Kanpur?)

Lecture 12 - Y?binkyoku wa asoko ni arimasu (The post office is over there)

Lecture 13 - Rao san wa doko ni imasu ka (Where is Mr. Rao?)

Lecture 14 - Pikuniku e ikimash? (Let's go for a picnic)

Lecture 15 - Kesa pan to tamago o tabemashita (I ate eggs and bread for breakfast)

Lecture 16 - Depa-to no tonari no biru wa gink? desu (The building next to the department store is the bank)

Lecture 17 - Taj hoteru wa ookii hoteru desu(Hotel Taj is a big hotel)

Lecture 18 - Hoteru de nani o tabemashita ka (What did you eat at the hotel?)

Lecture 19 - Tokyo wa ?kikute kirei desu (Tokyo is big and beautiful)

Lecture 20 - Ko-hi- wa oishiku arimasen(Coffee is not tasty)

Lecture 21 - Hantai kotoba (Opposites)

Lecture 22 - Watashi wa mainichi miruku o nomimasu (I drink milk everyday)

Lecture 23 - Watashi wa oniisan ni kamera o moratta(I received a camera from my brother)

Lecture 24 - Nani o tabetai desu ka(What do you want to eat?)

Lecture 25 - Nani o sashiagemasu ka (Giving and Receiving)

Lecture 26 - Sensei wa watashi ni hon o kuremashita (My teacher gave me a book)

Lecture 27 - Chotto matte kudasai ( Just a minute please)

Lecture 28 - Ke-ki o tabete mite kudasai ( Eat and see how is the cake)

Lecture 29 - Nani o shite imasu ka(What are you doing?)

Lecture 30 - Tokyo ni sunde imasu ( I live in Tokyo)

Lecture 31 - Kanji ga kakemasu (I can write Kanji)

[Lecture 32 - Im?to wa ningy? o hoshigatte imasu \(My sister wants a doll\)](#)

[Lecture 33 - Aisukuri-mu ga ke-ki yori suki desu \(I like ice-cream more than cakes\)](#)

[Lecture 34 - Kutsu o kai ni ikimasu \( I am going to buy shoes\)](#)

[Lecture 35 - Ashita motto atsuku narimasu \(It is going to become very hot tomorrow\)](#)

[Lecture 36 - Rainen Tokyo e iku to omoimasu \(I think I will go to Tokyo next year\)](#)

[Lecture 37 - Pen de kaite mo ii desu ka\(Is it alright to write in pen?\)](#)

[Lecture 38 - Comprehensions and Expressions](#)

[Lecture 39 - Basic Kanji](#)

[Lecture 40 - Basic Kanji](#)

[Lecture 1 - Introduction](#)

[Lecture 2 - Pre Siddhantic Astronomy](#)

[Lecture 3 - Siddhantic Astronomy](#)

[Lecture 4 - Astronomy in Medieval India](#)

[Lecture 5 - Introduction to Telescopic Astronomy and Concluding remarks](#)

**NPTEL : NOC:Stress Management (General)**

[Lecture 40 - Magnetohydrodynamic Power Generation](#)

Lecture 1 - What is satellite based remote sensing?

Lecture 2 - Development of remote sensing technology and advantages

Lecture 3 - Different platforms of remote sensing.

Lecture 4 - Electromagnetic Spectrum, solar reflection and thermal emission

Lecture 5 - Interaction of EM radiation with atmosphere including atmospheric scattering, absorption and emission

Lecture 6 - Interaction mechanism of EM radiation with ground and spectral response curve

Lecture 7 - Principles of image interpretation

Lecture 8 - Multi-spectral scanners and imaging devices

Lecture 9 - Salient characteristics of Landsat, IRS, Cartosat, Resourcesat sensors

Lecture 10 - Image characteristics and different resolutions in Remote Sensing

Lecture 11 - Image interpretation of different geological landforms, rock types and structures

Lecture 12 - Remote Sensing Integration with GIS and GPS

Lecture 13 - Geo-referencing Technique

Lecture 14 - Basic Image Enhancement Techniques

Lecture 15 - Spatial Filtering, Band ratio and Principal Component Analysis techniques

Lecture 16 - Image Classification Techniques

Lecture 17 - InSAR Techniques in its applications

Lecture 18 - Hyperspectral Remote Sensing

Lecture 19 - Integrated applications of RS and GIS in groundwater studies

Lecture 20 - Limitations of Remote Sensing Techniques

Lecture 1 - Introduction

Lecture 2 - Transcendental Consciousness

Lecture 3 - Plato's Theory of Mind

Lecture 4 - Parable of Cave : Plato's

Lecture 5 - Aristotle's Concept Mind

Lecture 6 - The Concept of Mind in Upanishadas

Lecture 7 - Dualism - I

Lecture 8 - Dualism - II

Lecture 9 - Dualism - III

Lecture 10 - Against Dualism

Lecture 11 - Property Dualism

Lecture 12 - Varieties of Materialism

Lecture 13 - Mind-Body Identity Theory

Lecture 14 - Functionalism

Lecture 15 - Different Models of Cognitive Mind

Lecture 16 - Connectionism and Folk - Psychology

Lecture 17 - Representation - I

Lecture 18 - Representation - II

Lecture 19 - Artificial Intelligence - I

Lecture 20 - Artificial Intelligence - II

Lecture 21 - Artificial Intelligence - III

Lecture 22 - The Limit of Artificial Intelligence - I

Lecture 23 - The Limit of Artificial Intelligence - II

Lecture 24 - Biological Naturalism

Lecture 25 - The Concept of Intentionality

Lecture 26 - The Structure of Consciousness - I

Lecture 27 - The Structure of Consciousness - II

Lecture 28 - Phenomenal Consciousness - I

Lecture 29 - Phenomenal Consciousness - II

Lecture 30 - Language, Representation & Meaning - I

Lecture 31 - Language & Meaning - II

[Lecture 32 - Language & Mind](#)

[Lecture 33 - Language & World - I](#)

[Lecture 34 - Language & World - II](#)

[Lecture 35 - Emergentism & Supervenience](#)

[Lecture 36 - Reduction & Realization - I](#)

[Lecture 37 - Reduction & Realization - II](#)

[Lecture 38 - The Cartesian Mind Revisited](#)

[Lecture 39 - Personal Identity - I](#)

[Lecture 40 - Personal Identity - II](#)

[Lecture 41 - Creativity : Human Vs Machine - I](#)

[Lecture 42 - Creativity : Human Vs Machine - II](#)

- Lecture 28 - A New Totality - II
- Lecture 29 - Modernity in India
- Lecture 30 - What have we discussed?

Lecture 1 - A Brief History of Cognitive Psychology - 1

Lecture 2 - A Brief History of Cognitive Psychology - 2

Lecture 3 - Studying Cognition

Lecture 4 - Perception:Basic Principles

Lecture 5 - Models of Perception - 1

Lecture 6 - Models of Perception - 2

Lecture 7 - Basic Attention Processes

Lecture 8 - Models of Attention

Lecture 9 - Automization and Attention

Lecture 10 - Memory Introduction

Lecture 11 - Short Term Memory

Lecture 12 - Working Memory

Lecture 13 - Long-Term Memory Encoding

Lecture 14 - Retrieval from Long-Term Memory

Lecture 15 - Semantic Memory Basics

Lecture 16 - Models of Semantic Memory

Lecture 17 - Introducing Concepts and Categories - 1

Lecture 18 - Introducing Concepts and Categories - 2

Lecture 19 - Basics of Visual Memory

Lecture 20 - Object Transformation in Visual Memory

Lecture 21 - Basic Issues in Language

Lecture 22 - Comprehension and Understanding of Language

Lecture 23 - Introduction to Problem Solving

Lecture 24 - Factors Influencing Problem Solving

Lecture 25 - Insight and Creativity

Lecture 26 - Reasoning - 1

Lecture 27 - Reasoning - 2

Lecture 28 - Classical Theory of Decision Making

Lecture 29 - Prospect Theory of Decision Making

Lecture 30 - Course Summary

- Lecture 1 - Introduction to the course
- Lecture 2 - Raja Rammohan Roy : Religious reforms
- Lecture 3 - Raja Rammohan Roy : Modern education
- Lecture 4 - Raja Rammohan Roy : Freedom of Press
- Lecture 5 - Rabindranath Tagore : Nationalism
- Lecture 6 - Rabindranath Tagore : Cosmopolitanism
- Lecture 7 - Rabindranath Tagore : Idea of man
- Lecture 8 - Aurobindo Ghosh : Self
- Lecture 9 - Aurobindo Ghosh : Community and Religion
- Lecture 10 - Vivekananda : Introduction
- Lecture 11 - Vivekananda : Revitalisation of Indian life
- Lecture 12 - Mahatma Gandhi : Introduction
- Lecture 13 - Mahatma Gandhi : Hind swaraj and Critique of Modern Civilisation
- Lecture 14 - Mahatma Gandhi : India of His Dreams
- Lecture 15 - Muhammad Iqbal : Community
- Lecture 16 - Muhammad Iqbal : Religion and Nation
- Lecture 17 - Savarkar : Introduction
- Lecture 18 - Savarkar : Hinduism and Hindutva
- Lecture 19 - Jawaharlal Nehru : Discovery of India
- Lecture 20 - Jawaharlal Nehru : Secularism
- Lecture 21 - Jawaharlal Nehru : Internationalism
- Lecture 22 - B.R.Ambedkar : Introduction
- Lecture 23 - B.R.Ambedkar : Caste
- Lecture 24 - B.R.Ambedkar : Liberal Democracy and Constitutional Morality
- Lecture 25 - Pandita Ramabai : Introduction
- Lecture 26 - Pandita Ramabai : Gender and Caste
- Lecture 27 - Rammanohar Lohia : Introduction
- Lecture 28 - Rammanohar Lohia : Caste and Class
- Lecture 29 - Rammanohar Lohia : Views on Indian Languages
- Lecture 30 - Conclusion

Lecture 1 - Introduction to Consumer Psychology - I

Lecture 2 - Introduction to Consumer Psychology - II

Lecture 3 - Problem Recognition - I

Lecture 4 - Problem Recognition - II

Lecture 5 - Alternate Evaluation - I

Lecture 6 - Alternate Evaluation - II

Lecture 7 - Alternate Evaluation - III

Lecture 8 - Post Purchase and Consumption - I

Lecture 9 - Post Purchase and Consumption - II

Lecture 10 - Perception and Cognition - I

Lecture 11 - Perception and Cognition - II

Lecture 12 - Memory and Learning - I

Lecture 13 - Memory and Learning - II

Lecture 14 - Emotion Motivation and Mood - I

Lecture 15 - Emotion Motivation and Mood - II

Lecture 16 - Attitude and Attitude Change - I

Lecture 17 - Attitude and Attitude Change - II

Lecture 18 - Communication and Persuasion - I

Lecture 19 - Communication and Persuasion - II

Lecture 20 - Summary

Lecture 1 - Sanskrit and National Theatre

Lecture 2 - History of Parsi Theatre and Female Impersonation

Lecture 3 - Female Impersonation and Indian Folk Traditions

Lecture 4 - Early Indian Playwrights

Lecture 5 - Silence! The Court is in Session

Lecture 6 - A Friend's Story

Lecture 7 - Ghashiram Kotwal

Lecture 8 - Kanyadaan

Lecture 9 - Hayavadana

Lecture 10 - Tughlaq

Lecture 11 - The Dreams of Tipu Sultan

Lecture 12 - The Fire and the Rain

Lecture 13 - Broken Images

Lecture 14 - Summary

Lecture 15 - Introduction and Garbo

Lecture 16 - Old Stone Mansion

Lecture 17 - Desire in the Rocks

Lecture 18 - Sonata

Lecture 19 - Summary of Mahesh Elkunchwar

Lecture 20 - Introduction and Final Solutions

Lecture 21 - Bravely Fought the Queen

Lecture 22 - Dance Like a Man

Lecture 23 - Summary of Mahesh Dattani

Lecture 24 - Introduction and Procession

Lecture 25 - Bhoma

Lecture 26 - Stale News and Summary

Lecture 27 - Conclusion

Lecture 1 - General Outline and methods

Lecture 2 - Political theories and ideologies

Lecture 3 - Liberty: republican conception of freedom

Lecture 4 - Freedom as autonomy; Positive and negative liberty

Lecture 5 - Freedom as Swaraj, Free speech and hate speech

Lecture 6 - Introduction: Equity and egalitarianism

Lecture 7 - Equality of opportunity; preferential treatment

Lecture 8 - Luck Egalitarianism and its critiques; Equality and Liberty

Lecture 9 - Introduction and forms of rights

Lecture 10 - Conflicts between rights

Lecture 11 - Rights and Duties

Lecture 12 - Justice : A distributive concept

Lecture 13 - Justice : Procedural and Substantive; Justice as fairness

Lecture 14 - Justice : Capability approach; libertarian, communitarian conception of Justice

Lecture 15 - Justice : Feminist conceptions of justice; Global justice

Lecture 16 - Introduction to Power and authority

Lecture 17 - Power, legitimacy and hegemony

Lecture 18 - Power and knowledge; different conceptions of power

Lecture 19 - Introduction and different conceptions of state and sovereignty

Lecture 20 - Modern nation state; liberal, Marxist and feminist conceptions of state

Lecture 21 - State and governmentality

Lecture 22 - Introduction: Procedural and Substantive Democracy

Lecture 23 - Various models of democracy

Lecture 24 - Challenges and Limits of Democracy; Free press and Democracy

Lecture 25 - Citizenship: Subject and Citizen

Lecture 26 - T H Marshal and liberal conceptions of citizenship as legal and equal member

Lecture 27 - Multiculturalism and Cosmopolitan Citizenship

Lecture 28 - Introduction; Doom and Gloom; Democracy and environmental crisis

Lecture 29 - Climate change and environmental justice

Lecture 30 - Revisiting some key themes and concepts

Lecture 1 - Introduction to the Science of Human Behavior - I

Lecture 2 - Introduction to the Science of Human Behavior - II

Lecture 3 - Sensation - I

Lecture 4 - Sensation - II

Lecture 5 - Perception - I

Lecture 6 - Perception - II

Lecture 7 - Learning - I

Lecture 8 - Learning - II

Lecture 9 - Memory - I

Lecture 10 - Memory - II

Lecture 11 - Language - I

Lecture 12 - Language - II

Lecture 13 - Intelligence - I

Lecture 14 - Intelligence - II

Lecture 15 - Emotion - I

Lecture 16 - Emotion - II

Lecture 17 - Personality - I

Lecture 18 - Personality - II

Lecture 19 - Social Influence and Cognition - I

Lecture 20 - Social Influence and Cognition - II

Lecture 21 - Summary

Lecture 1 - Communication and Language - I

Lecture 2 - Communication and Language - II

Lecture 3 - Science of Language - I

Lecture 4 - Science of Language - II

Lecture 5 - Speech Perception - I

Lecture 6 - Speech Perception - II

Lecture 7 - Speech Production - I

Lecture 8 - Speech Production - II

Lecture 9 - Words - I

Lecture 10 - Words - II

Lecture 11 - Words - III

Lecture 12 - Sentences - I

Lecture 13 - Sentences - II

Lecture 14 - Discourse - I

Lecture 15 - Discourse - II

Lecture 16 - Reading and Writing - I

Lecture 17 - Reading and Writing - II

Lecture 18 - Bilingualism - I

Lecture 19 - Bilingualism - II

Lecture 20 - Overall Review

Lecture 1 - Reflections on Development Studies and Development Research

Lecture 2 - Types, Forms, and Processes of Development Studies Research

Lecture 3 - The Rigour in Development Studies Research

Lecture 4 - Paradigms of Development Research

Lecture 5 - Development Research-Development Work Continuum and Action Research in Development Studies

Lecture 6 - Ethics in Development Studies and Development Research

Lecture 7 - Literature Study

Lecture 9 - Introducing Qualitative Research Methods

Lecture 10 - Introducing Qualitative Research Methods (Continued...)

Lecture 11 - Interviews and Focus Group Discussions

Lecture 12 - Participatory Methods and Approaches

Lecture 13 - Conducting Case Studies and Maintaining Field Diaries

Lecture 14 - Introducing Quantitative Research Methods

Lecture 15 - An Overview of Mixed Methods Research

Lecture 16 - Field Surveys and Inventories

Lecture 17 - Logical Framwork and SWOT Analysis

Lecture 18 - The importance of Census and other Secondary Data in Development Studies

Lecture 19 - Communicating Research

Lecture 20 - Operationalizing Rights-based Approaches to Development

Lecture 21 - Poverty Measures and Analysis

Lecture 22 - Gender-sensitive Indicators and Gender Analysis

Lecture 23 - Social Capital Assessment Tools

Lecture 24 - Moitoring and Evaluation

Lecture 25 - A Final Note

Lecture 1 - Introduction and General Outline

Lecture 2 - Sources and Methodology to Study Indian Business History

Lecture 3 - East India Company's early ventures in India

Lecture 4 - Agency Houses: Jagat Seths and Early Banking operations

Lecture 5 - Emergence of Bombay and Cotton Trade, 1750-1850

Lecture 6 - Indian Business: Changes and Styles

Lecture 7 - Emergence of Calcutta: Impact on Industries

Lecture 8 - Swadeshi Movement: Impact on Indian Industries

Lecture 9 - Case Studies: Indian Business Houses: TATAs

Lecture 10 - Indian Economy and Business during WW I

Lecture 11 - Impact of the Second World War WW II

Lecture 12 - Political Economy of the Global wars for India; Case Study: Hindustan Aeronautics Limited (HAL)

Lecture 13 - Impact of Independence and Partition: Evolution of the Railways in India

Lecture 14 - Planning, Statistics and Industrialization Policies

Lecture 15 - Global Currents of economic Thought, 1947-1960

Lecture 16 - Industrial Licensing Policies, Institutions 1947-1964

Lecture 17 - Industrial Licensing Policies, 1966-1980

Lecture 18 - Case Study: Amul and Rural Cooperatives

Lecture 19 - Liberalisation of the Indian Economy, 1990s

Lecture 20 - Business Developments in India; India's Energy Diplomacy through ONGC

Lecture 21 - Indian Business History: Trends and Prospects

Lecture 22 - Learning Outcomes from Indian Business History

Lecture 1 - General Outline and Method

Lecture 2 - Method: Text and Context

Lecture 3 - Intro and Justice

Lecture 4 - State and Philosopher King

Lecture 5 - Communism of Wives and Property and Critical Assessment of his Thought

Lecture 6 - Intro and Ethics or Virtue

Lecture 7 - Politics and His Ideal State

Lecture 8 - Aristotle-III: Citizenship, Views on Revolution and Critical Assessment of his Thought

Lecture 9 - Machiavelli-I: Intro and Virtue and Fortuna

Lecture 10 - Machiavelli-II: Politics, Violence, and Religion

Lecture 11 - Machiavelli-III: Republicanism and Critical Assessment of his Thought

Lecture 12 - Intro and Human Nature

Lecture 13 - The Leviathan or Sovereign

Lecture 14 - Political Obligation and Critical Assessment of his Thought

Lecture 15 - Intro, State of Nature and Natural Rights

Lecture 16 - Limited Government

Lecture 17 - Right to Dissent and Critical Assessment of his Thought

Lecture 18 - Rousseau-I: Intro and Social Contract

Lecture 19 - Rousseau-II: General Will and Critical Assessment of his Thought

Lecture 20 - Kant-I: Intro and What is Enlightenment?

Lecture 21 - Kant-II: Morality, Autonomy and Freedom

Lecture 22 - Kant-III: Kingdom of Ends and Critical Assessment of his Thought

Lecture 23 - Hegel-I: Intro and Freedom

Lecture 24 - Hegel-II: Civil Society and State

Lecture 25 - Hegel-III: Rights and Critical Assessment of his Thought

Lecture 26 - Marx-I: Intro and Historical Materialism

Lecture 27 - Marx-II: State and Class

Lecture 28 - Marx-III: Views on Politics, Communism and Critical Assessment of his Thought

Lecture 29 - Mill-I: Intro, Utilitarianism and Subjection of Women

Lecture 30 - Mill-II: On Liberty, Representative Government and Critical Assessment of his Thought

Lecture 1 - The Nature of Stress - 1

Lecture 2 - The Nature of Stress - 2

Lecture 3 - The Biology of Stress

Lecture 4 - Stress, Health, and Non-infectious Diseases

Lecture 5 - Stress and Infectious Diseases

Lecture 6 - Stress and Psychological Disorders

Lecture 7 - Stress, Trauma and Posttraumatic growth - 1

Lecture 8 - Stress, Trauma and Posttraumatic growth - 2

Lecture 9 - Factors Influencing Stress Tolerance

Lecture 10 - Coping Strategies: Definition and Types

Lecture 11 - Unconscious mind and defensive coping

Lecture 12 - Characteristics of constructive coping; Physical ways of coping

Lecture 13 - Coping with relaxation exercises

Lecture 14 - Mental ways of coping

Lecture 15 - Coping with social support

Lecture 16 - Coping with meditation and mindfulness

Lecture 17 - Positive mental health and well-being

Lecture 18 - Well-being and resilience

Lecture 19 - What is happiness? What makes us happy?

Lecture 20 - Socio-demographic factors and happiness

Lecture 21 - Positive emotions

Lecture 22 - Genetic set point and hedonic adaptation

Lecture 23 - Sustainable happiness model

Lecture 24 - Sustainable happiness with intentional activities

Lecture 25 - Cultivating happiness with gratitude

Lecture 26 - Cultivating happiness with acts of kindness

Lecture 27 - Social comparison and happiness

Lecture 28 - Cultivating happiness with signature strengths 1 (VIA character strengths)

Lecture 29 - Cultivating happiness with signature strengths 2 (Gallup's/Clifton strength finder)

Lecture 30 - Cultivating happiness with Flow

Lecture 31 - Humanistic psychology and self-actualization

[Lecture 32 - Self-determination, motivation, and well-being](#)

[Lecture 33 - Meaning in life and well-being](#)

[Lecture 34 - Life goals and well-being](#)

Lecture 1 - Articulation of consonants - 1

Lecture 2 - Articulation of consonants - 2

Lecture 3 - Articulation of vowels

Lecture 4 - Language endangerment and linguistic diversity

Lecture 5 - Linguistic diversity - consonants in the languages of the world

Lecture 6 - Linguistic diversity - consonants and vowels in the languages of the world

Lecture 7 - Linguistic diversity - conclusion

Lecture 8 - Acoustic analysis: sound waves

Lecture 9 - Acoustic analysis: source filter theory and spectrograms

Lecture 10 - Acoustic analysis: vowels and formants

Lecture 11 - Acoustic analysis: formant calculation

Lecture 12 - Perceptual cues, variability in the speech signal, acoustic-phonetic invariance

Lecture 13 - Segmentation problem, categorical perception, cp in infants and animals

Lecture 14 - Measuring perceptual distinctiveness, multidimensional scaling, speech perception theories

Lecture 15 - development of the ideas of phonemes and features

Lecture 16 - phonemes as categories, phonemes in different languages, allophonic rules

Lecture 17 - problems in phonemic analysis, context and phonotactics

Lecture 18 - Psychological reality of phonemes

Lecture 19 - Distinctive features and natural classes

Lecture 20 - Phonological rule application

Lecture 21 - Distinctive features, feature economy and markedness

Lecture 22 - Morphophonological rules

Lecture 23 - Syllables

Lecture 24 - Stress

Lecture 25 - Phonetics and phonology of intonation, microprosody, stylization

Lecture 26 - Nuclear tone, pitch accent and boundary tones

Lecture 27 - Focus, givenness

Lecture 1 - Empiricism and Rationalism

Lecture 2 - Comte and Positivism; Epistemology and Ontology

Lecture 3 - The Rules of Sociological Method

Lecture 4 - Sociology of Knowledge

Lecture 5 - Religion and the Division of Labour in Society

Lecture 6 - Positivism and Neo-Kantianism

Lecture 7 - Methodology of the Social Sciences

Lecture 8 - Interpretive Sociology

Lecture 9 - Methodological Individualism and Interpretative Understanding of Social Action

Lecture 10 - Weberian Social Sciences: Methodological Implications

Lecture 11 - Materialist Conception of History

Lecture 12 - Dialectic

Lecture 13 - Nature, Ideology and Science

Lecture 14 - Systematic Falsification

Lecture 15 - Hypothetico - Deductive Model

Lecture 16 - The Structure of Scientific Revolutions

Lecture 17 - Popper Versus Kuhn

Lecture 18 - Positivism Versus Hermeneutics - I

Lecture 19 - Positivism Versus Hermeneutics - II

Lecture 20 - Philosophy of Social Sciences: Taking Stock

Lecture 21 - End of the Philosophy of the Social Sciences

Lecture 22 - Return of Grand Theory in the Human Sciences

Lecture 23 - An Overview of the Course

- Lecture 1 - Sociology of development: An overview
- Lecture 2 - Development historically
- Lecture 3 - Decolonization, nationalism and development - I
- Lecture 4 - Decolonization, nationalism and development - II
- Lecture 5 - Decolonization, nationalism and development - III
- Lecture 6 - Social evolution and social change
- Lecture 7 - Social change and progress
- Lecture 8 - Modernization Theory: An Overview
- Lecture 9 - State and Class under Peripheral Capitalism
- Lecture 10 - Critique of Samuel Huntington
- Lecture 11 - Class, State and Revolution
- Lecture 12 - The Empirical Peasantry and the Hypothetical Proletariat
- Lecture 13 - Class and Classness: Substitutes and Realities
- Lecture 14 - Modernization and Huntington's Argument
- Lecture 15 - Huntington, Social Sciences and Ideology
- Lecture 16 - The Ideological, Empirical and Methodological Critiques - I
- Lecture 17 - The Ideological, Empirical and Methodological Critiques - II
- Lecture 18 - Dependency Theory: Intellectual Antecedents
- Lecture 19 - The Latin American Debates on Underdevelopment - I
- Lecture 20 - The Latin American Debates on Underdevelopment - II
- Lecture 21 - Dependency Theory in Transition - I
- Lecture 22 - Dependency Theory in Transition - II
- Lecture 23 - Critiques of Dependency Theory - I
- Lecture 24 - Critiques of Dependency Theory - II
- Lecture 25 - Limits to Growth - I
- Lecture 26 - Limits to Growth - II
- Lecture 27 - E. F. Schmacher's Small is Beautiful
- Lecture 28 - Ivan Illich's Towards a History of Needs
- Lecture 29 - Paradigms Lost, Paradigms Regained: Development studies in the 21st century - I
- Lecture 30 - Paradigms Lost, Paradigms Regained: Development studies in the 21st century - II

- Lecture 1 - Development, Economic Growth and Sustainable Development
- Lecture 2 - Basic Ecosystem Ecology
- Lecture 3 - Environmentalism
- Lecture 4 - Environmental movement
- Lecture 5 - Environmentalism in the global south
- Lecture 6 - Ecofeminism
- Lecture 7 - Feminist political ecology
- Lecture 8 - Marx and ecology
- Lecture 9 - Deep ecology
- Lecture 10 - Gandhi and ecology
- Lecture 11 - Social ecology
- Lecture 12 - Religion, environment and historical roots of ecological crisis
- Lecture 13 - Biodiversity conservation ethics in Buddhism and Hinduism
- Lecture 14 - Christian religion in the age of ecological crisis
- Lecture 15 - Natural resource management
- Lecture 16 - Common property vs. private property
- Lecture 17 - Livelihoods, forests, and conservation
- Lecture 18 - Conservation-induced displacement
- Lecture 19 - Environment impact assessment and national rehabilitation and resettlement policy
- Lecture 20 - Dispossession and land acquisition
- Lecture 21 - Mining, development, and indigenous people
- Lecture 22 - Competing visions of development along the Narmada
- Lecture 23 - Dams, development, and resistance: Case studies
- Lecture 24 - Development theory and gendered approach to development
- Lecture 25 - Gender, environment and sustainable development
- Lecture 26 - Climate change interventions and policy framework
- Lecture 27 - Eastern Himalayas and climate change
- Lecture 28 - Ecological knowledge, biodiversity conservation and sustainability
- Lecture 29 - Traditional religion and conservation of nature in Northeast India: Case study
- Lecture 30 - Indigenous knowledge, environment and development
- Lecture 31 - Relevance of indigenous knowledge: Case study

- Lecture 1 - Introduction to Industrial Organization, Preferences
- Lecture 2 - Utility maximization and derivation of demand curve
- Lecture 3 - Examples of utility maximization, demand curve and market demand curve
- Lecture 4 - Tutorial Module 1
- Lecture 5 - Production Function
- Lecture 6 - Cost minimization problem
- Lecture 7 - Derivation of cost curves
- Lecture 8 - Tutorial on Production and cost curves
- Lecture 9 - Optimal output and supply curve of a firm
- Lecture 10 - Derivation of Market price in competitive market
- Lecture 11 - Long run market price and Pareto optimality
- Lecture 12 - Tutorial on Perfectly Competitive Market
- Lecture 13 - Monopoly price
- Lecture 14 - Price Discrimination - I
- Lecture 15 - Price Discrimination - II
- Lecture 16 - Tutorial on Monopoly
- Lecture 17 - Introduction to Game Theory, Iterated Elimination of Dominated Strategy
- Lecture 18 - Pure Strategy Nash Equilibrium
- Lecture 19 - Mixed Strategy Nash Equilibrium
- Lecture 20 - Existence of Nash Equilibrium in Games with 2 Players and 2 Strategies
- Lecture 21 - Tutorial on Normal Form Games
- Lecture 22 - Dynamic Games, Backward Induction
- Lecture 23 - Subgame Perfect Nash Equilibrium
- Lecture 24 - Tutorial on Dynamic Games
- Lecture 25 - Cournot Duopoly
- Lecture 26 - Cournot Oligopoly
- Lecture 27 - Tutorial on Cournot Competition
- Lecture 28 - Bertrand Competition with and without fixed cost
- Lecture 29 - Bertrand Competition with capacity constraint
- Lecture 30 - Bertrand Competition with capacity constraint
- Lecture 31 - Tutorial on Bertrand Competition

[Lecture 32 - Bertrand Competition with Decreasing returns to scale](#)

[Lecture 33 - Stackelberg Quantity Competition](#)

[Lecture 34 - Tutorial on Bertrand Competition and Stackelberg Quantity Competition](#)

[Lecture 35 - Stackelberg Price Competition](#)

[Lecture 36 - Simultaneous move Hotelling Model](#)

[Lecture 37 - Tutorial on Stackelberg Price Competition](#)

[Lecture 38 - Sequential Move Hotelling Model](#)

[Lecture 39 - Dixit's Model of Entry Deterrence](#)

[Lecture 40 - Tutorial on Sequential move Hotelling Model](#)

[Lecture 41 - Dixit's Model of Entry Deterrence](#)

[Lecture 42 - Bundling and Tying](#)

[Lecture 43 - Tutorial on Dixit's Model of Entry Deterrence](#)

Lecture 1 - Aim of the course, real numbers

Lecture 2 - Logic, proof

Lecture 3 - Definitions

Lecture 4 - Set operations

Lecture 5 - Definitions

Lecture 6 - Linear functions

Lecture 7 - Quadratic functions

Lecture 8 - Exponential functions, etc.

Lecture 9 - Differentiation: preliminaries

Lecture 10 - Rules of differentiation

Lecture 11 - Partial differentiation

Lecture 12 - Higher order differentiations

Lecture 13 - Approximations and elasticities

Lecture 14 - Differentiability, series, PDV

Lecture 15 - NPV, evaluation of investment projects

Lecture 16 - Exponential, logarithmic functions

Lecture 17 - Tutorials - 1a

Lecture 18 - Tutorials - 1b

Lecture 19 - Tutorials - 1c

Lecture 20 - Extreme, stationary points, first derivative test

Lecture 21 - Global and local extreme points

Lecture 22 - Second derivative test

Lecture 23 - Inflection points

Lecture 24 - Profit maximizations

Lecture 25 - Area under a curve, indefinite integral

Lecture 26 - Definite integral

Lecture 27 - Oil extraction, income distribution, PDV

Lecture 28 - Integration by parts, substitution, Lorenz curve

Lecture 29 - First order difference equations, solution

Lecture 30 - Dynamic stability, Cobweb model

Lecture 31 - Market model with inventory, Phase diagrams, Higher order equations

[Lecture 32 - Multiplier-acceleration model](#)

[Lecture 33 - Tutorials - 2a](#)

[Lecture 34 - Tutorials - 2b](#)

Lecture 1 - Nature of human thought - I

Lecture 2 - Brain and cognition, Seat of thought - II

Lecture 3 - Language, meaning, reality - III

Lecture 4 - Categorization

Lecture 5 - Categorization: (Continued...)

Lecture 6 - Frames: another way to understand categories

Lecture 7 - Metaphor

Lecture 8 - Metaphor and Metonymy

Lecture 9 - Image schema

Lecture 10 - Image schema (Continued...)

Lecture 11 - Language acquisition

Lecture 12 - Language acquisition (Continued...)

Lecture 13 - Language in the brain

Lecture 14 - Language in the brain (Continued...)

Lecture 15 - Language and attention

Lecture 16 - Language and visual attention

Lecture 17 - Attention in Sentence processing

Lecture 18 - Executive control/function and its facets

Lecture 19 - Role of executive function in language processing

Lecture 20 - Mental simulation and its relation with language; summary of the course

Lecture 1 - Becoming and being bilingual

Lecture 2 - Attitude, Acculturation and Bilingualism

Lecture 3 - Who is a Bilingual ?

Lecture 4 - Bilingual acquisition among children: simultaneous bilingualism

Lecture 5 - Successive Bilingualism

Lecture 6 - Language and cognition among bilinguals

Lecture 7 - Bilingual cognition (Continued...)

Lecture 8 - Bilingual Memory Models

Lecture 9 - Bilingual brain: neural representation of languages

Lecture 10 - Data from processing studies on bilingual representation in brain

Lecture 11 - Speech perception and comprehension: theories

Lecture 12 - Speech perception and production studies

Lecture 13 - Lexical processing: background

Lecture 14 - Lexical processing: different experimental paradigms: comprehension and production

Lecture 15 - Sentence processing

Lecture 16 - Metalinguistic Awareness

Lecture 17 - Executive Control: bilingual advantage

Lecture 18 - cognitive reserve, new developments

Lecture 19 - New research trends in bilingualism

Lecture 20 - New models. Applied areas

Lecture 1 - Emotions: Concepts and Categories

Lecture 2 - Historical Background and Theories

Lecture 3 - Communication and Measurement of Emotions

Lecture 4 - Universals and cultural differences in emotions - 1

Lecture 5 - Universals and cultural differences in emotions - 2

Lecture 6 - Emotions and the Body

Lecture 7 - Emotions and the Brain

Lecture 8 - Self-evaluative emotions-Guilt, shame, Embarrassment, and pride

Lecture 9 - Social Comparison Emotions-Envy and Jealousy

Lecture 10 - Positive Emotions

Lecture 11 - Happiness and Subjective Well-being - 1

Lecture 12 - Happiness and Subjective Well-being - 2

Lecture 13 - Emotions in Groups - 1

Lecture 14 - Emotions in Groups - 2

Lecture 15 - Emotions and Cognitions: Introduction

Lecture 16 - Emotion and Memory

Lecture 17 - Emotion and Judgment/Decision making

Lecture 18 - Depression

Lecture 19 - Anxiety Disorders

Lecture 20 - Emotion regulation: Introduction

Lecture 21 - Adaptive emotion regulation using ABC model

Lecture 22 - Adaptive emotion regulation using mindfulness

Lecture 23 - Emotional intelligence: Introduction

Lecture 24 - Skills of EI-Self-awareness

Lecture 25 - Skills of EI-Self-regulation/Self-management

Lecture 26 - Skills of EI-Self-Motivation

Lecture 27 - Skills of EI-Empathy

Lecture 28 - Skills of EI-Social intelligence and social skills

Lecture 29 - Emotional intelligence and workplace

Lecture 30 - Emotional intelligence, health and well-being

Lecture 31 - Development of emotional intelligence

Lecture 1 - Introduction

Lecture 2 - Barriers to Communication - 1

Lecture 3 - Barriers to Communication - 2

Lecture 4 - Barriers to Communication - 3

Lecture 5 - Non-Verbal Communication - 1

Lecture 6 - Non-Verbal Communication - 2

Lecture 7 - Non-Verbal Communication - 3

Lecture 8 - Non-Verbal Communication - 4

Lecture 9 - Non-Verbal Communication - 5

Lecture 10 - Listening Skills - 1

Lecture 11 - Listening Skills - 2

Lecture 12 - Listening Skills - 3

Lecture 13 - Business Letters Writing - 1

Lecture 14 - Business Letters Writing - 2

Lecture 15 - Business Letters Writing - 3

Lecture 16 - Business Letters Writing - 4

Lecture 17 - Report Writing - 1

Lecture 18 - Report Writing - 2

Lecture 19 - Group Discussion - 1

Lecture 20 - Group Discussion - 2

Lecture 21 - Group Discussion - 3

Lecture 22 - Interview Skills - 1

Lecture 23 - Interview Skills - 2

Lecture 24 - Interview Skills - 3

Lecture 25 - Interview Skills - 4

Lecture 26 - Interview Skills - 5

Lecture 27 - Interview Skills - 6

Lecture 28 - Interview Skills - 7

Lecture 29 - Netiquette - 1

Lecture 30 - Netiquette - 2

Lecture 5 - Raja Ravi Varma, Amrita Sher-Gil, Jamini Roy: In search of Indian Identity

Lecture 6 - Early Modern Indian Sculpture

Lecture 7 - Nationalism, Rabindranath Tagore and Bengal School

Lecture 8 - Calcutta - the happening center of modern Indian art

Lecture 9 - Santiniketan - the alternative modernism Nandalal and Benode Behari

Lecture 10 - Santiniketan - the alternative modernism Ramkinkar and Rabindranath

Lecture 11 - 1940s - a different social reality

Lecture 12 - Calcutta Groups and Bombay Progressive Artists Group

Lecture 13 - Post Independent Sculpture

Lecture 14 - Diversities in style and content : 1950s onward (I)

Lecture 15 - Diversities in style and content : 1950s onward (II)

Lecture 16 - Abstraction in modern Indian art

Lecture 17 - Neo figuration and the narrative trends

Lecture 18 - Folk Art and Modernism

Lecture 19 - Breaking the barriers: Unconventional mediums and ideas

Lecture 20 - Experiments Innovations: Past and Future

Lecture 1 - Introduction to Japanese Scripts

Lecture 2 - Jikou Shoukai

Lecture 3 - Dochira kara desu ka?

Lecture 4 - Senmon wa nan desu ka?

Lecture 5 - Kore wa hon desu.

Lecture 6 - Are wa nan desu ka?

Lecture 7 - Ikura desu ka?

Lecture 8 - Ima nan-ji desu ka?

Lecture 9 - Kaigi wa roku-ji han kara desu.

Lecture 10 - Ashita TÅkyÅ e ikimasu.

Lecture 11 - Watashi wa mainichi roku-ji ni okimasu.

Lecture 12 - Itsu Kanpur e kimashita ka?

Lecture 13 - YÅ«binkyoku wa asoko ni arimasu.

Lecture 14 - Rao san wa doko ni imasu ka?

Lecture 15 - Pikunikku e ikimashÅ.

Lecture 16 - Kesa pan to tamago o tabemashita. Å»

Lecture 17 - Depa-to no tonari no biru wa ginkÅ desu.

Lecture 18 - Taj hoteru wa ookii hoteru desu.

Lecture 19 - Hoteru de nani o tabemashita ka?

Lecture 20 - TÅkyÅ wa Åki kute kirei desu.

Lecture 21 - Ko-hi- wa oishiku arimasen.

Lecture 22 - Hantai Kotoba ( Opposites)

Lecture 23 - Watashi wa mainichi miruku o nomimasu.

Lecture 24 - Watashi wa oniisan ni kamera o moratta.

Lecture 25 - Nani o tabetai desu ka?

Lecture 26 - Nani o sashiagemasu ka?

Lecture 27 - Sensei wa watashi ni hon o kuremashita.

Lecture 28 - Watashi wa pikunikku e ikitakunai.

Lecture 29 - Chotto matte kudasai.

Lecture 30 - Ke-ki o tabete mite kudasai.

Lecture 31 - Heya ni nani ga arimasu ka?

Lecture 32 - Nani o shite imasu ka?

Lecture 33 - TÅkyÅ ni sunde imasu.

Lecture 34 - Kanji ga kakemasu.

Lecture 35 - ImÅto wa ningyÅ o hoshigatte imasu.

Lecture 36 - Watashi wa Aisukuri-mu ga daisuki desu.

Lecture 37 - Aisukuri-mu ga ke-ki yori suki desu.

Lecture 38 - Kutsu o kai ni ikimasu.

Lecture 39 - Ashita motto atsuku narimasu.

Lecture 40 - Rainen TÅkyÅ e iku to omoimasu.

Lecture 41 - Pen de kaite mo ii desu ka.

Lecture 42 - New Expressions

Lecture 43 - Revision

Lecture 44 - Kanji I

Lecture 45 - Kanji II

Lecture 1 - Introduction to Statistics

Lecture 2 - Introduction to Econometrics

Lecture 3 - Organization and Presentation of Data

Lecture 4 - Summarizing Data through Descriptive Statistics

Lecture 5 - Discrete Random Variable and Probability Distribution

Lecture 6 - Continuous Random Variables and Probability Distribution

Lecture 7 - Normal Distribution

Lecture 8 - Introduction to Statistical Inference

Lecture 9 - Estimation - Part I

Lecture 10 - Estimation - Part II

Lecture 11 - Hypothesis Testing - Part I

Lecture 12 - Hypothesis Testing - Part II

Lecture 13 - Hypothesis Testing - Part III

Lecture 14 - Hypothesis Testing - Part IV

Lecture 15 - Relationship between Qualitative Variables

Lecture 16 - Relationship Between Quantitative Variables

Lecture 17 - Analysis of Variance

Lecture 18 - One Way ANOVA

Lecture 19 - Two Way ANOVA

Lecture 20 - Analysis of Covariance

Lecture 21 - Index Numbers - Part I

Lecture 22 - Index Numbers - Part II

Lecture 23 - Classical Time Series Analysis - Part I

Lecture 24 - Classical Time Series Analysis - Part II

Lecture 25 - Classical Linear Regression Model - Part I

Lecture 26 - Classical Linear Regression Model - Part II

Lecture 27 - Classical Linear Regression Model

Lecture 28 - Hypothesis Testing with CNLRM

Lecture 29 - More on Hypothesis Testing and Model Specification

Lecture 30 - Violations of CLRM Assumptions (Heteroskedasticity)

Lecture 31 - Violations of CLRM Assumptions (Autocorrelation and Multicollinearity)

[Lecture 32 - Time Series Regression with Stationary Data](#)

[Lecture 33 - Time Series Regression with Non-Stationary Data](#)

[Lecture 34 - Regression with Dummy Explanatory Variable](#)

[Lecture 35 - Dummy Dependent Variable Models - Part I](#)

[Lecture 36 - Dummy Dependent Variable Models - Part II](#)

[Lecture 37 - Simultaneous Equations Model](#)

[Lecture 38 - Panel Data Regression](#)

[Lecture 39 - Program Evaluation](#)

[Lecture 40 - Data Analysis and Regression with R](#)

[Lecture 41 - Regression Involving Dummy Variables in R](#)

[Lecture 42 - Time Series Analysis in R](#)

- Lecture 1 - Existential Concerns - I

Lecture 1 - Japanese scripts

Lecture 2 - Watashi wa Tanaka desu

Lecture 3 - Dochira kara desu ka?

Lecture 4 - Pen wa watashi no desu

Lecture 5 - Watashi mo gakusei desu

Lecture 6 - Nan sai desu ka?

Lecture 7 - Ikura desu ka?

Lecture 8 - Irasshaimase

Lecture 9 - Nan-ji desu ka?

Lecture 10 - Kyou wa getsuyoubi desu

Lecture 11 - Doko desu ka?

Lecture 12 - Tanjoubi wa itsu desu ka?

Lecture 13 - Nan-ji ni okimasu ka?

Lecture 14 - Tokyo e ikimasu

Lecture 15 - Expressions

Lecture 16 - Itsu Nihon ni kimashita ka?

Lecture 17 - Hon wa asoko ni arimasu

Lecture 18 - Yuubinkyoku wa hon-ya no tonari ni arimasu

Lecture 19 - Nan nin imasu ka?

Lecture 20

Lecture 21 - Ashita kurabu e ikimasen ka?

Lecture 22 - Kocho wa oishii desu

Lecture 23 - Iroiro na hito ni aimashita

Lecture 24 - Tanaka san onegaishimasu

Lecture 25 - Tanaka san irashshaimasu ka?

Lecture 26 - Tokyo wa ookikute kirei na machi desu

Lecture 27 - Pa-ti wa tanoshikatta desu

Lecture 28 - Raigetsu Amerika e ikimasu

Lecture 29 - Verbs 1

Lecture 30 - Verbs 2

Lecture 31 - Imouto ni kamera o agemashita

- Lecture 32 - Sensei ni pen o sashiagemashita
- Lecture 33 - Tomodachi wa hana o kuremashita
- Lecture 34 - Hawaii e ikitakunai desu
- Lecture 35 - Nanika tabetai desu ka?
- Lecture 36 - Dokoemo ikitakunai desu
- Lecture 37 - Chotto matte kudasai
- Lecture 38 - Mata irashite kudasai
- Lecture 39 - Omiyage o tsutsumanaide kudasai
- Lecture 40 - Watashi wa aisukurimu ga suki desu
- Lecture 41 - Nihongo no jishou ga hoshii desu
- Lecture 42 - Rainen kuni e kaeru tsumori desu
- Lecture 43 - Hikouki to shinkansen to dochira no houga hayai desu ka?
- Lecture 44 - Kurasu no naka de dare ga ichiban kashikoi desu ka?
- Lecture 45 - Kore wa tanaka san no jishou da to omoimasu
- Lecture 46 - Kasa wa eigo de nan to iimasu ka?
- Lecture 47 - Watashi ha Nihongo ga yomemasen
- Lecture 48 - Watashi wa kanji o kaku koto ga dekimasu
- Lecture 49 - Sonna koto iwanaide kudasai
- Lecture 50 - Watashiwa kuruma o unten suru toki ongaku o kikimasu
- Lecture 51 - Kanji o kaku koto ga dekimasu
- Lecture 52 - Shousetsu o yomu tame ni toshoukan e ikimasu
- Lecture 53 - Shashin o totte mo ii desu ka?
- Lecture 54 - Mainichi kaisha ni ikanakereba narimasen
- Lecture 55 - Tanaka san wa yoku hatarakimasu

Lecture 1 - Kore wa watashi no hon desu (This is my book)

Lecture 2 - Ima nan ji desu ka? (What is the time now?)

Lecture 3 - Hon wa tsukue no ue ni arimasu (The book is on the table)

Lecture 4 - Ashita kurabu e ikimasen ka? (Will you please come to the club tomorrow?)

Lecture 5 - Kodoma-tachi wa ima asonde imasu (Children are playing now)

Lecture 6 - Kodomotachi wa asonde kara benkyou shimasu (Children will study after playing)

Lecture 7 - Douzo meshiagatte kudasai (Please eat it)

Lecture 8 - Tabete mite kudasai (Please eat and see)

Lecture 9 - Koko de tabenaide kudasai (Please do not eat here)

Lecture 10 - Hitori de ikimasu ka? (Will you go alone?)

Lecture 11 - Irasshaimase ! (Welcome !)

Lecture 12 - Shiken wa dou deshita ka? (How was the exam?)

Lecture 13 - Tomodachi wa tanjoubi ni hana o kuremashita (My friend gave me flowers on my birthday)

Lecture 14 - Tomodachi wa ke-ki o tsukutte kuremashita (My friend made a cake and gave it to me)

Lecture 15 - Kimura to moushimasu (I am Kimura)

Lecture 16 - O-genki desu ka ? (How are you ?)

Lecture 17 - Kare wa 'happyou wa ashita desu' to iimashita (He said, 'the presentation is tomorrow')

Lecture 18 - Tanaka to iu hito ni aimashita (I met a person called Tanaka)

Lecture 19 - Tomodachi ga kuru to omoimasu (I think my friend will come)

Lecture 20 - Watashi wa hitori de ikemasu (I can go alone)

Lecture 21 - Ikka-getsu de dekimasu (I can do it in one mouth)

Lecture 22 - Kare wa Indo no shuukan no koto o yoku shitte imasu (He know a lot about Indian customs)

Lecture 23 - Aisatsu (Greetings)

Lecture 24 - Aisatsu (Greetings)

Lecture 25 - Chokore-to yori aisukuri-mu ga suki desu (I like ice cream more than chocolate)

Lecture 26 - Dochira ga suki desu ka ? (Which do you like ?)

Lecture 27 - Mira san asobi ni irashite kudasai (Mira san please visit us)

Lecture 28 - Houmon (Visiting)

Lecture 29 - Pen de kaite mo ii desu ka ? (Can I write with a pen?)

Lecture 30 - Konakute mo ii desu ka ? (Is is alright if I do not come ?)

Lecture 31 - Nani mo tabetakunai desu (I do not want to eat anything)

Lecture 32 - Watashi wa eiwa jiten ga hoshii desu (I want an English-Japanese dictionary)

Lecture 33 - Rainen kekkon suru tsumori desu (I intend to get married next year)

Lecture 34 - Soto wa kuraku narimashita (It has become dark outside)

Lecture 35 - Kyuujitai and Shinjitai

Lecture 36 - Nihon e itta koto ga arimasu (I have been to Japan)

Lecture 37 - Minikui ahiru no ko - I (Ugly duckling - I)

Lecture 38 - Minikui ahiru no ko - II (Ugly duckling - II)

Lecture 39 - Working in Japan

Lecture 40 - Haru ni naru to sakura ga saku (When it is spring cherry blossoms will bloom)

Lecture 41 - Mira wa konai kamoshirenai (Mira may not come)

Lecture 42 - Okane ga attara uchi o kaimasu (If I have money I will buy a house)

[Lecture 39 - Work - Life Balance](#)

[Lecture 40 - Applying Soft Skills to Workplace](#)

Lecture 1 - Introduction

Lecture 2 - Propositions, Arguments, Components, Basic Characteristics

Lecture 3 - Recognizing arguments, Diagramming logic flow

Lecture 4 - Types of arguments, Deductive, Inductive, different norms to assess arguments

Lecture 5 - Concepts of Validity Soundness, Consistency

Lecture 6 - History of Symbolic Language

Lecture 7 - Propositional Logic: Syntax

Lecture 8 - Connectives, Scope of Connectives

Lecture 9 - Truth-functional Connectives, Propositional Variables, Propositional Constants

Lecture 10 - Symbolization with Connectives

Lecture 11 - Propositional Logic: Semantics Basics of a Truth Table

Lecture 12 - Using Truth Table: Tautology, Contradiction, Contingent Propositions

Lecture 13 - Using Truth Table: Testing Arguments for Validity and Invalidity

Lecture 14 - Shorter Truth Table

Lecture 15 - Using Truth Table: Testing a Set of Propositions for consistency and inconsistency, and for logical equivalence

Lecture 16 - Introduction to Truth Trees

Lecture 17 - Truth Tree Rules and their Application

Lecture 18 - More on Truth-Tree Recovery of Partial Truth - Values

Lecture 19 - Using the Truth Trees

Lecture 20 - More on Truth Trees

Lecture 21 - Formal Proof of Validity

Lecture 22 - Valid Argument Forms:

Lecture 23 - How to Apply the Rules of Inference in a Proof

Lecture 24 - Understanding the Rules

Lecture 25 - Proofs with All Rules

Lecture 26 - Completeness : What it is

Lecture 27 - Indirect Proof

Lecture 28 - Conditional Proof

Lecture 29 - More on Conditional Proof

Lecture 30 - More on Derivations

Lecture 31 - Limitation of Propositional Logic

[Lecture 32 - Basic 4 Types of Categorical Propositions](#)

[Lecture 33 - Understanding Logical Relations in Standard Form Categorical Propositions](#)

[Lecture 34 - Translating Non-Standard Propositions into Standard Form Categorical Propositions](#)

[Lecture 35 - Validity and Invalidity of Syllogisms](#)

[Lecture 36 - First Order Predicate Logic](#)

[Lecture 37 - Quantifiers](#)

[Lecture 38 - Scope of a Quantifier Edit Lesson](#)

[Lecture 39 - Multiple Quantifiers](#)

[Lecture 40 - Understanding Overlapping Quantifiers Sharing Predicates and Scope](#)

- Lecture 1 - Basic of Intellectual Property
- Lecture 2 - Introduction to Law
- Lecture 3 - Theories of IP
- Lecture 4 - Different Forms of IP
- Lecture 5 - Different Forms of IP and Applicability of Theory
- Lecture 6 - Patent Basic
- Lecture 7 - Patent Ability Criteria
- Lecture 8 - Non-Patentable Invention
- Lecture 9 - Prier-Art Search
- Lecture 10 - Patent Filing Procedure
- Lecture 11 - Patent Prosecution
- Lecture 12 - Patent Prosecution (Continued...)
- Lecture 13 - International Patent
- Lecture 14 - Patent Infringement
- Lecture 15 - Patent Management
- Lecture 16 - Utility Model Protection
- Lecture 17 - Copyright Basic
- Lecture 18 - Copy Right Registration
- Lecture 19 - Copyright Infringement and Fair Use
- Lecture 20 - Copyright in Digital Media
- Lecture 21 - Industrial Design Basic
- Lecture 22 - Industrial Design Registration
- Lecture 23 - Utility Patent Vs Industrial Design
- Lecture 24 - Trademark Basic
- Lecture 25 - Trademark Registration
- Lecture 26 - Trademark and Internet
- Lecture 27 - Certification Mark and Collective Mark
- Lecture 28 - Geographical Indication
- Lecture 29 - Economics of GI Edit Lesson
- Lecture 30 - Trademark Vs GI Trademark Managment
- Lecture 31 - IC Layout Design and Basic

[Lecture 32 - IC Layout Design Registration](#)

[Lecture 33 - Trade- Secret and Basic](#)

[Lecture 34 - Trade-Secret Protection](#)

[Lecture 35 - Patent Vs Trade-Secret](#)

[Lecture 36 - Plant Variety Protection](#)

[Lecture 37 - Bio-diversity](#)

[Lecture 38 - Comparative Analysis](#)

[Lecture 39 - IP Management](#)

[Lecture 40 - Case - Study on IP Management](#)

Lecture 1 - Globalization Definition

Lecture 2 - Global Flows and New Media and Technologies

Lecture 3 - Globalization and Nation

Lecture 4 - Rise of Global Capitalism

Lecture 5 - Cultural Imperialism

Lecture 6 - Global Monocultures

Lecture 7 - Birth of Asian Kool

Lecture 8 - Bhangra Reinvention

Lecture 9 - Disorienting Bhangra

Lecture 10 - The Body of Dance

Lecture 11 - World Music I - Tabla

Lecture 12 - World Music II - Qawwali

Lecture 13 - World Music III - Baul

Lecture 14 - Is Chutney the New Rage

Lecture 15 - Bollywood Song and Dance

Lecture 16 - Planet Bollywood

Lecture 17 - Bollywood at Large

Lecture 18 - Bollywood Assemblages - Part I

Lecture 19 - Bollywood Assemblages - Part II

Lecture 20 - Bollywood's Soft Power

Lecture 21 - Travels of Dastan

Lecture 22 - Scripting the Nation

Lecture 23 - Cracking the Nation

Lecture 24 - Narrating and Interrogating the Nation

Lecture 25 - Cosmopolitans the Borderless World

Lecture 26 - Orientalism

Lecture 27 - Yoga, Meditation, Gurus

Lecture 28 - Beatles, Ravi Shankar and Sitar

Lecture 29 - Orientalizing India

Lecture 30 - Neorientalism

Lecture 31 - The Birth of Indo-Chic

[Lecture 32 - Henna, Bindi, Saris and Bangles](#)

[Lecture 33 - The Taste of Curry](#)

[Lecture 34 - Global News](#)

[Lecture 35 - News as Infotainment](#)

[Lecture 36 - Global Media Cultures](#)

[Lecture 37 - Cultural Imperialism](#)

[Lecture 38 - Contraflows in Global Media](#)

[Lecture 39 - Contraflows in News and Entertainment](#)

Lecture 23 - Third person pronouns and nouns (m/n/f) in the dual - Part 5

Lecture 24 - Revision of the third person pronouns and nouns (m/n) in the dual - Part 1

Lecture 25 - Revision of the third person pronouns and nouns (f) in the dual - Part 2

Lecture 26 - Introduction to the verb conjugations in the kriyĀtipatti-lā'ā'... (the conditional)

Lecture 27 - Introduction to the verb conjugations in the vidhi-liā'... (the optative)

Lecture 28 - Introduction to the conjugation of ā'asā'™ (to be) from the adĀdigā'ḥa (2nd group) in the various tenses and moods

Lecture 29 - Introduction to the conjugation of the verb ā'dā'™ (to give) from the juhotyĀdigā'ḥa (3rd group) in the various tenses and moods

Lecture 30 - Introduction to the conjugation of the verb ā'divā'™ (to shine, to sport) and ā'vidā'™ (to know) from the divĀdigā'ḥa (4th group)

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 31 - Introduction to the conjugation of the verb 'śru' (to hear) from the svādigaáṭṭa (5th group) in the various tenses and moods

Lecture 32 - Introduction to the conjugation of the verb 'kṛ' (to do) from the tanādigaáṭṭa (8th group) in the various tenses and moods

Lecture 33 - Introduction to the conjugation of the verb 'mil' (to meet) from the tudādigaáṭṭa (6th group) in the various tenses and moods

Lecture 34 - Introduction to the conjugation of the verb 'bhuj' (to protect) from the rudhādigaáṭṭa (7th group) in the various tenses and moods

Lecture 35 - Introduction to the conjugation of the verb 'jñā' (to know) from the kryādigaáṭṭa (9th group) in the various tenses and moods

Lecture 36 - Introduction of nouns (m) ending with 'u' and 'i' in the three vacanas

Lecture 37 - Introduction of nouns (n) ending with 'u' and 'i' in the three vacanas

Lecture 38 - Introduction of nouns (f) ending with 'u' and 'i' in the three vacanas

Lecture 39 - Introduction of nouns (m) ending with 'in' and of nouns (n/f) ending with 'nā' in the three vacanas

Lecture 40 - Introduction of nouns (m/n/f) ending with 'tā' in the three vacanas

Lecture 41 - Introduction of nouns (m/f/n) ending with 'ā' in the three vacanas

Lecture 42 - Introduction to the svarasandhi

Lecture 43 - Introduction to the visargasandhi

Lecture 44 - Introduction to the vyañjanasandhi

Lecture 45 - Summary and Conclusion

Lecture 1 - Introduction

Lecture 2 - What is an entrepreneurship ?

Lecture 3 - What do you understand by IP ?

Lecture 4 - Whether entrepreneurship and IP related? What is role of IP strategy in entrepreneurship?

Lecture 5 - Case study I - IT industry

Lecture 6 - Innovation, invention and creativity

Lecture 7 - Types of innovation

Lecture 8 - Innovation, market and IP

Lecture 9 - Open innovation and IP

Lecture 10 - Case Study II - Biotechnology

Lecture 11 - Trademark - Definition

Lecture 12 - Trademark - Types

Lecture 13 - Trademark - Registration

Lecture 14 - Trademark infringement

Lecture 15 - Case study III - Textile industry

Lecture 16 - Patent - introduction

Lecture 17 - Patent infringement

Lecture 18 - Patent strategies - I

Lecture 19 - Patent strategies - II

Lecture 20 - Capsule version

Lecture 21 - Copyright - Definition and subject matter

Lecture 22 - Copyright and related rights

Lecture 23 - Copyright registration and entrepreneurship

Lecture 24 - Copyright infringement

Lecture 25 - Case study IV - Film industry

Lecture 26 - Industrial Design- Definition, concept

Lecture 27 - Industrial Designs Act - Key features

Lecture 28 - Industrial Design-Business

Lecture 29 - Industrial Design infringement

Lecture 30 - Case study V - Automobile industry

Lecture 31 - IP strategy for start-up and MSME

[Lecture 32 - IP transaction - introduction](#)

[Lecture 33 - IP valuation, bank loan, insurance](#)

[Lecture 34 - Success story and business model of a few start-ups](#)

[Lecture 35 - Case Study VI - Agriculture](#)

[Lecture 36 - Incubators, research parks](#)

[Lecture 37 - Various Government policies](#)

[Lecture 38 - Various Government policies](#)

[Lecture 39 - Capsule revision](#)

[Lecture 40 - Am I ready to venture my start up? \(Course applicability\)](#)

Lecture 1 - Setting the Context

Lecture 2 - The Anthropocene

Lecture 3 - The Nine Planetary Boundaries Framework

Lecture 4 - The Capitalocene

Lecture 5 - The Urbanocene

Lecture 6 - COVID 19, Urban Informality and Environment

Lecture 7 - Sanitary Cities: Urban, Environment and Modernity in the West

Lecture 8 - Networked Cities: Path-dependent Consequences

Lecture 9 - From Sanitary to Sustainable Cities

Lecture 10 - How sustainable? Critical analysis of contemporary urban models

Lecture 11 - Historical Pasts

Lecture 12 - Colonial Urbanization

Lecture 13 - Limits and Legacies of Colonial Urbanization

Lecture 14 - The Post-independence Scenario: Planned Cities and Renewal Missions

Lecture 15 - Smart Cities

Lecture 16 - Smart Cities: Critique and Contestations

Lecture 17 - Fantasy Cities? Understanding Limits of Smart, Eco and Green Doctrines

Lecture 18 - Fantasy Cities? Understanding Limits of Smart, Eco and Green Doctrines Case (Continued...)

[Lecture 57 - The Jaina Philosophy](#)

[Lecture 58 - The Jaina Philosophy](#)

Lecture 1 - Greek Philosophy: Ionians, Pythagoras, Parmenides, Heraclitus and Democritus

Lecture 2 - Sophists, Socrates; philosophy of man; relativism and subjectivism; the idea of good

Lecture 3 - Platos idealism: theory of ideas

Lecture 4 - Plato: theory of knowledge, method of dialectic; theory of soul

Lecture 5 - Aristotles criticism of Platonic idealism and the concepts of Form and Matter

Lecture 6 - Aristotles theory of causation; potentiality and actuality

Lecture 7 - Medieval philosophy: St. Augustine and the Problem of evil; St. Thomas Aquinass concepts of faith and reason; proofs for the existence of God.

Lecture 8 - Modern Philosophy: mail characteristic features; renaissance and scientific revolution; rationalism and empiricism: main features.

Lecture 9 - Descartes: the method in philosophy; the concepts of doubt and indubitable knowledge.

Lecture 10 - Descartes: the mind-body dualism; the concept of God and proofs for Gods existence

Lecture 11 - Spinoza: the concepts of Substance, attributes and modes.

Lecture 12 - Spinozas pantheism-God and nature

Lecture 13 - Leibniz: Monadology; the mind-body problem revisited; concept of God; the concept of pre-established harmony

Lecture 14 - The empiricism of John Locke: ideas and their classification; refutation of innate ideas

Lecture 15 - John Locke: theory of knowledge; concept of substance; the primary and secondary qualities

Lecture 16 - Berkeley: the refutation of the distinction between primary and secondary qualities, immaterialism

Lecture 17 - Berkeleys critique of abstract ideas, esse est percipi, the problem of solipsism; God and self

Lecture 18 - Hume : Impressions and ideas, knowledge concerning relations of ideas and knowledge concerning matters of fact, induction and causality.

Lecture 19 - The external world and the self, personal identity, rejection of metaphysics, scepticism, reason and the passions.

Lecture 20 - Critical Philosophy: characteristic features; kantd objectives: the classification of judgements, possibility of synthetic a priori judgements, the Copernican revolution

Lecture 21 - Kant: forms of sensibility, categories of understanding; the process of knowledge acquisition; phenomenon and noumenon,

Lecture 22 - The Ideas of Reason-soul, God and world as a whole; antinomies; rejection of speculative metaphysics.

Lecture 23 - Kants ethics; freedom and immortality, problems with Kant.

Lecture 24 - Hegel : The conception of Geist (spirit), the dialectical method, concepts of being, non-being and becoming,

Lecture 25 - Absolute idealism; consciousness, self consciousness and reason.

Lecture 26 - Karl Marx: historical materialism; the significance of the proletariat; the base structure-superstructure division.

Lecture 27 - Nietzsche : Critique of western culture, religion and morality; will to power; the idea of superman.

Lecture 28 - Linguistic turn in British philosophy: Russells logical atomism and the refutation of idealism.

## DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 29 - Wittgenstein : early Wittgensteins conception of language and reality; the picture theory of meaning

Lecture 30 - Later Wittgensteins conception of language games and forms of life; meaning and use.

Lecture 31 - Logical positivism; against metaphysics and a scientific conception of philosophy; the limitation of logical positivism

Lecture 32 - Husserl : Phenomenology and the methods of reduction; the principle of intentionality.

Lecture 33 - Phenomenological reduction, eidetic reduction and transcendental reduction; transcendental subjectivity; the pure subject.

Lecture 34 - Heidegger : phenomenological hermeneutics; concept of Being; man as being-in-the-world; destruction of the western intellectual tradition.

Lecture 35 - Authentic and inauthentic existence; Truth as disclosure

Lecture 36 - Existentialism: main features; existence precedes essence; freedom and responsibility; finiteness and situatedness of human existence

Lecture 37 - Sartres conception of human existence; man is condemned to be free; rejection of essentialism

Lecture 38 - The concept of being-in-itself, being-for-itself and being-for-others

Lecture 39 - Postmodernism: major trends and chief characteristic features; conceptions of human subject; different postmodern approaches

Lecture 40 - Deconstruction, feminism, discourse theory etc.

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

**NPTEL : NOC:Inclusion and Technology Design (Humanities and Social Sciences)**

**Co-ordinators : Prof. Bidisha**

Lecture 1 - Introduction: Inclusive Digital Societies

Lecture 2 - Missing Women in Tech: Why Lack of Female Technologists Matters for Technology Design and Development?

Lecture 3 - Are Technologies Gender Neutral?

Lecture 4 - ICTs and Gender: Field Concerns and Project Management Approaches for Technology Design

Lecture 5 - The Political Nature of Technology Design

Lecture 6 - Accessibility Fundamentals

Lecture 7 - Accessibility Fundamentals: Disabilities, Guidelines, and Laws

Lecture 8 - Accessibility Fundamentals: Disabilities, Guidelines, and Laws

Lecture 9 - Designing an Assistive Technology Ecosystem: STEM Education for the Visually Impaired

Lecture 10 - Inclusion in Designing ICT for Development Projects: Who Should Matter - Part 1

Lecture 11 - ICTs in Agricultural Markets: Are they Inclusive

Lecture 12 - Inclusion in Designing ICT for Development Projects: Who Should Matter - Part 2

Lecture 13 - Digital Labour, Platforms and the Future of Work

Lecture 14 - Assignment Video: Design Jam

Lecture 15 - Assignment Examples Video: Students Presentations

Lecture 1 - Energy as an Economic Resource - Introduction

Lecture 2 - Energy as an Economic Resource - Classification of Energy Resource

Lecture 3 - Energy as an Economic Resource - Measurement of Energy

Lecture 4 - Energy as an Economic Resource - Energy Accounting

Lecture 5 - Energy as an Economic Resource - Problem Discussion on Module 1

Lecture 6 - Energy Demand - Part I - Basic concepts in Economics

Lecture 7 - Energy Demand - Part I - Descriptive Analysis of Energy Demand

Lecture 8 - Energy Demand - Part I - Decomposition Analysis and Parametric Approach

Lecture 9 - Energy Demand - Part II - Demand Side Management

Lecture 10 - Energy Demand - Part II - Load Management

Lecture 11 - Energy Demand - Part II - Demand Side Management - Energy Efficiency

Lecture 12 - Energy Demand - Part II - Rebound Effect

Lecture 13 - Energy Supply - Part I - Supply Behaviour of a Producer

Lecture 14 - Energy Supply - Part I - Energy Investment

Lecture 15 - Energy Supply - Part I - Economics of Non-renewable Resources

Lecture 16 - Energy Supply - Part II - Economics of Renewable Energy Supply Setting the context

Lecture 17 - Energy Supply - Part II - Economics of Renewable Energy Supply - Part 1

Lecture 18 - Energy Supply - Part II - Economics of Renewable Energy Supply - Part 2

Lecture 19 - Energy Supply - Part II - Economics of Electricity Supply

Lecture 20 - Energy Market - Perfect Competition as a Market Form

Lecture 21 - Energy Market - Why Energy Market is not Perfectly Competitive?

Lecture 22 - Energy Market - Market Failure and Monopoly

Lecture 23 - Energy Market - Oil Market: Pre OPEC Era - I

Lecture 24 - Energy Market - Oil Market: Pre OPEC Era - II

Lecture 25 - Energy Market - Oil Market: OPEC

Lecture 26 - Special Topics on Energy - Energy Security

Lecture 27 - Special Topics on Energy - Energy Access

Lecture 28 - Special Topics on Energy - Energy, Environment and Climate Change

Lecture 1 - THE GOTHIC - Literary Genre

Lecture 2 - Charles Dickens 'THE SIGNAL - MAN' - I - Close reading and the anxieties of the age

Lecture 3 - Charles Dickens 'THE SIGNAL - MAN' - II - Close reading and the anxieties of the age

Lecture 4 - Charles Dickens 'THE SIGNAL - MAN' - III - Close reading and the anxieties of the age

Lecture 5 - Charles Dickens 'THE SIGNAL - MAN' - IV - Close Reading and the anxieties of the age

Lecture 7 - Rudyard Kipling - My own true ghost story

Lecture 8 - Imperial Gothic - Major Characteristics

Lecture 9 - Rudyard Kipling 'My own true ghost story' - Close reading for implications of the imperial Gothic - I

Lecture 10 - Rudyard Kipling 'My own true ghost story' - Close reading for implications of the imperial Gothic - II

Lecture 12 - Arthur Conan Doyle - The Red-Headed League - I

Lecture 13 - Arthur Conan Doyle - The Red-Headed League - II

Lecture 14 - Arthur Conan Doyle - The Red-Headed League - III

Lecture 15 - Arthur Conan Doyle 'The Red-Headed League' - A Conversation

Lecture 16 - Arthur Conan Doyle 'The Red-Headed League' - Summary and Interview of the Author

Lecture 17 - H.G. WELLS 'THE RED ROOM' - Close Reading And Its Implications

Lecture 18 - H.G. WELLS 'THE RED ROOM' - Victorian Gothic

Lecture 19 - H.G. WELLS 'THE RED ROOM' - Close Reading And Its Ideological Implications

Lecture 1 - Was mochten Sie dieses Semester machen?

Lecture 2 - Wiederholung : Dativ und Präpositionen

Lecture 3 - Wir lernen das Perfekt

Lecture 4 - Wir üben das Perfekt

Lecture 5 - Was hast du in den Ferien gemacht ?

Lecture 6 - Farben und Kleidung

Lecture 7 - Wir lernen Präpositionen

Lecture 8 - Wir üben Präpositionen

Lecture 9 - Präpositionen Akkusativ oder Dativ?

Lecture 10 - Was bringt mir der Postbote?

Lecture 11 - Gesundheit: Was fehlt Ihnen?

Lecture 12 - Jeder fährt sich

Lecture 13 - Reflexiv - Akkusativ oder Dativ ?

Lecture 14 - Lektion 1 und Witze und Faust

Lecture 15 - Lektion 2, Präteritum von Modalverben, Ordinalzahlen

Lecture 16 - Lektion 2; Detour -- Was ist Geschichte ? | Basic Tenses

Lecture 17 - Was hast du nach der Schule gemacht?

Lecture 18 - Lektion 3: Welche Medien hast du gestern benutzt?

Lecture 19 - Komparativ und Superlativ

Lecture 20 - dass-Sätze

Lecture 21 - Wir wiederholen Komparativ und Superlativ

Lecture 22 - Imperativ mit 'du' und 'ihr'

Lecture 23 - Wir machen Lektion 5

Lecture 24 - Adjektivdeklination

Lecture 25 - Lektion 6 | Verkehr und Verkehrsmittel

Lecture 26 - Welche Verkehrsmittel benutzt du ? | Indirekte Fragesätze

Lecture 27 - Lektion 6 -- Aufgaben 4 und 6

Lecture 28 - Lektion 7 -- Es geht ums Lernen

Lecture 29 - Was hast du wann gelernt?

Lecture 30 - Probleme beim Lernen | Verben mit dem Dativ

Lecture 31 - Welche Probleme hast du beim Lernen ?

Lecture 32 - Perfekt von untrennbaren Verben | Wie löse ich meine Probleme beim Lernen ?

Lecture 33 - Ratschläge mit sollten | Sprache und Berufe | Wir lesen vor. (Lektion 7)

Lecture 34 - Exkurs ins Absurde! | Generationenprojekte (Lektion 7)

Lecture 35 - Generationenprojekte - wir hören die Texte

Lecture 36 - Welche Sportart möchtest du ausprobieren? | deshalb, trotzdem

Lecture 37 - Wiederholung Lektion 7 | Wir machen mit Lektion 8 weiter.

Lecture 38 - Woher entscheiden sich Sandra und Conny ? | Fragewort WO + Präposition

Lecture 39 - Alles über Fragewörter: mit und ohne Präpositionen

Lecture 40 - Eine Stadt entdecken | Wir beginnen Lektion 9

Lecture 41 - Lektion 9 | Interessante Häuser und Wohnungen

Lecture 42 - Lektion 9 | Die lieben Nachbarn

Lecture 43 - Lektion 9 | Höfliche Bitte | wenn und als

Lecture 44 - Lektion 9 | Wir üben als und wenn. | Sätze und Wortgruppen

Lecture 45 - Die Deutschen und ihre Haustiere

Lecture 46 - Wir beginnen Lektion 10 | Der Superlativ

Lecture 47 - Welche/r/s und Was für ein/e...

Lecture 48 - Lektion 10 | etwas, man, niemand, jemand...

Lecture 49 - Der Relativsatz | Wir machen Lektion 10 zu Ende

Lecture 50 - Wir machen Lektion 11. | K 2 - Verben und W-Fragen mit Präpositionen

Lecture 51 - Lektion 12 | Wir sind mit unserem Kurs fertig!

Lecture 1 - Herzlich willkommen!

Lecture 2 - Wie ist dein Name ?

Lecture 3 - Ich trinke gern Kaffee

Lecture 4 - Wir konjugieren die Verben

Lecture 5 - A bit of history and ZAHLEN

Lecture 6 - Verben, W-Fragen, Ja-Nein Fragen, Imperativ

Lecture 7 - das Alphabet, die Woche, das Jahr

Lecture 8 - Was sind deine Hobbys ? Formular ausfüllen

Lecture 9 - Mein Lehrbuch | Meine persönlichen Daten

Lecture 10 - Mein Arbeitsbuch

Lecture 11 - Wir beginnen Lektion 3

Lecture 12 - Wir lesen Lektion 3

Lecture 13 - Kein | Unregelmäßige Verben | Ein Lied

Lecture 14 - Wer ist das? | ich-mein; du-dein

Lecture 15 - Lektion 4 Guten Appetit!

Lecture 16 - Das Essen | Some revision

Lecture 17 - mag oder möchte | der Akkusativ

Lecture 18 - Ein Lesetext | die Uhr

Lecture 19 - die Uhrzeit | trennbare Verben

Lecture 20 - Familie und Possessiv

Lecture 21 - Wir machen Lektion 6 | Ordinalzahlen

Lecture 22 - Wie feierst du deinen Geburtstag?

Lecture 23 - der Akkusativ | ein Würfelspiel

Lecture 24 - das Kaffeehaus | die Kneipe | der Biergarten

Lecture 25 - Lektion 6: Freizeitprogramm

Lecture 26 - Sprache, Bundesländer, Städte | Wir beginnen Lektion 7

Lecture 27 - Akkusativ-Dativ | Annika im Büro | Wir machen Kaffee

Lecture 28 - Lektion 7 -- formeller Brief

Lecture 29 - Wie lernst du Deutsch ? Wir hören ein deutsches Lied

Lecture 30 - Wir lernen die Präpositionen

Lecture 31 - Hörverstehen | Wir beginnen Lektion 8

[Lecture 32 - Lektion 8 -- Haus-Wohnung-Möbel-Geräte](#)

[Lecture 33 - Extra Lektion on Modal Verbs](#)

[Lecture 34 - Eine E-Mail schreiben | Eine Wohnung beschreiben](#)

[Lecture 35 - Warum ist die Miete so hoch ? | Vorteile und Nachteile](#)

[Lecture 36 - Die neue Wohnung -- Was ist wo ? | Wechselpositionen](#)

[Lecture 37 - gefallen, gehen, passen, schmecken](#)

[Lecture 38 - Lektion 9 | Wir lernen das Perfekt](#)

[Lecture 39 - Lektion 9 | Wir üben das Perfekt](#)

[Lecture 40 - Was hast du in den Ferien gemacht ?](#)

[Lecture 41 - Lektion 9 | Die Jobsuche](#)

[Lecture 42 - Lektion 9 | Telefongespräche](#)

[Lecture 43 - Im Kaufhaus | Welche/Diese](#)

[Lecture 44 - Lektion 11 | Körper und Gesundheit](#)

[Lecture 45 - Gesund und munter | Wir machen Lektion 11 zu Ende](#)

[Lecture 46 - Ab in den Urlaub | Wir machen Lektion 12](#)

Lecture 1 - Disability Definition: An Evolving Phenomenon

Lecture 2 - Medical Model of Disability

Lecture 3 - Social Model of Disability - Part 1

Lecture 4 - Social Model of Disability - Part 2

Lecture 5 - Stigma: A Universal Phenomenon

Lecture 6 - Stigma and Disability: What can we learn?

Lecture 7 - Ableism - Part 1

Lecture 8 - Ableism - Part 2

Lecture 9 - Disability Activism

Lecture 10 - Models of Disability Activism

Lecture 11 - Dependency

Lecture 12 - Interdependence

Lecture 13 - Blindness

Lecture 14 - Blindness as metaphor

Lecture 15 - Eugenics

Lecture 16 - Disability Pride

Lecture 17 - Disability Resilience

Lecture 1 - GUTE REISE. Reisen, Ferien und Urlaub

Lecture 2 - Infinitiv mit zu

Lecture 3 - Wir lernen das Verb lassen

Lecture 4 - Das Verb lassen / Äœber eine Reise sprechen und schreiben

Lecture 5 - Wir Machen Lektion 1 Zu Ende

Lecture 6 - Wir Sprechen Äœber Vorlieben Und Abneigungen

Lecture 7 - Mein Lieblingsurlaub

Lecture 8 - Wir beginnen mit Kapitel 2

Lecture 9 - Kapitel 2. Wir Lernen Die Konnektoren -- Weil, Deshalb, Obwohl Und Trotzdem

Lecture 10 - Der Genitiv

Lecture 11 - Der Genitiv -- Die PrÄœpositionen wegen und trotz -- Wir machen Lektion 2 zu Ende

Lecture 12 - Wir machen Lektion 3.

Lecture 13 - Das PrÄœteritum

Lecture 14 - Technik im Alltag

Lecture 15 - Die PrÄœpositionen vor, nach und wÄœhrend.

Lecture 16 - Neue Technologien - Eine Meinung

Lecture 17 - Wir Ä¼ben Konnektoren. Wir beginnen mit Lektion 4

Lecture 18 - Wir machen mit Lektion 4 weiter

Lecture 19 - Wir lernen das PrÄœteritum und den Konjunktiv 2

Lecture 20 - Verben mit PrÄœpositionen - Lektion 4

Lecture 21 - Wir machen Lektion 4 zu Ende

Lecture 22 - Was bedeutet GlÄ¼ck fÄ¼r mich?

Lecture 23 - Umweltfreundlich? Wir machen Lektion 5

Lecture 24 - GlÄ¼cklich sein und umweltfreundlich leben. Lektion 5: Komparativ und Superlativ

Lecture 25 - Wir wiederholen Adjektiv- und n-Deklination

Lecture 26 - Umweltschutz und Tierschutz. Wir machen Lektion 5 zu Ende.

Lecture 27 - Wir bereiten uns auf eine PrÄœsentation vor.

Lecture 28 - Relativsatz 1

Lecture 29 - Relativsatz 2. Und wir lesen eine kleine Geschichte.

Lecture 30 - Zukunftszeichen und VorsÄœtze fÄ¼rs neue Jahr: Wir lernen Futur I.

Lecture 31 - Relativsatz - eine Wiederholung | Zukunft: Hamburg 2030

Lecture 32 - Was kann ich für die Umwelt tun? (I)

Lecture 33 - Was kann ich für die Umwelt tun? (II)

Lecture 34 - Was kann ich für die Umwelt tun? (III)

Lecture 35 - Kleines Städte-Quiz

Lecture 36 - Was kann ich für die Umwelt tun? (IV)

Lecture 37 - Wir lernen und üben das Plusquamperfekt.

Lecture 38 - Wir beginnen mit Kapitel 7.

Lecture 39 - Thema Beziehungskisten. Wir lernen dabei temporale Nebensätze kennen.

Lecture 40 - Wir üben temporale Nebensätze.

Lecture 41 - Berühmte Paare. Wir machen Kapitel 7 zu Ende.

Lecture 42 - Wir beginnen mit Kapitel 8.

Lecture 43 - Im Krankenhaus. brauchen nicht und brauchen nur + zu | dass Satz und Infinitiv Satz

Lecture 44 - Wir wiederholen und üben das Reflexiv.

Lecture 45 - Wofür interessierst du dich? | Reflexiv und zweiteilige Konnektoren: Wir machen Kapitel 8 zu Ende.

Lecture 46 - Thema: Hotel Mama. Präsentationen der Lernenden. (I)

Lecture 47 - Hotel Mama. Präsentationen der Lernenden. (II)

Lecture 48 - Präsentationen der Lernenden zum Thema Hotel Mama (III)

Lecture 49 - Ergänzung der Adjektivdeklination. Wir beginnen mit Kapitel 9.

Lecture 50 - Präsentationen der Lernenden zum Thema Hotel Mama (IV)

Lecture 51 - Wir sehen einen Film zum Thema Hotel Mama.

Lecture 52 - Stellung von nicht im Satz. | Volkslieder

Lecture 53 - Wir lernen das Passiv.

Lecture 54 - Wir lernen und üben das Passiv.

Lecture 55 - Wir üben das Passiv. (II) | Präpositionen mit dem Genitiv | Wir machen Kapitel 10 zu Ende.

Lecture 56 - Adjektivdeklination - Wiederholung | Kapitel 11: Artikelwörter als Pronomen

Lecture 57 - Kapitel 11: Adjektiv als Nomen | Sprichwörter | Ergänzung zu den Relativsätzen

Lecture 58 - Kapitel 11: Städterankings | Relativsätze mit was und wo

Lecture 59 - Wir machen Kapitel 11 zu Ende. | Sätze mit je...desto

Lecture 60 - Kapitel 12: Verben als Adjektive - Partizip 2 und Partizip 1

Lecture 61 - Wir lernen und üben das Passiv.

Lecture 62 - Kapitel 12: Lesetexte zu den Themen Globalisierung und Gewissensfragen

Lecture 63 - Zwei Präsentationen zum Thema: Leben - in der Stadt oder auf dem Land?

Lecture 64 - Kapitel 12: Lesetext -- Die Fuggerei in Augsburg

[Lecture 65 - Zwei Präsentionen zum Thema: Leben - in der Stadt oder auf dem Land? \(II\)](#)

[Lecture 66 - Präsentionen zum Thema: Leben - in der Stadt oder auf dem Land? \(III\)](#)

[Lecture 67 - Präsentionen zum Thema: Leben - in der Stadt oder auf dem Land? \(IV\)](#)

[Lecture 68 - Präsentionen zum Thema: Leben - in der Stadt oder auf dem Land? \(V\) | Wir lernen](#)

[Lecture 69 - Wir lernen, wie man einen informellen Brief oder eine informelle E-Mail schreibt](#)

Lecture 1 - Hindustani Music - A World of Colour, Romance and History

Lecture 2 - Classical or Shastriya - What's in a Name!

Lecture 3 - Dhrupad, Khayal and Instrumental Music: A Bird's-eye View

Lecture 4 - Hindustani Music is Raga Sangeet

Lecture 5 - The Textual Tradition

Lecture 6 - Swara and Shruti: Tone and Microtone

Lecture 7 - Swara and Shruti in the Textual Tradition

Lecture 8 - Tanpura - The King of Overtones

Lecture 9 - Entering the World of Raga - Raga and Swara

Lecture 10 - The World of Raga-2: Strong and Weak Notes

Lecture 11 - The World of Raga-3: Ornament

Lecture 12 - The World of Raga-4: Paths of a Raga

Lecture 13 - Raga and Time Association

Lecture 14 - Raga-Lakshana or Features of Raga

Lecture 15 - Defining Raga

Lecture 16 - Classification of Ragas - The Mela or Thaata System

Lecture 17 - Classification of Ragas - The Raagaanga System

Lecture 18 - Classification of Ragas - Raga Ragini System

Lecture 19 - Extending the Raga Corpus - Winds from the South

Lecture 20 - Extending the Raga Corpus - Jod Ragas

Lecture 1 - Introduction to Week 1

Lecture 2 - Evolution and concept of Linguistics

Lecture 3 - Defining Linguistics and its branches

Lecture 4 - The role of linguistics in understanding human communication

Lecture 5 - Application of linguistic theories in various fields

Lecture 6 - The Crucial Role of Linguistic Analysis in Legal Settings

Lecture 7 - Impact of Forensic Linguistics and Case Studie

Lecture 8 - Current Trends and Emerging Areas in Forensic Linguistics

Lecture 9 - Introduction to Week 2 - The Confluence of Language and Law

Lecture 10 - Exploring the Interplay Between Language and Law

Lecture 11 - Analysis of Courtroom Discourse

Lecture 12 - Impact of Linguistic Diversity on Legal Processes

Lecture 13 - Interdisciplinary Nature of Forensic Linguistics

Lecture 14 - Ethical Considerations in Forensic Linguistic Analysis

Lecture 15 - Impact on Understanding Legal and Cultural Contexts

Lecture 16 - Analysing Language as Vital Evidence in Legal Contexts

Lecture 17 - Challenges in Presenting Linguistic Evidence in Court

Lecture 18 - Introduction to Week 3

Lecture 19 - Illuminating Authorship Analysis and Its Nuances

Lecture 20 - Navigating Through Forensic Phonetics

Lecture 21 - Discourse Analysis: A Journey through Linguistic Structures

Lecture 22 - Exploring the Depths of Threat and Deception Analysis

Lecture 23 - Unveiling the Secrets of Language Profiling

Lecture 24 - Introduction to Week 4

Lecture 25 - Investigating Real-World Case Studies in Forensic Linguistics

Lecture 26 - Tackling the Challenges and Obstacles Within Forensic Linguistics

Lecture 27 - Upholding Ethics and Professionalism in Forensic Linguistics

Lecture 28 - Envisioning the Future: Prospective Pathways in Forensic Linguistics

Lecture 1 - Introduction

Lecture 2 - Interest Rate

Lecture 3 - Simple interest

Lecture 4 - Compounding techniques - I & II

Lecture 5 - Discrete annually compounding - I & II

Lecture 6 - Continuous compounding

Lecture 7 - Comparison of all compounding methods

Lecture 8 - Present value

Lecture 9 - Future Value

Lecture 10 - Annuities - I & II

Lecture 11 - Perpetuity

Lecture 12 - Amortization

Lecture 13 - Multiple cash flow - I & II

Lecture 14 - Valuation of bond - I & II

Lecture 15 - Valuation of ordinary shares

Lecture 1 - Introduction to course

Lecture 2 - Introduction to depreciation and Straight line method

Lecture 3 - Declining balance method

Lecture 4 - Double-declining balance method

Lecture 5 - Sum-of-the-digits method

Lecture 6 - Sinking fund method and Repair provision method

Lecture 7 - Accelerated cost recovery method - I

Lecture 8 - Accelerated cost recovery method - II

Lecture 9 - Introduction to alternate investment: Annual cost method-I

Lecture 10 - Introduction to alternate investment: Annual cost method

Lecture 11 - Present worth method

Lecture 12 - Rate of return method

Lecture 13 - Incremental rate of return

Lecture 14 - Perpetuity method

Lecture 15 - Minimum return as cost

Lecture 16 - Introduction to profitability analysis and Payback period

Lecture 17 - Return on investment

Lecture 18 - Net Return

Lecture 19 - Discounted cash flow - I

Lecture 20 - Discounted cash flow - II

Lecture 1 - Introduction to Soft Skills

Lecture 2 - Aspects of Soft Skills

Lecture 3 - Effective Communication Skills

Lecture 4 - Classification of Communication

Lecture 5 - Personality Development

Lecture 6 - Positive Thinking

Lecture 7 - Telephonic Communication Skills - Part I

Lecture 1 - Introduction

Lecture 2 - Government Policies

Lecture 3 - History of Labour Law in the Country

Lecture 4 - History - Previous Social Security Legislations in India (Continued...)

Lecture 5 - National Labour Commission Reports

Lecture 6 - Evolution of Trade Unions in India

Lecture 7 - Constitutional Freedom to Form Associations and Unions

Lecture 8 - ILO on Trade Union

Lecture 9 - Trade Union - Definitions, Registration, Cancellation, Management of Funds

Lecture 10 - Trade Union - Recognition, Immunities

Lecture 11 - Industrial Disputes - Introduction - Definitions

Lecture 12 - Resolution of Industrial Disputes

Lecture 13 - Concept of Workman, Contract of Service, Contract for Service

Lecture 14 - Strike

Lecture 15 - Lock-out

Lecture 16 - Lay-off

Lecture 17 - Retrenchment

Lecture 18 - Closure of Undertakings

Lecture 19 - Industrial Employment (Standing Orders)

Lecture 20 - Disciplinary Action and Procedures

Lecture 21 - The Code on Wages, 2019 - An Introduction

Lecture 22 - Minimum Wages, Floor Wages, Central and State Advisory Board

Lecture 23 - Payment of Wages, Deductions and Recovery, Fines

Lecture 24 - Equal Remuneration

Lecture 25 - Bonus

Lecture 26 - C.311-Minimum Wage Fixing Convention, 1970

Lecture 27 - C:26-ILO Minimum Wage-Fixing Machinery Convention,1928 C-99 Minimum Wage-Fixing

Lecture 28 - C.95-Protection of Wages Convention, 1949

Lecture 29 - C-100:Equal Remuneration Convention,1951,International Instruments on Equality

Lecture 30 - C-173:Protection of Workersâ€™ Claims (Employerâ€™s Insolvency) Convention, 1992

Lecture 31 - Code on Social Security, 2020 - Introduction

- Lecture 32 - Definitions Under The Code on Social Security, 2020
- Lecture 33 - Social Security Organizations (SSOs)
- Lecture 34 - Employees Compensation and Benefits
- Lecture 35 - The Concept of Arising Out of and in the Course of Employment
- Lecture 36 - Employee's State Insurance
- Lecture 37 - Different Benefits Under the ESI Scheme
- Lecture 38 - Employee's Provident Fund
- Lecture 39 - Gratuity
- Lecture 40 - Maternity Benefit
- Lecture 41 - Social Security in case of Building and Other Construction Worker
- Lecture 42 - Social Security for Unorganized Sector and Platform workers
- Lecture 43 - Bonded Labour System Abolition and Regulation
- Lecture 44 - Child Labour Prohibition
- Lecture 45 - Plantation Labour
- Lecture 46 - Occupational Safety Health and Working Conditions Code, 2020 -Introduction, Definitions
- Lecture 47 - Occupational Health and Safety
- Lecture 48 - Working conditions, Welfare Provisions and Liability of Occupier
- Lecture 49 - Regulation of Working Hours and the Concept of Decent Work
- Lecture 50 - Duties of Employer and Employees, Special Provisions relating to Employment of Women
- Lecture 51 - The Meaning of Factory,Manufacturing Process,Approval and Licensing of Factories
- Lecture 52 - Role of Inspector-cum-Facilitator and Other Authorities
- Lecture 53 - Social Security Fund, Offences and Penalties
- Lecture 54 - Contract Labourand Proposed ILO Convention
- Lecture 55 - Inter-State Migrant Workers
- Lecture 56 - Mine Workers and Working Conditions
- Lecture 57 - Beedi and Cigar Workers (Kerala and West Bengal Legislations)
- Lecture 58 - Audio-Visual Workers; Cine Workers and Dock Workers
- Lecture 59 - The Effective Abolition of Child Labour (C029; C105; C138 and C182)
- Lecture 60 - The Governance Conventions of ILO Labour Standards

Lecture 1 - Introduction

Lecture 2 - Why IP and IPM ?- Context of the development of IP culture

Lecture 3 - IP and academia - I

Lecture 4 - IP and academia - II

Lecture 5 - IP and its role in education and research

Lecture 6 - Types of IP - Patent

Lecture 7 - Types of IP - Copyright and trademark

Lecture 8 - Types of IP - Industrial design, SICLD, PPVFR

Lecture 9 - Types of IP - GI and Trade secret

Lecture 10 - IPM and various jurisdictions

Lecture 11 - Emerging areas of IP and open innovation

Lecture 12 - What is IPMS?

Lecture 13 - IPM system in organisation

Lecture 14 - IPM system model - I

Lecture 15 - IPM system model - II

Lecture 16 - IP Audit framework to evaluate your IPM system

Lecture 17 - Application of IPM model to develop/improve your IPM system

Lecture 18 - Case Study - I

Lecture 19 - Case Study - II

Lecture 20 - Capsule version-I

Lecture 21 - Use of IP analytics for your IPM

Lecture 22 - IPM and competitive intelligence

Lecture 23 - Case study - III

Lecture 24 - Case study - IV

Lecture 25 - Case study - V

Lecture 26 - IP policy

Lecture 27 - Case study - VI : IP policy of IITB

Lecture 28 - Case study - VI : IP policy of IITB

Lecture 29 - IP life cycle management

Lecture 30 - IP life cycle management and IP policy

Lecture 31 - IP commercialization

[Lecture 32 - Technology transfer- Definition, concept](#)

[Lecture 33 - Technology transfer models](#)

[Lecture 34 - Different ways of technology transfer](#)

[Lecture 35 - Case study - VII](#)

[Lecture 36 - Introduction to TT contracts](#)

[Lecture 37 - Structure of TT contracts](#)

[Lecture 38 - Integrative approach- IPM and TT](#)

[Lecture 39 - Capsule version II](#)

[Lecture 40 - Am I ready for IPM and TT ? \(Course applicability\)](#)

Lecture 1 - Concept and Scope of Biodiversity Protection

Lecture 2 - Types of Biodiversity, Megabiodiverse Centers

Lecture 3 - Biodiversity Mapping

Lecture 4 - Types of Bio-resources, Conservation Mechanisms

Lecture 5 - International Resources / Centres of Conservation

Lecture 6 - Traditional Resources Rights, Ecosystem Measures

Lecture 7 - Overview of International Framework

Lecture 8 - Convention on Biodiversity - Objectives and Articles

Lecture 9 - International Regime on ABS

Lecture 10 - Biodiversity and Climate Change

Lecture 11 - Biobanks - Governance issues

Lecture 12 - The Biodiversity Act, 2002

Lecture 13 - Regulatory Authorities in India - NBA and SBB

Lecture 14 - Biodiversity Management Committees

Lecture 15 - Peoples Biodiversity Registers

Lecture 16 - ABS Regulation and Benefit Sharing in India

Lecture 17 - Trade Regime and Biodiversity

Lecture 18 - Comparison of Biodiversity Laws of countries

Lecture 19 - TRIPS and CBD Relation

Lecture 20 - CBD and relation to other international treaties related to environment and organization

Lecture 21 - Interrelationship and New Developments

Lecture 22 - Biodiversity and Interface with IPR

Lecture 23 - Challenges related to biopiracy - case studies

Lecture 24 - Patents based on bioresources - Recent Trends and Developments

Lecture 25 - Disclosure requirements in Patent - A comparative perspective

Lecture 26 - Regulatory Law - Comparative perspective

Lecture 27 - Concept, Definitions and Criteria for Plant Variety Protection

Lecture 28 - Protection of Plant Varieties and Farmers' Right 2001 - Major Provisions of the Act

Lecture 29 - Plant Variety Protection - Comparative Perspective

Lecture 30 - International Union for Protection of New Plant Varieties (UPOV)

Lecture 31 - Farmers' Rights - Other Country Model

- [Lecture 32 - Principles of Biodiversity Governance](#)
- [Lecture 33 - Compliance Procedure and Linkage with IPR](#)
- [Lecture 34 - Compliance Procedures under International Framework](#)
- [Lecture 35 - Compliance Procedures in India](#)
- [Lecture 36 - Compliance Procedures in EU](#)
- [Lecture 37 - Biodiversity and Interrelationship with Life](#)
- [Lecture 38 - Sustainable Development Agenda](#)
- [Lecture 39 - Biodiversity, ecosystem functioning, ecosystem services](#)
- [Lecture 40 - Biodiversity and Human Happiness](#)

- Lecture 1 - Introduction to the World Trading system
- Lecture 2 - The history of Indian Trade and the Formation of GATT
- Lecture 3 - The GATT to WTO
- Lecture 4 - The Uruguay Round and The World Trade Organization
- Lecture 5 - Introduction to World Agriculture Trade
- Lecture 6 - The GATT and Agriculture
- Lecture 7 - The WTO Agriculture Agreement Objectives, Domestic Support and Different Boxes
- Lecture 8 - Food Security Concerns at WTO
- Lecture 9 - Rules of Dumping and Anti - Dumping
- Lecture 10 - Determination of Injury, Definition of Industry, Domestic Industry and Casual Link
- Lecture 11 - Procedural Aspects and Indian Laws on Anti-Dumping
- Lecture 12 - Agreement on Sanitary and Phytosanitary measures (SPS)
- Lecture 13 - Assessment of Risks, Codex and Standards
- Lecture 14 - SPS v. TBT Agreement
- Lecture 15 - Technical Barriers to Trade Agreement (TBT) and Indian Institutions
- Lecture 16 - Basic TBT Commitments, Indian Laws, Rules and Regulations
- Lecture 17 - General Agreements on Trade in Services (GATS)
- Lecture 18 - Different Modes of Services
- Lecture 19 - Opening of Legal Service Sector in India
- Lecture 20 - Trade-Related Investment Measures Agreement (TRIMs)
- Lecture 21 - Local Content and WTO disputes
- Lecture 22 - Trade Related Aspects of Intellectual Property Rights (TRIPs) Agreement
- Lecture 23 - Patents and Trademarks
- Lecture 24 - Copyright, Industrial Design and Integrated Circuits
- Lecture 25 - Geographical Indications and Trade Secrets
- Lecture 26 - Doha Declaration and Post-TRIPs Scenario
- Lecture 27 - Agreement on Customs Valuation (CV)
- Lecture 28 - Different Methods of calculating Customs Valuation
- Lecture 29 - Indian Laws on Customs Valuation
- Lecture 30 - The Agreement on Pre-Shipment Inspection
- Lecture 31 - GATT Dispute Settlement

[Lecture 32 - Dispute Settlement in WTO](#)

[Lecture 33 - Panel Proceedings](#)

[Lecture 34 - Appellate Body Proceedings](#)

Lecture 1 - Concepts of Federalism and Theories of Federalism

Lecture 2 - Nature of Centre-State Relations under the Indian Constitution

Lecture 3 - Constitutional Provisions Relating to Centre-State Relations

Lecture 4 - Administrative Relations between Centre and State

Lecture 5 - Administrative Relations between Centre and Union Territories

Lecture 6 - Administration and Control of Scheduled Areas and Scheduled Tribes

Lecture 7 - Administrative Control of Tribal Areas

Lecture 8 - Governor's role and control of Centre

Lecture 9 - Inter-State Disputes Relating to Water

Lecture 10 - Administrative Relations during Emergency

Lecture 11 - Administrative Relations during Emergency

Lecture 12 - Introduction to Services under Constitution, Public and Joint Public Service Commissions

Lecture 13 - Constitutional Provisions relating to Services between Union and Delhi

Lecture 14 - Distribution of Legislative Power

Lecture 15 - Residuary Power and Interpretation of Statutes

Lecture 16 - Power of Parliament to legislate for matters in State List

Lecture 17 - Doctrine of Repugnancy

Lecture 18 - Interpretation of Lists under Schedule VII of the Constitution

Lecture 19 - Doctrine of Doctrines of Pith and Substance, Incidental and Ancillary Power

Lecture 20 - Legislative Relations during Emergency

Lecture 21 - Legislative Relations of State with special status

Lecture 22 - Legislative Relations of Union and States in relation to role of Governor

Lecture 23 - Legislative Relations of Union and Panchayats

Lecture 24 - Legislative Power relating to tax laws

Lecture 25 - Goods and Services Tax and Goods and Services Tax Council

Lecture 26 - Distribution of Revenue between Centre and States

Lecture 27 - Finance Commission under Article 280

Lecture 28 - Inter State Commerce and Inter-Commerce Commission under Art 307

Lecture 29 - Consolidated Fund of India and States, Contingency Fund of India and States and Exemptions

Lecture 30 - Financial Emergency

Lecture 31 - Grants-in-aid (Art 275)

[Lecture 32 - Discretionary Grants \(Art 282\)](#)

[Lecture 33 - Borrowing by Union and State](#)

[Lecture 34 - Inter-State Council](#)

[Lecture 35 - Zonal Council and North Eastern Council](#)

[Lecture 36 - National Development Council, Planning Commission and NITI Aayog](#)

[Lecture 37 - Mechanism to Resolve Centre - State Disputes](#)

[Lecture 38 - Emerging Issues in Federalism I - One Nation One Election, Language Federalism](#)

[Lecture 39 - Emerging Issues in Federalism II - Demand for new States, Demand for Special Status](#)

[Lecture 40 - Role of Rajya Sabha in Federal Scheme](#)

Lecture 1 - Introduction to Transparency, Accountability and Good Governance - Part 1

Lecture 2 - Introduction to Transparency, Accountability and Good Governance - Part 2

Lecture 3 - India's Progress In Ensuring Transparency and Accountability

Lecture 4 - RTI and its contribution in strengthening Transparency and International Perspective on RTI Law

Lecture 5 - Chronology of State RTI Laws in India and major Landmarks in RTI Journey

Lecture 6 - Chronology of State RTI Laws in India and major Landmarks in RTI Journey

Lecture 7 - Constitutional and judicial perspective on RTI

Lecture 8 - Judicial Activism and RTI

Lecture 9 - Judicial Precedents, Reasonable Restrictions and Comparative perspective on RTI

Lecture 10 - Legislating the Right to Information: Background and Challenges - I

Lecture 11 - Legislating the Right to Information: Background and Challenges - II

Lecture 1 - The Evolution and Role of HR Function

Lecture 2 - Evolution and Nature of Strategic Human Resource Management

Lecture 3 - Contributions of and Trends in HR Function

Lecture 4 - Measuring Effectiveness of HR Function

Lecture 5 - Competence Maturity Model and People Competence Maturity Model

Lecture 6 - Organizational Healing: An Introduction

Lecture 7 - Working with Remote Teams

Lecture 8 - Restoring Social and Psychological Well-being

Lecture 9 - Employee Assistance Program

Lecture 10 - Talent Management: An Introduction

Lecture 11 - Potential Matrix: A Tool for Talent Management

Lecture 12 - HR Digitization for Talent Management

Lecture 13 - Positive Employee Relation: The Introduction

Lecture 14 - Positive Work Practices in Organization

Lecture 15 - Humanistic Management Model

Lecture 16 - Link of Humanistic Model and HR Processes

Lecture 17 - Process to make organization great place to work

Lecture 18 - Diversity Management: The Introduction

Lecture 19 - Significance of a Diverse and Inclusive Workplace

Lecture 20 - Significance of a Diverse and Inclusive Workplace

Lecture 21 - Biases in Organization and Ways of their Resolution

Lecture 22 - Intergenerational Relationships in Organization: The Introduction

Lecture 23 - Classifications of Generations at Workforce

Lecture 24 - Types and Attributes of Generations at Workplace

Lecture 25 - Ways of Synergizing Across Generations

Lecture 26 - Ways of enhancing Intergeneration Synergy

Lecture 27 - Intergenerational Relationships in Organization: The Introduction

Lecture 28 - Classifications of Generations at Workforce

Lecture 29 - Types and Attributes of Generations at Workplace

Lecture 30 - Ways of Synergizing Across Generations

Lecture 31 - Intergenerational Relationships in Organization: The Introduction

[Lecture 32 - Classifications of Generations at Workforce](#)

[Lecture 33 - Types and Attributes of Generations at Workplace](#)

[Lecture 34 - Ways of Synergizing Across Generations](#)

[Lecture 35 - Role and Challenges of Sustainable HRM](#)

[Lecture 36 - Contribution of HRM in Corporate Sustainability and Corporate Social Responsibility](#)

[Lecture 37 - Ways to integrate Corporate Sustainability and Corporate Social Responsibility with HRM](#)

[Lecture 38 - Important HR Metrics and Ratios in HRM Function](#)

[Lecture 39 - HR Analytics explained through Case Examples](#)

[Lecture 40 - Tools for Effective Decision Making and Factors for Success in Future at Work](#)

Lecture 1 - Why the Course on Managing Self and Career

Lecture 2 - Present Context of Professional Work

Lecture 3 - State of Wellbeing of Indian Youth

Lecture 4 - Link between Self-Management and Career Management

Lecture 5 - Journey of Positive Psychology

Lecture 6 - Can there be a Universal Positive Psychology ?

Lecture 7 - Difference in Good Life and Life Satisfaction

Lecture 8 - Why Yoga with Positive Psychology ?

Lecture 9 - Genesis of this Course

Lecture 10 - Using Stories to Understand Optimal Experiences

Lecture 11 - Fundamental Questions in Positive Psychology

Lecture 12 - What Positive Psychology is Not

Lecture 13 - Positive-Negative Dialects of Well-Being

Lecture 14 - Positive Psychology: The Second Wave

Lecture 15 - Positivity and Human Potential in Yogic Traditions

Lecture 16 - Holistic Life Goals

Lecture 17 - Embracing Emotions and Positive Behavior

Lecture 18 - Discovering Dharma

Lecture 19 - Distinction with Negative Human Potential

Lecture 20 - Positive Events: 16 Sanskaras

Lecture 21 - Four Ashrams or Stations in Life

Lecture 22 - Yagna - Positive Event

Lecture 23 - Positive Institutions

Lecture 24 - Family - A Positive Institution

Lecture 25 - Yoga and Governance

Lecture 26 - Positive Governance

Lecture 27 - Macro and Micro Integration in Yogic Perspective

Lecture 28 - Self and Society

Lecture 29 - Point for Action and Reflection

Lecture 30 - Health and Wellbeing

Lecture 31 - How does wellbeing affect life ?

- Lecture 32 - Yogic Perspectives of Health and Wellbeing
- Lecture 33 - Doshas
- Lecture 34 - Mind-body Complex
- Lecture 35 - Diseases in Yogic Perspective
- Lecture 36 - Panch Kosha or Five Layers of Self
- Lecture 37 - Managing Mind
- Lecture 38 - Factors to Enhance Well-being
- Lecture 39 - Self-Realization - The Ultimate Joy
- Lecture 40 - What is the Indian Worldview ?
- Lecture 41 - Ways of Attaining Well-Being
- Lecture 42 - TattvaBodh and Wisdom
- Lecture 43 - Indriyajaya or Self-Control
- Lecture 44 - Indriyajaya in Positive Psychology
- Lecture 45 - Dharmic Drishti (Vision)
- Lecture 46 - Dharmic Desires and Pursuits
- Lecture 47 - Dharmakriya in Positive Psychology
- Lecture 48 - Sukhayu-Hitayu
- Lecture 49 - DharmahKriya, Sukhayu-Hitayu and Career Success ?
- Lecture 50 - What is our real nature ?
- Lecture 51 - How the Mind Works: A Yogic Perspective
- Lecture 52 - Obstacles in Attaining Wellbeing
- Lecture 53 - Reflection on Functioning of the Mind
- Lecture 54 - How to avoid Klisht Vrittis ?
- Lecture 55 - Crossing Obstacles to Well-Being
- Lecture 56 - Six Inner Treasures
- Lecture 57 - How are the Six Inner Treasures Valuable
- Lecture 58 - Mental, Vital and Physical Consciousness
- Lecture 59 - Major Forms of Yoga in Indian Tradition
- Lecture 60 - Ashtanga Yoga or Raj Yoga
- Lecture 61 - Yoga for Panch Koshas
- Lecture 62 - Three Pillars of Health
- Lecture 63 - Spiritual Significance of Food
- Lecture 64 - Eight Factors about Food

- Lecture 65 - Seasons with Revolving Sun and Impact on Physiology
- Lecture 66 - Contemporary Knowledge about Food and Mental Health
- Lecture 67 - Food and Activities during the Cycle of the Day
- Lecture 68 - Yogasanas to Integrate Body and Emotions
- Lecture 69 - Interoception, Asanas and Well-Being
- Lecture 70 - Characteristics of Asanas
- Lecture 71 - Process for Moving into Posture
- Lecture 72 - Asanas for Different Body Constitution
- Lecture 73 - Notes on Pranayama
- Lecture 74 - Contemporary Evidences of Prana
- Lecture 75 - Prana Vayu, Nadi System and Chakras
- Lecture 76 - Pranayama Practices and Conscious Breathing
- Lecture 77 - Process and Benefits of Diaphragmatic Breathing
- Lecture 78 - Guidelines for Pranayama
- Lecture 79 - Nadi Shodhana Pranayama (Alternate Nostril Breathing)
- Lecture 80 - Tranquilizing Pranayamas
- Lecture 81 - Organizational Suffering and Dysfunctional Behaviors
- Lecture 82 - Introduction to Pratyahara
- Lecture 83 - Indriya-Pratyahara: Control of the Senses
- Lecture 84 - Methods of Pratyahara
- Lecture 85 - Understanding Emotional Intelligence
- Lecture 86 - Emotional Intelligence and its Relation to Everyday Behavior
- Lecture 87 - How Yoga Helps in Emotional Balance
- Lecture 88 - Positive and Negative Emotions
- Lecture 89 - Dealing with Negative Emotions
- Lecture 90 - How Yoga Helps in Equanimity of Mind
- Lecture 91 - What are the 7 Stages of Wisdom
- Lecture 92 - What Yoga does for Balancing Emotions and Cognitions
- Lecture 93 - How Yoga Impacts Student's Performance: Empirical Studies

Lecture 1 - Module 1 - Part 1

Lecture 2 - Module 1 - Part 2

Lecture 3 - Module 2 - Part 1

Lecture 4 - Module 2 - Part 2

Lecture 5 - Module 3 - Part 1

Lecture 6 - Module 3 - Part 2

Lecture 7 - Module 3 - Part 3

Lecture 8 - Module 4 - Part 1

Lecture 9 - Module 4 - Part 2

Lecture 10 - Module 5 - Part 1

Lecture 11 - Module 5 - Part 2

Lecture 12 - Module 6 - Part 1

Lecture 13 - Module 6 - Part 2

Lecture 14 - Module 7 - Part 1

Lecture 15 - Module 7 - Part 2

Lecture 16 - Module 8 - Part 1

Lecture 17 - Module 8 - Part 2

Lecture 18 - Module 9 - Part 1

Lecture 19 - Module 9 - Part 2

Lecture 20 - Module 10

- Lecture 1 - Introduction of Supply Chain Management
- Lecture 2 - Fundamentals of Supply Chain Management
- Lecture 3 - Supply Chain Drivers
- Lecture 4 - Supply Chain Processes - I
- Lecture 5 - Supply Chain Processes - II
- Lecture 6 - Supply Chain Challenges
- Lecture 7 - Need/Strategies
- Lecture 8 - Push Vs Pull
- Lecture 9 - Case Study on Product Segmentation
- Lecture 10 - Case Study on Inventory Segmentation
- Lecture 11 - Link between Corporate and Supply Chain Strategy
- Lecture 12 - Interface between Operations and Finance
- Lecture 13 - Procurement Strategy (Make Vs Buy)
- Lecture 14 - Procurement Strategy (Kraljic Matrix) - I and II
- Lecture 15 - Procurement Strategy (Kraljic Matrix) - I and II
- Lecture 16 - Introduction to Platform Economy
- Lecture 17 - Introduction to Platform Economy - Example
- Lecture 18 - Introduction to Channel Structures and Supply Chain Coordination
- Lecture 19 - Newsvendor Case Example (Deterministic Setting) - I and II
- Lecture 20 - Newsvendor Case Example (Deterministic Setting) - I and II
- Lecture 21 - Newsvendor Case (Probabilistic Setting and Contracts) - I and II
- Lecture 22 - Newsvendor Case (Probabilistic Setting and Contracts) - I and II
- Lecture 23 - Channel Structure Designs in Supply Chains (Brick and Mortar)
- Lecture 24 - Channel Structure Designs in Supply Chains (Dual Channels)
- Lecture 25 - Channel Structure Designs in Supply Chains (Multi and Omni Channels)
- Lecture 26 - Introduction to Analytics and Big Data
- Lecture 27 - Different Types of Analytics and its Applications in Supply Chain Management
- Lecture 28 - Predictive Analytics: Case Study on Predictive Maintenance
- Lecture 29 - Predictive Analytics: Classification Tree Model
- Lecture 30 - Predictive Analytics: Building Classification Tree Model using Python
- Lecture 31 - Role of AI/ML in Forecasting and Demand Analytics

- Lecture 32 - Demand Forecasting using AI/ML: A Case Study
- Lecture 33 - Demand Forecasting using AI/ML: Regression Tree Model
- Lecture 34 - Demand Forecasting using AI/ML: Building Regression Tree Model using Python
- Lecture 35 - Demand Forecasting using AI/ML: Random Forest Regression Model
- Lecture 36 - Supply Chain Network Optimization: Break even analysis
- Lecture 37 - Supply Chain Network Optimization: Facility location using Centre of Gravity
- Lecture 38 - Supply Chain Network Optimization: Case on Capacitated Plant Location Model
- Lecture 39 - Case on Supply Chain Network Design - I
- Lecture 40 - Case on Supply Chain Network Design - II
- Lecture 41 - Location of Distribution Centers using Clustering Technique: A Case Study
- Lecture 42 - Steps of building K-Means Clustering Algorithm: A Case Study
- Lecture 43 - Location of Distribution Centers: Building K-Means Clustering Model using Python
- Lecture 44 - Measuring Efficiency of Manufacturing Facilities: A DEA Model - I
- Lecture 45 - Measuring Efficiency of Manufacturing Facilities: A DEA Model - II
- Lecture 46 - Role of Product Tracking and Traceability
- Lecture 47 - Track and Trace Systems - I and II
- Lecture 48 - Track and Trace Systems - I and II
- Lecture 49 - ERP, WMS and TMS - I and II
- Lecture 50 - ERP, WMS and TMS - I and II
- Lecture 51 - Introduction to Supply Chain Digital Twin
- Lecture 52 - Supply Chain Digital Twin: Greenfield Analysis - A Case Study - I
- Lecture 53 - Supply Chain Digital Twin: Greenfield Analysis - A Case Study - II
- Lecture 54 - Supply Chain Digital Twin: Network Optimization - A Case Study
- Lecture 55 - Network Optimization with Capacity Constraints and Control Tower
- Lecture 56 - Digital Infrastructure for Supply Chains: Industry 4.0
- Lecture 57 - Industry 4.0 - IIoT, Cloud Computing, Horizontal and Vertical System Integration
- Lecture 58 - Industry 4.0 - Cybersecurity, Big Data Analytics, Simulation, AR, Robots, AM
- Lecture 59 - Blockchain
- Lecture 60 - Supply Chain and Industry 4.0

**NPTEL : NOC:Business Forecasting (Management)**

**Co-ordinators : Prof. Pankaj Dutta**

Lecture 1 - Introduction to Business Forecasting

Lecture 2 - Data Driven Decision Making and Essentials of Predictive Analytics

Lecture 3 - Data Driven Decision Making and Essentials of Predictive Analytics

Lecture 4 - Types of Forecasting: Qualitative Approaches and Quantitative Approaches

Lecture 5 - Components of a Time Series and Measures of Forecast Accuracy

Lecture 6 - Components of a Time Series and Measures of Forecast Accuracy

Lecture 7 - Moving Average Methods: Simple, Weighted, and Exponential Moving Average

Lecture 8 - Moving Average Methods: Simple, Weighted, and Exponential Moving Average

Lecture 9 - Exponential Smoothing

Lecture 10 - Trend Projections and Holt Model

Lecture 11 - Simple Linear Regression and Measure of Goodness and Standard Error

Lecture 12 - Simple Linear Regression and Measure of Goodness and Standard Error

Lecture 13 - Simple Linear Regression and Measure of Goodness and Standard Error

Lecture 14 - Multiple Linear Regression and Multicollinearity

Lecture 15 - Multiple Linear Regression and Multicollinearity

Lecture 16 - Multiple Linear Regression and Multicollinearity

Lecture 17 - Seasonality, Seasonal Index, and Quarterly Average Method

Lecture 18 - Seasonality, Seasonal Index, and Quarterly Average Method

Lecture 19 - Seasonality and Trend: Winter's Holt Method

Lecture 20 - Seasonality and Trend: Winter's Holt Method

Lecture 21 - Multiplicative Decomposition Method

Lecture 22 - Autocorrelation Function (ACF) and Partial Autocorrelation Function (PACF)

Lecture 23 - ARIMA: Auto-Regressive (AR) Process

Lecture 24 - ARIMA: Moving Average (MA) Process

Lecture 25 - ARIMA: Auto-Regressive Moving Average (ARMA) Process

Lecture 26 - Auto-Regressive Integrated Moving Average (ARIMA) Model

Lecture 27 - Introduction to Machine Learning

Lecture 28 - Introduction to Machine Learning

Lecture 0 - How to Learn and Follow the Course

Lecture 1 - R Software and its Installation

Lecture 2 - Help, Documentation, Examples, Packages and Libraries

Lecture 3 - Command Line and Data Editor

Lecture 4 - Introduction to R Studio

Lecture 5 - R as a Calculator

Lecture 6 - Calculation with Data Vectors and Built-in Function

Lecture 7 - Matrix Operations

Lecture 8 - Matrix Operations

Lecture 9 - Univariate Data-Central Tendency and Variability

Lecture 10 - Bivariate Data

Lecture 11 - Missing Data Handling

Lecture 12 - Measuring Central Tendency with Missing Data

Lecture 13 - Measuring Variation with Missing Data

Lecture 14 - Coefficient of Variation and Summary

Lecture 15 - Boxplots and Grouped Boxplots

Lecture 16 - Bar Diagram, Subdivided and Multiple Bar Diagrams

Lecture 17 - Pie Diagram, Histogram and Multiple Histogram

Lecture 18 - Scatter Plots, Smooth Scatter Plots and Matrix Plots

Lecture 19 - Three Dimensional Plots, Star Plots and Chernoff Faces

Lecture 20 - Continuous and Discrete

Lecture 21 - Probability Functions

Lecture 22 - Probability Functions for Continuous Bivariate and Multivariate Random Variables

Lecture 23 - Theoretical Properties

Lecture 24 - Application in R Software

Lecture 25 - Bivariate Normal and Multivariate Normal Distributions in R

Lecture 26 - Chi Square ( $\chi^2$ ), t and F Distribution

Lecture 27 - Point and Interval Estimation

Lecture 28 - Maximum Likelihood Estimation

Lecture 29 - Basics of Tests of Hypothesis

Lecture 30 - Test and Confidence Interval for Mean in One Sample with Known Variance in Univariate Data

- Lecture 31 - Test and Confidence Interval for Mean in One Sample with Unknown Variance in Univariate Data
- Lecture 32 - Tests for Mean in Two Samples with Univariable Data
- Lecture 33 - Analysis of Variance and Homogeneity of Variances with Univariate Data
- Lecture 34 - Tests for Mean Vector with Multivariate Data in One Sample
- Lecture 35 - Tests for Mean Vector with Multivariate Data in Two Sample
- Lecture 36 - Centering, Scaling and Z-Scores
- Lecture 37 - Introduction and Basic Concepts
- Lecture 38 - Estimation of Parameters
- Lecture 39 - Model Fitting with R Software
- Lecture 40 - Test of Hypothesis and Confidence Interval Estimation on Individual Regression Coefficients
- Lecture 41 - Analysis of Variance and Implementation in R Software
- Lecture 42 - Goodness of Fit and Testing of Normality
- Lecture 43 - Logistic Regression Model
- Lecture 44 - Introduction to Classification
- Lecture 45 - Bayes Procedure for Classification
- Lecture 46 - Classification Procedure for Multivariate Normal Distributions
- Lecture 47 - Classification Procedure and Analysis in R
- Lecture 48 - Basic Concepts and Definitions
- Lecture 49 - Hierarchical Classification
- Lecture 50 - Hierarchical Classification and Analysis with R
- Lecture 51 - Hierarchical Classification with Examples in R
- Lecture 52 - Concepts and Theoretical Setup
- Lecture 53 - Principle Component and Its Graphical Analysis in R
- Lecture 54 - Canonical Variables and Concepts
- Lecture 55 - Statistical Analysis of Canonical Variables
- Lecture 56 - Canonical Variables Analysis in R

- Lecture 1 - Introduction to Econometric Modelling
- Lecture 2 - Structure of Econometric Modelling
- Lecture 3 - Univariate Econometric Modelling
- Lecture 4 - Bivariate Econometric Modelling
- Lecture 5 - Bivariate Econometric Modelling (Continued...)
- Lecture 6 - Probability
- Lecture 7 - Bivariate Econometric Modelling
- Lecture 8 - Bivariate Econometric Modelling (Continued...)
- Lecture 9 - Reliability BEM
- Lecture 10 - Reliability BEM (Continued...1)
- Lecture 11 - Reliability BEM (Continued...2)
- Lecture 12 - ANOVA for Bivariate Econometric Modelling
- Lecture 13 - Trivariate Econometric Modelling
- Lecture 14 - Trivariate Econometric Modelling (Continued...)
- Lecture 15 - Reliability of Trivariate Econometric Modelling
- Lecture 16 - Multivariate Econometric Modelling
- Lecture 17 - Multivariate Econometric Modelling (Continued...)
- Lecture 18 - Matrix Approach to Econometric Modelling
- Lecture 19 - Matrix Approach to Econometric Modelling (Continued...)
- Lecture 20 - Multicollinearity Problem
- Lecture 21 - Multicollinearity Problem (Continued...)
- Lecture 22 - Autocorrelation Problem
- Lecture 23 - Autocorrelation Problem (Continued...)
- Lecture 24 - Heteroscedasticity Problem
- Lecture 25 - Heteroscedasticity Problem (Continued...)
- Lecture 26 - Dummy Modelling
- Lecture 27 - Dummy Modelling (Continued...)
- Lecture 28 - LOGIT and PROBIT Model
- Lecture 29 - LOGIT and PROBIT Model (Continued...)
- Lecture 30 - Panel Data Modelling
- Lecture 31 - Panel Data Modelling (Continued...)

[Lecture 32 - Simultaneous Equation Modelling](#)

[Lecture 33 - Simultaneous Equation Modelling \(Continued...\)](#)

[Lecture 34 - Structural Equation Modelling](#)

[Lecture 35 - Structural Equation Modelling \(Continued...\)](#)

[Lecture 36 - Time Series Modelling](#)

[Lecture 37 - Time Series Modelling \(Continued...\)](#)

## NPTEL : NOC:Performance and Reward Management (Management)

**Co-ordinators : Dr. Susmita Mukhopadhyay**

Lecture 1 - Understanding meaning of performance management and reward systems management with performance management process

Lecture 2 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 3 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 4 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 5 - Understanding meaning of performance management and reward systems management with performance management process (Continued...)

Lecture 6 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning

Lecture 7 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 8 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 9 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 10 - Developing an understanding as to why performance management and reward management are of strategic importance and their role in strategic planning (Continued...)

Lecture 11 - Implementation of a performance management system, defining performance and choosing a measurement approach and understanding the meaning of results

Lecture 12 - Implementation of a performance management system, defining performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 13 - Implementation of a performance management system, defining performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 14 - Implementation of a performance management system, defining performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 15 - Implementation of a performance management system, defining performance and choosing a measurement approach and understanding the meaning of results (Continued...)

Lecture 16 - Implementing a performance management system in your organization

Lecture 17 - Implementing a performance management system in your organization (Continued...)

Lecture 18 - Implementing a performance management system in your organization (Continued...)

Lecture 19 - Implementing a performance management system in your organization (Continued...)

Lecture 20 - Implementing a performance management system in your organization (Continued...)

Lecture 21 - Role of performance management in employee development, addressing performance management skills and team reward management

Lecture 22 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 23 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

Lecture 24 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

Lecture 25 - Role of performance management in employee development, addressing performance management skills and team reward management (Continued...)

Lecture 26 - Overview, reward system, understanding total, strategic and international reward

Lecture 27 - Overview, reward system, understanding total, strategic and international reward (Continued...)

Lecture 28 - Overview, reward system, understanding total, strategic and international reward (Continued...)

Lecture 29 - Overview, reward system, understanding total, strategic and international reward (Continued...)

Lecture 30 - Overview, reward system, understanding total, strategic and international reward (Continued...)

Lecture 31 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 32 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 33 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 34 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 35 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 36 - Understanding linkage between performance management and reward, an overview of various types of reward; financial reward, non-financial reward; contingent pay scheme; bonus scheme; team pay ; rewarding for business performance; recognition sc

Lecture 37 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure

Lecture 38 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 39 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 40 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 41 - Valuing and grading jobs, understanding pay levels, job evaluation schemes, equal pay, market rate analysis, designing of grade and pay structure (Continued...)

Lecture 42 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers

Lecture 43 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 44 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 45 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

Lecture 46 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers (Continued...)

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

[Lecture 47 - Rewarding Special Groups, rewarding directors and senior executives, sales and customer service staff, knowledge workers and manual workers \(Continued...\)](#)

[Lecture 48 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission](#)

[Lecture 49 - Understanding relevance of employee benefits and pension schemes, employee benefits, flexible benefits, pension scheme, 7th Pay Commission \(Continued...\)](#)

**NPTEL : NOC:Decision Support System for Managers (Management)**

**Co-ordinators : Prof Sujoy Bhattacharya, Prof. Anupam Ghosh, Prof. Kunal Kanti Ghosh**

Lecture 1 - Introduction to decision support systems

Lecture 2 - Components of a decision support systems

Lecture 3 - Components of a decision support systems (Continued...)

Lecture 4 - Models in decision support systems

Lecture 5 - Models in decision support systems (Continued...)

Lecture 6 - Structured, Semi-Structured and Unstructured problems; Models

Lecture 7 - Purpose of models; classification of models

Lecture 8 - Solution Techniques - Optimization : Linear Programming

Lecture 9 - Solution Techniques - Optimization : Linear Programming (Continued...)

Lecture 10 - Solution Techniques - Optimization : Integer Programming

Lecture 11 - Decision Support Systems for Forecasting

Lecture 12 - Decision Support Systems for Forecasting (Continued...)

Lecture 13 - Decision Support Systems for Forecasting (Continued...)

Lecture 14 - Decision Support Systems for Forecasting (Continued...)

Lecture 15 - Decision Support Systems for Forecasting (Continued...)

Lecture 16 - Decision Making for Warehouse Location : Factor Rating and Break - Even Method

Lecture 17 - Decision Making for Warehouse Location (Continued..): Centre of gravity; Ardalan heuristic and transportation cost models

Lecture 18 - Estimation of space requirement in a warehouse and concept of economic order quantity (EOQ)

Lecture 19 - Economic order quantity (EOQ) (Continued...)

Lecture 20 - ABC-FSN-VED Analysis; space calculation in a warehouse - for Staging area

Lecture 21 - Space calculation in a warehouse : Space calculation for racks

Lecture 22 - Order Picking; Material handling equipment's

Lecture 23 - Material Safety and Safety Equipment's

Lecture 24 - Automated storage and replenishment systems (AS/RS)

Lecture 25 - Managerial Decision making in the context of warehousing and materials management

Lecture 26 - Issues in HR; Employee Selection

Lecture 27 - Employee Selection, Promotion and Deployment Method - Lp Method

Lecture 28 - Employee Selection, Promotion and Deployment Method - Rating and ranking Method ; Clustering

Lecture 29 - Employee Selection, Promotion and Deployment Method - BCG

Lecture 30 - Strategizing for Business, the SWOT and Porter's Framwork Revisited

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 31 - Fortune at the Bottom of the Pyramid, GE, Rule of Three

Lecture 32 - Self Actualisation Needs, Rural Marketing Challenges

Lecture 33 - Rural Marketing; Balanced ScoreCard

Lecture 34 - Evaluating Investment Proposals : NPV, IRR

Lecture 35 - Costing and Pricing for Public Transport

Lecture 36 - Costing and Pricing for Hospitals

Lecture 37 - Decision Support Systems for Marketing : Decision Support Systems for Media Selection Model

Lecture 38 - Decision Support Systems for Marketing : Decision Support Systems for Media Selection Model (Continued...)

Lecture 39 - Decision Support Systems for Marketing : Decision Support Systems for Product Pricing Model

Lecture 40 - Pricing : Model Selection Using Cross - Validation

Lecture 41 - Taxation and the Distribution Network

Lecture 42 - Transshipment; Flexibility and Six Sigma

Lecture 43 - Flexibility and Total Cost of the Network

Lecture 44 - Risk Analysis for the Distribution Network

Lecture 45 - Echelons in the Network

Lecture 46 - Concept of Variability and Six Sigma

Lecture 47 - Concept of Variability and Six Sigma (Continued...)

Lecture 48 - Roadmap to Six Sigma; Ishikawa Diagram and SIPOC

Lecture 49 - Service Systems : Characteristics; Failure and Recovery

Lecture 50 - Decision Support Systems for Inventory

Lecture 51 - Decision Support Systems for Inventory (Continued...)

Lecture 52 - Decision Support Systems for Inventory (Continued...)

Lecture 53 - Decision Support Systems for Inventory (Continued...)

Lecture 54 - Decision Support Systems for Inventory (Continued...)

Lecture 55 - Decision Support Systems for Operations Management

Lecture 56 - Decision Support Systems for Operations Management (Continued...)

Lecture 57 - Decision Support Systems for Operations Management (Continued...)

Lecture 58 - Decision Support Systems for Operations Management (Continued...)

Lecture 59 - Decision Support Systems for Operations Management (Continued...)

Lecture 60 - DSS for Multi - Item Production - Distribution Planning

Lecture 1 - Introduction - Part 1

Lecture 2 - Introduction - Part 2

Lecture 3 - Dimensions of Information System

Lecture 4 - Information Management in the digital world

Lecture 5 - Class discussions and conclusion

Lecture 6 - Data bases and information management

Lecture 7 - Data warehouse and business intelligence

Lecture 8 - Introduction to data mining

Lecture 9 - Data analytics tools and techniques

Lecture 10 - What is ERP ?

Lecture 11 - ERP - Evolution and Benefits

Lecture 12 - Business Benefits of ERP

Lecture 13 - ERP project management: Challenge, risks and best practices

Lecture 14 - Change management and conclusion

Lecture 15 - Customer relationship management

Lecture 16 - Supply Chain Management - Part 1

Lecture 17 - Supply Chain Management - Part 2

Lecture 18 - Supplier relationship management

Lecture 19 - Product lifecycle maintenance

Lecture 20 - Information Systems for manufacturing management

Lecture 21 - Information Systems for manufacturing management (Continued...)

Lecture 22 - Information Systems for materials management

Lecture 23 - Information Systems for quality management

Lecture 24 - Information Systems for marketing

Lecture 25 - Information Systems for marketing (Continued...)

Lecture 26 - Information Systems for sales and distribution

Lecture 27 - Information Systems for finance and accounting

Lecture 28 - Information Systems for human resource management

Lecture 29 - Information Systems for human resource management (Continued...)

Lecture 11 - Inventory - Models for all quantity and marginal quantity Discount

Lecture 12 - Multiple Quantity Discount, Multiple item inventory - Constraint on numbers of orders

Lecture 13 - Multiple item inventory - Constraint on money value, space, equal number of orders

Lecture 14 - Multiple item inventory - combining orders, production consumption model

Lecture 15 - Inventory - Production consumption model with backordering, Economic lot scheduling problem

Lecture 16 - Economic lot scheduling problem, Supply Chain inventory

Lecture 17 - Lot sizing

Lecture 18 - Lot sizing - heuristics

Lecture 19 - Disaggregation

Lecture 20 - Disaggregation - time varying demand, Safety stock - ROL for discrete demand distribution

Lecture 21 - Safety stock - ROL for normal distribution of lead time demand

Lecture 22 - Integrated model, ROL for normal distribution of LTD and given mean

Lecture 23 - Safety stock reduction - delayed Product differentiation, substitution. MOM

Lecture 24 - Sequencing and scheduling - Assumptions, objectives and shop settings

Lecture 25 - Single machine sequencing. Two machine flow shop - Johnson's algorithm

Lecture 26 - Flow shop scheduling - Three machines, Johnson's algorithm and Branch and bound algorithm

Lecture 27 - Flow shop scheduling - heuristics - Palmer, Campbell Dudek Smith algorithm

Lecture 28 - Job shop scheduling - Gantt chart, Different dispatching rules

Lecture 29 - Job shop scheduling - Shifting bottleneck heuristic

Lecture 30 - Job shop scheduling - Shifting bottleneck heuristic. Line Balancing

Lecture 31 - Line Balancing

[Lecture 32 - Location problems - p median problem, Fixed charge problem](#)

[Lecture 33 - Location allocation problems in supply chain. Layout](#)

[Lecture 34 - Quantitative models for layout, Summary](#)

[Lecture 35 - Introduction to Supply Chain Management](#)

[Lecture 36 - Location Problems](#)

[Lecture 37 - Transportation and Distribution Models](#)

[Lecture 38 - Transportation and Distribution Models\(continued\)](#)

[Lecture 39 - Bin Packing and Travelling Salesman Problems](#)

[Lecture 40 - Vehicle Routeing Problems](#)

[Lecture 41 - Value of Information](#)

Lecture 1 - Introduction to Tech Forecasting for Strategic Decision Making

Lecture 2 - Famous forecasts which missed the mark

Lecture 3 - Why do we need technology forecasts? - Innovation vs Invention Efficiency vs Effectiveness

Lecture 5 - Why do we need technology forecasts? - Limiting Resources

Lecture 6 - Why do we need technology forecasts? - Why is it difficult to forecast?

Lecture 7 - Why do we need technology forecasts? - General stages of forecasting?

Lecture 9 - Failure and Success Startup Stories

Lecture 10 - Strategic, Tactical and Operational Decision Making

Lecture 11 - Quiz about Strategic, Tactical and Operational decision making

Lecture 12 - Answer to the quiz on Strategic, Tactical and operational decision making

Lecture 13 - Introduction to Vacuum forming case study and FORMAT handbook

Lecture 14 - Quiz on systems and set

Lecture 15 - Quiz on functions

Lecture 16 - Technology Lifecycle - Example case study - Transportation

Lecture 17 - Technology Lifecycle - Seasons, Clockspeed - Part 1

Lecture 18 - Technology Lifecycle - Seasons, Clockspeed - Part 2

Lecture 19 - Technology Lifecycle - Seasons, Clockspeed - Part 3

Lecture 20 - Technology Lifecycle - Seasons, Clockspeed - Part 4

Lecture 21 - Technology Lifecycle - Seasons, Clockspeed - Part 5

Lecture 22 - Aryabhata's experience in modeling and Live Solar Eclipse

Lecture 23 - Alternatives to forecasting in scope of technology management

Lecture 24 - Alternatives to forecasting in scope of technology management - Q&A

Lecture 25 - Element-Name-Value Model

Lecture 26 - System Operator

Lecture 27 - How to collect problems for mapping

Lecture 28 - How to formalize our knowledge about problems?

Lecture 29 - System function - What's function 1 Energy for cooking

Lecture 30 - System function - What's the function 2 Mosquito repellent

Lecture 31 - System function - What's the function 3 Pancake (Dosa) batter

Lecture 32 - Technological roadmaps

Lecture 33 - Maps of contradiction for forecasting

[Lecture 34 - Quantitative forecasting](#)

[Lecture 35 - Demo of S-curve fitting software](#)
