

**NPTEL : Introduction to Aerospace Propulsion (Aerospace Engineering)**

**Co-ordinators : Prof. Bhaskar Roy, Prof. A M Pradeep**

Lecture 1 - Course Intro & Historical development of flights

Lecture 2 - Early development of aircraft propulsive devices

Lecture 3 - Development of Jet propulsion for aircraft

Lecture 4 - Introduction to thermodynamics, Scope and method, Basic concepts: system, surroundings, property, intensive and extensive, state, equilibrium and state postulate, process, path and cycle

Lecture 5 - Quasi-static processes, zeroth law of thermodynamics and temperature, concept of energy and its various forms, internal energy, enthalpy

Lecture 6 - Specific heats at constant pressure and volume Work and heat transfers

Lecture 7 - Tutorial

Lecture 8 - First law of thermodynamics for closed systems

Lecture 9 - First law of thermodynamics for open systems/flow processes

Lecture 10 - Second law of thermodynamics, heat engines, refrigerators and heat pumps, Kelvin-Planck and Clausius statement of second law of thermodynamics

Lecture 11 - Reversible and irreversible processes, concept of entropy

Lecture 12 - Increase of entropy principle, third law of thermodynamics, absolute entropy, perpetual motion machines

Lecture 13 - Tutorial

Lecture 14 - Carnot cycle, Carnot principle, thermodynamic temperature scale

Lecture 15 - Exergy, availability and second law efficiency

Lecture 16 - Tutorial

Lecture 17 - Gas and vapour power cycles, Otto cycle, Diesel cycle, Dual cycle

Lecture 18 - Rankine cycle, Brayton cycle, Stirling and Ericsson cycles

Lecture 19 - Thermodynamic property relations, Jacobean and Legendre transformations, Maxwell's equations

Lecture 20 - Tutorial

Lecture 21 - Properties of gas and vapour mixtures

Lecture 22 - One-dimensional compressible flows, isentropic flows

Lecture 23 - Flows with friction and heat transfer, normal and oblique shocks

Lecture 24 - Piston-prop engines: Otto cycles; Ideal and Real cycles

Lecture 25 - IC Engines for aircraft application

Lecture 26 - Performance parameters of IC engines

Lecture 27 - Supercharging of aircraft IC engines

Lecture 28 - Tutorial: IC Engines

Lecture 29 - Propeller fundamentals

## DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

[Lecture 30 - Propeller aerodynamic theories - I](#)

[Lecture 31 - Propeller aerodynamic theories - II](#)

[Lecture 32 - Tutorial: Propellers](#)

[Lecture 33 - Ideal cycles for Jet engines](#)

[Lecture 34 - Ideal cycles for variants of jet engines](#)

[Lecture 35 - Tutorial](#)

[Lecture 36 - Fundamentals of Ramjets and Pulsejets](#)

[Lecture 37 - Fundamentals of Rocket engines](#)

[Lecture 38 - Fundamentals of Missile engines](#)

[Lecture 39 - Various space vehicles and their engines](#)

[Lecture 40 - Closure of the lecture series : recap](#)

**NPTEL : Jet Aircraft Propulsion (Aerospace Engineering)**

**Co-ordinators : Prof. A M Pradeep, Prof. Bhaskar Roy**

- Lecture 1 - Introduction & Development of Jet Aircraft Propulsion
- Lecture 2 - How the Aircraft Jet Engines make Thrust
- Lecture 3 - Jet Engine Basic Performance Parameters
- Lecture 4 - Turbojet, Reheat Turbojet and Multi-spool Engines
- Lecture 5 - Turbofan, Turbo-prop and Turboshift engines
- Lecture 6 - Ideal and Real Brayton cycles
- Lecture 7 - Jet Engine Cycles for Aircraft propulsion
- Lecture 8 - Cycle components and component performances
- Lecture 9 - Tute-1
- Lecture 10 - Analysis of engine real cycles
- Lecture 11 - Tute-2
- Lecture 12 - Thermodynamics of Compressors
- Lecture 13 - Thermodynamics of Turbines
- Lecture 14 - Axial Compressors : two dimensional analytical model
- Lecture 15 - Cascade analysis; Loss and Blade performance estimation
- Lecture 16 - Free Vortex theory; Single-Multi-stage characteristics
- Lecture 17 - Tutes-3
- Lecture 18 - Elements of centrifugal compressor
- Lecture 19 - Centrifugal Compressor characteristics: Surging, Choking
- Lecture 20 - Axial flow turbines; Turbine Blade 2-D (cascade) analysis
- Lecture 21 - Multi-staging: Axial Turbine; Turbine Cooling Technology
- Lecture 22 - Radial Turbine Aerodynamics & Thermodynamics; Losses
- Lecture 23 - Tutes-4
- Lecture 24 - Types of combustion chambers: mechanism & parameters
- Lecture 25 - Pr. Loss, Combustion efficiency; Combustion intensity
- Lecture 26 - Practical combustion system ; Stability, Fuel injection
- Lecture 27 - Intakes for Powerplant: Transport / Military Aircraft
- Lecture 28 - Subsonic, Transonic, Supersonic Intake Designs
- Lecture 29 - Nozzle : fixed and variable geometry nozzles
- Lecture 30 - C-D nozzle and their uses
- Lecture 31 - Tute-5

[Lecture 32 - Engine Off Design Operations](#)

[Lecture 33 - Aircraft Engine component matching: Dimensional analysis](#)

[Lecture 34 - Engine component matching and Sizing](#)

[Lecture 35 - Installed Performance of Engine](#)

[Lecture 36 - Tute-6](#)

[Lecture 37 - Use of Ramjets and Pulsejets in Aircraft propulsion](#)

[Lecture 38 - Thermodynamic Cycle & Performance Parameters](#)

[Lecture 39 - Flow in Diffusers, Combustors and Nozzles](#)

[Lecture 40 - Performance and Design of Ramjet & Scramjet Engines](#)

[Lecture 41 - Tute-7](#)

[Lecture 42 - Future of Aircraft Propulsion](#)

**NPTEL : Turbomachinery Aerodynamics (Aerospace Engineering)**

**Co-ordinators : Prof. Bhaskar Roy, Prof. A M Pradeep**

- Lecture 1 - Introduction to Turbo machines Syllabus, References and Schedules
- Lecture 2 - Axial Flow Compressors and Fans : Introduction to Compressor Aerothermodynamics
- Lecture 3 - A two dimensional analytical model : Cascade
- Lecture 4 - 2D losses in Axial flow Compressor Stage : Primary losses
- Lecture 5 - Tutorial 1 : Two Dimensional Axial Flow Compressors
- Lecture 6 - 3D Flows in Blade Passages, Secondary Flows, Tip leakage Flow, Scrubbling
- Lecture 7 - Three Dimensional Flow Analysis : Radial Equilibrium Concept
- Lecture 8 - Classical Blade Design Laws : Free Vortex and other Laws
- Lecture 9 - Three Dimensional Flow Analysis in Axial Flow Compressor
- Lecture 10 - Tutorial 2 : Three Dimensional Axial Flow Compressors
- Lecture 11 - Axial Compressor Characteristics: Single stage, Multi stage and Multi spool Characteristics
- Lecture 12 - Instability in Axial Compressors
- Lecture 13 - Inlet Distortion and Rotating Stall, Control of Instability
- Lecture 14 - Transonic Compressors and Shock Structure Models, Transonic Compressor Characteristics
- Lecture 15 - Axial Flow Compressor Design, Inter Spool Duct
- Lecture 16 - Design of Compressor Blades, Aerofoil Design (Subsonic, Transonic, Supersonic Profiles )
- Lecture 17 - Design of Compressor Blade: 3D Blade Shapes of Rotors and Stators
- Lecture 18 - Noise Problem in Axial Compressors and Fans
- Lecture 19 - Axial Flow Turbines: Introduction to Turbines Aerothermodynamics
- Lecture 20 - Axial Flow Turbines: Turbine Blade 2D (Cascade) Analysis
- Lecture 21 - Axial Flow Turbines: Work done, Degree of Reaction, Losses and Efficiency
- Lecture 22 - Axial Flow Turbines: Blade and Axial Flow Passages, Exit Flow Matching with Nozzle
- Lecture 23 - Tutorial 3 : Axial Flow Turbines
- Lecture 24 - Multi staging and Multi spooling of Turbine
- Lecture 25 - 3D Flow in Turbine: 3D Flow Theories, Free Vortex Theories etc.
- Lecture 26 - Tutorial 4 : 3D Flows in Axial Flow Turbines
- Lecture 27 - Turbine Blade Cooling “ Fundamentals of Heat Transfer, Blade Cooling Requirements
- Lecture 28 - Turbine Blade Cooling Technologies
- Lecture 29 - Turbine Blade Design: Turbine Profiles, Aerofoil Data and Profile Construction
- Lecture 30 - Turbine Blade Design: 3D Blade Shapes
- Lecture 31 - Centrifugal Compressors: Thermodynamics and Aerodynamics

[Lecture 32 - Centrifugal Compressors: Characteristics, Stall, Surge Problems](#)

[Lecture 33 - Tutorial 5 : Centrifugal Compressors](#)

[Lecture 34 - Design of Centrifugal Compressors: Impellers, Vane/Vane less Diffusers, Volute](#)

[Lecture 35 - Radial Turbines: Thermodynamics and Aerodynamics](#)

[Lecture 36 - Tutorial 6 : Radial Turbines](#)

[Lecture 37 - Radial Turbine Characteristics and Design of Radial Turbines](#)

[Lecture 38 - CFD for Turbomachinery: Grid Generation, Boundary Conditions for Flow Analysis](#)

[Lecture 39 - CFD for Turbomachinery: Flow Track and Inter-spool Duct Design using CFD](#)

[Lecture 40 - CFD for Turbomachinery: 2D and 3D Blade Generation and Analysis Using CFD](#)

- Lecture 1 - Course Layout and Brief Introduction of Course Instructor
- Lecture 2 - Introduction to International Standard Atmosphere (ISA)
- Lecture 3 - Pressure, Temperature, Density and Viscosity Variation with Altitude in ISA
- Lecture 4 - Other Standard Atmospheres
- Lecture 5 - Aircraft Component Nomenclature - Wing and its Components
- Lecture 6 - Aircraft Component Nomenclature - Fuselage and its Components
- Lecture 7 - Aircraft Component Nomenclature - Tail Plane and its Components
- Lecture 8 - Tutorial 1 - Aircraft Component Nomenclature
- Lecture 9 - Essentials of Incompressible Flow - Part I
- Lecture 10 - Essentials of Incompressible Flow - Part II
- Lecture 11 - Bernoulli's Equation and Coanda Effect
- Lecture 12 - Mach Number
- Lecture 13 - Tutorial 2 - Incompressible Flow and Flow Visualization
- Lecture 14 - Viscous Flow and Reynolds Number
- Lecture 15 - Introduction to Boundary Layer
- Lecture 16 - Pressure Measurement
- Lecture 17 - Air Speed Measurement - Pitot Static Tube
- Lecture 18 - Air Speed Corrections
- Lecture 19 - Altitude and ROC/ROD Measurement
- Lecture 20 - Measurements in Compressible Flows
- Lecture 21 - Non Pneumatic Instruments
- Lecture 22 - Introduction to Aerofoils and Aerofoil Nomenclature
- Lecture 23 - Aerofoils - A Visit to the Past
- Lecture 24 - Thick Aerofoils
- Lecture 25 - Low Reynolds Number Aerofoils
- Lecture 26 - Lift Generation by Wings - Part I
- Lecture 27 - Lift Generation by Wings - Part II
- Lecture 28 - Coefficient of Lift and Coefficient of Pressure
- Lecture 29 - Tutorial on Aerofoils
- Lecture 30 - Critical Mach Number
- Lecture 31 - Wave Drag

Lecture 32 - Swept Wings

Lecture 33 - Introduction to Drag and Types of Drag

Lecture 34 - Factors Affecting Induced Drag

Lecture 35 - Skin Friction Drag

Lecture 36 - Tutorial on Critical Mach Number and Wave Drag

Lecture 37 - Introduction to Propulsion

Lecture 38 - Gas Turbine Engine Types - Part I

Lecture 39 - Gas Turbine Engine Types - Part II

Lecture 40 - Introduction to Electric Propulsion and Ion Propulsion

Lecture 41 - Steady Level Flight

Lecture 42 - Power Required for the Steady Level Flight

Lecture 43 - Steady Level Flight - A Pilot's View

Lecture 44 - Tutorial on Steady Level Flight

Lecture 45 - Gliding Flight

Lecture 46 - Climbing Flight and Ceiling

Lecture 47 - Introduction to Turning Flight

Lecture 48 - Turning Flight Equations

Lecture 49 - Instantaneous and Sustained Turn

Lecture 50 - Tutorial on Climbing Flight and Turning Flight

Lecture 51 - Introduction to Static Stability: Center of Pressure, Center of Gravity and Neutral Point

Lecture 52 - Aerodynamic Center and Effect of Center of Gravity

Lecture 53 - Effect of Center of Gravity - A Practical Demonstration

Lecture 54 - Introduction to V-n Diagram

Lecture 55 - V-n Diagram as per FAR 23 Regulations

Lecture 56 - Effect of Gusts on V-n Diagram

Lecture 57 - Tutorial on Stability and Control

Lecture 58 - Range

Lecture 59 - Specific Fuel Consumption and Generalized Range Equation

Lecture 60 - Endurance

Lecture 61 - Take-off Performance of Flight - Part I

Lecture 62 - Take-off Performance of Flight - Part II

Lecture 63 - Landing Performance of Flight

Lecture 64 - Tutorial on Range Payload Diagram

[Lecture 65 - Tutorial on Range and Endurance](#)

[Lecture 66 - Flapping Wing Aerodynamics - Part I](#)

[Lecture 67 - Flapping Wing Aerodynamics - Part II](#)

- Lecture 1 - What is Aircraft Design
- Lecture 2 - Aircraft Design Process
- Lecture 3 - Design Stages
- Lecture 4 - Phases in Aircraft Design
- Lecture 5 - The Design Spiral

Lecture 4 - Linear Algebra: Permutation Matrix, Existence of Solution (Continued...)

Lecture 5 - Linear Algebra: Linear Independence, Basis Vector and Dimensions

Lecture 6 - Linear Algebra: Null Space, Column Space, Row Space, Introduction to Orthogonal System

Lecture 7 - Linear Algebra: Orthogonal System, Projection, Determinant

Lecture 8 - Linear Algebra: Orthogonal System, Projection, Determinant (Continued...)

Lecture 9 - Linear Algebra: Properties of Determinant, Cramer's Rule, Introduction to Eigen Values

Lecture 10 - Linear Algebra: Eigen Values, Eigen Vectors, SVD

Lecture 11 - Linear Algebra: Eigen Values, Eigen Vectors, SVD (Continued...)

Lecture 12 - ODE: Introduction to ODEs, Initial Value Problem, Separation of Variables

Lecture 13 - ODE: Solution of Exact ODEs, First Order Linear Systems

Lecture 14 - ODE: Solution of Second Order Linear ODEs

Lecture 15 - ODE: Existence and Uniqueness of Solution, Non-Homogeneous System

Lecture 16 - ODE: Higher Order Linear ODEs, Variation of Parameters, System of ODEs

Lecture 17 - ODE: Linear Systems, Superposition for Homogeneous Systems

Lecture 18 - Fourier Analysis, Orthogonality of Trigonometric Systems, Euler's Formula

Lecture 19 - Parseval's Theorem, Fourier Integrals, Laplace Transforms

Lecture 20 - PDE: Introduction to PDEs, Solution of PDEs using Characteristics Curve

Lecture 21 - PDE: First Order PDEs, Dilation Invariant Solution of Differential Equations

Lecture 22 - PDE: Solution of Linear PDEs

Lecture 23 - PDE: Separation of Variables, Eigenvalue Problem, Poisson Integral Representation

Lecture 24 - PDE: Boundary Conditions, Solution of 2D systems

Lecture 25 - Introduction to Numerical Methods, Mathematical Models, Errors

Lecture 26 - Errors, Numerical Differentiation, Stability

Lecture 27 - Roots of Equations: Graphical Method, Bi-Section Method, False-Position Method

Lecture 28 - Secant Method, Brent's Method, Multipoint Iteration Method, Derivative Free Method

Lecture 29 - Complex Roots, Birge-Vieta Method, Bairstow's method

Lecture 30 - Solution of Linear Algebraic Equations, Gauss Elimination Method

Lecture 31 - Direct Methods: Gauss Elimination, Gauss-Jordan, Crout's Method, Cholesky Method, Iterative Methods: Jacobi Iteration

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Method, Gauss-Seidel

Lecture 32 - Extrapolation Method, Eigenvalue Problem, Jacobi Method, Householder's Method for Symmetric Matrices, Power Method, Inverse Power Method

Lecture 33 - Interpolation: Taylor's Series, Lagrange and Newton Interpolation, Iterated Interpolation, Hermite Interpolation, Finite Difference Operations

Lecture 34 - Piecewise and Spline Interpolation, Bivariate Interpolation, Least Square Approximation, Uniform Polynomial Approximation

Lecture 35 - Numerical Differentiation and Intergration, Methods Based on Finite Differences, Methods based on Undetermined Coefficients, Extrapolation Methods, Partial Differentiation

Lecture 36 - Numerical Integration: Newton-Cotes Method, Gaussian Integration Methods, Lobatto Integration Method, Radau Integration Method, Composite Integration Methods

Lecture 37 - Double Integration: Trapezoidal Rule, Simpson's Rule, Solution of ODEs: Difference Equation, Single Step Methods, Explicit Methods

Lecture 38 - Runge-Kutta Methods, Euler-Cauchy Method, Multi-step Methods, Predictor-Corrector Methods

Lecture 39 - System of Differential Equations, Stability Analysis, Solution of Boundary Value Problem: Shooting Method

Lecture 40 - Numerical Approach to Solution of PDEs: Heat Conduction Equation, Convergence and Stability

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

**NPTEL : NOC:Weather Forecast in Agriculture and Agro-advisory (WF) (Agriculture)**

**Co-ordinators : Dr. R. Nagarajan, Co Faculty, Dr.T.N.Balasubramanian (Rtd.), Instructor Incharge**

Lecture 1 - Introduction

Lecture 2 - Basic aspects of Atmosphere, Climate, Weather

Lecture 3 - Basic aspects of Rainfall and their application in crop production

Lecture 4 - Basic aspects of Temperature and their application in crop production

Lecture 5 - Basic aspects of Relative humidity, Cloud cover and their application in crop production

Lecture 6 - Basic aspects of wind, wind direction and their application in crop production

Lecture 7 - Three weather codes and crop production

Lecture 8 - Crop production risks and their management

Lecture 9 - Weather sensitive crops, stages and farm operations

Lecture 10 - Crop-weather interactions and definition

Lecture 11 - Crop-Weather Interactions: Wheat, Rice and Maize

Lecture 12 - Crop-Weather Interactions: Sorghum, Groundnut and Pigeon pea

Lecture 13 - Crop-Weather Interactions: Cotton and Sugarcane

Lecture 14 - Crop-Weather Interactions: Sugarbeet and Chickpea

Lecture 15 - Crop-Weather Interactions: Sunflower and Mustard

Lecture 16 - Genesis of weather forecast in India and Abroad

Lecture 17 - Types of weather forecast and details

Lecture 18 - Types of weather forecast and details (Continued...)

Lecture 19 - Simple methods of verification of weather forecast with real event

Lecture 20 - Traditional knowledges on weather forecast and their validity

Lecture 21 - Weather thumb rules and their validity

Lecture 22 - Development and component of agro advisory for weather forecast

Lecture 23 - Development and component of agro advisory for weather forecast (Continued...)

Lecture 24 - Model agro advisories for selected five days weather forecast

Lecture 25 - Mass communication mode of agro advisories and their effectiveness

Lecture 26 - Discussion on weather forecast and agro advisory from different website

Lecture 27 - Role of climate manager on farm management decision based on weather forecast at village level and assignment

Lecture 28 - Development of selected weather window for issuing agro advisory - case study from Tamil Nadu

Lecture 29 - Model of agro advisory for 54 selected weather window of Tamil Nadu for rice

Lecture 30 - Response farming- a type of farm planning being practiced in Australia considering seasonal climate forecast

Lecture 31 - Case study in India on the adoption of weather based crop production - Crop management

**HTML Links for 1,14,300+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai**

Lecture 1 - Introduction

Lecture 2 - Soil Properties - I

Lecture 3 - Soil Properties - II

Lecture 4 - Soil Water

Lecture 5 - Tutorial - I

Lecture 6 - Field water balance

Lecture 7 - Evapotranspiration

Lecture 8 - Crop water requirement

Lecture 9 - Irrigation Scheduling

Lecture 10 - Tutorial

Lecture 11 - Irrigation Water Conveyance System

Lecture 12 - Irrigation Water Conveyance

Lecture 13 - Channel Design Structures

Lecture 14 - Measurement of Irrigation Water: Pipe

Lecture 15 - Tutorial

Lecture 16 - Water Application Methods

Lecture 17 - Surface Irrigation Hydraulics

Lecture 18 - Furrow Irrigation Hydraulics

Lecture 19 - Border Irrigation Design

Lecture 20 - Tutorial

Lecture 21 - Sprinkler Irrigation Design

Lecture 22 - Sprinkler Irrigation : Hydraulic Design

Lecture 23 - Drip Irrigation - I

Lecture 24 - Drip Irrigation Design

Lecture 25 - Tutorial (Week 5)

Lecture 26 - Irrigation Wells

Lecture 27 - Aquifer Properties

Lecture 28 - Well Hydraulics - 1

Lecture 29 - Well Hydraulics - 2

Lecture 30 - Tutorial

Lecture 31 - Introduction

Lecture 32 - Centrifugal Pump: Basics

Lecture 33 - Centrifugal Pumps: Power Requirement

Lecture 34 - Pump Characteristic Curves

Lecture 35 - Tutorial

Lecture 36 - Management of salt affected soils: Saline and alkali soils - 1

Lecture 37 - Management of salt affected soils: Saline and alkali soils - 1

Lecture 38 - Agricultural Drainage: Related Concepts

Lecture 39 - Agricultural Drainage: Introduction

Lecture 40 - Tutorial

Lecture 41 - Drainage System Components

Lecture 42 - Drainage System : Drain Pipe

Lecture 43 - Drainage System : Structures

Lecture 44 - Drainage System Design

Lecture 45 - Tutorial

Lecture 46 - Subsurface Drainage Design - 1

Lecture 47 - Subsurface Drainage Design - 2

Lecture 48 - Subsurface Drainage Design - 3

Lecture 49 - Subsurface Drainage Design - 4

Lecture 50 - Tutorial

Lecture 51 - Surface drainage system design - 1

Lecture 52 - Surface drainage system design - 2

Lecture 53 - Non-conventional drainage

Lecture 54 - Economics of drainage project

Lecture 55 - Tutorial

Lecture 56 - Case study of drainage system

Lecture 57 - Drainage Model

Lecture 58 - Irrigation Efficiency

Lecture 59 - Irrigation Economics

Lecture 60 - Irrigation model

Lecture 1 - Importance Of Rheology In Food

Lecture 2 - Food Rheology

Lecture 3 - Food Rheology

Lecture 4 - Food Rheology

Lecture 5 - Food Rheology

Lecture 6 - Measurements of Rheological Properties

Lecture 7 - Measurements of Rheological Properties

Lecture 8 - Rheological Properties of Viscoelastic Food

Lecture 9 - Rheological Properties of Viscoelastic Food

Lecture 10 - Rheological Properties of Viscoelastic Food

Lecture 11 - Thermal Processing And Microbial Death Kinetics

Lecture 12 - Thermal processing and microbial death kinetics

Lecture 13 - Thermal processing and microbial death kinetics (Continued...)

Lecture 30 - EIA Process - Follow-Up (Monitoring and Auditing)

Lecture 31 - EIA Methods - Air Assessment - Part I

- Lecture 32 - EIA Methods - Air Assessment - Part II
- Lecture 33 - EIA Methods - Water Assessment
- Lecture 34 - EIA Methods - Soil, Land and Geology
- Lecture 35 - EIA Methods - Climate and Climate Change - Part I
- Lecture 36 - EIA Methods - Climate and Climate Change - Part II
- Lecture 37 - EIA Methods for Ecology (Definitions and Concepts)
- Lecture 38 - EIA Methods for Ecology (Baseline Study)
- Lecture 39 - EIA Methods for Ecology (Impact Prediction and Evaluation)
- Lecture 40 - EIA Methods - Ecosystem Services - Part I
- Lecture 41 - EIA Methods - Ecosystem Services - Part II
- Lecture 42 - EIA Methods - Coastal Ecology and Geomorphology - Part I
- Lecture 43 - EIA Methods - Coastal Ecology and Geomorphology - Part II
- Lecture 44 - EIA Methods - Noise
- Lecture 45 - EIA Methods - Transport
- Lecture 46 - EIA Methods - Landscape and Visuals
- Lecture 47 - EIA Methods - Cultural Heritage
- Lecture 48 - EIA Methods - Health
- Lecture 49 - EIA Methods - Socio-Economic Impacts (SIA) - Part I
- Lecture 50 - EIA Methods - Socio-Economic Impacts (SIA) - Part II
- Lecture 51 - EIA Methods - Land Acquisition, Resettlement and Livelihoods
- Lecture 52 - EIA Methods - Resource Efficiency
- Lecture 53 - EIA Methods - Risk and Risk Assessment
- Lecture 54 - EIA Methods - Cumulative Effects
- Lecture 55 - EIA - Environmental Management Plans
- Lecture 56 - EIA - Widening the scope: Strategic Environmental Assessment
- Lecture 57 - EIA - Reporting and Review of EIA Quality
- Lecture 58 - EIA Case Study - Mumbai Metro Line 3, Colaba - Bandra - SEEPZ
- Lecture 59 - EIA Case Study - Development of Water Aerodrome, Andaman and Nicobar - Part - I
- Lecture 60 - EIA Case Study - Development of Water Aerodrome, Andaman and Nicobar - Part - II

Lecture 1 - Introduction - Part 1

Lecture 2 - Introduction - Part 2

Lecture 3 - Pre-Independence - Part 1: Indo-Saracenic Architecture

Lecture 4 - Pre-Independence - Part 2: Colonial Architecture and Art Deco

Lecture 5 - Pre-Independence to Independence - Part 1

Lecture 6 - Pre-Independence to Independence - Part 2

Lecture 7 - Revivalism

Lecture 8 - The First Generation (1945-1970) - Part 1

Lecture 9 - The First Generation (1945-1970) - Part 2

Lecture 10 - The First Generation (1945-1970) - Part 3

Lecture 11 - The First Generation (1945-1970) - Part 4

Lecture 12 - The First Generation (1945-1970) - Part 5

Lecture 13 - The First Generation (1945-1970) - Part 6

Lecture 14 - Impact of Western Architects: Le Corbusier - Part 1

Lecture 15 - Impact of Western Architects: Le Corbusier - Part 2

Lecture 16 - Impact of Western Architects: Le Corbusier - Part 3

Lecture 17 - Impact of Western Architects: Le Corbusier - Part 4

Lecture 18 - Impact of Western Architects: Le Corbusier - Part 5

Lecture 19 - Impact of Western Architects: Le Corbusier - Part 6

Lecture 20 - Impact of Western Architects: Walter Gropius - Part 1

Lecture 21 - Impact of Western Architects: Walter Gropius - Part 2

Lecture 22 - Impact of Western Architects: Louis I Kahn - Part 1

Lecture 23 - Impact of Western Architects: Louis I Kahn - Part 2

Lecture 24 - Impact of Western Architects: Louis I Kahn - Part 3

Lecture 25 - Impact of Western Architects: Louis I Kahn - Part 4

Lecture 26 - Introduction to Critical Regionalism - Part 1

Lecture 27 - Introduction to Critical Regionalism - Part 2

Lecture 28 - Critical Regionalism in Indian Architecture - Part 1

Lecture 29 - Critical Regionalism in Indian Architecture - Part 2

Lecture 30 - Critical Regionalism in Indian Architecture - Part 3

Lecture 31 - Critical Regionalism in Indian Architecture - Part 4

[Lecture 32 - Critical Regionalism in Indian Architecture - Part 5](#)

[Lecture 33 - Structure: The Works of Mahendra Raj](#)

[Lecture 34 - Point-Blocks and High Rises - Part 1](#)

[Lecture 35 - Point-Blocks and High Rises - Part 2](#)

[Lecture 36 - Search for a new Architecture - Part 1](#)

[Lecture 37 - Search for a new Architecture - Part 2](#)

Lecture 1 - Culture, Identity and Built Environment

Lecture 2 - Space and Meaning in Balinese Vernacular Architecture

Lecture 3 - Adobe Construction and Religious Structures

Lecture 4 - Social System, Beliefs and its Architecture

Lecture 5 - Anthropology of Shelter-Conclusion

Lecture 6 - Stone as a Vernacular Resource Material

Lecture 7 - Earth as Vernacular Resource Material

Lecture 8 - Bamboo as Vernacular Resource Material

Lecture 9 - Timber as Vernacular Resource Material

Lecture 10 - Advanced Material Adaptations: The conclusion

Lecture 11 - Cultural Geography and Vernacular Architecture

Lecture 12 - Cultural Geography and Small-scale Features in the Landscape

Lecture 13 - Acculturation in Architecture

Lecture 14 - Tradition and Transmission

Lecture 15 - Transformation in Vernacular Context

Lecture 16 - Disasters Vulnerability and Traditions

Lecture 17 - Learning Disaster Mitigation from the Vernacular

Lecture 18 - The Second Birth: Lessons from Disaster Recovery

Lecture 19 - Climate Change and Traditions

Lecture 20 - Yonmenkaigi (Four square table system) Method for Collaborative Knowledge Development

Lecture 1 - Introduction to Interaction Design

Lecture 2 - Components of Interaction Design

Lecture 3 - Interaction Design Process

Lecture 4 - Understanding User

Lecture 5 - Conceptual Design - Part 1

Lecture 6 - Conceptual Design - Part 2

Lecture 7 - Role of Cognition

Lecture 8 - Role of Social Interaction

Lecture 9 - Designing for Emotional Interaction

Lecture 10 - Interactive Interfaces

Lecture 11 - Data Gathering

Lecture 12 - Data Analysis

Lecture 13 - Discovering Requirements

Lecture 14 - User Personas and Scenarios

Lecture 15 - Design and Prototyping - Part 1

Lecture 16 - Design and Prototyping - Part 2

Lecture 17 - Visual Interface Design

Lecture 18 - Elements of User Interface

Lecture 19 - Affordances and UI Transformations

Lecture 20 - Component-Based Design Systems

**NPTEL : NOC:Understanding and Reducing Ghg Emissions - Focus on Scope 1 and 2 Emission Reduction through Building Design and Construction (Architecture)**

**Co-ordinators : Prof. Avlokita Agrawal**

- Lecture 1 - Introduction, Sustainability, And Sustainable Development
- Lecture 2 - Sustainable Development And Sustainable Goals
- Lecture 3 - Sustainable Development Goals and Climate Change
- Lecture 4 - Climate Risk

Lecture 18 - Biophysical Methods - I

Lecture 19 - Biophysical Methods - II

Lecture 20 - Biophysical Methods - III

Lecture 21 - Types of Protein ligand interactions

Lecture 22 - Kinetics and Thermodynamics of protein-ligand binding

Lecture 23 - Experimental methods in protein ligand interactions

Lecture 24 - Protein ligand docking

Lecture 25 - Discussion class

Lecture 26 - Enzymes I - Classification

Lecture 27 - Enzymes - II

Lecture 28 - Enzyme Mechanisms - I

Lecture 29 - Enzyme Mechanisms - II

Lecture 30 - Enzyme mechanisms - III

Lecture 31 - Enzyme Kinetics - I

Lecture 32 - Enzyme Kinetics - II  
Lecture 33 - Enzyme Inhibition - I  
Lecture 34 - Enzyme Inhibition - II  
Lecture 35 - Discussion class  
Lecture 36 - Motor Proteins - I  
Lecture 37 - Motor Proteins - II  
Lecture 38 - Metalloproteins - I  
Lecture 39 - Metalloproteins - II  
Lecture 40 - Myoglobin and Hemoglobin  
Lecture 41 - Membrane Proteins - I  
Lecture 42 - Membrane proteins - II  
Lecture 43 - Membrane Transport - I  
Lecture 44 - Membrane Transport - II  
Lecture 45 - Electron Transport Chain  
Lecture 46 - Protein Carbohydrate Interactions - I  
Lecture 47 - Protein Carbohydrate Interactions - II  
Lecture 48 - Protein Nucleic Acid Interactions - I  
Lecture 49 - Protein Nucleic Acid Interactions - II  
Lecture 50 - Protein Nucleic Acid Interactions - III  
Lecture 51 - Protein Protein Interactions - I  
Lecture 52 - Protein Protein Interactions - II  
Lecture 53 - Protein Peptide Interactions  
Lecture 54 - Chaperone proteins  
Lecture 55 - Protein Nanoparticle Interactions  
Lecture 56 - Oxidative stress in Proteins  
Lecture 57 - Enzyme action and Proteolytic cleavage  
Lecture 58 - Intrinsically disordered proteins  
Lecture 59 - Viral proteins  
Lecture 60 - Overview of Course

Lecture 1 - Introduction - 1

Lecture 2 - Introduction - 2

Lecture 3 - Signals and Systems Overview

Lecture 4 - Important Signals

Lecture 5 - System

Lecture 6 - LSI Systems

Lecture 7 - Image Quality

Lecture 8 - Local Contrast

Lecture 9 - Blurring and Noise

Lecture 10 - Physics of Radiography

Lecture 11 - Types of Ionizing Radiations

Lecture 12 - EM Radiation

Lecture 13 - Attenuation Models

Lecture 14 - Radiation Dosimetry

Lecture 15 - PR\_Instrument

Lecture 16 - PR\_Instru\_CA

Lecture 17 - PR\_Image\_formation

Lecture 18 - Imaging Equation\_updated

Lecture 19 - Film screen\_Optical Density

Lecture 20 - PR\_Image Quality

Lecture 21 - CT\_Intsru

Lecture 22 - CT\_Instru\_finish

Lecture 23 - CT Back projection

Lecture 24 - CT\_BP\_finish

Lecture 25 - Fan beam\_IQ

Lecture 26 - CT\_IQ\_Artifact

Lecture 27 - Nuclear Med\_Phys

Lecture 28 - Nuclear\_Med\_Radiotracers

Lecture 29 - Planar\_Scintigraphy\_Instru

Lecture 30 - Planar\_Scintigraphy\_Im and IQ

Lecture 31 - Spect\_Pet

Lecture 1 - Introduction

Lecture 2 - Next Generation Sequencing Technologies - 454 Sequencing

Lecture 3 - Illumina Sequencing By Synthesis (SBS)

Lecture 4 - Single Molecule Real Time (SMRT) Sequencing

Lecture 5 - Ion Torrent and Nanopore Sequencing

Lecture 6 - Sequencing Coverage, Quality Score and Experiment Design

Lecture 7 - Data Formats

Lecture 8 - Data Formats (Continued...)

Lecture 9 - Data Quality

Lecture 10 - Data QC and Trimming

Lecture 11 - Hands-on: Setting up the system

Lecture 12 - Basic Shell Commands

Lecture 13 - Data Download and Exploration

Lecture 14 - Hands-on 1 - Data exploration and QC

Lecture 15 - Hands-on 1 - Data QC and Trimming

Lecture 16 - Read Mapping

Lecture 17 - Mapping Algorithms

Lecture 18 - Suffix tree-based mapping algorithm

Lecture 19 - Burrows-Wheeler Transform (BWT)

Lecture 20 - Read Mapping with BWT

Lecture 21 - Bowtie2 tool

Lecture 22 - Mapping reads with Bowtie2

Lecture 23 - Bowtie2 output

Lecture 24 - SAM and BAM format

Lecture 25 - SAM format: Alignment section

Lecture 26 - Variant Calling

Lecture 27 - Calling SNP/SNVs and Indels

Lecture 28 - Hands-on analysis : Variant Calling

Lecture 29 - VCF Files

Lecture 30 - Variant Annotation

Lecture 31 - Analysis of CNVs and SVs

- Lecture 32 - Introduction to RNA sequencing
- Lecture 33 - RNA-seq data processing pipeline
- Lecture 34 - Transcriptome Assembly and Quantification
- Lecture 35 - Transcript Abundance Quantification
- Lecture 36 - Biases in RNA-seq experiments
- Lecture 37 - Data Normalization Methods
- Lecture 38 - Data Normalization Methods (Continued...)
- Lecture 39 - Differential Gene Expression (DGE) Analysis
- Lecture 40 - DGE analysis results and visualizations
- Lecture 41 - Multiple hypothesis testing correction
- Lecture 42 - FDR correction and interpretation of DGE analysis results
- Lecture 43 - Functional Enrichment Analysis
- Lecture 44 - RNA-seq data analysis - Hands-on 2
- Lecture 45 - Hands-on 2: Setting up the system
- Lecture 46 - Hands-on 2: Preliminary Data Analysis
- Lecture 47 - Sample Specific Bias Correction
- Lecture 48 - Differential Gene Expression Analysis I
- Lecture 49 - DGE Analysis with spike-ins
- Lecture 50 - DGE Analysis Results and Functional Enrichment Analysis
- Lecture 51 - Genome Assembly
- Lecture 52 - Shortest Common Superstring (SCS) assembly
- Lecture 53 - Overlap-Layout-Consensus (OLC) approach
- Lecture 54 - de Bruijn Graph (DBG) based assembly
- Lecture 55 - Assembly and Quality Control
- Lecture 56 - Applications of NGS in Epigenomics
- Lecture 57 - Detecting DNA Methylations
- Lecture 58 - Genome-wide Transcription Factor(TF) Binding Sites
- Lecture 59 - Chromatin Accessibility
- Lecture 60 - Genome Organization in 3D

Lecture 1 - Neuron Structure

Lecture 2 - Networks of Neurons and Synapses

Lecture 3 - Basic Structures in the Brain

Lecture 4 - Systems of neural processing

Lecture 5 - Methods of Recording Neural Activity

Lecture 6 - Membrane Potential and All or None Spike

Lecture 7 - Patch Clamp Measurements

Lecture 8 - Ion channels

Lecture 9 - Current injection: Synapses

Lecture 10 - Single Neuron Acitivity

Lecture 11 - Point and compartmental models of neurons

Lecture 12 - Hodgkin Huxley Equations - I

Lecture 13 - Hodgkin Huxley Equations - II

Lecture 14 - Reducing the HHE and Moris-Lecar Equations (MLE)

Lecture 15 - Properties of MLE

Lecture 16 - Phase Plane Analysis - I

Lecture 17 - Phase Plane Analysis - II

Lecture 18 - Phase Plane Analysis - III

Lecture 19 - Analysing HHE with Phase Plane Analysis - I

Lecture 20 - Analysing HHE with Phase Plane Analysis - II

Lecture 21 - Random variables and random process

Lecture 22 - Spike train statistics and response measure

Lecture 23 - Receptive fields and models of receptive fields

Lecture 24 - Stimulus to Response mapping (Coding) - I

Lecture 25 - Stimulus to Response mapping (Coding) - II

Lecture 26 - Stimulus to Response Mapping (Coding) - III

Lecture 27 - Response to Stimulus Mapping (Decoding)

Lecture 28 - Basics of Information Theory - I

Lecture 29 - Basics of Information Theory - II

Lecture 30 - Maximally Informative Dimensions

Lecture 31 - Intro to Discrimination based methods

- Lecture 32 - Kullback Leibler Distance
- Lecture 33 - Measuring Spike Train Distances - I
- Lecture 34 - Measuring Spike Train Distances - II
- Lecture 35 - Signal and Noise Correlations
- Lecture 36 - Statistical Methods in Discrimination
- Lecture 37 - Single Cell Decoding - I: Two Alternative Forced Choice task in Monkeys
- Lecture 38 - Single Cell Decoding - II: Using ROC Curves for discrimination
- Lecture 39 - Single Cell Encoding - I: Operant Conditioning Task in Ferrets
- Lecture 40 - Single Cell Encoding - II: Learning in avoidance and approach methods in Ferrets
- Lecture 41 - Plasticity - Synaptic Transmission and Synaptic Strength
- Lecture 42 - Ways of modification of Synaptic Strength
- Lecture 43 - Type of Plasticity
- Lecture 44 - Short Term Plasticity - I
- Lecture 45 - Short Term Plasticity - II
- Lecture 46 - Long Term Plasticity
- Lecture 47 - Spike Time Dependent Plasticity
- Lecture 48 - Hebbian Plasticity
- Lecture 49 - BCM Rule
- Lecture 50 - Synaptic Normalization
- Lecture 51 - Adaptation
- Lecture 52 - Models of Short Term Plasticity
- Lecture 53 - Attention - I
- Lecture 54 - Attention - II
- Lecture 55 - Developmental Cicuits
- Lecture 56 - Optimal Coding in Visual System
- Lecture 57 - Optimal Coding in Auditory System
- Lecture 58 - Optimal Coding of Deviant Stimuli in Development
- Lecture 59 - Spike Timing Dependent Plasticity - a theoretical Perspective
- Lecture 60 - Important Problems in Neuroscience

Lecture 1 - Ionic basis of membrane potential

Lecture 2 - Physiology of voltage gated channels

Lecture 3 - Physiology of voltage gated channels

Lecture 4 - Cardiac muscle physiology

Lecture 5 - Action potential of cardiac muscle - 1

Lecture 6 - Action potential of cardiac muscle - 2

Lecture 7 - Conducting system of heart

Lecture 8 - ECG-Physiological basis

Lecture 9 - ECG-Normal, Technical aspects

Lecture 10 - ECG Interpretation

Lecture 11 - Abnormal ECG - 1

Lecture 12 - Abnormal ECG - 2

Lecture 13 - ECG and Myocardial Infarction

Lecture 14 - Heart rate and Blood pressure - Baroreflex pathway

Lecture 15 - ECG and Hypertension

Lecture 16 - Autonomic regulation of heart

Lecture 17 - Heart rate variability (HRV)

Lecture 18 - Heart rate variability-interpretation and clinical uses, Blood pressure variability

Lecture 19 - Autonomic Function Tests - 1

Lecture 20 - Autonomic Function Tests - 2

Lecture 1 - Pharmacognosy and Medicinal Plants

Lecture 2 - Plant Specialized Metabolites: Waste Products or Ecochemicals?

Lecture 3 - Evolution of Specialized Metabolism from Primary Metabolism

Lecture 4 - Production of specialized metabolites through cell and organ culture

Lecture 5 - Eliciting specialized metabolism in culture

Lecture 6 - Analysis of Specialized Metabolites - Tools and Techniques

Lecture 7 - Metabolic phytochemistry-based approaches for studying plant specialized metabolism

Lecture 8 - Metabolic engineering strategies in plants

Lecture 9 - Plant genetic transformation (through natural genetic engineer)

Lecture 10 - Design of vectors for Agrobacterium-mediated gene transfer; Transformed and co-

Lecture 11 - Introduction to alkaloids

Lecture 12 - Biosynthesis of tropane alkaloids

Lecture 13 - Engineering tropane alkaloid pathways in plants - I

Lecture 14 - Engineering tropane alkaloid pathways in plants - II : Engineering tropane alkaloid pathway

Lecture 15 - Isoquinoline alkaloids - Biosynthesis and tissue localization

Lecture 16 - Isoquinoline alkaloids - Late steps of biosynthetic pathway and tissue localization

Lecture 17 - Benzyloisoquinoline alkaloids - Induced top1 mutant and natural T mutantEngineering

Lecture 18 - Benzyloisoquinoline alkaloids - Metabolic pathway engineering

Lecture 19 - RNAi-mediated replacement of morphine with nonnarcotic alkaloid reticuline in opium

Lecture 20 - Isoquinoline alkaloids - biosynthesis and tissue localization

Lecture 21 - Indole alkaloids - Early steps of biosynthesis

Lecture 22 - Indole alkaloids - Metabolic engineering of early steps of indole alkaloid pathway

Lecture 23 - Indole alkaloids - Environmental factors regulating indole alkaloid biosynthesis

Lecture 24 - Indole alkaloids - Role of elicitors in modulating alkaloids accumulation

Lecture 25 - Indole alkaloids - Late steps of indole alkaloid biosynthesis

Lecture 26 - Indole alkaloids - Regulatory roles of transcription factors in light-induced

Lecture 27 - Engineering indole alkaloid pathways in Catharanthus roseus hairy root cultures

Lecture 28 - Missing enzymes of vindoline biosynthetic pathway

Lecture 29 - Monoterpene indole alkaloid pathway cell and tissue localization

Lecture 30 - Model for biosynthesis and secretion of monoterpene indole alkaloids involving

Lecture 31 - Metabolic reprogramming of periwinkle plant culture

- Lecture 32 - Engineered yeast brews precursors of anticancer drug vinblastine
- Lecture 33 - Recent discovery of strychnine biosynthetic pathway
- Lecture 34 - Indole alkaloid biosynthesis - a final overview
- Lecture 35 - Recent discovery of colchicine biosynthetic pathway
- Lecture 36 - Biosynthesis of terpenoids - an outline
- Lecture 37 - Diversity of monoterpenoids
- Lecture 38 - Biosynthesis of monoterpenoids
- Lecture 39 - Diversity of sesquiterpenes, diterpenes, triterpenes and polyterpenes
- Lecture 40 - Oleoresins and polyterpenes - an outline
- Lecture 41 - Monoterpenoids as components of floral scent volatiles: Metabolic engineering of
- Lecture 42 - Biosynthesis of carotenoids and carotenoid cleavage products
- Lecture 43 - Metabolic engineering of carotenoid pathway
- Lecture 44 - Metabolic engineering of carotenoid pathway: Golden Rice Story
- Lecture 45 - Menthol story: Biosynthesis and pathway manipulation - I
- Lecture 46 - Menthol story: Biosynthesis and pathway manipulation - II
- Lecture 47 - Artemisinin, hyperforin and taxol - three promising candidates for biotechnological
- Lecture 48 - Phenolics: Origin via shikimate pathway
- Lecture 49 - Phenolics: Phenylpropanoids, benzenoids, coumarins, tannins
- Lecture 50 - Phenolics: Monolignols, lignins and lignans
- Lecture 51 - Phenolics: Metabolic engineering of monolignol pathways
- Lecture 52 - Phenolics: Biosynthesis of lignans and podophyllotoxin; Caffeic acid esters
- Lecture 53 - Phenolics: Flavonoids, Flavones, Isoflavonoids, Proanthocyanidins
- Lecture 54 - Phenolics: Biosynthesis of anthocyanins; Metabolic pathway engineering for enhance
- Lecture 55 - Phenolics: Metabolic engineering of anthocyanin pathways in flowers
- Lecture 56 - Phenolics: Alcohol acetyl transferses and volatile phenolics
- Lecture 57 - Phenolics: Biosynthesis of volatile benzenoids
- Lecture 58 - Phenolics: Biosynthesis of vanillin in plants
- Lecture 59 - Phenolics: Metabolic engineering for vanillin
- Lecture 60 - Phenolics: Biosynthesis of shikonin
- Lecture 61 - Phenolics: Metabolic engineering of shikonin pathway
- Lecture 62 - Molecular Pharming: Transplastomic plants
- Lecture 63 - Molecular Pharming: production of human somatotropin in tobacco

Lecture 1 - Introduction

Lecture 2 - Mass balance, Heat Balance, flow sheet

Lecture 3 - Costing

Lecture 4 - Costing (continued), Physical and chemical principles in Down stream

Lecture 5 - Problems in Mass balance, flow sheet

Lecture 6 - Cell Breakage

Lecture 7 - Cell breakage (Continued...)

Lecture 8 - Solid Liquid Separation

[Lecture 68 - Unsteady State Material Balances](#)

[Lecture 69 - Unsteady State Energy Balances](#)

Lecture 1 - Introduction

Lecture 2 - Drug Discovery - Issues

Lecture 3 - Target and Lead Identification

Lecture 4 - Drug And Data bases

Lecture 5 - Drug Properties

Lecture 6 - Drug - Properties / SMILES

Lecture 7 - Drug Solubility

Lecture 8 - Drug Solubility / permeability

Lecture 9 - ADME

Lecture 10 - Drug - ADME

Lecture 11 - Drug - ADME

Lecture 12 - Drug - BBB

Lecture 13 - Pgp efflux/Drug Likeness

Lecture 14 - Drug Likeness

Lecture 15 - Molecular Modelling

Lecture 16 - Molecular Mechanics / Force Field

Lecture 17 - Molecular Mechanics / Force Field

Lecture 18 - Molecular Mechanics / Force Field

Lecture 19 - Molecular Mechanics / Force Field

Lecture 20 - ODES and Numerical methods

Lecture 21 - ODES and Numerical methods

Lecture 22 - Conformational Search / MD

Lecture 23 - Quantum Mechanics

Lecture 24 - Quantum Mechanics

Lecture 25 - Quantitative Struture Activity Relationship (QSAR)

Lecture 26 - Quantitative Struture Activity Relationship (QSAR)

Lecture 27 - Quantitative Struture Activity Relationship (QSAR)

Lecture 28 - Quantitative Struture Activity Relationship (QSAR)

Lecture 29 - Quantitative Struture Activity Relationship (QSAR)

Lecture 30 - Quantitative Struture Activity Relationship (QSAR)

Lecture 31 - 3D QSAR

[Lecture 32 - Pharmacophore modelling](#)

[Lecture 33 - Target based drug design](#)

[Lecture 34 - Target based drug design](#)

[Lecture 35 - Target based drug design](#)

[Lecture 36 - Target based drug design](#)

[Lecture 37 - Docking](#)

[Lecture 38 - Docking](#)

[Lecture 39 - Pharmacokinetics / pharmacodynamics](#)

[Lecture 40 - Pharmacokinetics / pharmacodynamics](#)

Lecture 1 - Introduction to RNA Biology and RNA World - The Beginning

Lecture 2 - Introduction to RNA Biology and RNA World - Evidences

Lecture 3 - Introduction to RNA Biology and RNA World - Origin of Monomers

Lecture 4 - Introduction to RNA Biology and RNA World - Shift to DNA

Lecture 5 - Introduction to RNA Biology and RNA World - RNA Self Replication

Lecture 6 - Introduction to RNA Biology and RNA World - Origin of RNA Enzymes

Lecture 7 - RNA as Enzymes: The Ribozymes

Lecture 8 - RNA as Enzymes: Structure and Functions

Lecture 9 - RNA as Enzymes: The Present and Future

Lecture 10 - RNA Transcription: The Central Dogma

Lecture 11 - RNA Transcription: Initial Steps

Lecture 12 - RNA Transcription: Different Stages

Lecture 13 - RNA Transcription: Termination and RNA Modification

Lecture 14 - RNA Transcription: Different Polymerases

Lecture 15 - RNA Processing and Life Cycle: RNA Maturation and RNPs

Lecture 16 - RNA Processing and Life Cycle: RNA Splicing

Lecture 17 - RNA Processing and Life Cycle: Post Transcriptional Processing

Lecture 18 - Alternative RNA Processing and Editing: Alternative Splicing

Lecture 19 - Alternative RNA Processing and Editing: Implications of Introns

Lecture 20 - Alternative RNA Processing and Editing: Splicing and Pathology

Lecture 21 - Alternative RNA Processing and Editing: RNA Editing in Detail

Lecture 22 - Alternative RNA Processing and Editing: Relevance of RNA Editing

Lecture 23 - Alternative RNA Processing and Editing: Relevance in Immunology

Lecture 24 - RNA Splicing, Export and Stability: Relevance of Introns

Lecture 25 - RNA Splicing, Export and Stability: Introns in RNA Splicing

Lecture 26 - RNA Splicing, Export and Stability: Different Spliceosomes

Lecture 27 - RNA Splicing, Export and Stability: SMN Complex

Lecture 28 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: Introns and Link to Splicing

Lecture 29 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: RNA Helicases

Lecture 30 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: Nucleo Cytoplasmic Transport

Lecture 31 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: Nucleoporins and miRNAs

Lecture 32 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: RNA Export Mechanisms

Lecture 33 - snRNA, rRNA, miRNA, siRNA Processing, Export and Function: RNA Quality Control

Lecture 34 - Mechanisms of RNA Decay and Non Coding RNAs: Decay Pathways

Lecture 35 - Mechanisms of RNA Decay and Non Coding RNAs: The Exosomes

Lecture 36 - Mechanisms of RNA Decay and Non Coding RNAs: mRNA Surveillance

Lecture 37 - Mechanisms of RNA Decay and Non Coding RNAs: Mechanisms of RNA Decay

Lecture 38 - Mechanisms of RNA Decay and Non Coding RNAs: Autoregulation of RNAs

Lecture 39 - Mechanisms of RNA Decay and Non Coding RNAs: Introduction to Non-Coding RNAs

Lecture 40 - Dosage Compensation and X-Inactivation: SRP and Different Modes of Compensation

Lecture 41 - Dosage Compensation and X-Inactivation: Dosage Compensation of X

Lecture 42 - Dosage Compensation and X-Inactivation: Omprinted vs Random X Inactivation

Lecture 43 - Dosage Compensation and X-Inactivation: Molecular Basis of X-Inactivation

Lecture 44 - Dosage Compensation and X-Inactivation: ES Cells and X-Inactivation

Lecture 45 - Dosage Compensation, Xist and ncRNA in Imprinting: The Roles of YY1

Lecture 46 - Dosage Compensation, Xist and ncRNA in Imprinting: shRNAs and Gene Expression

Lecture 47 - Dosage Compensation, Xist and ncRNA in Imprinting: Mechanism of RNAi in Action

Lecture 48 - Dosage Compensation, Xist and ncRNA in Imprinting: Genomic Imprinting in Action

Lecture 49 - Dosage Compensation, Xist and ncRNA in Imprinting: Different ncRNAs and their Roles

Lecture 50 - Dosage Compensation, Xist and ncRNA in Imprinting: lncRNA-Induced Cancer

Lecture 51 - Dosage Compensation, Xist and ncRNA in Imprinting: Xist and Cancer

Lecture 52 - Telomere, Telomerase and Impact on Genomes: The Importance of Telomeres

Lecture 53 - Telomere, Telomerase and Impact on Genomes: Telomerase and Aging

Lecture 54 - Telomere, Telomerase and Impact on Genomes: Telomere Length as Marker of Aging

Lecture 55 - Telomere, Telomerase and Impact on Genomes: Telomeres and Cancer

Lecture 56 - Telomere, Telomerase and Impact on Genomes: Cell Cycle Arrest

Lecture 57 - Telomere, Telomerase and Impact on Genomes: Maintenance and Manipulation of Telomeres

Lecture 58 - Epitranscriptome and Protein Synthesis: Important RNA Modifications

Lecture 59 - Epitranscriptome and Protein Synthesis: Readers, Writes and Erasers

Lecture 60 - Epitranscriptome and Protein Synthesis: Biological Implications of RNA Modifications

Lecture 61 - Epitranscriptome and Protein Synthesis: Roles of RNAs in Translation

Lecture 62 - Epitranscriptome and Protein Synthesis: Mechanism of Translation

Lecture 1 - Introduction to forces - Resolving forces, principle of transmissibility

Lecture 2 - Statics FBD and EOE

Lecture 3 - Example problems on FBD and EOE

Lecture 50 - Public Health in India (Guest Lecture) Dr. Abha Rao (Public Health Foundation of India)

Lecture 51 - Discussion on Public Health - Dr. Abha Rao (PHFI) and Mr. Pratush Brahma (University of Florida)

Lecture 52 - Public Health - Rotavirus (Case study)

Lecture 53 - Public Health - Malaria (Case study) - Part 1

Lecture 54 - Public Health - Malaria (Case study) - Part 2

Lecture 55 - Biology and Climate Change - Part 1

Lecture 56 - Biology and Climate Change - Part 2

Lecture 57 - Biology and Climate Change - Part 3

Lecture 58 - Biodiversity Conservation (Guest Lecture) Dr. Krishnapriya Tamma (Azim Premji University)

Lecture 59 - Discussion on Biology and Society

Lecture 60 - Discussion on Art and Science

Lecture 61 - Biology and Society - Case study on Stray Dogs

Lecture 62 - Nature Relatedness

Lecture 63 - Course Wrap-Up

Lecture 1 - History of Neuroscience : Introduction - Part 1

Lecture 2 - History of Neuroscience : Introduction - Part 2

Lecture 3 - Factors that produce discoveries

Lecture 4 - Importance of the 1950s in Neuroscience

Lecture 5 - Advances in Molecular Biology (Genes to DNA)

Lecture 6 - Discovery of the structure of the DNA

Lecture 7 - How DNA works

Lecture 8 - Molecular biology of the human brain

Lecture 9 - Signaling molecule: The First growth Factor

Lecture 10 - Nerve Growth Factor

Lecture 11 - Organizing the Connections

Lecture 12 - Axonal Transport

Lecture 13 - Signaling molecules: The First Neurotransmitter in the brain

Lecture 14 - The concept of Lock and Key

Lecture 15 - The Soup vs Sparks Debate

Lecture 16 - Intracellular Electrode, Neurotransmitter in the Brain, Dales Law

Lecture 17 - Early evidence of Acetylcholine and Glutamate

Lecture 18 - Early evidence of GABA and Serotonin

Lecture 19 - Catecholamine and Hormones

Lecture 20 - Second messengers and Hormones

Lecture 21 - Pheromones

Lecture 22 - Revolution in Cytology

Lecture 23 - Synapse and the 'Neuronism vs Reticularism' debate

Lecture 24 - Contributions by Rene Couteaux and George Koelle

Lecture 25 - Chemical Synapse

Lecture 26 - Synapse and the Neuromuscular Junction

Lecture 27 - The Electrical Synapse and Myelin

Lecture 28 - Physiology: The Action Potential - Part 1

Lecture 29 - Recording nerve impulses and single action potentials

Lecture 30 - Recording from nerve and plant cells

Lecture 31 - Recording Local circuits, Hodgkin and Huxely contributions - Part 1

Lecture 32 - Hodgkin and Huxely model - Part 2 and Kenneth Cole Contributions

Lecture 33 - GHK equation and HH action potentials

Lecture 34 - First Electrophysiological Evidence for Synaptic Transmission

Lecture 35 - Bernard Katz

Lecture 36 - End-Plate Potential and Synaptic Quanta

Lecture 37 - Eccles and Spinal motor neuron

Lecture 38 - Invertebrate simple systems: Aplysia

Lecture 39 - Other studies of sensory responses

Lecture 40 - Legacy of Golgi and Ramo`n y Cajal

Lecture 41 - Dynamic polarization of Neuron

Lecture 42 - Modern Research

Lecture 43 - Synaptic Integration and Action Potential Initiation

Lecture 44 - Active properties of dendrites

Lecture 45 - Dendritic dominance

Lecture 46 - Dendritic spines

Lecture 47 - Rethinking the concept of Neuron Doctrine

Lecture 48 - Muscle spindles

Lecture 49 - Spinal cord pathways

Lecture 50 - Retinal Processing

Lecture 51 - Keffler Hartline

Lecture 52 - Stephen Kuffler and Horace Barlow

Lecture 53 - Expansion of the Reflex concept

Lecture 54 - Central Pptern generators

Lecture 55 - The cortical column

Lecture 56 - Vernon Mountcastle

Lecture 57 - Central Visual Processing

Lecture 58 - Central Visual Processing and Feature Detectors

Lecture 59 - Intracellular recordings from the brain - Part 1

Lecture 60 - Intracellular recordings from the brain - Part 2

Lecture 61 - Two motor systems

Lecture 62 - Auditory cortex and The pattern theory of olfaction

Lecture 63 - Arousal and Reticular activating system

Lecture 64 - Sleep and Rapid Eye Movements

- Lecture 65 - Operant Conditioning by brain stimulation
- Lecture 66 - Hypothalamus and Feeding Behavior
- Lecture 67 - Brain as a gland
- Lecture 68 - Hypothalamic-Neurohypophyseal System
- Lecture 69 - Hypothalamic-Adenohypophyseal System
- Lecture 70 - Founding Modern Neuroanatomy
- Lecture 71 - Psychology and Ethology
- Lecture 72 - Karl Lashley
- Lecture 73 - Donald Hebb
- Lecture 74 - Limbic system- Limbic Lobe and Papez Circuit
- Lecture 75 - Limbic system-Kluver-Bucy Syndrome
- Lecture 76 - The Limbic system and Amygdala
- Lecture 77 - The Hippocampus and Patient H.M
- Lecture 78 - Brenda Milner
- Lecture 79 - Neurology: Foundations of Brain Imaging
- Lecture 80 - The Neurological unit of the Boston City Hospital
- Lecture 81 - Derek Denny-Brown, Raymond Adams and C. Miller Fisher
- Lecture 82 - Montreal Neurological Institute
- Lecture 83 - Cerebral Circulation
- Lecture 84 - Spreading depression of Leo and Migraine
- Lecture 85 - The Eradication of Polio
- Lecture 86 - Origin of Neurosurgery
- Lecture 87 - Harvey Cushing
- Lecture 88 - Pituitary Surgery
- Lecture 89 - Stereotaxy
- Lecture 90 - Epilepsy
- Lecture 91 - Psychosurgery
- Lecture 92 - Antipsychotic Drugs
- Lecture 93 - Reserpine
- Lecture 94 - Monoamine Oxidase Inhibitors
- Lecture 95 - Lithium
- Lecture 96 - Benzodiazepines
- Lecture 97 - Stress

Lecture 1 - Basic concepts in microscopy - 1

Lecture 2 - Basic concepts in microscopy - 2

Lecture 3 - Dark-field and phase contrast microscopy

Lecture 4 - Differential interference contrast and polarization

Lecture 5 - Fluorescence and confocal microscopy

Lecture 6 - Transmission electron microscopy

Lecture 7 - Transmission electron microscopy cont. and scanning electron microscopy

Lecture 8 - Basic concepts - 1

Lecture 9 - Basic concepts - 2

Lecture 10 - GM counting and Scintillation counting

Lecture 11 - Scintillation counting continued

Lecture 12 - Autoradiography and RIA

Lecture 13 - Safety aspects and applications

Lecture 14 - Introduction and Basic concepts in chromatography - 1

Lecture 15 - Basic concepts in chromatography - 2

Lecture 16 - Low-pressure liquid chromatography (LPLC) and high performance liquid chromatography (HPLC)

Lecture 17 - Ion-exchange chromatography

Lecture 18 - Gel-filtration chromatography

Lecture 19 - Affinity chromatography

Lecture 20 - Gas-liquid chromatography

Lecture 21 - Basic concepts in electrophoresis

Lecture 22 - Horizontal and vertical gel electrophoresis

Lecture 23 - Native gel electrophoresis and SDS-PAGE

Lecture 24 - Isoelectric focusing (IEF), 2-D gel electrophoresis and protein detection methods

Lecture 25 - Electrophoresis of nucleic acids

Lecture 26 - Immunoelectrophoresis and capillary electrophoresis

Lecture 27 - Introduction and Basic Concepts - 1

Lecture 28 - Basic concepts - 2

Lecture 29 - Types of centrifuges and analytical ultracentrifugation method

Lecture 30 - Separation methods in preparative ultracentrifuges

Lecture 31 - Types of rotors

[Lecture 32 - Types of rotors cont. and care of rotors](#)

[Lecture 33 - Introduction and basic concepts](#)

[Lecture 34 - UV-Visible spectroscopy](#)

[Lecture 35 - Infrared and fluorescence spectroscopy](#)

[Lecture 36 - Circular dichroism \(CD\) spectroscopy](#)

[Lecture 37 - Nuclear magnetic resonance \(NMR\) spectroscopy and X-ray crystallography](#)

[Lecture 38 - Atomic spectroscopy and mass spectrometry](#)

[Lecture 39 - Polymerase chain reaction\(PCR\)](#)

[Lecture 40 - DNA sequencing methods](#)

[Lecture 41 - Enzyme linked immunosorbent assay \(ELISA\)](#)

Lecture 1 - Introduction to Nano

Lecture 2 - Nano-Biomimicry

Lecture 3 - Synthesis of nanomaterials by Physical and Chemical Methods

Lecture 4 - Synthesis of nanomaterials by Biological Methods

Lecture 5 - Characterisation of Nanomaterials

Lecture 6 - DNA Nanotechnology

Lecture 7 - Protein and Glyco Nanotechnology

Lecture 8 - Lipid Nanotechnology

Lecture 9 - Bio-Nanomachines

Lecture 10 - Carbon nanotubes and Its Bio-Applications

Lecture 11 - Nanomaterials for Cancer Diagnosis

Lecture 12 - Nanomaterials for Cancer therapy

Lecture 13 - Nanotechnology in Tissue Engineering

Lecture 14 - Nano artificial cells

Lecture 15 - Nanotechnology in Organ Printing

Lecture 16 - Nanotechnology in Point-of-Care Diagnostics

Lecture 17 - Nano-Pharmacology and Drug Targeting

Lecture 18 - Cellular uptake mechanisms of nanomaterials

Lecture 19 - In vitro Methods to study antibacterial and anticancer properties of nanomaterials

Lecture 20 - Nanotoxicology

- Lecture 1 - Life Cycle of an Angiosperm
- Lecture 2 - Characteristics of Plant Growth and Development - I
- Lecture 3 - Characteristics of Plant Growth and Development - II
- Lecture 4 - Molecular Genetics of Plant Development - I
- Lecture 5 - Molecular Genetics of Plant Development - II
- Lecture 6 - Molecular Genetics of Plant Development - III
- Lecture 7 - Molecular Genetics of Plant Development - IV
- Lecture 8 - Molecular Genetics of Plant Development (Continued...) - I
- Lecture 9 - Molecular Genetics of Plant Development (Continued...) - II
- Lecture 10 - Molecular Genetics of Plant Development (Continued...) - III
- Lecture 11 - Root Development
- Lecture 12 - Root Development (Continued...)
- Lecture 13 - Root Development (Vascular Development)
- Lecture 14 - Root Branching: Lateral Root Development
- Lecture 15 - Shoot Development: SAM Maintenance
- Lecture 16 - Shoot Development: Organogenesis
- Lecture 17 - Shoot Development: Leaf Development
- Lecture 18 - Shoot Development: Flowering
- Lecture 19 - Cell-Cell Communication During Plant Development
- Lecture 20 - Techniques Used in Lab

Lecture 1 - Introduction: Why to Study Structural Biology

Lecture 2 - Introduction to Biological Macromolecules

Lecture 3 - Introduction: Decoding Biological Macromolecules

Lecture 4 - Introduction: Genome Sequencing

Lecture 5 - Introduction: Post Genomic Era

Lecture 6 - Amino acids and their properties

Lecture 7 - Protein: Protein Chemistry, Chirality, Peptide bond and Levels of protein structures

Lecture 8 - Protein: Dihedral angles, Peptide bond and Ramachandran Plot

Lecture 9 - Protein: Super Secondary Structures, Motif, Domains, Non-covalent interactions

Lecture 10 - Protein: Folding of Protein, Thermodynamics and Kinetics of protein folding, Characterization of Proteins

Lecture 11 - Introduction to Structural Biology Techniques - Part I

Lecture 12 - Introduction to Structural Biology Techniques - Part II

Lecture 13 - X-ray Crystallography: Crystallization - Part I

Lecture 14 - X-ray Crystallography: Crystallization - Part II

Lecture 15 - X-ray Crystallography: Crystal Mounting

Lecture 16 - X-ray Crystallography: Production of X-ray and its properties

Lecture 17 - X-ray Crystallography: Journey to 3D land

Lecture 18 - X-ray Crystallography: Crystal Symmetry

Lecture 19 - X-ray Crystallography: Instrumentation in X-ray Crystallography

Lecture 20 - X-ray Crystallography: Data collection and processing

Lecture 21 - X-ray Crystallography: Data Analysis - Part I

Lecture 22 - X-ray Crystallography: Data Analysis - Part II

Lecture 23 - X-ray Crystallography: Phase Problem - Part I

Lecture 24 - X-ray Crystallography: Phase Problem - Part II

Lecture 25 - X-ray Crystallography: Refinement and Structure deposition to PDB

Lecture 26 - Introduction to Spectroscopy and NMR

Lecture 27 - Basic Principles of NMR and Instrumentation

Lecture 28 - NMR Sample Preparation and Chemical Shift related concepts

Lecture 29 - Factors effecting NMR Spectra (1D and 2D)

Lecture 30 - 2D and 3D NMR Spectroscopy focusing on protein structure

Lecture 31 - Introduction to Spectroscopy

[Lecture 32 - UV-Vis and CD spectroscopy](#)

[Lecture 33 - Fluorescence Spectroscopy and Green Fluorescence Protein \(GFP\)](#)

[Lecture 34 - Infrared and Raman Spectroscopy for protein](#)

[Lecture 35 - Raman Spectroscopy, Raman Microscopy and Raman Crystallography for studying protein](#)

[Lecture 36 - Introduction to Microscopy](#)

[Lecture 37 - Functioning details of Cryo Electron Microscopy \(Cryo EM\)](#)

[Lecture 38 - Cryo Electron Microscopy: Data Collection and Analysis](#)

[Lecture 39 - A concise story of advancement Cryo-EM](#)

[Lecture 40 - Protein Data Bank](#)

[Lecture 41 - History of Molecular Visualizations of Biological Macromolecules](#)

[Lecture 42 - Description of structure related files \(.pdb, .mmCIF, .mtz, etc.\)](#)

[Lecture 43 - Demonstration of COOT](#)

[Lecture 44 - 3D visualization using Pymol](#)

[Lecture 45 - Demonstration of Pymol](#)

[Lecture 46 - Why we need MD Simulation](#)

[Lecture 47 - Molecular Dynamic Simulation Process - Part I](#)

[Lecture 48 - Molecular Dynamic Simulation Process - Part II](#)

[Lecture 49 - Molecular Dynamic Simulation Process - Part III](#)

[Lecture 50 - Application of Molecular Dynamic Simulation](#)

[Lecture 51 - What, How and Which of Protein Engineering](#)

[Lecture 52 - How to make logical Protein Engineering: Process of Rational design](#)

[Lecture 53 - Success story of Rational Protein designing: Focusing on De Novo Process](#)

[Lecture 54 - Designing Protein by mimicking nature: Process of Directed Evolution](#)

[Lecture 55 - Achievement, Challenges, and Future direction in the field of Protein Engineering](#)

[Lecture 56 - Introduction to Structure Based Drug Discovery \(SBDD\)](#)

[Lecture 57 - Rational Drug Discovery](#)

[Lecture 58 - Docking Based Virtual Screening: Progress, Challenges and Future perspective](#)

[Lecture 59 - What makes a small molecule an ideal drug: Developing in silico ADMETox Model](#)

[Lecture 60 - Structure Based Drug Discovery: Case study and Conclusion](#)

Lecture 1 - Introduction to Learning and Memory - I : Historical perspective

Lecture 2 - Introduction to Learning and Memory - II : Classification

Lecture 3 - Associative Learning I : Rules of Associative learning

Lecture 4 - Associative learning II : Garcia and Koelling's Experiment, Kamin's Blocking Experiment

Lecture 5 - Introduction to the Rescorla Wagner Model

Lecture 6 - Application of Rescorla Wagner Model - I

Lecture 7 - Application of Rescorla Wagner Model - II

Lecture 8 - Application of Rescorla Wagner Model - III

Lecture 9 - Application of Rescorla Wagner Model - IV

Lecture 10 - Limitations of Rescorla Wagner Model

Lecture 11 - Introduction of Reinforcement Learning - I : Thorndike's view, Tolman's views, Skinner Box

Lecture 12 - Introduction of Reinforcement Learning - II : Classification, Thorndike's view, Tolman's views, Skinner Box (Continued...)

Lecture 13 - Introduction of Reinforcement Learning - III : Understanding scheduling of reinforcers in operant conditioning

Lecture 14 - Sign Tracking vs Goal Oriented/Tracking; Linking complex behaviors to simple molecules

Lecture 15 - Sign Tracking vs Goal Oriented; Learning Linking complex behaviors to simple molecules - II

Lecture 16 - Memory in Molecular Terms - I : Protein synthesis in memory consolidation

Lecture 17 - Memory in Molecular Terms - II : Long term potentiation

Lecture 18 - Memory in Molecular Terms - III : Properties of a memory molecule

Lecture 19 - Memory in Molecular Terms - IV : Remote memory and its characteristics

Lecture 20 - Memory in Molecular Terms - V : Selective labelling of memory encoding neurons and their manipulation

Lecture 1 - Drug Delivery Introduction and Pharmacokinetics

Lecture 2 - Pharmacokinetics (Continued...)

Lecture 3 - Pro-drugs and Polymers Introduction

Lecture 4 - Polymers - Synthesis

Lecture 5 - Polymers - Properties

Lecture 6 - Biomedical Polymers

Lecture 7 - Biodegradable Polymers and Polymer Drug Conjugates - I

Lecture 8 - Polymer Drug Conjugates - II

Lecture 9 - Research Paper Discussion and Diffusion Controlled Systems

Lecture 10 - Controlled Release: Reservoir System - I

Lecture 11 - Controlled Release: Reservoir Systems and Non-erodible Systems

Lecture 12 - Controlled Release: Non-erodible Systems and Erodible systems

Lecture 13 - Math Exercise

Lecture 14 - Hydrogels - I

Lecture 15 - Hydrogels - II

Lecture 16 - Hydrogels - III

Lecture 17 - Hydrogels - IV

Lecture 18 - Nano and Micro-particles - I

Lecture 19 - Nano and Micro-particles - II

Lecture 20 - Nano and Micro-particles - III

Lecture 21 - Nano and Micro-particles - IV

Lecture 22 - Nano and Micro-particles - V

Lecture 23 - Nano and Micro-particles - VI

Lecture 24 - Nano and Micro-particles - VII

Lecture 25 - Protein Adsorption - I

Lecture 26 - Protein Adsorption - II

Lecture 27 - Protein Adsorption - III

Lecture 28 - Tissue Engineering - I

Lecture 29 - Tissue Engineering - II

Lecture 30 - Tissue Engineering - III

Lecture 31 - Drug Delivery in Tissue Engineering - I

- Lecture 32 - Drug Delivery in Tissue Engineering - II
- Lecture 33 - Implant Associated Infections - I
- Lecture 34 - Implant Associated Infections - II
- Lecture 35 - Route Specific Delivery: Oral Route - I
- Lecture 36 - Route Specific Delivery: Oral Route - II
- Lecture 37 - Route Specific Delivery: Oral and Subcutaneous Route
- Lecture 38 - Route Specific Delivery: Intramuscular, Transdermal - I
- Lecture 39 - Route Specific Delivery: Transdermal - II
- Lecture 40 - Route Specific Delivery: Transdermal and Inhalation Route
- Lecture 41 - Route Specific Delivery: Inhalation - II, Buccal and Rectal Administration
- Lecture 42 - Research Paper Discussion: Dry Powder Particle Delivery
- Lecture 43 - Route Specific Delivery: Intra-articular and Intravenous Administration
- Lecture 44 - Intravenous Administration: Approved Nanocarriers and Immune System
- Lecture 45 - Immune System - II
- Lecture 46 - Complement System and Blood Clotting
- Lecture 47 - Blood Clotting and Hemocompatibility of Materials; Adaptive Immune Response
- Lecture 48 - Adaptive Immune Response and Vaccine
- Lecture 49 - Vaccines
- Lecture 50 - Vaccines and Immuno-isolated Cell Therapy
- Lecture 51 - Immuno-isolated Cell Therapy
- Lecture 52 - Immuno-isolated Cell and Gene Therapy
- Lecture 53 - Gene Delivery: Vectors
- Lecture 54 - Gene Delivery: Polymers
- Lecture 55 - Genes as Vaccines
- Lecture 56 - Vaccines: Gene Delivery and Other Variants
- Lecture 57 - Cancer Vaccines
- Lecture 58 - Cancer Vaccine: Immunotherapy
- Lecture 59 - Responsive Delivery Systems - I
- Lecture 60 - Responsive Delivery Systems - II
- Lecture 61 - Targeted Drug Delivery System
- Lecture 62 - Targeted Drug Delivery System: Research Paper Discussion
- Lecture 63 - Nanotoxicology and Translation Pathways

Lecture 1 - Introduction

Lecture 2 - Substrate

Lecture 3 - Substrate (Continued...)

Lecture 4 - Introduction to cleanroom

Lecture 5 - Contamination and surface cleaning

Lecture 6 - Advanced cleaning techniques

Lecture 7 - Defects

Lecture 8 - Diffusion

Lecture 9 - Diffusion - Advanced Concepts

Lecture 10 - Ion Implantation

Lecture 11 - Ion Implantation (Continued...)

Lecture 12 - Native Films

Lecture 13 - Native Films: Advanced Concepts

Lecture 14 - Native Films: Defects at Si/SiO<sub>2</sub> interface

Lecture 15 - Methods and Some Definitions

Lecture 16 - Chemical Vapor Deposition: Basics

Lecture 17 - Chemical Vapor Deposition: Precursor Transport

Lecture 18 - Chemical Vapor Deposition: Types of CVD Equipment

Lecture 19 - Chemical Vapor Deposition: Nucleation and Growth

Lecture 20 - Chemical Vapor Deposition: Other Details

Lecture 21 - Atomic Layer Deposition

Lecture 22 - Atomic Layer Deposition (Continued...)

Lecture 23 - Physical Vapor Deposition: Basics

Lecture 24 - Physical Vapor Deposition: Evaporation

Lecture 25 - Physical Vapor Deposition: Sputtering

Lecture 26 - Metallization: Contact resistance

Lecture 27 - Metallization: Electromigration and Epilogue

Lecture 28 - Pattern Transfer Basics

Lecture 29 - Optical lithography basics: resist process - 1

Lecture 30 - Optical lithography basics: resist process - 2

Lecture 31 - Optical Lithography: Contact and Proximity printing

- Lecture 32 - Optical Lithography: Stepper and Scanner
- Lecture 33 - Projection Lithography: Image formation basics
- Lecture 34 - Projection Lithography: Image formation in photoresist

Lecture 16 - Mixing of Solids: Introduction

Lecture 17 - Degree of mixing and Its Assessment

Lecture 18 - Mixing and agitation of fluids/slurries

Lecture 19 - Basic understandings and applications of fluidization

Lecture 20 - Minimum Fluidization Velocity

Lecture 21 - Basic understanding of froth flotation

Lecture 22 - Separation of particles by Screening

Lecture 23 - Particulate Matter Separation by Gravity Settling Chamber

Lecture 24 - Particle Separation by Cyclone and Centrifuge

Lecture 25 - Particle Separation by Electrostatic Precipitator

Lecture 26 - Separation by Industrial Fabric (Bag) Filters

Lecture 27 - Wet Scrubber for Particle Removal

Lecture 28 - Filtration

Lecture 29 - Dead-End and Continuous Filtration

Lecture 30 - Reverse Osmosis

Lecture 31 - Introduction to Nanoparticles

[Lecture 32 - Synthesis of Nanoparticles - Physical Method](#)

[Lecture 33 - Synthesis of Nanoparticles \(Chemical Methods\)](#)

[Lecture 34 - Adsorption: Principle and Applications](#)

[Lecture 35 - Analysis of Adsorption by Isotherms](#)

[Lecture 36 - Adsorption Kinetics](#)

Lecture 1 - Sources of energy

Lecture 2 - Sources of energy

Lecture 3 - Energy scenario

Lecture 4 - Environmental aspects of energy

Lecture 5 - Environmental aspects of energy

Lecture 6 - Environmental aspects of energy

Lecture 7 - Environmental aspects of energy

Lecture 8 - Solid fuels - Part I

Lecture 9 - Solid fuels - Part II

Lecture 10 - Liquid fuels - Part I

Lecture 11 - Liquid fuels - Part II

Lecture 12 - Practice problems - Part I

Lecture 13 - Practice problems - Part II

Lecture 14 - Energy from Bio-based Feedstock

Lecture 15 - Thermal/Thermochemical processes

Lecture 16 - Practice problems (Pelletization)

Lecture 17 - Practice problems (Torrefaction Mass and Energy Yield)

Lecture 18 - Pyrolysis and Hydrothermal Liquefaction

Lecture 19 - Gasification

Lecture 20 - Practice examples (Pyrolysis, Gasification)

Lecture 21 - Biochemical conversion processes - Anaerobic Digestion in Landfills

Lecture 22 - Bioethanol Production

Lecture 23 - Practice examples (Biogas and Bio-ethanol production)

Lecture 24 - Chemical Conversion Processes - Types of Feedstock and Pretreatment

Lecture 25 - Mechanism of trans-esterification and biodiesel production

Lecture 26 - Green diesel synthesis from bio-based feedstocks

Lecture 27 - Energy from Coal (Carbonization, Gasification and Liquefaction)

Lecture 28 - Practice Example (Combustion of Biomass and Coal)

Lecture 29 - Combustion Process (Biomass and Coal)

Lecture 30 - Concept of integration of energy system

Lecture 1 - Introduction to Petroleum Reservoir Engineering

Lecture 2 - Petroleum Reserves

Lecture 3 - Petroleum Geology

Lecture 4 - Well Drilling Methods

Lecture 5 - Thermodynamics of Hydrocarbons

Lecture 6 - Natural Gas Properties

Lecture 7 - Properties of Crude Oil

Lecture 8 - Reservoir Rock Properties

Lecture 9 - Relative Permeability

Lecture 10 - Primary Drive Mechanisms

Lecture 11 - General Material (Volumetric) Balance

Lecture 12 - Volumetric Balance in Oil and Gas Reservoir

Lecture 13 - Fundamentals of Reservoir Fluid Flow

Lecture 14 - General Equations for radial Flow in Reservoir

Lecture 15 - Inflow Performance Relationship for Reservoir Fluids

Lecture 16 - Well Testing and Performance - I

Lecture 17 - Well Testing and Performance - II

Lecture 18 - Secondary Oil Recovery Methods

Lecture 19 - Enhanced Oil Recovery Methods

Lecture 20 - Introduction to Reservoir Simulation

Lecture 21 - Unconventional Natural Gas Production

Lecture 3 - Onto, into, one to one function

Lecture 4 - Vectors

Lecture 5 - Vectors (Continued...)

Lecture 6 - Contraction Mapping

Lecture 7 - Contraction Mapping (Continued...)

Lecture 8 - Matrix, Determinant

Lecture 9 - Eigenvalue Problem in Discrete Domain

Lecture 10 - Eigenvalue Problem in Discrete Domain (Continued...)

Lecture 11 - Eigenvalue Problem in Discrete Domain (Continued...)

Lecture 12 - Eigenvalue Problem in Discrete Domain (Continued...)

Lecture 13 - Stability Analysis

Lecture 14 - Stability Analysis (Continued...)

Lecture 15 - Stability Analysis (Continued...)

Lecture 16 - More Examples

Lecture 17 - Partial Differential Equations

Lecture 18 - Partial Differential Equations (Continued...)

Lecture 19 - Eigenvalue Problem in Continuous Domain

Lecture 20 - Special ODEs

Lecture 21 - Adjoint Operator

Lecture 22 - Theorems of Eigenvalues and Eigenfunction

Lecture 23 - Solution PDE : Separation of Variables Method

Lecture 24 - Solution of Parabolic PDE : Separation of variables method

Lecture 25 - Solution of Parabolic PDE : Separation of Variables Method (Continued...)

Lecture 26 - Solution of Higher Dimensional PDEs

Lecture 27 - Solution of Higher Dimensional PDEs (Continued...)

Lecture 28 - Four Dimensional Parabolic PDE

Lecture 29 - Solution of Elliptic and Hyperbolic PDE

Lecture 30 - Solution of Elliptic and Hyperbolic PDE (Continued...)

Lecture 31 - PDE in Cylindrical and Spherical Coordinate

[Lecture 32 - Solution of non-homogeneous PDE](#)

[Lecture 33 - Solution of non-homogeneous PDE \(Continued...\)](#)

[Lecture 34 - Solution of non-homogeneous Parabolic PDE](#)

[Lecture 35 - Solution of non-homogeneous Elliptic PDE](#)

[Lecture 36 - Solution of non-homogeneous Elliptic PDE \(Continued...\)](#)

[Lecture 37 - Similarity Solution](#)

[Lecture 38 - Similarity Solution \(Continued...\)](#)

[Lecture 39 - Integral Method](#)

[Lecture 40 - Laplace Transform](#)

[Lecture 41 - Fourier Transform](#)

[Lecture 1 - Fundamentals of Separation Processes and Introduction of Membrane System](#)

[Lecture 2 - Fundamentals of Separation Processes and Introduction of Membrane System \(Continued...\)](#)

[Lecture 3 - Fundamentals of Separation Processes and Introduction of Membrane System \(Continued...\)](#)

[Lecture 4 - Fundamentals of Separation Processes and Introduction of Membrane System \(Continued...\)](#)

[Lecture 5 - Modeling of Reverse Osmosis](#)

[Lecture 6 - Concentration Polarization](#)

[Lecture 7 - Osmotic Pressure Controlling Filtration](#)

[Lecture 8 - Osmotic Pressure Controlling Filtration \(Continued...\)](#)

[Lecture 9 - Osmotic Pressure Controlling Filtration \(Continued...\)](#)

[Lecture 10 - Osmotic Pressure Controlling Filtration \(Continued...\)](#)

[Lecture 11 - Osmotic Pressure Controlling Filtration \(Continued...\)](#)

[Lecture 12 - Osmotic Pressure Controlling Filtration \(Continued...\)](#)

[Lecture 13 - Modeling of Gel Layer Controlling Filtration](#)

[Lecture 14 - Modeling of Gel Layer Controlling Filtration \(Continued...\)](#)

[Lecture 15 - Modeling of Gel Layer Controlling Filtration \(Continued...\) and Resistance in Series Models](#)

[Lecture 16 - Design of Membrane Module](#)

[Lecture 17 - Design of Membrane Module \(Continued...\)](#)

[Lecture 18 - Design of Membrane Module \(Continued...\)](#)

[Lecture 19 - Modeling of Dialysis](#)

[Lecture 20 - Modeling of Dialysis \(Continued...\)](#)

Lecture 1 - Introduction - 1

Lecture 2 - Introduction - 2

Lecture 3 - Introduction - 3

Lecture 4 - Fundamental Concepts Related to Surface Tension - 1

Lecture 5 - Fundamental Concepts Related to Surface Tension - 2

Lecture 6 - Fundamental Concepts Related to Surface Tension - 3

Lecture 7 - Fundamental Concepts Related to Surface Tension - 4

Lecture 8 - Components of Surface Tension - 1

Lecture 9 - Components of Surface Tension - 2

Lecture 10 - Self Assembly of Surfactant Molecules

Lecture 11 - Laplace Pressure

Lecture 12 - Photo Lithography - 1

Lecture 13 - Photo Lithography - 2

Lecture 14 - Photo Lithography - 3

Lecture 15 - Photo Lithography - 4

Lecture 16 - Photo Lithography - 5

Lecture 17 - Photo Lithography - 6

Lecture 18 - Soft Lithography - I

Lecture 19 - Soft Lithography - 2

Lecture 20 - Soft Lithography - 3

Lecture 21 - Soft Lithography - 4

Lecture 22 - Soft Lithography - 5

Lecture 23 - Soft Lithography - 6

Lecture 24 - Atomic Force Microscope - 1

Lecture 25 - Atomic Force Microscope - 2

Lecture 26 - Atomic Force Microscope - 3

Lecture 27 - Atomic Force Microscope - 4

Lecture 28 - Atomic Force Microscope - 5

Lecture 29 - Atomic Force Microscope - 6

Lecture 30 - Dewetting - 1

Lecture 31 - Dewetting - 2

[Lecture 32 - VdW Interaction Between Two Surfaces](#)

[Lecture 33 - Interaction Between Two Surfaces - 2](#)

[Lecture 34 - Interaction Between Two Surfaces - 3](#)

[Lecture 35 - Dewetting - 3](#)

[Lecture 36 - Pattern Directed Dewetting - I](#)

[Lecture 37 - Pattern Directed Dewetting - II](#)

[Lecture 38 - Spin Dewetting](#)

[Lecture 39 - Elastic Contact Instability - I](#)

[Lecture 40 - Elastic Contact Instability - II](#)

Lecture 1 - Brief Introduction to Multiphase Flow

Lecture 2 - Brief Introduction to Multiphase Flow (Continued...)

Lecture 3 - Two Phase Flow through Micro Channels

Lecture 4 - Two Phase Flow through Micro Channels (Continued...)

Lecture 5 - Criteria for Confinement for in Case of Two Phase Flow

Lecture 6 - Pertinent Dimensionless Numbers in Two Phase

Lecture 7 - Flow Pattern Maps for Milli and Micro Systems

Lecture 8 - Pattern Transition from Energy Minimisation Principle

Lecture 9 - Experimental Identification of Flow Regimes

Lecture 10 - Experimental Identification of Flow Regimes (Continued...)

Lecture 11 - Flow Regimes and Void Fraction Estimation

Lecture 12 - Influence of Operating Parameter on Flow Patterns

Lecture 13 - Influence of Operating Parameter on Flow Patterns (Continued...)

Lecture 14 - Influence of Operating Parameter on Flow Patterns (Continued...)

Lecture 15 - Influence of Operating Parameter on Flow Patterns (Continued...)

Lecture 16 - Void Fraction Characteristic Mini and Micro Channel

Lecture 17 - Void Fraction and Pressure Drop in Reduced Dimensions - Experimental results

Lecture 18 - Void Fraction and Pressure Drop in Reduced Dimensions - Experimental results (Continued...)

Lecture 19 - Theoretical Analysis of Two Phase Flow in Reduced Dimensions

Lecture 20 - Theoretical Analysis of Two Phase Flow in Reduced Dimensions (Continued...)

Lecture 21 - Flow Pattern based Analysis in Micro Systems - Drift Flux Model

Lecture 22 - Flow Pattern based Modelling - Slug Flow Model

Lecture 23 - Flow Boiling in Microchannels

Lecture 24 - Tutorial - I

Lecture 25 - Tutorial - II

Lecture 1 - Introduction

Lecture 2 - Introduction (Continued...)

Lecture 3 - First Law of Thermodynamics

Lecture 4 - Second Law of Thermodynamics

Lecture 5 - Second Law of Thermodynamics (Continued...)

Lecture 6 - Entropy Change during Spontaneous Processes

Lecture 7 - Criteria of Spontaneity

Lecture 8 - Criteria of Spontaneity (Continued...)

Lecture 9 - Thermodynamic Network

Lecture 10 - Thermodynamic Network (Continued...)

Lecture 11 - Tutorial 1

Lecture 12 - Gibbs free energy as a function of temperature and pressure

Lecture 13 - P-v-T behaviour of gases

Lecture 14 - P-v-T behaviour (Continued...)

Lecture 15 - P-v-T behaviour (Continued...)

Lecture 16 - P-v-T behaviour (Continued...)

Lecture 17 - Tutorial 2

Lecture 18 - Property estimation from P-v-T behaviour

Lecture 19 - Property estimation (Continued...)

Lecture 20 - Concept of chemical potential

Lecture 21 - Chemical potential (Continued...)

Lecture 22 - Homogeneous open systems

Lecture 23 - Homogeneous open systems (Continued...)

Lecture 24 - Heterogeneous Closed Systems

Lecture 25 - Tutorial 3

Lecture 26 - Concept of fugacity

Lecture 27 - Fugacity (Continued...)

Lecture 28 - Estimation of fugacity coefficients

Lecture 29 - Fugacity of condensed phase

Lecture 30 - Mixtures

Lecture 31 - Mixtures (Continued...)

Lecture 56 - LAB 10 - Regression and curve - fitting of data Problem definition and analysis

Lecture 57 - LAB 10 - Regression and curve - fitting of data Background theory and solution strategy

Lecture 58 - LAB 10 - Regression and curve - fitting of data Problem solution

Lecture 59 - LAB 10 - Regression and curve - fitting of data Problem solution (Continued...)

Lecture 60 - Review of the course

Lecture 1 - What is Petroleum How it is stored under the earth Exploration of petroleum underground

Lecture 2 - Concept of Seismic Reflection, Introduction to Drilling

Lecture 3 - Drilling Mud and Mechanisms of Recovery of Petroleum

Lecture 4 - Composition of Crude Petroleum and Evaluation of Oil Stocks

Lecture 5 - Evaluation of Oil Stocks: Vaporization Characteristics

Lecture 6 - Primary Processing of Crude Oil: Desalting

Lecture 7 - Primary Processing of Crude Oil: Atmospheric Distillation Unit (ADU)

Lecture 8 - Primary Processing of Crude Oil: Reflux Systems, Vacuum Distillation Unit (VDU)

Lecture 9 - Products and Process Utilities in Primary Processing, Pipe Still Heater

Lecture 10 - Refinery Units

Lecture 11 - Secondary Processing: Decomposition of Residues: Thermal Cracking

Lecture 12 - Coking, Gasification and Steam Cracking

Lecture 13 - Secondary Processing: Decomposition of Residues: Hydrocracking

Lecture 14 - Secondary Processing: Decomposition of Residues: Catalytic Cracking

Lecture 15 - Secondary Processing: Decomposition of Residues: Process description of FCC

Lecture 16 - Properties and Testing of Petroleum Products

Lecture 17 - Properties and Testing of Petroleum Products (Continued...)

Lecture 18 - Properties and Testing of Petroleum Products (Continued...)

Lecture 19 - Properties and Testing of Petroleum Products (Continued...)

Lecture 20 - Properties and Testing of Petroleum Products (Continued...)

Lecture 21 - Petroleum fractions from distillation units

Lecture 22 - Petroleum fractions from distillation units (Continued...)

Lecture 23 - Petroleum fractions from distillation units (Continued...)

Lecture 24 - Petroleum fractions from distillation units (Continued...)

Lecture 25 - Petroleum fractions from distillation units (Continued...)

Lecture 26 - Upgradation of straight run cuts from atmospheric distillation unit

Lecture 27 - Upgradation of straight run cuts from atmospheric distillation unit (Continued...)

Lecture 28 - Upgradation of straight run cuts from atmospheric distillation unit (Continued...)

Lecture 29 - Upgradation of straight run cuts from atmospheric distillation unit (Continued...)

Lecture 30 - Upgradation of straight run cuts from distillation unit

Lecture 31 - Purification processes

[Lecture 32 - Purification processes \(Continued...\)](#)

[Lecture 33 - Bitumen preparation processes](#)

[Lecture 34 - Grease: preparation, description and application](#)

[Lecture 35 - Emission control and effluent treatment in refinery](#)

[Lecture 36 - Fundamentals of thermochemistry: Combustion](#)

[Lecture 37 - Fundamentals of thermochemistry: Flame](#)

[Lecture 38 - Fundamentals of thermochemistry: Adiabatic flame temperature](#)

[Lecture 39 - Fundamentals of thermochemistry: Burner](#)

[Lecture 40 - Fundamentals of thermochemistry: Internal Combustion engine](#)

Lecture 1 - Basic Introduction to Polymer

Lecture 2 - Structure Process Correlation

Lecture 3 - Basic Rheology

Lecture 4 - Classification of Fluids

Lecture 5 - Flow of Liquids Through Various Channels - 1

Lecture 6 - Flow of Liquids Through Various Channels - 2

Lecture 7 - Flow of Liquids Through Various Channels - 3

Lecture 8 - Introduction to Viscometers and Rheometers

Lecture 9 - Ostwald Viscometer, Brookfield Viscometer, Falling Piston Viscometers

Lecture 10 - ODR, MDR, RPA, PPR

Lecture 11 - DMA -In-Light of rheology

Lecture 12 - Master Curve and its Implications

Lecture 13 - Capillary Rheometer

Lecture 14 - Introduction to Paints and importance of rheology in paints

Lecture 15 - Rheology of paints - 1

Lecture 16 - Rheology of paints - 2

Lecture 17 - Rheology of Adhesives and Sealants

Lecture 18 - Rheology of Fiber and Plastics

Lecture 19 - Practical demonstration on Brookfield viscometer and Oswald viscometer

Lecture 20 - Practical demonstration on Mooney viscometer, ODR and MDR

Lecture 21 - Practical demonstration on RPA

Lecture 22 - Practical demonstration on PPR and DMA

Lecture 23 - Practical demonstration on Capillary Rheometer

Lecture 24 - Numerical Problems related to basic rheology

Lecture 25 - Importance of compounding and introduction to various compounding ingredients

Lecture 26 - Properties and role of various compounding ingredients

Lecture 27 - Surface treatment of reinforcing elements

Lecture 28 - Rheology of Elastomers

Lecture 29 - Importance of die swell (correlating with normal force differences)

Lecture 30 - Melt Fracture and other extrudate instabilities

Lecture 31 - Introduction to plastic and rubber mixing and blending

Lecture 32 - Various mixing equipment and their importance

Lecture 33 - Introduction to Two-Roll Mill and Mixing on Two - Roll Mill 1

Lecture 34 - Introduction to Two-Roll Mill and Mixing on Two - Roll Mill 2

Lecture 35 - Introduction to Internal mixture Kneaders and Mixing using Internal mixture and Kneaders

Lecture 36 - Practical demonstration of Rubber mixing on a two roll and using an internal mixer

Lecture 37 - Molding Techniques

Lecture 38 - Calendering

Lecture 39 - Extrusion

Lecture 40 - Rheology of Injection moulding process

Lecture 41 - Plastic and fiber-related processing

Lecture 42 - Numerical problems related to various processing techniques

Lecture 43 - Wire coating, Garvey die, Profile Extrusion

Lecture 44 - Introduction to FEA based computationalfluid mechanics on extrusion - 1

Lecture 45 - Introduction to FEA based computationalfluid mechanics on extrusion - 2

Lecture 46 - Introduction to FEA based computationalfluid mechanics on extrusion - 3

Lecture 47 - Practical demonstartion on FEA

Lecture 48 - Concluding remarks and commentson applied rheology for advanced learners

[Lecture 35 - Molecular basis of Thermodynamics - II](#)

Lecture 1 - Motivation for CFD and Introduction to the CFD approach

Lecture 2 - Illustration of the CFD approach through a worked out example

Lecture 3 - Eulerian approach, Conservation Equation, Derivation of Mass Conservation Equation and Statement of the momentum conservation equation

Lecture 4 - Forces acting on a control volume; Stress tensor; Derivation of the momentum conservation equation ; Closure problem; Deformation of a fluid element in fluid flow

Lecture 5 - Kinematics of deformation in fluid flow; Stress vs strain rate relation; Derivation of the Navier-Stokes equations

Lecture 6 - Equations governing flow of incompressible flow; Initial and boundary conditions; Wellposedness of a fluid flow problem

Lecture 7 - Equations for some simple cases; Generic scalar transport equation form of the governing equations; Outline of the approach to the solution of the N-S equations.

Lecture 8 - cut out the first 30s; Spatial discretization of a simple flow domain; Taylor's series expansion and the basis of finite difference approximation of a derivative; Central and one-sided difference approximations; Order of accuracy of finite difference ap

Lecture 9 - Finite difference approximation of pth order of accuracy for qth order derivative; cross -derivatives; Examples of high order accurate formulae for several derivatives

Lecture 10 - One -sided high order accurate approximations; Explicit and implicit formulations for the time derivatives

Lecture 11 - Numerical solution of the unsteady advection equation using different finite difference approximations

Lecture 12 - Need for analysis of a discretization scheme; Concepts of consistency, stability and convergence and the equivalence theorem of Lax ; Analysis for consistency

Lecture 13 - Statement of the stability problem; von Neumann stability analysis of the first order wave equation

Lecture 14 - Consistency and stability analysis of the unsteady diffusion equation; Analysis for two- and three -dimensional cases; Stability of implicit schemes

Lecture 15 - Interpretation of the stability condition; Stability analysis of the generic scalar equation and the concept of upwinding ; Diffusive and dissipative errors in numerical solution; Introduction to the concept of TVD schemes

Lecture 16 - Template for the generic scalar transport equation and its extension to the solution of Navier-Stokes equations for a compressible flow.

Lecture 17 - Illustration of application of the template using the MacCormack scheme for a three-dimensional compressible flow

Lecture 18 - Stability limits of MacCormack scheme; Limitations in extending compressible flow schemes to incompressible flows ; Difficulty of evaluation of pressure in incompressible flows and listing of various approaches

Lecture 19 - Artificial compressibility method and the streamfunction-vorticity method for the solution of NS equations and their limitations

Lecture 20 - Pressure equation method for the solution of NS equations

Lecture 21 - Pressure-correction approach to the solution of NS equations on a staggered grid; SIMPLE and its family of methods

Lecture 22 - Need for efficient solution of linear algebraic equations; Classification of approaches for the solution of linear algebraic equations.

Lecture 23 - Direct methods for linear algebraic equations; Gaussian elimination method

Lecture 24 - Gauss-Jordan method; LU decomposition method; TDMA and Thomas algorithm

Lecture 25 - Basic iterative methods for linear algebraic equations: Description of point -Jacobi, Gauss-Seidel and SOR methods

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 26 - Convergence analysis of basic iterative schemes; Diagonal dominance condition for convergence; Influence of source terms on the diagonal dominance condition; Rate of convergence

Lecture 27 - Application to the Laplace equation

Lecture 28 - Advanced iterative methods: Alternating Direction Implicit Method; Operator splitting

Lecture 29 - Advanced iterative methods; Strongly Implicit Procedure; Conjugate gradient method; Multigrid method

Lecture 30 - Illustration of the Multigrid method for the Laplace equation

Lecture 31 - Overview of the approach of numerical solution of NS equations for simple domains; Introduction to complexity arising from physics and geometry

Lecture 32 - Derivation of the energy conservation equation

Lecture 33 - Derivation of the species conservation equation; dealing with chemical reactions

Lecture 34 - Turbulence; Characteristics of turbulent flow; Dealing with fluctuations and the concept of time-averaging

Lecture 35 - Derivation of the Reynolds -averaged Navier -Stokes equations; identification of the closure problem of turbulence; Boussinesq hypothesis and eddy viscosity

Lecture 36 - Reynolds stresses in turbulent flow; Time and length scales of turbulence; Energy cascade; Mixing length model for eddy viscosity

Lecture 37 - One-equation model for turbulent flow

Lecture 38 - Two -equation model for turbulent flow; Numerical calculation of turbulent reacting flows

Lecture 39 - Calculation of near-wall region in turbulent flow; wall function approach; near-wall turbulence models

Lecture 40 - Need for special methods for dealing with irregular flow geometry; Outline of the Body-fitted grid approach ; Coordinate transformation to a general, 3-D curvilinear system

Lecture 41 - Transformation of the governing equations; Illustration for the Laplace equation; Appearance and significance of cross - derivative terms; Concepts of structured and unstructured grids.

Lecture 42 - Finite volume method for complicated flow domain; Illustration for the case of flow through a duct of triangular cross - section.

Lecture 43 - Finite volume method for the general case

Lecture 44 - Generation of a structured grid for irregular flow domain; Algebraic methods; Elliptic grid generation method

Lecture 45 - Unstructured grid generation; Domain nodalization; Advancing front method for triangulation

Lecture 46 - Delaunay triangulation method for unstructured grid generation

Lecture 47 - Co -located grid approach for irregular geometries; Pressure correction equation for a co -located structured grid; Pressure correction equation for a co-located unstructured grid.

- Lecture 61 - Surface compressor for gas lift - Part 2
- Lecture 62 - Surface compressor for gas lift - Part 3

Lecture 1 - Introduction to Chemical process Industries

Lecture 2 - Raw material for Organic Chemical Industries

Lecture 3 - Unit processes and unit operations in organic chemical Industries

Lecture 4 - Coal and coal as chemicals feed stock

Lecture 5 - Coal carbonization and Coke oven plant

Lecture 6 - Gasification of Coal,Petrocoke and Biomass

Lecture 7 - Introduction to Pulp and paper Industry, Raw material for paper industry and Technological development

Lecture 8 - Pulping and Bleaching

Lecture 9 - Recovery of Chemicals

Lecture 10 - Stock preparation and paper making

Lecture 11 - Introduction to Soap and detergent, Soap making and Recovery of Glycerine

Lecture 12 - Synthetic detergent and Linear alkyl benzene

Lecture 13 - Sugar and Fermentation industry

Lecture 14 - Ethanol as Biofuel and Chemical feed stock

Lecture 15 - Introduction : Staus of Petroleum refinery, Crude oil and Natural gas origin, occurrence, exploration, drilling and processing, Fuel norms

Lecture 16 - Evaluation of Crude oil,Petroleum Products and Apetrochemicals

Lecture 17 - Crude oil Distillation

Lecture 18 - Thermal Cracking: Visbreaking and Delayed Coking

Lecture 19 - Catalytic cracking: Fluid Catalytic cracking and Hydro cracking

Lecture 20 - Catalytic reforming

Lecture 21 - Alkylation, Isomerisation and Polymerisation

Lecture 22 - Desulphurisation Processes and Recovery of Sulphur

Lecture 23 - Profile of petrochemical Industry and its structure

Lecture 24 - Naphtha and gas cracking for production of olefins

Lecture 25 - Recovery of chemicals from FCC and steam cracking

Lecture 26 - Synthesis gas and its derivatives: Hydrogen, CO, Methanol, Formaldehyde

Lecture 27 - Ethylene derivatives: Ethylene Oxide, Ethylene glycol, Ethylene dichloride and Vinyl chloride

Lecture 28 - Propylene, Propylene oxide and Isopropanol

Lecture 29 - Aromatics Production

Lecture 30 - Aromatics product profile, Ethyl benzene & Styrene, Cumene and phenol, Bisphenol, Aniline

## DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 31 - Introduction to polymer, Elastomer and Synthetic Fibre, Polymerisation

Lecture 32 - Polymers: Polyolefins, Polyethylene, Polypropylene Polystyrene

Lecture 33 - Polyvinylchloride, polycarbonate, thermoset resin: phenolformaldehyde, uriaformaldehyde and melamineformaldehyde

Lecture 34 - Elastomers: Styrene butadiene Rubber(SBR), Poly butadiene, Nitrile rubber

Lecture 35 - Polyamides or Nylons(PA)

Lecture 36 - DMT and Terephthalic Acid, Polyester, PET resin, PTB resin

Lecture 37 - Acrylic Fibre, Modified Acrylic Fibre, Acrylonitrile, Acrolein, Propylene Finber, Polyurethane

Lecture 38 - Viscose Rayon and Acetate rayon

Lecture 39 - Pesticide

Lecture 40 - Dye and Intermediates

**NPTEL : Process Integration (Chemical Engineering)**

**Co-ordinators : Dr. B. Mohanty**

Lecture 1 - Process integration, methods and area of application

Lecture 2 - Fundamental concepts related to heat integration - Part 1

Lecture 3 - Fundamental concepts related to heat integration - Part 2

Lecture 4 - Data extraction

Lecture 5 - Hot composite curves

Lecture 6 - Cold composite curves

Lecture 7 - Hot and cold composite curves and the pinch

Lecture 8 - Threshold problems

Lecture 9 - Energy targeting procedure

Lecture 10 - Problem Table Algorithm - Part 1

Lecture 11 - Grand composite curve

Lecture 12 - Problem Table Algorithm - Part 2

Lecture 13 - Number of units target

Lecture 14 - Shell targeting - Part 1

Lecture 15 - Area targeting - Part 1

Lecture 16 - Area targeting - Part 2

Lecture 17 - Coast targeting - Part 1

Lecture 18 - Coast targeting - Part 2

Lecture 19 - Supertargeting- optimization of  $\hat{I}^*_{t \min}$

Lecture 20 - Global & stream specific  $\hat{I}^*_{t \min}$  and its relevance

Lecture 21 - Topology Trap

Lecture 22 - Rules for Pinch Design Method (PDM) - Part 1

Lecture 23 - Rules for Pinch Design Method (PDM) - Part 2

Lecture 24 - Application of PDM for MER Hen Synthesis

Lecture 25 - Design for threshold problems

Lecture 26 - Design for single pinch problems

Lecture 27 - Design for multi pinch problems

Lecture 28 - HEN optimization

Lecture 29 - Remaining problem analysis

Lecture 30 - Driving Force Plot

Lecture 31 - Low Temperature process Design - Part 1

[Lecture 32 - Low Temperature process Design - Part 2](#)

[Lecture 33 - Integration of Gas turbine with process - Part 1](#)

[Lecture 34 - Integration of Gas turbine with process - Part 2](#)

[Lecture 35 - Placement and Integration of Distillation Column](#)

[Lecture 36 - Heat Integration of evaporators](#)

[Lecture 37 - Integration of heat pump](#)

[Lecture 38 - Placement of Heat Engine, Heat pump and Reactors](#)

[Lecture 39 - Integration of Furnace](#)

[Lecture 40 - Problem solving using HINT Software - Part 1](#)

[Lecture 41 - Problem solving using HINT Software - Part 2](#)

[Lecture 42 - Problem solving using HINT Software - Part 3](#)

[Lecture 43 - Problem solving using HINT Software - Part 4](#)

Lecture 13 - Liquid Fluidisation

Lecture 14 - Gas Fluidisation - 1

Lecture 15 - Gas Fluidisation - 2

Lecture 16 - Flotation - 1

Lecture 17 - Flotation - 2

Lecture 18 - Transportaion of solids - 1

Lecture 19 - Transportaion of solids - 2

Lecture 20 - Transportaion of solids - 3

Lecture 1 - Introduction to the course, Macromolecules and Life, Molecular flexibility

Lecture 2 - Classification of polymers, Types of polymerization, Average molecular weights and polydispersity

Lecture 3 - Motivation to study polymer physics

Lecture 4 - Random Walk Models of Single Chain I: end-to-end distance of a polymer chain, freely jointed chain, drunkard walk

Lecture 5 - Random Walk Models of Single Chain II: general random walk on a lattice

Lecture 6 - Random Walk Models of Single Chain III: Freely rotating chain, definition of persistence length

Lecture 7 - Models of semiflexible chains (Kratky Porod Model) - Part I

Lecture 8 - Models of semiflexible chains (Kratky Porod Model) - Part II

Lecture 9 - Probability density of an ideal chain - Part I

Lecture 10 - Probability density of an ideal chain - Part II

Lecture 11 - Entropic Elasticity, Bead-Spring Model, Simulations of random walk models

Lecture 12 - Derivation of Diffusion equation, Einstein notation

Lecture 13 - Definition of Radius of gyration

Lecture 14 - Radius of gyration for an ideal chain, concept of ideality

Lecture 15 - Nonbonded interactions, hydrophobic and hydrophilic behaviour

Lecture 16 - Definition of excluded volume; good, bad, and theta solvent

Lecture 17 - Virial expansion, Flory theory for good solvent

Lecture 18 - Flory theory for bad solvent, self-similarity and fractal nature of polymers

Lecture 19 - Derivation of fractal dimension, concentration regimes and overlap concentration

Lecture 20 - Size, shape, and structure. Gyration tensor and measures of asphericity.

Lecture 21 - Order-disorder transition

Lecture 22 - Scattering experiments, Pair correlation function

Lecture 23 - Structure of polymer chain, Introduction to Monte Carlo simulations of polymer chains

Lecture 24 - Monte Carlo algorithm: Detailed Balance, Metropolis algorithm

Lecture 25 - Practical aspects of Monte Carlo simulation

Lecture 26 - Molecular Dynamics Simulations, Review of Thermodynamics

Lecture 27 - Solution Thermodynamics - I

Lecture 28 - Solution Thermodynamics - II

Lecture 29 - Solution Thermodynamics - III

Lecture 30 - Solution Thermodynamics - IV

Lecture 1 - Introduction to the course

Lecture 2 - Molecular basis of energy and entropy

Lecture 3 - Probability and probability distributions

Lecture 4 - Probability distributions and thermodynamic equilibrium

Lecture 5 - Energy distribution in molecular systems

Lecture 6 - First and second law of thermodynamics

Lecture 7 - Reversible and irreversible processes; third law of thermodynamics; legendre transformation; thermodynamic functions for one component system

Lecture 8 - Thermodynamic functions for multi-component systems; chemical potential; why do we minimize thermodynamic functions?

Lecture 9 - Extensive and intensive variables; gibbs duhem relation; euler theorem; maxwell relations

Lecture 10 - Discrete and continuous probabilities; stirling approximation

Lecture 11 - Binomial distribution approaches Gaussian distribution for large n; definition of drunkard walk

Lecture 12 - Solution of drunkard walk; Lagrange multipliers

Lecture 13 - Energy distribution in molecular system revisited; introduction to thermodynamic ensembles

Lecture 14 - Canonical ensemble: most probable distribution, partition function

Lecture 15 - Definition of temperature; third law of thermodynamics

Lecture 16 - Canonical ensemble: Helmholtz free energy, averages and fluctuations, specific heat, deriving ideal gas law

Lecture 17 - Partition function of a dense gas; grand canonical ensemble: partition function, most probable distribution

Lecture 18 - Computing properties in grand canonical ensemble

Lecture 19 - Isothermal isobaric ensemble

Lecture 20 - Summary of thermodynamic ensembles; partition function of an ideal gas

Lecture 21 - Mixing and phase separation, phase equilibrium of a multiphase multicomponent system, Gibbs phase rule

Lecture 22 - Pure component phase diagram; solution thermodynamics: Helmholtz free energy density

Lecture 23 - Characterizing mixing and phase separation using Helmholtz free energy density

Lecture 24 - Common tangent construction, definition of binodal, spinodal, and critical point

Lecture 25 - Osmotic pressure and chemical potential

Lecture 26 - Lattice model of liquid solutions - I

Lecture 27 - Lattice model of liquid solutions - II

Lecture 28 - Lattice model of liquid solutions - III

Lecture 29 - Critical review of Lattice model, theoretical basis of molecular dynamics simulation

Lecture 30 - Theoretical basis of molecular dynamics simulation

- Lecture 31 - Interaction energy and force field
- Lecture 32 - Liouville theorem; theoretical basis of Monte Carlo simulation
- Lecture 33 - Introduction to Monte Carlo simulation method
- Lecture 34 - Markov chain algorithm, condition for equilibrium and detailed balance
- Lecture 35 - Metropolis algorithm, periodic boundary condition
- Lecture 36 - Numerical implementation of Monte Carlo simulation: Python Examples - I
- Lecture 37 - Numerical implementation of Monte Carlo simulation: Python Examples - II
- Lecture 38 - Numerical implementation of Monte Carlo simulation: Python Examples - III
- Lecture 39 - Numerical implementation of Monte Carlo simulation: Python Examples - IV
- Lecture 40 - Numerical implementation of Monte Carlo simulation: Python Examples - V
- Lecture 41 - Particle simulations: comparison with quantum chemical and continuum simulations; bridging length and time scales
- Lecture 42 - Pair potentials
- Lecture 43 - Saving CPU time: short range and long range interactions
- Lecture 44 - Bonded and non-bonded interactions, force fields
- Lecture 45 - Practical aspects of molecular simulations
- Lecture 46 - Numerical implementation of MD; thermostat and barostat
- Lecture 47 - MD simulations - efficiency and parallelization, sampling and averaging, analysis of simulation trajectories
- Lecture 48 - MD simulations - analysis of simulation trajectories (continued), Case Studies - I
- Lecture 49 - MD simulations - Case Studies - II
- Lecture 50 - MD simulations - Case Studies - III
- Lecture 51 - Free energies and phase behavior; extension of canonical ensemble Monte Carlo to other ensembles
- Lecture 52 - Extension of canonical ensemble Monte Carlo to other ensembles (Continued...)
- Lecture 53 - Monte Carlo in Gibbs ensemble and semi-grand canonical ensemble, thermodynamic integration
- Lecture 54 - Thermodynamic integration (continued); Widom's particle insertion; overlapping distribution method
- Lecture 55 - Multiple histogram method; umbrella sampling; thermodynamic cycle; potential of mean force; pulling simulations; metadynamics; tackling time scale issues
- Lecture 56 - Tackling time scale issues (continued); nonequilibrium molecular dynamics; mesoscale simulations: Langevin dynamics and Brownian dynamics, kinetic Monte Carlo simulations; dissipative particle dynamics
- Lecture 57 - Multiparticle collision dynamics; lattice Boltzmann method; coarse-graining
- Lecture 58 - Case studies
- Lecture 59 - Simulations of chemical reactions using Kinetic Monte Carlo simulations
- Lecture 60 - Reactive force fields; Ab initio molecular dynamics and other advanced methods; molecular simulations in chemical engineering; concluding remarks

Lecture 1 - Introduction to Chemical Process Utilities

Lecture 2 - Energy Perspective to the Utilities

Lecture 3 - Power Cycle

Lecture 4 - Fuel Analysis

Lecture 5 - Practice problems related to power cycle and fuel analysis

Lecture 6 - Heat Transfer Utilities - I

Lecture 7 - Heat Transfer Utilities - II

Lecture 8 - Plate and Frame Heat Exchangers Types

Lecture 9 - Solar Energy - I

Lecture 10 - Solar Energy - II

Lecture 11 - Heat Transfer Media and Solar energy

Lecture 12 - Water

Lecture 13 - Water Chemistry

Lecture 14 - Inhibition and Water Treatment

Lecture 15 - Boiler Water treatment

Lecture 16 - Water Governance

Lecture 17 - Water Quality standards - I

Lecture 18 - Water Quality Standards - II

Lecture 19 - Steam

Lecture 20 - Boilers

Lecture 21 - Industrial Boiler Types

Lecture 22 - Boilers

Lecture 23 - Boilers- Question Practice

Lecture 24 - Steam Generation Unit

Lecture 25 - Steam Generation Unit-Heaters

Lecture 26 - Attemperator and Steam Drum

Lecture 27 - Steam Traps, Centralization, and Fuel Selection

Lecture 28 - Economizer, Super heaters, and Safety devices

Lecture 29

Lecture 30 - Insulation of Steam Generators

Lecture 31 - Air

Lecture 32 - Air Filtration and Pneumatic Conveying

Lecture 33 - Introduction to Pneumatic Conveying System

Lecture 34 - Conveying System Types

Lecture 35 - Material Properties and Pipeline Feeding Devices

Lecture 36 - Feeding devices

Lecture 37 - Gas-solid flows

Lecture 38 - Design of Pipelines Elements of Pipeline Design

Lecture 39 - Natural Gas Transmission - I

Lecture 40 - Natural Gas Transmission - II

Lecture 41 - Natural Gas Transmission - III

Lecture 42 - Pipeline Mechanical design - Natural Gas Transmission - IV

Lecture 43 - Cooling Tower; Theory and Some Basic Calculations

Lecture 44 - Concept of Heat Transfer in Cooling Tower and its Components

Lecture 45 - Types and Components of Cooling Tower

Lecture 46 - Components and Materials of Construction and Applications of Cooling Tower

Lecture 47 - Control and Maintenance in cooling towers

Lecture 48 - Pressure Levels and Terminology - I

Lecture 49 - Pressure Levels and Terminology - II

Lecture 50 - Gauges for Pressure Measurement

Lecture 51 - Refrigerants and Refrigeration

Lecture 52 - Introduction to Refrigeration

Lecture 53 - Refrigeration System Components

Lecture 54 - Refrigeration System Components and Refrigeration Cycle

Lecture 55 - Refrigeration Systems

Lecture 56 - Refractories

Lecture 57 - Thermodynamic Principles and Corrosion in Refractories

Lecture 58 - Slag Attack and Kinds of Refractories in Uses

Lecture 59 - Brief history of Insulations and its fundamental principles

Lecture 60 - Heat transfer in Insulations materials

Lecture 1 - Introduction to Water Pollution and Control

Lecture 2 - Environmental Acts and Standards

Lecture 3 - Water Quality Monitoring: Physical Parameters

Lecture 4 - Water Quality Monitoring: Physical and Chemical Parameters

Lecture 5 - Water Quality Monitoring: Chemical Parameters - I

Lecture 6 - Water Quality Monitoring: Chemical Parameters - II

Lecture 7 - Water Quality Monitoring: Biological/Biochemical Parameters - I

Lecture 8 - Water Quality Monitoring: Biological/Biochemical Parameters - II

Lecture 9 - Water Quality Monitoring: Bacteriological Parameters

Lecture 10 - Treatment of Water and Wastewater

Lecture 11 - Flow Equalization

Lecture 12 - Aeration - I

Lecture 13 - Aeration - II

Lecture 14 - Aeration - III

Lecture 15 - Aeration - IV

Lecture 16 - Aeration - V

Lecture 17 - Aeration - VI

Lecture 18 - Coagulation and Flocculation - I

Lecture 19 - Coagulation and Flocculation - II

Lecture 20 - Coagulation and Flocculation - III

Lecture 21 - Coagulation and Flocculation - IV

Lecture 22 - Settling and Sedimentation - I

Lecture 23 - Settling and Sedimentation - II

Lecture 24 - Settling and Sedimentation - III

Lecture 25 - Settling and Sedimentation - IV

Lecture 26 - Settling and Sedimentation - V

Lecture 27 - Settling and Sedimentation - VI

Lecture 28 - Filtration - I

Lecture 29 - Filtration - II

Lecture 30 - Filtration - III

Lecture 31 - Adsorption - I

- Lecture 32 - Adsorption - II
- Lecture 33 - Adsorption - III
- Lecture 34 - Adsorption - IV
- Lecture 35 - Adsorption - V
- Lecture 36 - Adsorption - VI
- Lecture 37 - Ion-exchange - I
- Lecture 38 - Ion-exchange - II
- Lecture 39 - Ion-exchange - III
- Lecture 40 - Ion-exchange - IV
- Lecture 41 - Wastewater treatment by membrane processes - I
- Lecture 42 - Wastewater treatment by membrane processes - II
- Lecture 43 - Wastewater treatment by membrane processes - III
- Lecture 44 - Wastewater treatment by membrane processes - IV
- Lecture 45 - Wastewater treatment by membrane processes - V
- Lecture 46 - Advanced Oxidation Processes (AOP) - Introduction
- Lecture 47 - AOP - Photocatalytic wastewater treatment
- Lecture 48 - AOP - Fenton, ozone and catalytic treatment
- Lecture 49 - AOP - Electrochemical wastewater treatment - I
- Lecture 50 - AOP - Electrochemical wastewater treatment - II
- Lecture 51 - AOP - Sono-hybrid wastewater treatment
- Lecture 52 - Disinfection - I
- Lecture 53 - Disinfection - II
- Lecture 54 - Disinfection - III
- Lecture 55 - Case Study - Wastewater treatment in sugar industry
- Lecture 56 - Case Study - Wastewater treatment in distillery
- Lecture 57 - Case Study - Wastewater treatment in fertilizer industry
- Lecture 58 - Case Study - Wastewater treatment in petroleum refining industry
- Lecture 59 - Case Study - Common effluent treatment plant (CETP)
- Lecture 60 - Choice of technology and summary

Lecture 1 - Introduction

Lecture 2 - Ecology, Environment and Biodiversity

Lecture 3 - Ecosystem services and its risks - 1

Lecture 4 - Ecosystem services and its risks - 2

Lecture 5 - Tutorial-1

Lecture 6 - Pollution types and sources

Lecture 7 - Pollution: Impacts/Consequences

Lecture 8 - Transmission of pollutants in environment - 1

Lecture 9 - Transmission of pollutants in environment - 2

Lecture 10 - Tutorial-2

Lecture 11 - Environmental quality and standards - 1

Lecture 12 - Environmental quality and standards - 2

Lecture 13 - Instrumental techniques of environmental analysis - 1

Lecture 14 - Instrumental techniques of environmental analysis - 2

Lecture 15 - Tutorial-3

Lecture 16 - Sampling and characterization - 1 (Gas, air ,emission)

Lecture 17 - Sampling and characterization - 2 (water, wastewater, effluents)

Lecture 18 - Sampling and characterization - 3 (solid waste and soil)

Lecture 19 - Environmental laws and regulatory framework

Lecture 20 - Tutorial-4

Lecture 21 - Air pollution control - 1

Lecture 22 - Air pollution control - 2

Lecture 23 - Air pollution control - 3

Lecture 24 - Air pollution control - 4

Lecture 25 - Tutorial-5

Lecture 26 - Treatment of surface and ground water for drinking water generation

Lecture 27 - Treatment of domestic and industrial wastewater: Schemes

Lecture 28 - Primary treatment equipment

Lecture 29 - Secondary treatment processes

Lecture 30 - Tutorial-6

Lecture 31 - Secondary treatment equipment - 1

- Lecture 32 - Secondary treatment equipment - 2
- Lecture 33 - Advanced secondary processes - 1
- Lecture 34 - Advanced secondary processes - 2
- Lecture 35 - Tutorial-7
- Lecture 36 - Advanced secondary processes - 3
- Lecture 37 - Tertiary treatment - 1
- Lecture 38 - Tertiary treatment - 2
- Lecture 39 - Tertiary treatment - 3
- Lecture 40 - Tutorial-8
- Lecture 41 - Sludge management - 1
- Lecture 42 - Sludge management - 2
- Lecture 43 - Sludge management - 3
- Lecture 44 - Industrial Pollution Control in GPI - 1 (General aspect and pollution control in sugar industry)
- Lecture 45 - Tutorial-9
- Lecture 46 - Industrial Pollution Control in GPI - 2 (Pollution control in Distillery)
- Lecture 47 - Industrial Pollution Control in GPI - 3 (Pollution control in Tannery)
- Lecture 48 - Pollution control in Petroleum refinery and petrochemicals industry
- Lecture 49 - Industrial Pollution Control in GPI - 4
- Lecture 50 - Tutorial 10
- Lecture 51 - Solid waste and hazardous waste management - 1
- Lecture 52 - Solid waste and hazardous waste management - 2
- Lecture 53 - Solid waste and hazardous waste management - 3
- Lecture 54 - Solid waste and hazardous waste management - 4
- Lecture 55 - Tutorial-11
- Lecture 56 - Air Pollution Management, Air quality survey, NAAQI - 1
- Lecture 57 - Air Pollution Management, Air quality survey, NAAQI - 2
- Lecture 58 - Management of special category wastes - 1
- Lecture 59 - Management of special category wastes - 2

Lecture 16 - X- Ray Analytical Techniques-2 (iii. Applications)

Lecture 17 - Atomic Absorption Spectrometry-1 (i. Theoretical Aspects)

Lecture 18 - Atomic Absorption Spectrometry-2 (ii.Theoretical Aspects)

Lecture 19 - Atomic Absorption Spectrometry-3 (iii. Instrumentation)

Lecture 20 - Atomic Absorption Spectrometry-4 (iv. Instrumentation)

Lecture 21 - Atomic Absorption Spectrometry-5 (v. Instrumentation)

Lecture 22 - Atomic Absorption Spectrometry-6 (vi. Signal handling)

Lecture 23 - Atomic Absorption Spectrometry-7 (vii. Interferences)

Lecture 24 - Atomic Absorption Spectrometry-8 (viii. Hydride Generation AAS)

Lecture 25 - Atomic Absorption Spectrometry-9 (ix.Cold Vapour Mercury AAS)

Lecture 26 - Electrothermal Atomic Absorption Spectrometry-10 (x. Electrothermal Aspects)

Lecture 27 - Electrothermal Atomic Absorption Spectrometry-11 (xi. Practical Aspects)

Lecture 28 - Inductively Coupled Plasma Atomic Emission Spectrometry-1 (i. Theoretical Aspects)

Lecture 29 - Inductively Coupled Plasma Atomic Emission Spectrometry-2 (ii. Instrumentation)

Lecture 30 - Inductively Coupled Plasma Atomic Emission Spectrometry-3 (iii. Comparison of ICP & AAS)

Lecture 31 - Infrared Spectroscopy-1 (i. Theoretical Aspects)

[Lecture 32 - Infrared Spectroscopy-2 \(ii. Practical Aspects\)](#)

[Lecture 33 - Infrared Spectroscopy-3 \(iii. Nondispersive IR, Mass spectrometer\)](#)

[Lecture 34 - Introduction to Mass Spectrometry](#)

[Lecture 35 - Introduction to Nuclear Magnetic Resonance Spectroscopy](#)

[Lecture 36 - Fundamentals of Electrochemical Techniques-1 \(i. Introduction\)](#)

[Lecture 37 - Fundamentals of Electrochemical Techniques-2 \(ii. Introduction\) \(Continued...\)](#)

[Lecture 38 - Polarography-1 \(i. Introduction\)](#)

[Lecture 39 - Polarography-2 \(ii. Applications\)](#)

[Lecture 40 - Chromatography-1 \(i. Introduction\)](#)

[Lecture 41 - Gas chromatography-1 \(i. Instrumentation\)](#)

[Lecture 42 - Gas chromatography-2 \(ii. Applications\)](#)

[Lecture 43 - Gas chromatography-3 \(iii. Applications\)](#)

Lecture 1 - Transport by convection and diffusion

Lecture 2 - Non-dimensional analysis of beams

Lecture 3 - Dimensional analysis: Force on a particle settling in a fluid

Lecture 4 - Dimensional analysis: Heat transfer in a heat exchanger

Lecture 5 - Dimensional analysis: Mass transfer from a particle suspended in a fluid

Lecture 6 - Dimensional analysis: Power of an impeller

Lecture 7 - Dimensional analysis: Scaling up of an impeller

Lecture 8 - Dimensional analysis: Convection and diffusion

Lecture 9 - Dimensional analysis: Physical interpretation of dimensionless groups

Lecture 10 - Dimensional analysis: Correlations for dimensionless groups

Lecture 11 - Dimensional analysis: Natural and forced convection

Lecture 12 - Continuum description of fluids

Lecture 13 - Conservation equations and constitutive relations

Lecture 14 - Diffusion: Mechanism of mass diffusion in gases

Lecture 15 - Diffusion: Estimation of mass diffusion coefficient

Lecture 16 - Diffusion: Momentum diffusion coefficient

Lecture 17 - Diffusion: Thermal diffusion coefficient

Lecture 18 - Unidirectional transport: Conservation equation for heat and mass transfer

Lecture 19 - Unidirectional transport: Conservation equation for momentum transfer

Lecture 20 - Unidirectional transport: Similarity solution for infinite domain

Lecture 21 - Unidirectional transport: Similarity solution for infinite domain (Continued...)

Lecture 22 - Unidirectional transport: Similarity solution for mass transfer into a falling film

Lecture 23 - Unidirectional transport: Similarity solution for decay of a pulse

Lecture 24 - Unidirectional transport: Similarity solution for decay of a pulse (Continued...)

Lecture 25 - Unidirectional transport: Separation of variables for transport in a finite domain

Lecture 26 - Unidirectional transport: Separation of variables for transport in a finite domain (Continued...)

Lecture 27 - Unidirectional transport: Separation of variables for transport in a finite domain (Continued...)

Lecture 28 - Unidirectional transport: Separation of variables for transport in a finite domain (Continued...)

Lecture 29 - Unidirectional transport: Balance laws in cylindrical co-ordinates. Heat transfer across the wall of a pipe

Lecture 30 - Unidirectional transport: Balance laws in cylindrical co-ordinates. Unsteady heat conduction from a cylinder

Lecture 31 - Unidirectional transport: Balance laws in cylindrical co-ordinates. Unsteady heat conduction from a cylinder (Continued...)

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

- Lecture 32 - Unidirectional transport: Balance laws in cylindrical co-ordinates. Unsteady heat conduction from a cylinder (Continued...)
- Lecture 33 - Unidirectional transport: Balance laws in cylindrical co-ordinates. Similarity solution for heat conduction from a wire
- Lecture 34 - Unidirectional transport: Effect of body force in momentum transfer. Falling film
- Lecture 35 - Unidirectional transport: Effect of pressure in momentum transfer. Flow in a pipe
- Lecture 36 - Unidirectional transport: Friction factor for flow in a pipe
- Lecture 37 - Unidirectional transport: Laminar and turbulent flow in a pipe
- Lecture 38 - Unidirectional transport: Laminar and turbulent flow in a pipe
- Lecture 39 - Unidirectional transport: Oscillatory flow in a pipe. Solution using complex variables
- Lecture 40 - Unidirectional transport: Oscillatory flow in a pipe. Solution using complex variables
- Lecture 41 - Unidirectional transport: Oscillatory flow in a pipe. Solution using complex variables (Continued...)
- Lecture 42 - Unidirectional transport: Oscillatory flow in a pipe. Low and high Reynolds number solutions
- Lecture 43 - Unidirectional transport: Spherical co-ordinates. Heat conduction from a sphere
- Lecture 44 - Mass and energy balance equations in Cartesian co-ordinates
- Lecture 45 - Mass and energy balance equations in Cartesian co-ordinates
- Lecture 46 - Mass and energy balance equations in spherical co-ordinates
- Lecture 47 - Mass and energy balance equations in spherical co-ordinates
- Lecture 48 - Momentum balance: Incompressible Navier-Stokes equations
- Lecture 49 - Balance equation: Convection and diffusion dominated regimes
- Lecture 50 - Diffusion equation: Heat conduction in a rectangular solid
- Lecture 51 - Diffusion equation: Heat conduction in a rectangular solid (Continued...)
- Lecture 52 - Diffusion equation: Heat conduction around a spherical inclusion
- Lecture 53 - Diffusion equation: Heat conduction around a spherical inclusion
- Lecture 54 - Diffusion equation: Effective conductivity of a composite
- Lecture 55 - Diffusion equation: Spherical harmonic solutions
- Lecture 56 - Diffusion equation: Conduction from a point source
- Lecture 57 - Diffusion equation: Method of Green's functions
- Lecture 58 - Diffusion equation: Method of images
- Lecture 59 - Diffusion equation: Equivalence of spherical harmonics and multipole expansion
- Lecture 60 - High Peclet number forced convection: Boundary layer in flow past a heated plate
- Lecture 61 - High Peclet number forced convection: Boundary layer in flow past a heated plate (Continued...)
- Lecture 62 - High Peclet number forced convection: Flow past a heated sphere
- Lecture 63 - High Peclet number forced convection: Flow past a heated sphere (Continued...)
- Lecture 64 - High Peclet number forced convection: Transport to a falling film

[Lecture 65 - High Peclet number forced convection: Transport to a spherical bubble](#)

[Lecture 66 - High Peclet number forced convection: Solutions for an arbitrary geometry](#)

[Lecture 67 - High Peclet number forced convection: Taylor dispersion](#)

[Lecture 68 - Natural convection: Boussinesq equations for heat transfer](#)

[Lecture 69 - Natural convection: Boundary layer equations](#)

[Lecture 70 - Natural convection: Boundary layer equations convection](#)

[Lecture 71 - Natural convection: Heat transfer correlations](#)

Lecture 1 - Course Introduction

Lecture 2 - Atomic structure

Lecture 3 - Interaction of EM radiation with matter

Lecture 4 - Atomic and molecular orbitals

Lecture 5 - Interaction of EM radiation with matter - I

Lecture 6 - Interaction of EM radiation with matter - II

Lecture 7 - Interaction of interaction of EM radiation with matter - III

Lecture 8 - Emission and absorption spectra

Lecture 9 - MO theory

Lecture 10 - Structure  $\hat{A}$ - property relationship of organic compounds

Lecture 11 - Woodward Fieser rules, structure  $\hat{A}$ - property relationship

Lecture 12 - Beer-Lamberts law

Lecture 13 - Deviations from Beer-Lamberts law, relative concentration error, instrumentation - I

Lecture 14 - UV-Visible spectrophotometry, instrumentation - II

Lecture 15 - UV-Visible spectrophotometry, instrumentation - III

Lecture 16 - UV-Visible spectrophotometry, instrumentation - IV

Lecture 17 - Quantitative analysis  $\hat{A}$ - I

Lecture 18 - Quantitative analysis  $\hat{A}$ - II

Lecture 19 - Quantitative analysis  $\hat{A}$ - III

Lecture 20 - Quantitative analysis  $\hat{A}$ - IV

Lecture 21 - Fluorescence spectrophotometry  $\hat{A}$ - I

Lecture 22 - Fluorescence spectrophotometry - II

Lecture 23 - Fluorescence spectrophotometry - III

Lecture 24 - Instrumentation

Lecture 25 - Chemical analysis, applications

Lecture 26 - Chemiluminescence, principles

Lecture 27 - Status of spectrophotometry vis a vis environment

Lecture 28 - Separations methods

Lecture 29 - Method development

Lecture 30 - Boron, chloride

Lecture 31 - Fluoride

Lecture 32 - Phenols

Lecture 33 - Arsenic, Free chlorine

Lecture 34 - Magnesium

Lecture 35 - Nonionic surfactants, iron, phosphate

Lecture 36 - Nitrite , manganese

Lecture 37 - Cadmium, copper, lead

Lecture 38 - Total hardness, zinc

Lecture 39 - Nitrate, chromium

Lecture 40 - Determination of aluminum, cyanide, sulphate

Lecture 41 - Sulphate, ammonia, Conclusions

Lecture 1 - Course Introduction

Lecture 2 - Atomic structure - I

Lecture 3 - Atomic structure - II

Lecture 4 - Electronic arrangement in the Elements - I

Lecture 5 - Electronic arrangement in the Elements - II

Lecture 6 - Interaction of EM radiation with matter - I

Lecture 7 - Interaction of EM radiation with matter - II

Lecture 8 - Interaction of EM radiation with matter - III

Lecture 9 - Interaction of EM radiation with matter - IV

Lecture 10 - Theoretical basis of AAS - I

Lecture 11 - Theoretical basis of AAS - II

Lecture 12 - Theoretical basis of AAS - III

Lecture 13 - Theoretical basis of AAS - IV

Lecture 14 - Instrumentation in AAS - I

Lecture 15 - Instrumentation in AAS - I (Continued...) Radiation Sources

Lecture 16 - Instrumentation in AAS Radiation Sources: Sample introduction

Lecture 17 - Instrumentation in AAS - III : Burners

Lecture 18 - Instrumentation in AAS - IV : Flame Processes

Lecture 19 - Instrumentation in AAS - V : Atomization Processes

Lecture 20 - Instrumentation in AAS - VI : Optics

Lecture 21 - Instrumentation in AAS - VII : Optics and Detectors

Lecture 22 - Interferences in AAS

Lecture 23 - Background correction on flame AAS - I

Lecture 24 - Interferences in AAS - II

Lecture 25 - Interferences in AAS - III

Lecture 26 - Hydride Generation AAS - I

Lecture 27 - Hydride Generation AAS and Cold Vapour Hg AAS

Lecture 28 - Cold vapor Hg AAS Flame Emission

Lecture 29 - Mercury cold vapour technique, FAES and Electrothermal AAS

Lecture 1 - Dimensions and units

Lecture 2 - Dimensions and units, dimension of an equation

Lecture 3 - Dimensional analysis, settling sphere

Lecture 4 - Dimensional analysis, Brownian diffusivity, torque on a particle

Lecture 5 - Mass transfer to suspended particles

Lecture 6 - Heat transfer in a heat exchanger

Lecture 7 - Momentum transfer, flow in a pipe, friction factor

Lecture 8 - Dimensionless groups - ratio of convection and diffusion

Lecture 9 - Dimensionless fluxes, other dimensionless groups

Lecture 10 - Laminar and turbulent flow in a pipe

Lecture 11 - Flow past flat plate

Lecture 12 - Correlations for drag coefficient

Lecture 13 - Correlations for drag coefficient

Lecture 14 - Flow through packed column

Lecture 15 - Unit operations for mixing

Lecture 16 - Droplet breakup

Lecture 17 - Heat and mass transfer, Colburn and Reynolds analogy

Lecture 18 - Low Peclet number heat/mass transfer, high Peclet number laminar flow

Lecture 19 - High Peclet number laminar/turbulent flows. Flow in pipe, flow past flat plate

Lecture 20 - High Peclet number laminar/turbulent flows. Flow past particle

Lecture 21 - Flow past mobile interfaces, flow in packed column

Lecture 22 - Natural convection

Lecture 23 - Mass diffusion in gases

Lecture 24 - Mass diffusion in gases

Lecture 25 - Mass diffusion in liquids

Lecture 26 - Thermal diffusion

Lecture 27 - Momentum diffusion

Lecture 28 - Dispersion

Lecture 29 - Turbulent dispersion, dispersion in packed column, Taylor dispersion

Lecture 30 - Unidirectional transport. Shell balance

Lecture 31 - Unidirectional transport. Common form of transport equations

- Lecture 32 - Steady solutions, constant diffusivity, parallel and series conduction
- Lecture 33 - Steady solutions, internal source, viscous heating
- Lecture 34 - Steady solutions, flow down inclined plane
- Lecture 35 - Steady solutions, internal source, electrokinetic flow
- Lecture 36 - Steady solutions, internal source, electrokinetic flow
- Lecture 37 - Steady solutions, internal source, diffusion-reaction
- Lecture 38 - Binary diffusion
- Lecture 39 - Binary diffusion
- Lecture 40 - Correlations in balance equations. Transport by diffusion
- Lecture 41 - Correlations in balance equations. Transport by diffusion
- Lecture 42 - Correlations in balance equations. Forced convection
- Lecture 43 - Correlations in balance equations. Forced convection
- Lecture 44 - Correlations in balance equations. Natural convection
- Lecture 45 - Correlations in balance equations. Packed column
- Lecture 46 - Cylindrical co-ordinates. Balance equation
- Lecture 47 - Cylindrical co-ordinates. Steady conduction
- Lecture 48 - Cylindrical co-ordinates. Heat transfer resistance
- Lecture 49 - Cylindrical co-ordinates. Examples
- Lecture 50 - Spherical co-ordinates. Balance equation
- Lecture 51 - Spherical co-ordinates. Heat transfer resistance
- Lecture 52 - Laminar flow in a pipe. Momentum balance
- Lecture 53 - Laminar flow in a pipe. Velocity profile. Friction factor
- Lecture 54 - Laminar flow in a pipe. Friction factor correlation
- Lecture 55 - Laminar flow in a pipe. Examples
- Lecture 56 - Laminar flow in a pipe. Examples
- Lecture 57 - Turbulence. Instability and transition
- Lecture 58 - Turbulent flow in a pipe. Dissipation rate, turbulence scales
- Lecture 59 - Turbulent flow in a pipe. Turbulence cascade
- Lecture 60 - Turbulent flow in a pipe. Structure of turbulence

Lecture 1 - Introduction of Organometallic Chemistry

Lecture 2 - Counting of Electrons

Lecture 3 - Ligand Substitution Reactions

Lecture 4 - Oxidative Addition [1. Concerted Mechanism]

Lecture 5 - Oxidative Addition [2. SN2 Mechanism]

Lecture 6 - Oxidative Addition [3. Radical Mechanism]

Lecture 7 - Reductive Elimination

Lecture 8 - Migratory Insertion and Elimination Reactions

Lecture 9 - Migration and Insertion Reactions

Lecture 10 - Alpha-Migratory Insertion and alpha-Elimination Reactions

Lecture 11 - Beta-Migratory Insertion

Lecture 12 - Beta-Elimination Reaction

Lecture 13 - Alpha-Abstraction and beta-Abstraction

Lecture 14 - 4-Center Reactions; [2+2] Reactions

Lecture 15 - External Attack by a Ligand and Reductive Coupling

Lecture 16 - Hydrogenation Reaction

Lecture 17 - Hydrogenation Reaction [Dihydride Catalyst]

Lecture 18 - Stereoselective Hydrogenation Reaction

Lecture 19 - Carbonylation Reaction [1. Monsanto Acetic Acid Process 2. Hydroformylation 3. Hydrocarboxylation]

Lecture 20 - Carbonylation Reaction [1. Hydroformylation 2. Hydrocarboxylation 3. Hydrocyanation]

Lecture 1 - Fundamentals of Chemical thermodynamics

Lecture 2 - Work

Lecture 3 - Tutorial-1

Lecture 4 - First Law of Thermodynamics

Lecture 5 - Tutorial-2

Lecture 6 - Adiabatic processes

Lecture 7 - Entropy

Lecture 8 - Entropy and Second Law: Basics

Lecture 9 - Entropy and Second Law: Applications

Lecture 10 - Third Law of Thermodynamics

Lecture 11 - Discussion on Helmholtz energy

Lecture 12 - Discussion on Gibbs Energy

Lecture 13 - Maxwell relations, Properties of Gibbs energy

Lecture 14 - Further discussion on properties of Gibbs energy

Lecture 15 - Fugacity

Lecture 16 - Tutorial session

Lecture 17 - Tutorial session

Lecture 18 - Chemical potential of a substance in mixture

Lecture 19 - Chemical potential of Liquids, Raoult's Law, Henry's Law

Lecture 20 - Thermodynamics of mixing, Excess functions

Lecture 21 - Partial molar volume

Lecture 22 - Activities (Accounting for deviations from Ideal behaviour)

Lecture 23 - Tutorial on thermodynamics of mixing and deviations from ideality

Lecture 24 - Further discussion on relation between  $C_p$  and  $C_v$

Lecture 25 - Chemical Equilibrium

Lecture 26 - Perfect gas equilibria

Lecture 27 - Equilibrium constant

Lecture 28 - Effect of pressure on equilibrium constant and equilibrium composition

Lecture 29 - Effect of temperature on equilibria

Lecture 30 - Biological standard states and pH

Lecture 31 - Tutorial 1 - Equilibrium constant

- Lecture 32 - Tutorial 2 - Equilibrium constant
- Lecture 33 - Acids and bases and Equilibrium concepts
- Lecture 34 - pH Scale Strong and weak acids and bases
- Lecture 35 - Strong and weak acids and bases
- Lecture 36 - Acid-base titrations
- Lecture 37 - pH curve for titration of weak acid with strong base Buffers and indicators
- Lecture 38 - Thermodynamics in systems of biological interest
- Lecture 39 - Calorimetry
- Lecture 40 - Differential scanning calorimetry (DSC)
- Lecture 41 - Further discussion on Differential Scanning Calorimetry (DSC)
- Lecture 42 - Explaining Differential Scanning Calorimetric Profiles (DSC Profiles)
- Lecture 43 - Applications of DSC in thermal unfolding of proteins and protein-solvent interactions
- Lecture 44 - Further discussion on applications of DSC in thermal unfolding of proteins and protein-solvent interactions
- Lecture 45 - Isothermal Titration calorimetry (ITC)
- Lecture 46 - Further discussion on Isothermal Titration calorimetry (ITC)
- Lecture 47 - ITC Experimental Design and Isothermal Titration Calorimetry (ITC) in Drug Design
- Lecture 48 - Isothermal Titration Calorimetry (ITC) in Drug Design
- Lecture 49 - Isothermal Titration Calorimetry (ITC) in Engineering Binding Affinity
- Lecture 50 - Calorimetry in identifying partially folded states of proteins (Molten Globule State)
- Lecture 51 - Thermodynamic Characterization of Partially Folded States of Proteins
- Lecture 52 - Quantitative Thermodynamic Characterization of Partially Folded States of Proteins
- Lecture 53 - ITC in Drug-Protein Interactions
- Lecture 54 - Identifying sites for Drug-Protein Interactions by ITC
- Lecture 55 - Identifying sites for Drug-Protein Interactions, DSC of Protein-Ligand Complexes. Enthalpy-Entropy Compensation
- Lecture 56 - Estimation of Binding Constants in Strong to Ultratight Protein-Ligand, Interactions Using Differential Scanning Calorimetry
- Lecture 57 - Continuation of discussion on... Estimation of Binding Constants in Strong to Ultratight Protein-Ligand Interactions Using Differential Scanning Calorimetry
- Lecture 58 - Thermal unfolding of protein by non-calorimetric methods, Addressing thermodynamics of the process
- Lecture 59 - Titration Calorimetry as a tool to determine thermodynamic and Kinetic parameters of enzymes
- Lecture 60 - Summary of the course

Lecture 1 - Classification of Elements and Periodic Properties

Lecture 2 - Periodic Properties, Periodic Trends and Classification of Main Group Compounds

Lecture 1 - Introduction to Computational Chemistry

Lecture 2 - Writing Simple Programs: Compilation and Execution

Lecture 3 - Programming Techniques 1 - Evaluating the sine function

Lecture 4 - Programming Techniques 2 - Do loops and if statements

Lecture 5 - Programming Techniques 3 - Roots of a quadratic equation and arrays

Lecture 6 - Programming Techniques 4 - Arrays and matrices

Lecture 7 - Practical Session of Programming 1

Lecture 8 - Programming Techniques 5 - Formats, Functions and Subroutines

Lecture 9 - Programming Techniques 6 - Functions and Subroutines, arranging numbers in as ascending order

Lecture 10 - Programming Techniques 7 - Functions and Subroutines, and the common statement

Lecture 11 - Numerical Methods. Analysis of errors

Lecture 12 - Practical Session on Programming 2 - The exponential function

Lecture 13 - Practical Session on Programming 3 - Functions and Subroutines

Lecture 14 - Interpolation Methods-1

Lecture 15 - Interpolation Methods-2: Newton's and Lagrange Interpolation

Lecture 16 - Errors in interpolation, Matrix operations

Lecture 17 - Gauss elimination method for matrix inversion

Lecture 18 - Matrix diagonalization, Similarity transformations

Lecture 19 - Matrix inversion, Matrix diagonalization

Lecture 20 - Curve fitting, Newton Raphson method

Lecture 21 - Random numbers, Numerical integration using Simpson's rule

Lecture 22 - Numerical Integration and Differential Equations

Lecture 23 - Practical Session on Programming 3: Random numbers, Simpson's rule; Introduction to Scilab

Lecture 24 - Scilab-2: Matrix equations and Roots of Polynomials

Lecture 25 - Scilab-3: Functions, Integrals, Differential Equations and graphs

Lecture 26 - Scilab-4: Curve Fitting and Execution of Scilab programs

Lecture 27 - Scilab-5: Legendre polynomials, Multiple plots and Curve fitting

Lecture 28 - Scilab-6: Integral Transforms; Introduction to Molecular Dynamics (MD)

Lecture 29 - Classical Molecular Dynamics-2, Force Fields and Equations of Motion

Lecture 30 - Classical Molecular Dynamics-3, Force Fields and MD Algorithms

Lecture 31 - Classical MD-4 Thermodynamic Properties and Distribution Functions.

[Lecture 32 - Classical MD-5, Execution of programs on liquid argon](#)

[Lecture 33 - Molecular Dynamics using Gromacs-1](#)

[Lecture 34 - Molecular Dynamics using Gromacs-2: Simulating Liquid Argon](#)

[Lecture 35 - Molecular Dynamics using Gromacs-3: Installing Gromacs](#)

[Lecture 67 - 2DIR: Techniques](#)

Lecture 1 - Introduction

Lecture 2 - Reppe Synthesis (Introduction)

Lecture 3 - Reppe Reactions - Part 1

Lecture 4 - Reppe Reactions - Part 2

Lecture 5 - Reppe Reactions - Part 3

Lecture 6 - Metallative and Conventional Reppe and Metathesis Reaction (Introduction)

Lecture 7 - Origin of Olefin Metathesis

Lecture 8 - Mechanistic approaches of Metathesis Reaction - Part 1

Lecture 9 - Mechanistic approaches of Metathesis Reaction - Part 2

Lecture 10 - Mechanistic approaches of Metathesis Reaction - Part 3

Lecture 11 - Mechanistic approaches of Metathesis Reaction - Part 4

Lecture 12 - Types of Carbenes

Lecture 13 - Types of Metathesis Reactions

Lecture 14 - Alkyne Metathesis

Lecture 15 - Catalysis Development Aspect of Olefin Metathesis - Part 1

Lecture 16 - Catalysis Development Aspect of Olefin Metathesis - Part 2

Lecture 17 - Catalysis Development Aspect of Olefin Metathesis - Part 3

Lecture 18 - Catalysis Development Aspect of Olefin Metathesis - Part 4

Lecture 19 - Cross Metathesis - Part 1

Lecture 20 - Cross Metathesis - Part 2

Lecture 21 - Cross Metathesis - Part 3

Lecture 22 - Ring Opening Metathesis - Part 1

Lecture 23 - Ring Opening Metathesis - Part 2

Lecture 24 - Ring Opening Metathesis - Part 3

Lecture 25 - Ring Closing Metathesis - Part 1

Lecture 26 - Ring Closing Metathesis - Part 2

Lecture 27 - Ring Closing Metathesis - Part 3

Lecture 28 - Alkyne Metathesis

Lecture 29 - Alkene Alkyne Metathesis - Part 1

Lecture 30 - Alkene Alkyne Metathesis - Part 2

Lecture 31 - Alkene Alkyne Metathesis - Part 3

Lecture 32 - Ring Closing Eneyne Metathesis (RCEYM) - Part 1

Lecture 33 - Ring Closing Eneyne Metathesis (RCEYM) - Part 2

Lecture 34 - Ring Closing Eneyne Metathesis (RCEYM) and Alkenes and Alkynes oligomerization reactions

Lecture 35 - Oligomerization of alkenes and alkynes - Part 1

Lecture 36 - Oligomerization of alkenes and alkynes - Part 2

Lecture 37 - Oligomerization of alkenes and alkynes - Part 3

Lecture 38 - Oligomerization of alkenes and alkynes - Part 4

Lecture 39 - Alkene oligomerization and Polymerization.

Lecture 40 - Olefin Polymerization - Part 1

Lecture 41 - Olefin Polymerization - Part 2

Lecture 42 - Olefin Polymerization - Part 3

Lecture 43 - Olefin Polymerization - Part 4

Lecture 44 - Olefin Polymerization - Part 5

Lecture 45 - Olefin Polymerization - Part 6

Lecture 46 - Olefin Polymerization - Part 7

Lecture 47 - Olefin Polymerization - Part 8

Lecture 48 - Olefin Polymerization - Part 9

Lecture 49 - Olefin Polymerization - Part 10

Lecture 50 - Olefin Polymerization - Part 11

Lecture 51 - Olefin Polymerization - Part 12

Lecture 52 - Olefin Polymerization - Part 13

Lecture 53 - Olefin Polymerization - Part 14

Lecture 54 - Olefin Polymerization - Part 15

Lecture 55 - Olefin Polymerization - Part 16

Lecture 56 - Homo and Copolymerization; Functionalized olefins, Cycloolefins and Diolefins

Lecture 57 - Non- Group IV Metal based olefin polymerization catalysts

Lecture 58 - Non- Group IV Metal based olefin polymerization catalysts

Lecture 59 - Bioorganometallic Chemistry

Lecture 60 - Overall summary of Transition metal organometallics in catalysis and biology

Lecture 1 - Basic Introduction

Lecture 2 - Bohr Model and Beyond

Lecture 3 - The wave nature of matter

Lecture 4 - Ground Rules: Postulates of Quantum mechanics - Part I

Lecture 5 - Ground Rules: Postulates of Quantum mechanics - Part II

Lecture 6 - Particle in a box - Part I

Lecture 7 - Particle in a box - Part II

Lecture 8 - Particle in a box - Part III

Lecture 9 - Particle in a box - Uncertainty Principle

Lecture 10 - Particle in a box - Uncertainty Principle (Continued...)

Lecture 11 - Quantum Mechanical Tunneling

Lecture 12 - Harmonic Oscillator - Part 1

Lecture 13 - Harmonic Oscillator - Part 2

Lecture 14 - Harmonic Oscillator - Part 3

Lecture 15 - Harmonic Oscillators - Wave Functions and Recursion formulae

Lecture 16 - Harmonic Oscillators - Wave Functions and Recursion formulae (Continued...)

Lecture 17 - Harmonic Oscillators: Conclusions

Lecture 18 - Rigid Rotor - Part 1

Lecture 19 - Rigid Rotor - Part 2

Lecture 20 - Rigid Rotor - Part 3

Lecture 21 - Polar Plots of Spherical Harmonics

Lecture 22 - Angular Momentum

Lecture 23 - Angular Momentum (Continued...)

Lecture 24 - Hydrogen Atom: Schrodinger Equation

Lecture 25 - Hydrogen Atom: Schrodinger Equation (Continued...)

Lecture 26 - Hydrogen atom: Quantum numbers

Lecture 27 - Radial Probability distribution functions

Lecture 28 - Hydrogen atom wavefunctions: s orbitals

Lecture 29 - 2s orbital

Lecture 30 - 2p orbitals

Lecture 31 - 3pz and 3d orbitals

Lecture 32 - Atomic orbitals and orbital approximation

Lecture 33 - Multi electron atoms

Lecture 34 - He atom wavefunction

Lecture 35 - Excited states of many electron atoms

Lecture 36 - Introduction to Perturbation theory

Lecture 37 - Scope of Perturbation theory

Lecture 38 - Application of Perturbation theory: Anharmonic oscillator

Lecture 39 - Higher order perturbations

Lecture 40 - Perturbation theory for non-degenerate states

Lecture 41 - Perturbation Theory for degenerate states

Lecture 42 - Application of Perturbation Theory for degenerate States

Lecture 43 - Variation Method

Lecture 44 - Variational Method (Continued...)

Lecture 45 - Variational calculations for Harmonic Oscillator and Particle in a Box

Lecture 46 - Secular equations in Variational calculations

Lecture 47 - Secular equations for particle in a box

Lecture 48 - Variational calculation for particle in a box (Continued...)

Lecture 49 - Perturbation theory for many electron atoms

Lecture 50 - Variational method for many electron atoms

Lecture 51 - Hartree-Fock Equations and Self Consistent Fields

Lecture 52 - Hartree-Fock Equations for He - Part 1

Lecture 53 - Hartree-Fock Equations for He - Part 2

Lecture 54 - Electronic Wavefunctions of He atom

Lecture 55 - Valance Bond Theory and homonuclear diatomics - Part 1

Lecture 56 - Valance Bond Theory and homonuclear diatomics - Part 2

Lecture 57 - Molecular shape and hybrid orbitals

Lecture 58 - sp<sup>2</sup> hybridization

Lecture 59 - sp<sup>3</sup> hybridization

Lecture 60 - Non-equivalent hybrid orbitals

Lecture 61 - Molecular Orbital Theory for H<sub>2</sub><sup>+</sup>

Lecture 62 - Molecular orbital theory for homonuclear diatomic molecules

Lecture 63 - Beyond Homonuclear diatomic molecules

Lecture 64 - MOT for polyatomic molecules

[Lecture 65 - Huckel MOT-1](#)

[Lecture 66 - Huckel MOT-2](#)

[Lecture 67 - The last word](#)

Lecture 1 - Why Study Statistical Mechanics?

Lecture 2 - Thermodynamics

Lecture 3 - Probability Theory - Part 1

Lecture 4 - Probability Theory - Part 2

Lecture 5 - Fundamental concepts and Postulates of Statistical Mechanics - Part 1

Lecture 6 - Fundamental concepts and Postulates of Statistical Mechanics - Part 2

Lecture 7 - From Postulates to Formulation

Lecture 8 - Microcanonical Ensemble

Lecture 9 - Relation with Thermodynamics in Microcanonical Ensemble - Part 1

Lecture 10 - Relation with Thermodynamics in Microcanonical Ensemble - Part 2

Lecture 11 - Canonical Ensemble - Part 1

Lecture 12 - Canonical Ensemble - Part 2

Lecture 13 - Thermodynamic Potential for Canonical ensemble

Lecture 14 - Grand Canonical Ensemble

Lecture 15 - Thermodynamic Potentials for Grand Canonical and Isothermal-Isobaric ensembles

Lecture 16 - Fluctuations and Response Function - Part 1

Lecture 17 - Fluctuations and Response Function - Part 2

Lecture 18 - Ideal Monatomic Gas: Microscopic Expression of Translational Entropy - Part 1

Lecture 19 - Ideal Monatomic Gas: Microscopic Expression of Translational Entropy - Part 2

Lecture 20 - Ideal Monatomic Gas: Microscopic Expression of Translational Entropy - Part 3

Lecture 21 - Ideal Monatomic Gas: Microscopic Expression of Translational Entropy - Part 4

Lecture 22 - Ideal Monatomic Gas: Microscopic Expression of Translational Entropy - Part 5

Lecture 23 - Ideal Gas of Diatomic Molecules: Microscopic Expression for Rotational and Vibrational Entropy and Specific Heat - Part 1

Lecture 24 - Ideal Gas of Diatomic Molecules: Microscopic Expression for Rotational and Vibrational Entropy and Specific Heat - Part 2

Lecture 25 - Ideal Gas of Diatomic Molecules: Microscopic Expression for Rotational and Vibrational Entropy and Specific Heat - Part 3

Lecture 26 - Ideal Gas of Diatomic Molecules: Microscopic Expression for Rotational and Vibrational Entropy and Specific Heat - Part 4

Lecture 27 - Ideal Gas of Polyatomic molecules

Lecture 28 - Cluster Expansion and Mayer's Theory of Condensation - Part 1

Lecture 29 - Cluster Expansion and Mayer's Theory of Condensation - Part 2

- Lecture 30 - Cluster Expansion and Mayer's Theory of Condensation - Part 3
- Lecture 31 - Cluster Expansion and Mayer's Theory of Condensation - Part 4
- Lecture 32 - Cluster Expansion and Mayer's Theory of Condensation - Part 5
- Lecture 33 - Cluster Expansion and Mayer's Theory of Condensation - Part 6
- Lecture 34 - Phase Transition and Landau Theory - Part 1
- Lecture 35 - Phase Transition and Landau Theory - Part 2
- Lecture 36 - Phase Transition and Landau Theory - Part 3
- Lecture 37 - Comments on some important Concepts of Statistical Mechanics
- Lecture 38 - Nucleation Part 1: Introduction, Thermodynamics of Nucleation
- Lecture 39 - Nucleation Part 2: Kinetics of Nucleation
- Lecture 40 - Nucleation Part 3: Kinetics of Nucleation, Classical Nucleation Theory, Heterogeneous Nucleation
- Lecture 41 - Nucleation Part 4: Ostwald Step Rule
- Lecture 42 - Spinodal Decomposition and Pattern Formation: Evolution of Structure through Dynamics - Part 1
- Lecture 43 - Spinodal Decomposition and Pattern Formation: Evolution of Structure through Dynamics - Part 2
- Lecture 44 - Ising Model and Other Lattice Models - Part 1
- Lecture 45 - Ising Model and Other Lattice Models - Part 2
- Lecture 46 - Ising Model and Other Lattice Models - Part 3
- Lecture 47 - Ising Model and Other Lattice Models - Part 4
- Lecture 48 - Ising Model and Other Lattice Models - Part 5
- Lecture 49 - Binary Mixtures: Towards Understanding Non-Ideality and Osmotic Pressure - Part 1
- Lecture 50 - Binary Mixtures: Towards Understanding Non-Ideality and Osmotic Pressure - Part 2
- Lecture 51 - Theory of Liquids - Part 1
- Lecture 52 - Theory of Liquids - Part 2
- Lecture 53 - Theory of Liquids - Part 3
- Lecture 54 - Theory of Liquids - Part 4
- Lecture 55 - Polymers in Solution and Polymer Collapse - Part 1
- Lecture 56 - Polymers in Solution and Polymer Collapse - Part 2
- Lecture 57 - Polymers in Solution and Polymer Collapse - Part 3
- Lecture 58 - Polymers in Solution and Polymer Collapse - Part 4
- Lecture 59 - Computer Simulation Methods in Statistical Mechanics - Part 1
- Lecture 60 - Computer Simulation Methods in Statistical Mechanics - Part 2
- Lecture 61 - Conclusion

- Lecture 1 - Introduction to quantum Mechanics - Part 1
- Lecture 2 - Introduction to quantum Mechanics - Part 2
- Lecture 3 - Introduction to quantum Mechanics - Part 3
- Lecture 4 - Time Dependant Perturbation Theory of Two states - Part 1
- Lecture 5 - Time Dependent Perturbation Theory of Two States - Part 2
- Lecture 6 - Time Dependent Perturbation Theory of Two States - Part 3
- Lecture 7 - Time Dependent Perturbation Theory of Many States - Part 1
- Lecture 8 - Time Dependent Perturbation Theory of Many States - Part 2
- Lecture 9 - First-Order Correction to Time- Dependent Perturbation Theory
- Lecture 10 - Properties of Light (Classical Treatment)
- Lecture 11 - Interaction Hamiltonian - Part 1
- Lecture 12 - Interaction Hamiltonian - Part 2
- Lecture 13 - Interaction Hamiltonian - Part 3
- Lecture 14 - Transition Moment Integral
- Lecture 15 - Absorption Probability - Part 1
- Lecture 16 - Absorption Probability - Part 2
- Lecture 17 - Transition to Continuum States: Fermi's Golden Rule
- Lecture 18 - Einstein's Coefficient - Part 1
- Lecture 19 - Einstein's Coefficient - Part 2
- Lecture 20 - Einstein's Coefficient - Part 3
- Lecture 21 - Spontaneous Emission Lifetime
- Lecture 22 - Relationship between Transition Dipole and Extinction Coefficient
- Lecture 23 - Spectral Lineshapes
- Lecture 24 - Selection Rules
- Lecture 25 - Molecular Rotations - Part 1
- Lecture 26 - Molecular Rotations - Part 2
- Lecture 27 - Molecular Rotations - Part 3
- Lecture 28 - Rotational Selection Rules
- Lecture 29 - Rotational Spectrum
- Lecture 30 - Molecular Vibrations - Part 1
- Lecture 31 - Molecular Vibrations - Part 2

[Lecture 32 - Vibrational Selection rules](#)

[Lecture 33 - Electronic Transition](#)

[Lecture 34 - Rotations of Polyatomic Molecules - Part 1](#)

[Lecture 35 - Rotations of Polyatomic Molecules - Part 2](#)

[Lecture 36 - Selection Rules for particle in a box](#)

[Lecture 37 - Interpretation of Rotational Spectra](#)

[Lecture 38 - Features of vibrational and electronic spectroscopy](#)

Lecture 1 - Introduction to organic synthesis-Importance of selectivity, stereochemistry and Mechanism

Lecture 2 - Sulfur based oxidations of alcohols

Lecture 3 - Sulfur based oxidations and Pummerer rearrangement

Lecture 4 - Further aspects of sulfur and selenium based oxidations

Lecture 5 - Organoselenium chemistry and SeO<sub>2</sub> based oxidations

Lecture 6 - SeO<sub>2</sub> based oxidation of ketones and Sulfoxide- Sulfenate rearrangement (Mislow-Evans rearrangement)

Lecture 7 - Mechanistic and stereochemical aspects of Mislow-Evans rearrangement and synthetic applications

Lecture 8 - Further synthetic applications of Mislow-Evans rearrangement and Saegusa-Ito oxidation

Lecture 9 - 1,2-Ketone transpositions, Shapiro reaction and Dauben-Michno rearrangement (a case of 1,3-enone transposition)

Lecture 10 - Dess-Martin periodinane oxidation

Lecture 11 - Iodoxybenzoic acid (IBX) based oxidations

Lecture 12 - Silver based oxidations: Prevost reaction and use of Fetizon's reagent

Lecture 13 - Further aspects of oxidations using Fetizon's reagent: Mechanism and Stereochemistry

Lecture 14 - Ruthenium tetroxide (and RuCl<sub>3</sub>/NaIO<sub>4</sub>) mediated oxidations

Lecture 15 - Tetra-n-propylammonium perruthenate (TPAP) based oxidations, and Tamao-Fleming oxidation

Lecture 16 - Further synthetic and mechanistic aspects of Tamao-Fleming oxidations

Lecture 17 - Oxidations with dimethyl dioxirane (DMDO)

Lecture 18 - Mechanistic aspects of DMDO based oxidations and oxaziridine mediated alpha-hydroxylations of ketones

Lecture 19 - Asymmetric alpha-hydroxylations using oxaziridine based reactions

Lecture 20 - Barton and related reactions (oxidation at unfunctionalised carbons) and synthetic applications

Lecture 21 - beta-Cleavage in Barton and related reactions and miscellaneous oxidations such as TEMPO based oxidations, Pinnick oxidation and pseudomonas putida mediated oxidations

Lecture 22 - Reductions in organic chemistry: Metal hydride (NaBH<sub>4</sub> and LiAlH<sub>4</sub>) mediated reduction

Lecture 23 - Reductions using diisobutylaluminum hydride (DIBAL-H)

Lecture 24 - Further aspects of DIBAL-H based reductions and comparison with mixed chloride hydrides

Lecture 25 - Reductions with Red-Al, and Luche Reductions

Lecture 26 - Further aspects of Luche reduction, stereochemistry in reductions and reduction with LiBH<sub>4</sub>

Lecture 27 - Reductions with Zn(BH<sub>4</sub>)<sub>2</sub>, LiBHEt<sub>3</sub> (superhydride) and L and K-selectrides

Lecture 28 - Reductions with LS/KS selectrides and NaCNBH<sub>3</sub>

Lecture 29 - Dissolving metal reductions (Na, K, Mg) and McMurry coupling using Ti(0)

Lecture 30 - Stereochemistry and mechanistic aspects of McMurry coupling and metal mediated reductions of alpha, beta-unsaturated

ketones

- Lecture 31 - Silanes [R<sub>3</sub>SiH, including polymethylhydrosiloxanes (PMHS)] as reducing agents
- Lecture 32 - Further aspects of silanes as reducing agents and Barton-McCombie deoxygenation
- Lecture 33 - Tributyltinhydride (n-Bu<sub>3</sub>SnH) based radical based reductions and C-C bond formations
- Lecture 34 - Asymmetric synthesis: An introduction
- Lecture 35 - Sharpless asymmetric epoxidation: Mechanism, stereochemistry and kinetic resolution
- Lecture 36 - Synthetic utility of chiral 2,3-epoxy alcohols obtained from Sharpless epoxidation
- Lecture 37 - Katsuki-Jacobsen epoxidation: Mechanism and stereochemistry
- Lecture 38 - Further aspects of Katsuki-Jacobsen epoxidation, and Introduction to Sharpless Asymmetric Dihydroxylation
- Lecture 39 - Mechanism, stereochemical aspects and synthetic applications of Sharpless Asymmetric Dihydroxylation
- Lecture 40 - Asymmetric hydrogenations and reductions using rhodium and ruthenium derived chiral catalysts
- Lecture 41 - Asymmetric reduction with oxazaborolidines
- Lecture 42 - C-C bond formations: Introduction to enolate, enamine and enol silyl ether based chemistry
- Lecture 43 - C-C bond formations using enol silyl ether and imine based chemistry including SAMP and RAMP based asymmetric alkylations
- Lecture 44 - Asymmetric C-C bond formations using Oppolzer's camphorsultams and introduction to directed Aldol reactions
- Lecture 45 - Further aspects of Aldol chemistry including the use of boron and silicon enolates
- Lecture 46 - C-C bond formations using Evans' oxazolidinone based chemistry
- Lecture 47 - Ireland-Claisen rearrangement: Emphasis of enolate geometry on the stereochemical outcome, and Claisen rearrangements
- Lecture 48 - Aromatic Claisen rearrangement, Johnson-Claisen rearrangement and Eschenmoser-Claisen rearrangement and synthetic
- Lecture 49 - Bellus-Claisen rearrangement, Aza-Claisen rearrangement, Thia-Claisen rearrangement, Chen-Mapp rearrangement and their synthetic applications
- Lecture 50 - Zwitterionic-Claisen rearrangement, Overmann rearrangement, Bamford- Stevens and Shapiro reactions and synthetic applications
- Lecture 51 - Introduction to allyl metal additions for C-C bond formation
- Lecture 52 - Allylindium chemistry: Mechanism, stereochemistry and synthetic applications
- Lecture 53 - Allyltin chemistry: Mechanism, stereochemistry and synthetic applications
- Lecture 54 - Chemistry of allylsilanes: Mechanism, stereochemistry and synthetic applications - Part 1
- Lecture 55 - Further synthetic aspects of the chemistry of allylsilanes - Part 2
- Lecture 56 - Further synthetic aspects of the chemistry of allylsilanes - Part 3
- Lecture 57 - Chemistry of Vinylsilanes: Mechanism, Stereochemistry and Synthetic Applications
- Lecture 58 - Peterson olefination and further synthetic aspects of vinylsilane chemistry
- Lecture 59 - Simmons Smith cyclopropanation: Mechanism, stereochemistry and synthetic applications
- Lecture 60 - Course Summary and Conclusion

Lecture 1 - Rate: the reaction velocity

Lecture 2 - Its elementary - rate law equations

Lecture 3 - Arrhenius equation: what's the fuss about?

Lecture 4 - Dance of atoms: from Newton to Hamilton

Lecture 5 - Boltzmann distribution: a story of Hamilton, Liouville and Boltzmann

Lecture 6 - Maxwell Boltzmann distribution: how fast are molecules moving?

Lecture 7 - Kinetic theory of collisions: initial estimate

Lecture 8 - Boltzmann distribution and kinetic theory of collisions

Lecture 9 - Kinetic theory of collisions: a discussion

Lecture 10 - Kinetic theory of collisions: reactive cross section

Lecture 11 - Problem solving session - 1

Lecture 12 - Problem solving session - 2

Lecture 13 - Kinetic theory of collision and equilibrium constant

Lecture 14 - Critique of kinetic theory of collisions

Lecture 15 - Transition state theory and partition functions

Lecture 16 - Partitioning the partition function

Lecture 17 - Translating, rotating and vibrating quantum mechanically

Lecture 18 - Partition function and equilibrium constant

Lecture 19 - What is a transition state?

Lecture 20 - A puzzle: cars on highway

Lecture 21 - Transition state theory: derivation 1

Lecture 22 - Practical calculation of TST rate

Lecture 23 - Calculating TST rate for the reaction  $H+HBr$

Lecture 24 - Collision theory as a special case of TST

Lecture 25 - TST: an intuitive proof in one dimension

Lecture 26 - Rate as a flux across a dividing surface

Lecture 27 - Transition state theory: derivation 2 from dynamical perspective

Lecture 28 - Discussion of the assumptions of TST

Lecture 29 - Thermodynamic formulation of TST

Lecture 30 - Problem solving session - 3

Lecture 31 - Problem solving session - 4

Lecture 32 - Hills and valleys of potential energy surfaces

Lecture 33 - Molecular dynamics: rolling spheres on potential energy surfaces

Lecture 34 - Predictions from potential energy surfaces - rotational vs vibrational energies

Lecture 35 - Free energy and potential of mean force

Lecture 36 - Transmission coefficient and molecular dynamics

Lecture 37 - Problem solving session - 5

Lecture 38 - Microcanonical rate constant: putting balls in jars

Lecture 39 - Microcanonical rate constant: RRK model

Lecture 40 - Microcanonical rate constant: magic of Marcus - RRKM model

Lecture 41 - Canonical TST from microcanonical RRKM model

Lecture 42 - Sum and density of states

Lecture 43 - Unimolecular decay - revisited

Lecture 44 - Unimolecular decay: RRK's approach

Lecture 45 - Unimolecular decay: RRKM's approach

Lecture 46 - Problem solving session - 6

Lecture 1 - Introduction to quantum theory

Lecture 2 - Schrodinger's theory

Lecture 3 - Laws of quantum mechanics

Lecture 4 - Wave functions

Lecture 5 - Quantum mechanics of a free particle

Lecture 6 - Particle in 1D box

Lecture 7 - Particle in 2D box

Lecture 8 - Spherical polar coordinates and angular momentum

Lecture 9 - Developing Hydrogen atom orbitals - 1

Lecture 10 - Developing Hydrogen atom orbitals - 2

Lecture 11 - Developing Hydrogen atom orbitals - 3

Lecture 12 - Visualizing molecular orbitals

Lecture 13 - Molecular orbital theory 1: Introduction

Lecture 14 - Molecular orbital theory 2: Diatomic molecules

Lecture 15 - Molecular orbital theory 3: Homo-diatomc molecules - I

Lecture 16 - Molecular orbital theory 4: Homo-diatomc molecules - II

Lecture 17 - Molecular orbital theory 5: Hetero-diatomc molecules

Lecture 18 - Molecular orbital theory 6: Polyatomic molecules

Lecture 19 - Molecular orbital theory 7: Ethylene (Introduction to Huckel's theory) - I

Lecture 20 - Molecular orbital theory 8: Ethylene (Introduction to Huckel's theory) - II

Lecture 21 - Molecular orbital theory 9: Butadiene - I

Lecture 22 - Molecular orbital theory 9: Butadiene - II

Lecture 23 - Concept of effective nuclear charge

Lecture 24 - Electronic configuration of elements

Lecture 25 - Properties of Elements (Size, IE, EA and EN)

Lecture 26 - Polarizability

Lecture 27 - Hard soft acid base

Lecture 28 - Predicting molecular structures: VSEPR theory

Lecture 29 - Coordination Chemistry: 18 electron rule and VBT

Lecture 30 - Crystal Field Theory: Octahedral Complex

Lecture 31 - Crystal Field Theory: Tetrahedral Complex

Lecture 32 - Crystal Field Theory: Octahedral vs. Tetrahedral Complex

Lecture 33 - Application of CFSE: Spinel and J-T Distortion

Lecture 34 - Introduction to Molecular Magnetism

Lecture 35 - Problem Solving Approach

Lecture 36 - Magnetism

Lecture 37 - Spectroscopic Term Symbol

Lecture 38 - Magnetic States of Matter: Paramagnetic, Ferro and Antiferromagnetic

Lecture 39 - Band structures of solid materials

Lecture 40 - Density of states and doping in semiconductors

Lecture 41 - Introduction to molecular spectroscopy

Lecture 42 - Rotational spectroscopy

Lecture 43 - Vibrational spectroscopy

Lecture 44 - Electronic Spectroscopy - I

Lecture 45 - Electronic Spectroscopy - II

Lecture 46 - Electronic Spectroscopy - III

Lecture 47 - Fluorescence Spectroscopy

Lecture 48 - Fundamentals of NMR spectroscopy and MRI

Lecture 49 - Surface characterization techniques

Lecture 50 - Introduction to thermodynamics: Work, heat and energy

Lecture 51 - First law of thermodynamics: Diathermic and adiabatic systems, exothermic and endothermic processes

Lecture 52 - Enthalpy, Hess's law

Lecture 53 - Second law of thermodynamics: Entropy and third law of thermodynamics

Lecture 54 - Helmholtz and Gibbs free energies, Concept of spontaneity

Lecture 55 - Electrochemical equilibrium, Nernst equation

Lecture 56 - Acid base and solubility equilibria

Lecture 57 - Corrosion

Lecture 58 - Extraction of metals

Lecture 59 - Ellingham Diagram

Lecture 60 - Problems From Thermodynamics

Lecture 61 - Intermolecular forces: Electrostatic and Ion-Dipole Interaction

Lecture 62 - Intermolecular forces: Dipole-dipole, hydrogen bonding

Lecture 63 - Real gases - Part 1

Lecture 64 - Real gases - Part 2

[Lecture 65 - Introduction to Potential Energy Surfaces](#)

[Lecture 66 - Potential energy surface of H<sub>3</sub> system](#)

[Lecture 67 - Salient features of H<sub>3</sub> potential energy surface](#)

[Lecture 68 - Potential Energy Surfaces of HCN and H<sub>2</sub>F system](#)

[Lecture 69 - Representation of three dimensional structures](#)

[Lecture 70 - Structural isomers and stereoisomers](#)

[Lecture 71 - Configurations, Symmetry and Chirality](#)

[Lecture 72 - Enantiomers and Diastereomers](#)

[Lecture 73 - Optical activity, Conformational analysis, and absolute configuration](#)

[Lecture 74 - Substitution reactions](#)

[Lecture 75 - Elimination reactions](#)

[Lecture 76 - Addition, Oxidation and Reduction reactions](#)

Lecture 1 - Overview - 1

Lecture 2 - Overview - 2

Lecture 3 - Overview - 3

Lecture 4 - Illudin M (Kinder) Illudin C (Funk)

Lecture 5 - Total Synthesis of FR900848 (Barrett)

Lecture 6 - Total Synthesis of Cubane

Lecture 7 - Total Synthesis of Endiandric acids

Lecture 8 - Total Synthesis of Penicilin

Lecture 9 - Total Synthesis of Thienamycin

Lecture 10 - Total Synthesis of Prostaglandin (Corey)

Lecture 11 - Total Synthesis of Prostaglandin (Johnson and Stork)

Lecture 12 - Total Synthesis of Biotin and Lactacystin (i) Corey, (ii) Baldwin

Lecture 13 - Total Synthesis of Triquinanes: Isocomene 1) M. Pirrung 2) Fitjer

Lecture 14 - Total Synthesis of Triquinanes: Isocomene and Silphipherfol-6-en-5-one (Rawal)

Lecture 15 - Total synthesis of Triquinanes by radical cyclisation - I (Curran)

Lecture 16 - Total synthesis of Triquinanes by radical cyclisation - II

Lecture 17 - Total synthesis of Triquinanes by photochemical reaction - I

Lecture 18 - Total synthesis of Triquinanes by photochemical reaction - II

Lecture 19 - Total synthesis of Triquinanes by Thermal Metathesis (Mehta)

Lecture 20 - Total synthesis of Triquinanes by other reactions

Lecture 21 - Total synthesis of Longifolene (Corey and Oppolzer)

Lecture 22 - Total synthesis of Carpanone (Chapman)

Lecture 23 - Total synthesis of Mevinolin (Clive)

Lecture 24 - Total synthesis of Gibberellic Acid (Corey)

Lecture 25 - Total synthesis of Gibberellic Acid (Yamada)

Lecture 26 - Total synthesis of Perhydrohistrionicotoxin (Corey)

Lecture 27 - Total synthesis of Strychnine (Woodward)

Lecture 28 - Total synthesis of Strychnine (Rawal and Overman)

Lecture 29 - Total synthesis of Strychnine (Kuehne)

Lecture 30 - Total synthesis of Reserpine (Woodward)

Lecture 31 - Total synthesis of Yohimbine (Tamelen and Momose)

- Lecture 32 - Total synthesis of Quinine (Woodward and Stork)
- Lecture 33 - Total synthesis of Dendrobine (Livinghouse)
- Lecture 34 - Total synthesis of Morphine (Gates and Overman)
- Lecture 35 - Total synthesis of Morphine (Parker and White)
- Lecture 36 - Total synthesis of Methylhomosecodaphniphyllate (Heathcock)
- Lecture 37 - Total synthesis of Lysergic acid (Woodward and Oppolzer)
- Lecture 38 - Total synthesis of Galanthamine (Barton and Kirby)
- Lecture 39 - Total synthesis of Epibatidine (Trost and Evans)
- Lecture 40 - Total synthesis of Swainsonine (Hashimoto)
- Lecture 41 - Total synthesis of Staurosporine (Danishefsky and Wood)
- Lecture 42 - Total synthesis of Manzamine A (Winkler)
- Lecture 43 - Total synthesis of Progesterone (Johnson)
- Lecture 44 - Total synthesis of Progesterone from Diosgenin (Marker)
- Lecture 45 - Total synthesis of Estrone (Torgov)
- Lecture 46 - Total synthesis of Taxol (Nicolaou)
- Lecture 47 - Total synthesis of Taxol (Holton)
- Lecture 48 - Total synthesis of Taxol (Danishefsky)
- Lecture 49 - Total synthesis of Taxol (Wender)
- Lecture 50 - Total synthesis of Eleutherobin (Nicolaou)
- Lecture 51 - Total synthesis of Eleutherobin (Danishefsky)
- Lecture 52 - Total synthesis of Phorbol (Wender)
- Lecture 53 - Total synthesis of Periplanone (Still and Schreiber)
- Lecture 54 - Total synthesis of Discodermolide (Schreiber)
- Lecture 55 - Total synthesis of Epothilones I (Nicolaou)
- Lecture 56 - Total synthesis of Epothilones II (Schinzer and Danishefsky)
- Lecture 57 - Total synthesis of Vineomycinone B2 (Tius and Danishefsky)
- Lecture 58 - Total synthesis of Zaragozic acid C (Carreira)

Lecture 1 - CD Spectroscopy: Introduction

Lecture 2 - Symmetry and Molecular properties

Lecture 3 - Symmetry elements - I

Lecture 4 - Symmetry elements - II

Lecture 5 - Symmetry and point groups - I

Lecture 6 - Symmetry and point groups - II

Lecture 7 - Point group determination tutorial

Lecture 8 - Chirality and point group - I

Lecture 9 - Chirality and point group - II

Lecture 10 - Chirality and point group - III tutorial

Lecture 11 - Chirality and biology - I

Lecture 12 - Chirality and biology - II

Lecture 29 - Cu, Mn, Sm, and Sn Based Reactions, Acyloin Condensation

Lecture 30 - C-N, C-O bond formation and decarboxylation

Lecture 1 - Chromium Based Reagents for Oxidation

Lecture 2 - Non-metal based Reagents for Oxidation

Lecture 3 - Organic Peroxides

Lecture 4 - Oxidation Mediated by DDQ, CAN and SeO<sub>2</sub>

Lecture 5 - Oxidation Mediated by Mn and Ag

Lecture 6 - Oxidation by Ru, Hypervalent Iodine, Al and Na based Reagents

Lecture 7 - Na and Li Metal based Reduction

Lecture 8 - Hydride based Reduction

Lecture 9 - Hydrogenation

Lecture 10 - Al, Zn and Li Based Reagents for Reduction

Lecture 11 - Reduction With Boranes, Diimide and Trialkylsilanes

Lecture 12 - Li Based Reagents in Organic Synthesis

Lecture 13 - Mg and Na Based Reagents in Organic Synthesis

Lecture 14 - B Based Reagents in Organic Synthesis

Lecture 15 - B and Al Based Reagents in Organic Synthesis

Lecture 16 - S Based Reagents in Organic Synthesis

Lecture 17 - P Based Reagents in Organic Synthesis

Lecture 18 - Si and Pb Based Reagents in Organic Synthesis

Lecture 19 - Sn and Bi Based Reagents in Organic Synthesis

Lecture 20 - Ti Based Reagents in Organic Synthesis

Lecture 21 - Ru Based Reagents in Organic Synthesis

Lecture 22 - Pd Based Reagents in Organic Synthesis

Lecture 23 - Cu Based Reagents in Organic Synthesis

Lecture 24 - Cr and Mn Based Reagents in Organic Synthesis

Lecture 25 - Zn and Hg Based Reagents in Organic Synthesis

Lecture 26 - Au Based Reagents in Organic Synthesis

Lecture 27 - Fe and Co Based Reagents in Organic Synthesis

Lecture 28 - Ag and Rh Based Reagents in Organic Synthesis

Lecture 29 - Ni, Pt and Ir Based Reagents in Organic Synthesis

Lecture 30 - Introduction to Lanthanides and Sm Based Reagents

Lecture 31 - Samarium(Ii) Iodide Based Reagents in Organic Synthesis

Lecture 32 - Sm and Yb Based Reagents in Organic Synthesis

- Lecture 1 - Concepts of heat and work; First Law of Thermodynamics
- Lecture 2 - Concepts of enthalpy and heat capacity
- Lecture 3 - Introduction to entropy
- Lecture 4 - Calculation of entropy for various processes
- Lecture 5 - Gibbs and Helmholtz free energy
- Lecture 6 - Introduction to chemical potential
- Lecture 7 - Clapeyron equation and phase transition; concept of fugacity
- Lecture 8 - Calculation of fugacity; free energy of mixing
- Lecture 9 - Partial molar quantities; excess thermodynamic quantities
- Lecture 10 - Concept of activity and activity coefficients; Debye-Huckel limiting law
- Lecture 11 - Phase Diagram of one component systems
- Lecture 12 - Phase Diagram of two component systems
- Lecture 13 - Phase Diagram of three component system; one dimensional random walk
- Lecture 14 - Macroscopic and microscopic states; Boltzmann distribution; Canonical partition function
- Lecture 15 - Calculation of different thermodynamical quantities using canonical partition function
- Lecture 16 - Introduction to molecular partition function
- Lecture 17 - Translational, electronic and nuclear partition function
- Lecture 18 - Rotational partition function
- Lecture 19 - Vibrational partition function; Introduction to grand canonical ensemble
- Lecture 20 - Grand canonical distribution; Introduction to microcanonical ensemble
- Lecture 21 - Problems on classical thermodynamics - 1
- Lecture 22 - Problems on classical thermodynamics - 2
- Lecture 23 - Problems on statistical thermodynamics - 1
- Lecture 24 - Problems on statistical thermodynamics - 2
- Lecture 25 - Problems on statistical thermodynamics - 3
- Lecture 26 - Fermi-Dirac and Bose-Einstein statistics
- Lecture 27 - Ideal Fermi gas
- Lecture 28 - Ideal Bose gas; Introduction to Bose-Einstein condensation
- Lecture 29 - Bose-Einstein condensations
- Lecture 30 - Nuclear spin statistics; Ortho- and para-hydrogens
- Lecture 31 - Specific Heats of solids

Lecture 25 - Protein Purification by Size Exclusion Chromatography (SEC)

Lecture 26 - Protein Purification by Affinity Chromatography

Lecture 27 - Gel Electrophoresis of DNA and Proteins - Part I

Lecture 28 - Gel Electrophoresis of DNA and Proteins - Part II

Lecture 29 - Gel Electrophoresis of DNA and Proteins - Part II

Lecture 30 - Isolation and Characterization of Proteins Part - I

Lecture 31 - Isolation and Characterization of Proteins Part - II

[Lecture 32 - Isolation and Purification of Proteins](#)

[Lecture 33 - Quality and Quantity of the Isolated Protein](#)

[Lecture 34 - Enzyme Kinetics - I](#)

[Lecture 35 - Enzyme Kinetics - II](#)

[Lecture 36 - Enzyme Kinetics \(by using enzyme from apple juice\)](#)

[Lecture 37 - Enzyme Kinetics \(by using enzyme from apple juice\) \(Continued...\)](#)

[Lecture 38 - Isolation and Characterization of DNA Part - I](#)

[Lecture 39 - Isolation and Characterization of DNA Part - II](#)

[Lecture 40 - Bacterial Culture for Plasmid DNA Isolation](#)

[Lecture 41 - Isolation of Plasmid DNA](#)

[Lecture 42 - Isolation and Characterization of DNA Summary](#)

[Lecture 43 - Basics of rDNA Technology Part - I](#)

[Lecture 44 - Basics of rDNA Technology Part - II](#)

[Lecture 45 - Cloning : Polymerase Chain Reaction, Restriction Enzyme Digestion and Ligation](#)

[Lecture 46 - DNA Transformation](#)

[Lecture 47 - Protein-Ligand Interaction](#)

[Lecture 48 - Protein-Ligand Interaction \(Continued...\)](#)

[Lecture 49 - Interaction study of HSA protein with Curcumin and Gallic acid using UV-Vis spectroscopy](#)

[Lecture 50 - Interaction study of HSA protein with Circumin and Gallic acid using UV-Vis spectroscopy \(Continued...\)](#)

[Lecture 51 - Analysis of the Structure of Protein ligand complex](#)

[Lecture 52 - Immunoassay Techniques](#)

[Lecture 53 - Western Blotting Technique](#)

Lecture 1 - Introduction

Lecture 2 - Importance of chemical industry, chemicals from materials

Lecture 3 - Bulk and commodity chemicals

Lecture 4 - Fine and speciality chemicals

Lecture 5 - Water

Lecture 6 - Hydrogen

Lecture 7 - Inorganic peroxide compounds

Lecture 8 - Nitrogen compounds

Lecture 9 - Chloramine and Hydroxylamine

Lecture 10 - Nitric acid, Ostwald process and uses

Lecture 11 - Phosphorus and its components

Lecture 12 - Phosphoric acid salts

Lecture 13 - Tetrapotassium diphosphate preparation

Lecture 14 - Hydroxy apatite

Lecture 15 - P<sub>4</sub>S<sub>10</sub> and phosphide preparation

Lecture 16 - Sulfur and copper (I) phosphide

Lecture 17 - Sulfur compounds and sulfur from H<sub>2</sub>S and SO<sub>2</sub>

Lecture 18 - Sulfuric acid, catalyst and S<sub>2</sub>Cl<sub>2</sub>, applications

Lecture 19 - Sulfur dichloride, thionyl chloride

Lecture 20 - Thiosulfates and dithionite

Lecture 21 - Sodium hydroxyl methanesulfinate and hydrogen sulfide

Lecture 22 - Halogen and halogen compounds

Lecture 23 - Fluorine and inorganic fluorides

Lecture 24 - Hydrogen fluoride and aluminum fluoride

Lecture 25 - Cryolite and other industrially important fluoride salts

Lecture 26 - Electrochemical fluorination, sulfonyl fluorides

Lecture 27 - Chloralkali electrolysis

Lecture 28 - Ion conduction membrane in electrolysis

Lecture 29 - Hydrochloric acid manufacture

Lecture 30 - Bromine and bromine compounds

Lecture 31 - Hydrogen bromide and alkali bromates

Lecture 32 - Iodine and iodine compounds

Lecture 33 - Mineral fertilizers

Lecture 34 - Nitrogen fertilizer and Urea

Lecture 35 - Potassium fertilizer

Lecture 36 - Metals and their compounds: Lithium

Lecture 37 - Sodium and its compounds

Lecture 38 - Potassium and its compounds

Lecture 39 - Magnesium and its compounds

Lecture 40 - Calcium and its compounds

Lecture 41 - Barium and its compounds

Lecture 42 - Chromium and its compounds

Lecture 43 - Manganese and its industrially important compounds

Lecture 44 - Silicon and its compounds

Lecture 45 - Organosilicon compounds, organoalkoxysilanes

Lecture 46 - Organomercapto silanes and silicones

Lecture 47 - Silicone rubber

Lecture 48 - Inorganic solids: glass

Lecture 49 - Zeolites

Lecture 50 - Inorganic Fibres: asbestos, textile glass and optical fibres

Lecture 51 - Glass fibre production and construction materials

Lecture 52 - Ceramics and its manufacturing processes

Lecture 53 - Specialty ceramic products

Lecture 54 - Ferrites and porcelain enamel

Lecture 55 - Layers of enamelling

Lecture 56 - Carbon modifications: Glassy carbon, foamed carbon, carbon black

Lecture 57 - Activated carbon

Lecture 58 - Metallic hard materials: Carbides, borides, silicides

Lecture 59 - Fillers and inorganic pigments

Lecture 60 - Oxide pigments, luminescent pigments, corrosion protection pigments, magnetic pigments

[Lecture 1 - Introduction](#)

[Lecture 2 - Structure and Geometry of Carbenes](#)

[Lecture 3 - Structure and Geometry of Carbenes \(Continued...\)](#)

[Lecture 4 - Generation of Carbene](#)

[Lecture 5 - Generation of Carbene \(Continued...\)](#)

[Lecture 6 - Generation of Carbene \(Continued...\)](#)

[Lecture 7 - Reaction of Carbene](#)

[Lecture 8 - Reaction of Carbene \(Continued...\)](#)

[Lecture 9 - Reaction of Carbene \(Continued...\)](#)

[Lecture 10 - Reaction of Carbene \(Continued...\)](#)

[Lecture 11 - Reaction of Carbene \(Continued...\)](#)

[Lecture 12 - Reaction of Carbene \(Continued...\)](#)

[Lecture 13 - Reaction of Carbene \(Continued...\)](#)

[Lecture 14 - Reaction of Carbene \(Continued...\)](#)

[Lecture 15 - Reaction of Carbene \(Continued...\)](#)

[Lecture 16 - Nitrene](#)

[Lecture 17 - Nitrene \(Continued...\)](#)

[Lecture 18 - Reaction of Nitrene](#)

[Lecture 19 - Reaction of Nitrene \(Continued...\)](#)

[Lecture 20 - Reaction of Nitrene \(Continued...\)](#)

Lecture 1 - A brief introduction to Molecules of Life: Structure of Amino acids and their various charged forms

Lecture 2 - Biological Macromolecules and Small molecules: Importance and functions

Lecture 3 - Amino Acids: The building block of proteins

Lecture 4 - Amino acids: separation and detection, Electrophoresis and Ninhydrin reaction

Lecture 5 - Method of determination of Amino acid sequence: primary structure of polypeptide/protein

Lecture 6 - Selective peptide bond cleavage: Enzymatic and Non-enzymatic methods

Lecture 7 - Peptide synthesis: Protecting groups for amine and carboxyl functionality

Lecture 8 - Peptide synthesis (Continued...) Protection, coupling and deprotection method

Lecture 9 - Recent development of coupling agents; Merrifield's method of solid phase peptide synthesis

Lecture 10 - Hierarchical structure of proteins: Secondary, tertiary and quaternary structure

Lecture 11 - Ramachandran plot and protein purification techniques

Lecture 12 - Protein purification techniques (Continued...)

Lecture 13 - Introduction to Enzymes and its kinetics

Lecture 14 - Enzyme catalysed reactions and introduction to catalytic activity of proteases

Lecture 15 - Enzyme Kinetics (Continued...)

Lecture 16 - Concept of Enzyme Inhibition

Lecture 17 - Concept of Enzyme Inhibition (Continued...)

Lecture 18 - Problems on Enzyme Kinetics and Enzyme Inhibition

Lecture 19 - Synthetic Biology

Lecture 20 - Synthetic Biology (Continued...)

Lecture 21 - Synthetic Biology (Continued...)

Lecture 22 - Nucleic Acid

Lecture 23 - Nucleic Acid (Continued...)

Lecture 24 - DNA sequencing method

Lecture 25 - DNA sequencing method (Continued...)

Lecture 26 - DNA sequencing method (Continued...)

Lecture 27 - Synthesis of oligonucleotide

Lecture 28 - Central dogma: DNA replication, transcription and translation

Lecture 29 - Central dogma: DNA replication, transcription and translation (Continued...)

Lecture 30 - Central dogma: DNA replication, transcription and translation (Continued...)

Lecture 31 - Central dogma: DNA replication, transcription and translation (Continued...)

[Lecture 32 - Central dogma: DNA replication, transcription and translation \(Continued...\)](#)

[Lecture 33 - Molecular Biology](#)

[Lecture 34 - Molecular Biology \(Continued...\)](#)

[Lecture 35 - Chemistry of cofactors/coenzymes](#)

[Lecture 36 - Chemistry of cofactors/coenzymes \(Continued...\)](#)

[Lecture 37 - Chemistry of cofactors/coenzymes \(Continued...\)](#)

[Lecture 38 - Chemistry of cofactors/coenzymes \(Continued...\)](#)

[Lecture 39 - Chemistry of cofactors/coenzymes \(Continued...\)](#)

[Lecture 40 - Chemistry of cofactors/coenzymes \(Continued...\)](#)

[Lecture 41 - Introduction to Drug Discovery Process](#)

[Lecture 42 - Fundamental Principles of Drug Development Process](#)

[Lecture 43 - Combinatorial chemistry](#)

[Lecture 44 - Neurotransmitters](#)

[Lecture 45 - Catechol amine based and GABA neurotransmitters](#)

[Lecture 46 - Hypertension: humoral mechanism and renin/angiotensin system](#)

[Lecture 47 - Inhibitor design of angiotensin converting enzyme](#)

[Lecture 48 - Antimicrobial drugs](#)

[Lecture 49 - Chemistry of penicillins](#)

[Lecture 50 - Resistance to beta-lactam antibiotics](#)

[Lecture 51 - Mechanistic studies of beta-lactamase](#)

[Lecture 52 - Non beta-lactam antibiotics](#)

[Lecture 53 - Mechanistic enzymology of Isopenicillin N synthase](#)

[Lecture 54 - Polyketide Biosynthesis](#)

[Lecture 55 - Biosynthesis of macrolide polyketides and introduction to virus](#)

[Lecture 56 - Anti-viral drugs](#)

[Lecture 57 - Cancer and Chemotherapy](#)

[Lecture 58 - Anti-cancer drugs \(Continued...\)](#)

[Lecture 59 - Aromatase inhibition and Anti-ulcer drugs](#)

[Lecture 60 - Cholesterol lowering agents](#)

[Lecture 61 - Cholesterol Biosynthesis](#)

[Lecture 62 - Pharmacokinetics and pharmacodynamics](#)

[Lecture 63 - QSAR principles](#)

Lecture 1 - Importance of Polymer Science and Brief Historical background

Lecture 2 - Definitions/Terminologies, Classifications

Lecture 3 - Classifications, Nomenclature

Lecture 4 - Classification by Polymerization Mechanism, Nomenclature

Lecture 5 - Molecular Weight, Big Picture of Polymer Science, Common Polymers

Lecture 6 - Examples of Step Polymers, Linear Step Polymerization

Lecture 7 - Linear Step Polymerization: MW Control, MW Distribution, Kinetics

Lecture 8 - Linear Step Polymerization: Kinetics (Continued...), Equilibrium Consideration, General Requirements for Achieving High MW; Non-linear Step Polymerization

Lecture 9 - Linear Step Polymerization: Summary - General Requirement, Non-Linear Step Polymerization

Lecture 10 - Types of Chain polymerization, Mechanism and Kinetics of Radical Chain Polymerization

Lecture 11 - Kinetics of Radical Chain Polymerization (Continued...), Various Types of Initiators

Lecture 12 - Thermal Initiation (Continued...), Molecular Weight and Kinetic Chain Length, Other Types of Radical Initiators, Transfer Reactions

Lecture 13 - Transfer Reactions, Effect of Temperature on Rate and MW, MW Distribution, ceiling Temperature

Lecture 14 - Energetics and Thermodynamics of Chain Polymerization, MW Distribution, Common Polymers

Lecture 15 - Thermodynamics of Chain Polymerization, MW Distribution, Common Polymers

Lecture 16 - Process Conditions, Emulsion Polymerization

Lecture 17 - Emulsion Polymerization (Continued...), Common Polymers by Radical Chain Polymerization, RDRP

Lecture 18 - Reversible - Deactivation Radical Polymerizations (RDRP)

Lecture 19 - RAFT Polymerization (Continued...), Ionic Polymerization

Lecture 20 - Polymer Stereochemistry and Zeigler - Natta Coordination Polymerization

Lecture 21 - Ring Opening Polymerization, Copolymers

Lecture 22 - Copolymerization (Continued...)

Lecture 23 - Polymers in Solution : Flory - Huggins Theory

Lecture 24 - Polymers in Solution : Application of Flory - Huggins Theory

Lecture 25 - Polymers in Solution : Solubility Parameter, Polymer Phase Separation and Fractionation

Lecture 26 - Polymers Chain Dimensions

Lecture 27 - Frictional Properties of Polymer Molecules in Dilute Solution, Determination of Polymer MW (Overview)

Lecture 28 - Membrane Osmometry, End Group Analysis, Dilute Solution Viscometry

Lecture 29 - Dilute Solution Viscometry, Light Scattering Techniques for MW

Lecture 30 - Gel Permeation Chromatography

[Lecture 41 - Polymer Additives](#)

[Lecture 42 - Polymer Blends, Concluding Remarks](#)

**NPTEL : NOC:Structure, Stereochemistry and Reactivity of Organic Compounds and Intermediates: A Problem Solving Approach (Chemistry and Biochemistry)**

**Co-ordinators : Prof. A. Basak**

Lecture 1 - Introduction to structure and stereochemistry of organic molecules: salient features of symmetry elements; Role of principal axis, sigma plane, centre of symmetry, and alternating axis of symmetry in deciding chirality

Lecture 2 - Introduction to point group notation, classification, symmetry number and order

Lecture 3 - Examples of various point group notations, chiral and achiral point groups, examples of various point groups

Lecture 4 - Solving problems on point groups ( $C_n$ ,  $C_{nv}$ ,  $C_{nh}$ ,  $D_{nd}$ )

Lecture 5 - Conformational Analysis of Perhydrophenanthrene

Lecture 6 - Concept Clearing Session on Achiral Point Groups

Lecture 7 - Axial, Planar and Helical Chirality, assignment of absolute configuration to such molecules

Lecture 8 - Concept of pseudoasymmetry; Reflection variance/invariance problem; methods of nomenclature system

Lecture 9 - Conformational analysis of bicyclic systems: the Decalins

Lecture 10 - Conformational analysis of Perhydrophenanthrene

Lecture 11 - Conformational analysis of Perhydroanthracene

Lecture 12 - Revisiting conformational analysis of Perhydrophenanthrene

Lecture 13 - Revisiting conformational analysis of Perhydroanthracene

Lecture 14 - Introduction to Linear Polarized light and interaction with chiral materials; Circular Birefringence, Circular Dichroism

Lecture 15 - ORD, CD and Cotton Effect (CE); Empirical rule to determine the sign of CE, 2-axial haloketone rule

Lecture 16 - Octant rule: application to substituted cyclohexanone and decalone system

Lecture 17 - Application of Octant rule to tricyclic system; drawing of octant projection

Lecture 18 - Application of Octant rule to steroidal ketones; drawing of octant projection

Lecture 19 - Stereoelectronic effects on conformation and reactivity

Lecture 20 - Examples of anomeric effect and Stereoelectronic effect

Lecture 21 - Baldwin rules

Lecture 22 - Cyclization in enolic systems

Lecture 23 - Problem solving on Baldwin rules

Lecture 24 - Reactive Functionalities: Chemistry of Alkynes

Lecture 25 - Reactive Functionalities: Chemistry of Alkynes (Continued...), arynes and enediynes

Lecture 26 - Reactive Functionalities: Eneidyne (Continued...), allenes and Ketenes

Lecture 27 - Beta - Lactam Synthesis

Lecture 28 - Chemistry of radicals

Lecture 29 - Reactivity of radicals: Frontier orbital approach.

Lecture 30 - Radical mediated C-C bond formation

- Lecture 31 - Radical mediated C-C bond formation (Continued...).
- Lecture 32 - Radical mediated decarboxylation and deoxygenation
- Lecture 33 - Dynamic Stereochemistry: Conformationally rigid and mobile systems
- Lecture 34 - Dynamic Stereochemistry: Conformational analysis of elimination and addition
- Lecture 35 - Dynamic Stereochemistry: Stereoselectivity in carbonyl reduction
- Lecture 36 - Dynamic Stereochemistry: Reactivity of unsaturated carbonyl and enolate systems
- Lecture 37 - Dynamic Stereochemistry: Enolate as nucleophile
- Lecture 38 - Dynamic Stereochemistry: stereochemical issues in cyclohexenone reduction and alpha-electrophilic substitution in carbonyls
- Lecture 39 - Dynamic Stereochemistry: Asymmetric aldol reactions
- Lecture 40 - Dynamic Stereochemistry: Asymmetric aldol reaction (Continued...)

Lecture 1 - Review of Quantum Chemistry

Lecture 2 - Postulates of Quantum Mechanics - I

Lecture 3 - Postulates of Quantum Mechanics - II

Lecture 4 - Exactly Solvable Models - I

Lecture 5 - Exactly Solvable Models - II

Lecture 6 - Exactly Solvable Models - II (Continued...)

Lecture 7 - Variational Principle - I

Lecture 42 - Hydrogen Molecule Ion: Calculations and Results

Lecture 43 - Hydrogen Molecule: The Valence Bond Method

Lecture 44 - Hydrogen Molecule: Calculations and Molecular Orbital Method

Lecture 45 - Video Tutorials on Angular Momentum (Orbital and Spin) and Variational Method - Part 1

Lecture 46 - Video Tutorials on Angular Momentum (Orbital and Spin) and Variational Method - Part 2

Lecture 47 - Introduction to Quantum Mechanical Perturbation Theory

Lecture 48 - First Order Time Independent perturbation Theory for Non-Degenerate states

Lecture 49 - First and Second Order Time Independent Perturbation Theory for Non-Degenerate States

Lecture 50 - First and Second Order Time Independent Perturbation Theory: Simple Examples

Lecture 51 - Time Independent Perturbation Theory for Degenerate States: First Order

Lecture 52 - General MO method for Homonuclear Diatomic Molecules

Lecture 53 - General MO method for Heteronuclear Diatomic Molecules

Lecture 54 - Introduction to Hybridization and Valence Bond for Polyatomic Molecules

Lecture 55 - Hückel Molecular Orbital Theory - I

Lecture 56 - Hückel Molecular Orbital Theory - II

Lecture 1 - Electrochemistry, double layer, 3 electrode systems, supporting electrolyte

Lecture 2 - Rate constant, concept of impedance, Z of electrical elements, differential impedance

Lecture 3 - Time domain results

Lecture 4 - Graphical representation of data (Complex plane, Bode)

Lecture 5 - Introduction to other techniques

Lecture 6 - Tutorial 01

Lecture 7 - Type of analyzers, single and multi sine

Lecture 8 - FFT details, frequency range and resolution, cross correlation

Lecture 9 - Multi sine, odd harmonic, non-harmonics, crest factor, spectral leakage

Lecture 10 - Windowing

Lecture 11 - Tutorial 02

Lecture 12 - Introduction to KKT

Lecture 13 - Linearity, causality, stability, impedance vs. admittance, measurement model

Lecture 14 - Linear KKT illustration

Lecture 15 - Tutorial 03

Lecture 16 - Introduction to EEC, Choice of circuits, confidence intervals, AIC

Lecture 17 - EEC fitting, initial values, distinguishability

Lecture 18 - Zero/pole representation,  $R_t$  and  $R_p$

Lecture 19 - Maxwell, Voigt, Ladder circuits, choice of initial values illustrated

Lecture 20 - Tutorial 04

Lecture 21 - Simple electron transfer reaction

Lecture 22 - Two step reaction with an intermediate (1 of 3)

Lecture 23 - Two step reaction with an intermediate (2 of 3)

Lecture 24 - Two step reaction with an intermediate (3 of 3)

Lecture 25 - E-EAR reaction, negative resistance (1 of 2)

Lecture 26 - E-EAR reaction, negative resistance (2 of 2)

Lecture 27 - Three step reaction with two adsorbed intermediates

Lecture 28 - Catalytic mechanism

Lecture 29 - Examples with Frumkin or Temkin isotherms

Lecture 30 - Challenges in RMA

Lecture 31 - Patterns Reported in Experiments

Lecture 32 - Warburg part - 1

Lecture 33 - Warburg part - 2

Lecture 34 - Warburg part - 3

Lecture 30 - Eukaryotic protein expression systems - I

Lecture 31 - Eukaryotic protein expression systems - II

[Lecture 32 - Eukaryotic protein expression systems - III: Gene expression in mammalian cells using viral vectors](#)

[Lecture 33 - Human Gene Therapy](#)

[Lecture 34 - DNA vaccines](#)

[Lecture 35 - Transgenic animals](#)

[Lecture 36 - Transgenic plants](#)

[Lecture 37 - Knockout mic](#)

[Lecture 38 - Regulation of Eukaryotic Gene Expression by Small RNAs \(RNA Interference, RNAi\)](#)

[Lecture 39 - Genomics & Proteomics](#)

[Lecture 40 - Metabolic Engineering & Synthetic Biology](#)

Lecture 1 - Wave Particle Duality

Lecture 2 - Standing Waves

Lecture 3 - Path Integrals and Schrodinger Equation

Lecture 4 - Postulates - Part 1

Lecture 5 - Postulates - Part 2

Lecture 6 - Postulates - Part 3

Lecture 7 - Separating Variables and Particle in a Box - Part 1

Lecture 8 - Particle in a box - Part 2

Lecture 9 - Particle in a box - Part 3

Lecture 10 - Particle in a box-time dependent states-Expectations values and time dependent states

Lecture 11 - Particle in a 3 dimensional box

Lecture 12 - Particle in a well of finite depth

Lecture 13 - Finite well, Delta and Step Functions

Lecture 14 - Finite well (Continued...)

Lecture 15 - Tunneling - Part 1

Lecture 16 - Tunneling - Part 2

Lecture 17 - Schrodinger equation for Harmonic Oscillator

Lecture 18 - Harmonic Oscillator - The Series Solution

Lecture 19 - Harmonic Oscillator - Generating function

Lecture 20 - Harmonic Oscillator - Orthogonality of Eigenfunctions

Lecture 21 - Hydrogen Atom: Separating centre of mass motion and integral motion

Lecture 22 - Hydrogen Atom: Polar Co-ordinates

Lecture 23 - Hydrogen atom continued : Separation of variables

Lecture 24 - Hydrogen atom : Finding the functions  $\hat{I}^2$  ( $\hat{I}_z$ ) and  $\hat{I}_z(\hat{I}^2)$

Lecture 25 - Finding R(r)

Lecture 26 - Atomic Orbitals - Part 1

Lecture 27 - Atomic Orbitals - Part 2

Lecture 28 - Atomic Orbitals - Part 3

Lecture 29 - Atomic Orbitals - Part 4 and Hermitian Operators

Lecture 30 - Measurement, Uncertainty Principle

Lecture 31 - Generalized Uncertainty Principle

[Lecture 32 - Generalized Uncertainty Principle \(Continued...\)](#)

[Lecture 33 - Angular Momentum](#)

[Lecture 34 - Angular Momentum \(Continued...\)](#)

[Lecture 35 - Angular Momentum \(Continued...\) and Spin](#)

[Lecture 36 - Perturbation Theory](#)

[Lecture 37 - Perturbation Theory \(Continued...\)](#)

[Lecture 38 - Variation Method - Introduction](#)

[Lecture 39 - Variation Method - Proof and Illustration](#)

[Lecture 40 - He atom wave function with spin included - Paulis principle](#)

[Lecture 41 - Hydrogen Molecular ion - Linear variation method](#)

[Lecture 42 - Hydrogen Molecular ion \(Continued...\)](#)

[Lecture 43 - Hydrogen Molecular ion \(Continued...\)](#)

[Lecture 44 - Molecular Orbitals The Hydrogen Molecule](#)

[Lecture 45 - MO and VB theory](#)

[Lecture 46 - MO theory of diatoms](#)

[Lecture 47 - Di-atomics \(Continued...\)](#)

[Lecture 48 - Hybridization Huckel theory](#)

[Lecture 49 - Huckel MO Theory \(Continued...\)](#)

Lecture 1 - Basic Introduction about the Course

Lecture 2 - Generation Introduction to the Remote Sensing - Part 1

Lecture 3 - Generation Introduction to the Remote Sensing - Part 2

Lecture 4 - Aerial Photogrammetry - Part 1

Lecture 5 - Aerial Photogrammetry - Part 2

Lecture 6 - Stereoscapy

Lecture 7 - Relief Displacement

Lecture 8 - Exploring the Remote Sensing Data and GIS Software - Part 1

Lecture 9 - Exploring the Remote Sensing Data and GIS Software - Part 2

Lecture 10 - Exploring the Remote Sensing Data and GIS Software - Part 3

Lecture 11 - Georeferencing of Toposheets on QGIS

Lecture 12 - Georeferencing of Remote Sensing Data on QGIS

Lecture 13 - Mosaicking, Merging and Generation of Shape Files on QGIS

Lecture 14 - Fluvial Systems and Associated Landforms - Part 1

Lecture 15 - Fluvial Systems and Associated Landforms - Part 2

Lecture 16 - Fluvial Systems and Associated Landforms - Part 3

Lecture 17 - Fluvial Systems and Associated Landforms - Part 4

Lecture 18 - Fluvial Systems and Associated Landforms - Part 5

Lecture 19 - Fluvial Systems and Associated Landforms - Part 6

Lecture 20 - Tectonic Geomorphology - Part 1

Lecture 21 - Tectonic Geomorphology - Part 2

Lecture 22 - Tectonic Geomorphology - Part 3

Lecture 23 - Tectonic Geomorphology - Part 4

Lecture 24 - Anaglyph and DEM Generation of Cartosat-1 data on ENVI

Lecture 25 - Tectono-Geomorphic Mapping on QGIS - Part 1

Lecture 26 - Tectono-Geomorphic Mapping on QGIS - Part 2

Lecture 27 - Tectono-Geomorphic Mapping on QGIS - Part 3

Lecture 28 - Tectono-Geomorphic Mapping on QGIS - Part 4

Lecture 29 - Total Station (TS) and Real Time Kinematics (RTK) and its Applications

Lecture 30 - Field Demonstration of Real Time Kinematics (RTK) - Part 1

Lecture 31 - Field Demonstration of Real Time Kinematics (RTK) - Part 2

[Lecture 32 - Field Demonstration of Total Station \(TS\) - Part 1](#)

[Lecture 33 - Field Demonstration of Total Station \(TS\) - Part 2](#)

[Lecture 34 - Ground Penetrating Radar \(GPR\) and its Applications - Part 1](#)

[Lecture 35 - Ground Penetrating Radar \(GPR\) and its Applications - Part 2](#)

[Lecture 36 - Field Demonstration of GPR - Part 1](#)

[Lecture 37 - Field Demonstration of GPR - Part 2](#)

[Lecture 38 - Optically Stimulated Luminescence \(OSL\) Dating technique and its Applications](#)

[Lecture 39 - Optically Stimulated Luminescence \(OSL\) Dating Lab](#)

Lecture 1 - Introduction

Lecture 2 - Soil Exploration

Lecture 3 - Soil Exploration - Penetration Tests

Lecture 4 - Soil Exploration - Geophysical Exploration

Lecture 5 - Shallow Foundation - Introduction

Lecture 6 - Shallow Foundation : Bearing Capacity - I

Lecture 7 - Shallow Foundation : Bearing Capacity - II

Lecture 8 - Shallow Foundation : Bearing Capacity - III

Lecture 9 - Shallow Foundation : Bearing Capacity - IV

Lecture 10 - Shallow Foundation : Bearing Capacity - V

Lecture 11 - Shallow Foundation - Settlement Calculation - I

Lecture 12 - Shallow Foundation - Settlement Calculation - II

Lecture 13 - Shallow Foundation - Settlement Calculation - III

Lecture 14 - Design of Shallow Foundation

Lecture 15 - Design of Raft Foundation

Lecture 16 - Deep Foundation - Introduction

Lecture 17 - Pile Foundation - Load Carrying Capacity - I

Lecture 18 - Pile Foundation - Load Carrying Capacity - II

Lecture 19 - Pile Foundation - Load Carrying Capacity - III and Settlement Calculation

Lecture 20 - Tension and Lateral Loaded Piles

Lecture 21 - Well Foundation

Lecture 22 - Well Foundation (Continued...)

Lecture 23 - Design of Retaining Wall

Lecture 24 - Design of Retaining Wall (Continued...)

Lecture 25 - Design of Sheet Piles

Lecture 26 - Design of Sheet Piles (Continued...)

Lecture 27 - Design of Sheet Piles (Continued...)

Lecture 28 - Design of Sheet Piles (Continued...)

Lecture 29 - Reinforced Earth

Lecture 30 - Reinforced Retaining Wall

Lecture 31 - Seismic Design of Retaining Wall

[Lecture 32 - Seismic Design of Retaining Walls \(Continued...\)](#)

[Lecture 33 - Soil - Foundation Interaction](#)

[Lecture 34 - Soil - Foundation Interaction \(Continued...\)](#)

[Lecture 35 - Soil - Foundation Interaction \(Continued...\)](#)

[Lecture 36 - Soil - Foundation Interaction \(Continued...\)](#)

[Lecture 37 - Soil - Foundation Interaction \(Continued...\)](#)

[Lecture 38 - Soil - Foundation Interaction \(Continued...\)](#)

[Lecture 39 - Soil - Foundation Interaction \(Continued...\)](#)

[Lecture 40 - Soil - Foundation Interaction \(Continued...\)](#)

**NPTEL : Ground Water Hydrology (Civil Engineering)**

**Co-ordinators : Dr. Anirban Dhar, Dr. V.R. Desai**

Lecture 1 - Introduction : Ground Water (GW) Utilization and Historical Background, GW in hydrologic Cycle

Lecture 2 - Ground Water in & % Hydrologic Cycle (Continued...), Ground Water Budget, Ground Water Level Fluctuations and Environmental Influence

Lecture 3 - Ground water Level Fluctuations and Environmental Influence (Continued...) Literature/Data/Internet Resources

Lecture 4 - Ground water Level Fluctuations and Environmental Influence (Continued...) Literature/Data/Internet Resources

Lecture 5 - Occurrence and Movement of Ground Water : Origin and Age of Ground Water, Rock Properties Affecting Ground Water, Ground Water Column

Lecture 6 - Zones of Aeration and Saturation; Aquifers and their characteristics/classification

Lecture 7 - Aquifer Classification (Continued...), Ground water Basins and Springs; Darcy's Law; Permeability

Lecture 8 - Determination of Permeability : Heterogeneity and Anisotropy

Lecture 9 - Ground Water (GW) flowrates and flow directions; general flow equations through porous media

Lecture 10 - General Flow Equations Through Porous Media (Continued...), Dupuit's Assumptions

Lecture 11 - 1-D Unconfined Ground water Flows; Steady Flow into Wells

Lecture 12 - Steady Flow into Wells (Continued...); Unsteady Flow into Wells

Lecture 13 - Unsteady Flow into Wells (Continued...)

Lecture 14 - Unsteady Radial Flow in Confined and Unconfined Aquifers

Lecture 15 - Unsteady Radial Flow in Leaky Aquifers (Continued...); Well Flow Near Aquifer Boundaries

Lecture 16 - Well Flow for Special Conditions; Partially Penetrating Wells; Horizontal Wells and Collector Wells; Multiple Well Systems

Lecture 17 - Well Completion; Well Development; Well Protection; Well Rehabilitation; Well testing for Yields

Lecture 18 - Well Protection/Rehabilitation/Testing for yield (Continued...); Artificial Ground Water Recharge : Concept and Methods

Lecture 19 - Concept and methods of Artificial Ground Water Recharge (Continued...); Recharge Mounds and Induced Recharge

Lecture 20 - Induced Recharge (Continued...); Wastewater recharge for reuse; Water spreading

Lecture 21 - Pollution and Quality Analysis of Ground Water : Sources of Pollution of GW-Municipal, Industrial, Agricultural and Miscellaneous

Lecture 22 - Ground Water Pollution from Industrial, Agricultural and Miscellaneous Sources (Continued...)

Lecture 23 - Ground Water Pollution from Miscellaneous Sources (Continued...), Attenuation and Underground Distribution of Pollutants

Lecture 24 - Potential Evaluation of Ground water Pollution; Physical/Chemical/Biological analysis of Ground Water quality; Criteria and measures of Ground water quality

Lecture 25 - Ground water salinity and samples ; Graphical representations of ground water quality

Lecture 26 - Graphical representations of ground water quality (Continued...), Surface/Sub-Surface Investigation Of Ground Water: Geological/geophysical exploration; Remote sensing/electrical resistivity methods

Lecture 27 - Surface Investigation of ground water (Continued...): Electrical resistivity seismic refraction/gravity/magnetic methods

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 28 - Seismic refraction/gravity/magnetic methods (Continued...);Sub-surface investigation of ground water: Geographical/resistivity methods

Lecture 29 - Sub-surface investigation of ground water (Continued...): Geographical/resistivity/spontaneous potential/radiation of methods of logging

Lecture 30 - Radiation method of logging (Continued...); Temperature/caliper/fluid conductivity/fluid velocity/miscellaneous logging methods

Lecture 31 - Saline Water Intrusion in Aquifers:Occurence, Features affecting aquifers,Bodon - Ghyben - Hergberg Principle

Lecture 32 - Saline Water Intrusion in Aquifers : Bodon - Ghyben - Hergberg principle (Continued...), Analytical Solution of Saline Water Intrusion in Coastal Aquifer

Lecture 33 - Saline Water Intrusion in Aquifers : Analytical Solution of Saline Water Intrusion in Coastal Aquifer (Continued...), Density dependent salt water intrusion model

Lecture 34 - Saline Water Intrusion in Aquifers : Geochemical Investigations, Control of salt water intrusion, Practical Modeling of salt water intrusion

Lecture 35 - Modeling and Management of Ground Water : Ground Water Simulation Models, Ground Water Management Model : Confined Aquifer

Lecture 36 - Modeling and Management of Ground Water : Ground Water Management Model : Confined and Unconfined Aquifer, Linked Simulation - Optimization, Meta Model Based Approach

Lecture 37 - Modeling and Management of Ground Water : Contaminant Source Identification , Monitoring Network Design

Lecture 38 - Modeling and Management of Ground Water : Aquifer Yield and Ground Water Availability, Effects of Ground Water Development, Regional Scale Development of Ground Water

Lecture 39 - Modeling and Management of Ground Water : Conjunctive Surface - Subsurface Modeling of Overland Flow including flow through Vadose zone

Lecture 40 - Modeling and Management of Ground Water : Ground Water - Surface Water Interaction

Lecture 1 - Introduction to Numerical Methods

Lecture 2 - Error Analysis

Lecture 3 - Introduction to Linear Systems - I

Lecture 4 - Linear Systems - II

Lecture 5 - Linear Systems - III

Lecture 6 - Linear Systems - Error Bounds

Lecture 7 - Error Bounds and Iterative Methods for Solving Linear Systems

Lecture 8 - Iterative Methods for Solving Linear Systems - I

Lecture 9 - Iterative Methods - II

Lecture 10 - Iterative Methods - III

Lecture 11 - Iterative Methods for Eigen Value Extraction

Lecture 12 - Solving Nonlinear Equations - I

Lecture 13 - Solving Nonlinear Equations - II

Lecture 14 - Solving Multi Dimensional Nonlinear Equations - I

Lecture 15 - Solving Multi Dimensional Nonlinear Equations - II

Lecture 16 - ARC Length and Gradient Based Methods

Lecture 17 - Gradient Based Methods

Lecture 18 - Conjugate Gradient Method - I

Lecture 19 - Conjugate Gradient Method - II

Lecture 20 - Nonlinear Conjugate Gradient and Introduction to PDEs

Lecture 21 - Eigenfunction Solutions for the Wave Equation

Lecture 22 - Analytical Methods for Solving the Wave Equation

Lecture 23 - Analytical Methods for Hyperbolic and Parabolic PDEs

Lecture 24 - Analytical Methods for Parabolic and Elliptic PDEs

Lecture 25 - Analytical Methods for Elliptic PDE's

Lecture 26 - Series Solutions for Elliptic PDE's and Introduction to Differential Operators

Lecture 27 - Differential Operators - I

Lecture 28 - Differential Operators - II

Lecture 29 - Differential Operators - III

Lecture 30 - Interpolation

Lecture 31 - Polynomial Fitting

[Lecture 32 - Orthogonal Polynomials - I](#)

[Lecture 33 - Orthogonal Polynomials - II](#)

[Lecture 34 - Orthogonal Polynomials - III](#)

[Lecture 35 - Spline Functions](#)

[Lecture 36 - Orthogonal Basis Functions for Solving PDE's - I](#)

[Lecture 37 - Orthogonal Basis Functions for Solving PDE's - II](#)

[Lecture 38 - Integral Equations - I](#)

[Lecture 39 - Integral Equations - II](#)

[Lecture 40 - Integral Equations - III](#)

[Lecture 63 - Introduction to wave mechanics \(Continued...\)](#)

Lecture 1 - Overview of urban transportation: Urbanization and Transport

Lecture 2 - Overview of urban transportation: Key issues in urban transportation

Lecture 3 - Overview of urban transportation: Challenges in urban transportation

Lecture 4 - Overview of urban transportation: Travel demand modelling overview

Lecture 5 - Overview of urban transportation: Vehicular Level of Service (LOS) overview

Lecture 6 - Public Transportation: Introduction to public transportation

Lecture 7 - Public Transportation: Basic operating elements of public transportation

Lecture 8 - Public Transportation: Basic operating elements of public transportation (Continued...)

Lecture 9 - Public Transportation: Bus Transportation

Lecture 10 - Public Transportation: Bus Transportation (Continued...)

Lecture 11 - Public Transportation: Financing public transportation

Lecture 12 - Public Transportation: Transit marketing

Lecture 13 - Public Transportation: Rail transportation

Lecture 14 - Public Transportation: Intermediate Public Transportation

Lecture 15 - Public Transportation: Measuring performance of transit systems

Lecture 16 - Public Transportation: Advanced operation concepts of public transportation

Lecture 17 - Public Transportation: Bus and Rail Transit Capacity

Lecture 18 - Public Transportation: Bus and Rail Transit Capacity (Continued...)

Lecture 19 - Public Transportation: Station Capacity

Lecture 20 - Public Transportation: Transit Stop Location

Lecture 21 - Non-motorised Transportation (NMT) Planning: Introduction to NMT Systems

Lecture 22 - Non-motorised Transportation (NMT) Planning: Assessing existing NMT scenario

Lecture 23 - Non-motorised Transportation (NMT) Planning: Data collection and analysis in NMT Planning

Lecture 24 - Non-motorised Transportation (NMT) Planning: Complementarity and Selection of Interventions

Lecture 25 - Non-motorised Transportation (NMT) Planning: Alternative Selection through Economic & Financial Analysis

Lecture 26 - Non-Motorised Transportation (NMT) Planning: Basic NMT Characteristics

Lecture 27 - Non-Motorised Transportation (NMT) Planning: Pedestrian Data Collection and Flow Characteristics

Lecture 28 - Non-Motorised Transportation (NMT) Planning: Pedestrian Flow models

Lecture 29 - Non-Motorised Transportation (NMT) Planning: Pedestrian flow characteristics on facilities

Lecture 30 - Non-Motorised Transportation (NMT) Planning: Pedestrian Level of Service (PLOS) based on Flow models

Lecture 31 - Non-Motorised Transportation (NMT) Planning: Other types of Pedestrian Level of Service (PLOS)

- Lecture 32 - Non-Motorised Transportation (NMT) Planning: HCM 2010 Methodology for PLOS
- Lecture 33 - Non-Motorised Transportation (NMT) Planning: HCM 2010 Methodology for PLOS (Continued...)
- Lecture 34 - Non-Motorised Transportation (NMT) Planning: Bicycle Facilities and Level of Service (BLOS)
- Lecture 35 - Non-Motorised Transportation (NMT) Planning: BLOS and Bicycle Compatibility Index (BCI)
- Lecture 36 - Non-Motorised Transportation (NMT) Planning: NMT Design Principles
- Lecture 37 - Non-Motorised Transportation (NMT) Planning: Design of Pedestrian Infrastructure
- Lecture 38 - Non-Motorised Transportation (NMT) Planning: Design of Pedestrian Infrastructure (Continued...)
- Lecture 39 - Non-Motorised Transportation (NMT) Planning: Design of Cycling Infrastructure
- Lecture 40 - Non-Motorised Transportation (NMT) Planning: Design of Cycling Infrastructure (Continued...)
- Lecture 41 - Urban Transport and Sustainability: Travel Demand Management (TDM) overview
- Lecture 42 - Urban Transport and Sustainability: Push measures cases
- Lecture 43 - Urban Transport and Sustainability: Pull measure cases
- Lecture 44 - Urban Transport and Sustainability: Parking Studies
- Lecture 45 - Urban Transport and Sustainability: Transit Oriented Development (TOD)
- Lecture 46 - Urban Transport and Sustainability: Introduction to Intelligent Transportation Systems (ITS)
- Lecture 47 - Urban Transport and Sustainability: ITS components, applications and communication
- Lecture 48 - Urban Transport and Sustainability: ITS Architecture
- Lecture 49 - Urban Transport and Sustainability: Electronic Toll Collection (ETC)
- Lecture 50 - Urban Transport and Sustainability: Public Bicycle Sharing (PBS) System with ITS
- Lecture 51 - Urban Transport and Sustainability: Multimodal transportation (MMT) environment
- Lecture 52 - Urban Transport and Sustainability: Multimodal Level of Service (MMLOS)
- Lecture 53 - Urban Transport and Sustainability: Multimodal Level of Service (MMLOS) (Continued...)
- Lecture 54 - Urban Transport and Sustainability: Design of multimodal transfer facilities
- Lecture 55 - Urban Transport and Sustainability: Park & Ride (P&R) Facility Planning
- Lecture 56 - Urban Transport and Sustainability: An Introduction to Pedestrian Road Safety and associated Risk Factors
- Lecture 57 - Urban Transport and Sustainability: Road crash estimation and elements of predictive methods
- Lecture 58 - Urban Transport and Sustainability: Predicting Vehicle-Pedestrian and Vehicle-Bicycle conflicts
- Lecture 59 - Urban Transport and Sustainability: Environmental Concerns of Urban Transport
- Lecture 60 - Urban Transport and Sustainability: Sustainable strategies for Urban Transportation

Lecture 1 - Urbanization, Urban Transportation and Transportation Demand

Lecture 2 - Travel Behaviour, Transportation Externalities and Present Scenario of Urban Transportation

Lecture 3 - Approaches for Mitigating Externalities, Need for Transportation Planning and Transport Planning Morphology

Lecture 4 - Transport Planning Morphology

Lecture 5 - Hierarchical Level of Urban Transport Planning and Interrelationship of Transport Problems and Models

Lecture 6 - Traditional Travel Demand Forecasting Process

Lecture 7 - Traditional Travel Demand Forecasting Process, Specification, Calibration, Validation and Forecasting

Lecture 8 - Information Needs for Travel Demand Forecasting: Study Area, Urban Activities, Transportation System

Lecture 9 - Information Needs for Travel Demand Forecasting: Travel Information

Lecture 10 - Data Collection and Techniques

Lecture 11 - Introduction and Basic Considerations of Trip Generation

Lecture 12 - Trip Classifications and Factors Affecting Trip Generation

Lecture 13 - Modelling Approaches and Step-Wise Approach of Multiple Regression Analysis

Lecture 14 - Step-Wise Approach of Multiple Regression Analysis and Examples

Lecture 15 - Examples, Common Mistakes and Zonal Based Models of Multiple Regression Analysis

Lecture 16 - Zonal and Household Based Regression Models

Lecture 17 - Cross Classification Analysis: Model Structure and Calibration

Lecture 18 - Cross Classification Analysis: Model Calibration

Lecture 19 - Cross Classification Analysis: Model Application, Advantages and Dis-Advantages

Lecture 20 - Matching Productions and Attractions; Stability of Trip Generation Models

Lecture 21 - Basic Considerations and Trip Distribution Matrices

Lecture 22 - Methods for Trip Distribution, Uniform Growth Factor Method and Average Growth Factor Method

Lecture 23 - Detroit Method and Fratar Model

Lecture 24 - Furness Method

Lecture 25 - Synthetic Methods, Measures of Travel Resistance and Gravity Model

Lecture 26 - Singly Constrained Gravity Model

Lecture 27 - Bureau of Public Roads Calibration Procedure

Lecture 28 - Doubly Constrained Gravity Model

Lecture 29 - Intervening Opportunities Model

Lecture 30 - Competing Opportunities Model and Linear Programming Approach

Lecture 1 - Introduction

Lecture 2 - Waves on a String

Lecture 3 - Stress

Lecture 4 - Strain tensor and Constitutive equations

Lecture 5 - Equations of Motion

Lecture 6 - Wavenumber vector, Slowness, P-and S-wave Polarization

Lecture 7 - Seismic spectrum, Seismogram rotation, Spherical Waves

Lecture 8 - Energy in the Plane Wave, Potentials at an Interface

Lecture 9 - Boundary Conditions, Types Of Interfaces, Ray Theory, Reflection/Transmission

Lecture 10 - Snell's law, Transmission and Reflection Coefficients, Fermat's Principle, Huygen's

Lecture 11 - Precritical, Critical, and Postcritical waves, reflection and transmission coefficients

Lecture 12 - Surface waves

Lecture 13 - Rayleigh Waves

Lecture 14 - Love waves

Lecture 15 - Dispersion

Lecture 16 - Dispersion example in the Earth and Tsunamis

Lecture 17 - Normal modes

Lecture 18 - Torsional and Spheroidal Modes

Lecture 19 - Solving numerical problems

Lecture 20 - Refraction seismology

Lecture 21 - Refraction seismology (Continued...)

Lecture 22 - Reflection seismology (Continued...)

Lecture 23 - Earth as a constant velocity Distribution

Lecture 24 - Multi Channel Data Geometry

Lecture 25 - Seismic waves in spherical earth

Lecture 26 - Velocity distribution

Lecture 27 - Body waves

Lecture 28 - Core Phases

Lecture 29 - Velocity structure of upper mantle and lower mantle

Lecture 30 - Anisotropic earth structure

Lecture 31 - Anisotropic earth structure (Continued...)

[Lecture 53 - Seismology and Plate tectonics, Spreading centers, Subduction zones](#)

[Lecture 54 - Seismology and Plate tectonics, Spreading centers, Subduction zones \(Continued...\)](#)

[Lecture 55 - Seismology and Plate tectonics, Spreading centers, Subduction zones \(Continued...\)](#)

[Lecture 56 - Numerical Problems in Seismology](#)

[Lecture 57 - Numerical Problems in Seismology \(Continued...\)](#)

Lecture 1 - Introduction and significance

Lecture 2 - Engineering geological ground, concept and categorization

Lecture 3 - Geomaterial: Rock, rock material and rock strata, concept of stress, deformation ...

Lecture 4 - Stress-strain behaviour and mechanical parameters of rocks

Lecture 5 - Geomorphology of river valley and mountainous regions and landforms

Lecture 6 - Different types of water and distribution of water, different type of rocks and ...

Lecture 7 - Surface and subsurface water and their interaction with geoground

Lecture 8 - Weathering processes and classification

Lecture 9 - Chemical weathering and impact of weathering

Lecture 10 - Weatherability and weathering indices

Lecture 11 - Characteristic of rocks and rock strata and some physical property

Lecture 12 - Common physical attributes of geomaterials

Lecture 13 - Engineering properties of rocks

Lecture 14 - Geotechnical characteristic of joint and approach for rock mass classification

Lecture 15 - Rock mass classification

Lecture 16 - About construction materials and dimensional stone

Lecture 17 - Crushed stone and suitability of rocks as construction materials

Lecture 18 - Aggregate and deleterious materials

Lecture 19 - Pozzolan and soil

Lecture 20 - Cement-aggregate reaction

Lecture 21 - Concept and classification of dams

Lecture 22 - Classification of dams based on materials used

Lecture 23 - Classification of dam based on design and function

Lecture 24 - Arch dams and classification dams based on use and function and technical ...

Lecture 25 - Forces acting on dam and engineering geological characteristics for dam construction

Lecture 26 - About tunnels and classification of tunnels

Lecture 27 - Tunnelling methods

Lecture 28 - Treatments

Lecture 29 - Anchoring of rock strata : grouting

Lecture 30 - Anchoring of rock strata : rock bolting

Lecture 31 - Categorization of major geological structures affecting stability of engineering ...

- Lecture 32 - Major geological structures Fold, Faults, joints
- Lecture 33 - Major geological structures: sedimentary structures, unconformity and effect ...
- Lecture 34 - Effects of beddings, folds, faults, joints and unconformity on stability of dams
- Lecture 35 - Effects of beddings, folds, faults, joints and unconformity on ground control ...
- Lecture 36 - Rock-load/ground pressure, factors affecting ground pressure
- Lecture 37 - Methods for determination of rock load: empirical approaches
- Lecture 38 - Methods for determination of rock load: empirical, semi-empirical approaches
- Lecture 39 - Methods for determination of rock load: Structural defect and rock-support ...
- Lecture 40 - Unified approach, support system, and mechanics of rock bolt working
- Lecture 41 - About road and highway features and pavement
- Lecture 42 - Stress distributions and engineering geological facets of new road/highway alignments
- Lecture 43 - About bridges, classifications and working mechanism
- Lecture 44 - Engineering geological facets of bridges and material quality
- Lecture 45 - Building, building foundation and foundation strata
- Lecture 46 - Landslide
- Lecture 47 - Landslide Hazards Zonation, causes and mitigation
- Lecture 48 - Slope stability aspects of landslide
- Lecture 49 - Earthquakes
- Lecture 50 - Induced seismicity
- Lecture 51 - Sea, seacoast, features and agents
- Lecture 52 - Wave propagations and concept of surf zones and breaking of waves
- Lecture 53 - Waves propagation in different depth and wave mechanics
- Lecture 54 - Erosion induced and deposition assisted sea landforms
- Lecture 55 - Sea shore hazards, mitigation and protective structures
- Lecture 56 - Energy and introductory aspects of geothermal energy
- Lecture 57 - Geothermal resources and enhanced geothermal systems
- Lecture 58 - Geotechnical facets of gas hydrate
- Lecture 59 - Engineering geological facets of CBM and shale gas
- Lecture 60 - Engineering geological aspect of carbon capture, usage and storage (CCUS)

Lecture 1 - Sources and characteristics of industrial wastewater

Lecture 2 - Sources and characteristics of industrial wastewater

Lecture 3 - Wastewater Management

Lecture 4 - Design Aspects of Equalization Tank

Lecture 5 - Neutralization and Proportioning

Lecture 6 - Ion Exchange Process

Lecture 7 - Ion Exchange Process

Lecture 8 - Ion Exchange Process

Lecture 9 - Adsorption Process

Lecture 10 - Adsorption Process

Lecture 11 - Gas Transfer and Air Stripping (Ammonia Removal)

Lecture 12 - Gas Transfer and Air Stripping (Ammonia Removal)

Lecture 13 - Advanced oxidation processes

Lecture 14 - Advanced oxidation processes

Lecture 15 - Advanced oxidation processes

Lecture 16 - Advanced oxidation processes

Lecture 17 - Membrane processes for wastewater treatment

Lecture 18 - Membrane processes for wastewater treatment

Lecture 19 - Membrane processes for wastewater treatment

Lecture 20 - Membrane processes for wastewater treatment

Lecture 21 - Coagulation, Precipitation and Heavy Metal Removal

Lecture 22 - Coagulation, Precipitation and Heavy Metal Removal

Lecture 23 - Coagulation, Precipitation and Heavy Metal Removal

Lecture 24 - Coagulation, Precipitation and Heavy Metal Removal

Lecture 25 - Coagulation, Precipitation and Heavy Metal Removal

Lecture 26 - Treatment and disposal of sludge

Lecture 27 - Treatment and disposal of sludge

Lecture 28 - Treatment and disposal of sludge

Lecture 29 - Treatment and disposal of sludge

Lecture 30 - Treatment and disposal of sludge

Lecture 31 - Treatment of wastewater produced from Distillery and Dairy Industries

Lecture 32 - Treatment of wastewater produced from Distillery and Dairy Industries

Lecture 33 - Treatment of wastewater produced from Distillery and Dairy Industries

Lecture 34 - Treatment of wastewater produced from Distillery and Dairy Industries

Lecture 35 - Treatment of wastewater produced from Distillery and Dairy Industries

Lecture 36 - Treatment of wastewater produced from Tannery and Pulp and Paper

Lecture 37 - Treatment of wastewater produced from Tannery and Pulp and Paper

Lecture 38 - Treatment of wastewater produced from Tannery and Pulp and Paper

Lecture 39 - Treatment of wastewater produced from Tannery and Pulp and Paper

Lecture 40 - Treatment of wastewater produced from Tannery and Pulp and Paper

Lecture 41 - Treatment of wastewater produced from Textile and Dye and Fertilizers

Lecture 42 - Treatment of wastewater produced from Textile and Dye and Fertilizers

Lecture 43 - Treatment of wastewater produced from Textile and Dye and Fertilizers

Lecture 44 - Treatment of wastewater produced from Textile and Dye and Fertilizers

Lecture 45 - Treatment of wastewater produced from Textile and Dye and Fertilizers

Lecture 46 - Treatment of wastewater produced from Refineries and Iron and Steel (Coke Ovens)

Lecture 47 - Treatment of wastewater produced from Refineries and Iron and Steel (Coke Ovens)

Lecture 48 - Treatment of wastewater produced from Refineries and Iron and Steel (Coke Ovens)

Lecture 49 - Treatment of wastewater produced from Refineries and Iron and Steel (Coke Ovens)

Lecture 50 - Treatment of wastewater produced from Refineries and Iron and Steel (Coke Ovens)

Lecture 51 - Treatment of wastewater produced from Pharmaceutical industry

Lecture 52 - Treatment of wastewater produced from Pharmaceutical industry

Lecture 53 - Treatment of wastewater produced from Pharmaceutical industry

Lecture 54 - Treatment of wastewater produced from Pharmaceutical industry

Lecture 55 - Treatment of wastewater produced from Pharmaceutical industry

- Lecture 1 - What is Project Management? Is Project Management an Art/Science ?
- Lecture 2 - Objectives of a Project, Scientific Way of Managing of Objectives
- Lecture 3 - Course Scope and Plan, Questions and Discussions
- Lecture 4 - Construction Industry and National Growth
- Lecture 5 - Project Stakeholders, Project Phases, Project Organization
- Lecture 6 - Project Scheduling Levels (Scheduling Engineer Responsibilities)
- Lecture 7 - Time Management - Overview
- Lecture 8 - Basics of Work Breakdown Structure (WBS)
- Lecture 9 - Tools for Time Management
- Lecture 10 - Gantt / Bar Chart - History, Representation, Progress Monitoring, Uses, Steps to draw a Bar Chart
- Lecture 11 - Develop a Bar Chart (Exercise)
- Lecture 12 - Bar Charts for Resource Usage, Pros and Cons
- Lecture 13 - Duration Estimation - Types, Inputs, Methods, Parametric Estimation
- Lecture 14 - Factors influencing Productivity, Example for Ideal Productivity, Factored Productivity and Working Time Factor
- Lecture 15 - Piling Activity Example, Applicability of different methods to Estimate Activity Duration
- Lecture 16 - Summary of Key Topics, Types of Networks
- Lecture 17 - Networks - Introduction, Techniques
- Lecture 18 - Representing Results in a Bar Chart, AON Example-2
- Lecture 19 - Introduction to Floats, Types of Floats and Example-1 Discussion
- Lecture 20 - Example 4, Usage of Floats for Project Decisions
- Lecture 21 - Two-Span Bridge : Activity Identification and Duration Estimation (Continued...)
- Lecture 22 - Two-Span Bridge : Activity Identification and Duration Estimation
- Lecture 23 - Two-Span Bridge : Activity- Duration- Predecessors
- Lecture 24 - Review Network Analysis Concepts, Apply Network Analysis to Two-Span Bridge (Continued...)
- Lecture 25 - Two-Span Bridge : Network Analysis
- Lecture 26 - Two-Span Bridge : Resource Constraints in Network Logic
- Lecture 27 - Fast-Tracking vs Crashing, Relationship between Activity Direct Cost and Activity Duration - Assumptions
- Lecture 28 - Time-Cost trade-off : ABCD Example Project, Steps for Crashing
- Lecture 29 - Time-Cost trade-off : Class Exercise-2
- Lecture 30 - Time-Cost trade-off : Problem-3, Tabulation Approach
- Lecture 31 - Incorporating Factors such as Bonus and Penalty; Problem-4

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 32 - What is Resource?, Influence of Resources on Schedule, Two-Span Bridge Example, Resource Decisions; ABCD Example Project; Resource Over-Allocation; Example-2

Lecture 33 - Projects and Resources, Example of Two Resources, Exercise, Two-Span Bridge Example

Lecture 34 - Review Problem-1; Problem-2 (Cash Resource); Resolving Over-Allocation

Lecture 35 - Problem 1 - Two Resources; Resolving Resource Allocation Problems

Lecture 36 - Resource Profile Requirements

Lecture 37 - Resource Leveling - Example Network

Lecture 38 - Minimum Moment Concept

Lecture 39 - Applying Improvement Factor - Illustration

Lecture 40 - Introduction to Precedence Diagramming Method (PDM)

Lecture 41 - PDM network representation and its issues, Network Calculation

Lecture 42 - PDM – Problem #1

Lecture 43 - Issues in PDM, Negative Lags, Problem #2 Solution

Lecture 44 - PDM – Analysis with non-continuous duration, Floats

Lecture 45 - Defining Relationship (Based on Construction Method) - Simple Shed

Lecture 46 - Project Monitoring & Control – Typical Project Time Monitoring Process, Levels and Frequency of updates

Lecture 47 - Project Control Process, Daily Progress Report, Macro Level Update- Data Need, Standard Progress Reports

Lecture 48 - Application: Two Span Bridge – ES Schedule

Lecture 49 - Review of Key Issues in Project Monitoring, Earned Value Concept Through Examples

Lecture 50 - Basic Earned Value Definitions and Terminology, Summary

Lecture 51 - Uncertainty in Project Schedules

Lecture 52 - PERT Background & Assumptions, Stepwise Procedure

Lecture 53 - PERT Example Problem, Summary

Lecture 54 - Course Conclusion

Lecture 55 - Emerging Trends / Tools in Project Planning

Lecture 56 - Industry Perspective – Prof. N. Raghavan

Lecture 57 - Final Exam Pattern, Acknowledgements

Lecture 1 - Module 1: Introduction of Structural Dynamics

Lecture 2 - Module 2: Types of Analysis

Lecture 3 - Module 3: Degrees of Freedom

Lecture 4 - Module 4: Vibrations of SDOF Systems

Lecture 5 - Module 5: Methods Solution of Equilibrium Equation

Lecture 6 - Module 6: UnDamped free Vibration

Lecture 7 - What is MATLAB?

Lecture 8 - Getting Started with MATLAB Online

Lecture 9 - MATLAB Variables

Lecture 10 - MATLAB as a Calculator

Lecture 11 - MATLAB Functions

Lecture 12 - Creating Vectors

Lecture 13 - Creating Uniformly Spaced Vectors (Colon Operator)

Lecture 14 - Creating Uniformly Spaced Vectors (Linspace)

Lecture 15 - Accessing Elements of a Vector

Lecture 16 - Calculations with Vectors

Lecture 17 - Creating Matrices

Lecture 18 - Matrix Creation Functions

Lecture 19 - Accessing Elements of a Matrix

Lecture 20 - Matrix Multiplication

Lecture 1 - Why this course?

Lecture 2 - Concepts and equations in this course

Lecture 3 - Objectives and prerequisite

Lecture 4 - Linear Algebra

Lecture 5 - Vector Algebra

Lecture 6 - Representation of Vector

Lecture 7 - Concept of Force

Lecture 8 - Definition of a body

Lecture 9 - Motion and Displacement field

Lecture 10 - Traction

Lecture 11 - Properties of traction

Lecture 12 - Definition of stress tensor and linear function

Lecture 13 - Tensor Algebra

Lecture 14 - Meaning of components of the stress tensor

Lecture 15 - Transformation of stress components

Lecture 16 - Mohr's Circle derivation

Lecture 17 - Example 1: Construction of Mohr's circle

Lecture 18 - Example 2: Extremum normal and shear stress

Lecture 19 - Example 3: Transformation of stress components

Lecture 20 - Uniaxial stress

Lecture 21 - Hydrostatic, pure shear and deviatoric stress

Lecture 22 - Biaxial and Plane state of stress

Lecture 23 - Extreme stress for 3D stresses

Lecture 24 - Extremum shear stress

Lecture 25 - Stresses in the Octahedral plane

Lecture 26 - 2D Equilibrium equations

Lecture 27 - 3D Equilibrium equations

Lecture 28 - Stretch ratio and strain

Lecture 29 - Curves and arc Length

Lecture 30 - Gradient

Lecture 31 - Deformation and displacement Gradient

Lecture 32 - Right Cauchy Green Deformation tensor

Lecture 33 - Homogeneous deformation

Lecture 34 - Engineering strain

Lecture 35 - Change in Angle

Lecture 36 - Transformation of strain components/ Strain Rosette

Lecture 37 - Compatibility condition

Lecture 38 - Constitutive relation

Lecture 39 - Young's Modulus and Poisson's Ratio

Lecture 40 - Shear Modulus

Lecture 41 - Bulk Modulus

Lecture 42 - Restriction on material parameters

Lecture 43 - Thermal strain

Lecture 44 - Strain energy, load potential and total potential

Lecture 45 - Stepped shaft subjected to axial force

Lecture 46 - Inhomogeneous bar subjected to axial force

Lecture 47 - Stepped shaft subjected to raise in temperature

Lecture 48 - Traction in member subjected to bending

Lecture 49 - Governing equilibrium equations

Lecture 50 - Displacement field

Lecture 51 - Bending equation

Lecture 52 - Radius of curvature

Lecture 53 - Shear force and bending moment diagram

Lecture 54 - Variation of axial stress

Lecture 55 - Deflected shape and rotation of cross section

Lecture 56 - Expression to find shear stress

Lecture 57 - Finding centroid of a cross section

Lecture 58 - Parallel axis theorem and its application

Lecture 59 - Vertical shear stress in I section

Lecture 60 - Horizontal shear stress in I section

Lecture 61 - Connection design

Lecture 62 - Definition of shear center

Lecture 63 - Shear center of Channel section

Lecture 64 - Expression to find shear center

- Lecture 65 - Shear force and bending moment diagram
- Lecture 66 - Deflected shape and rotation of cross section
- Lecture 67 - Finding allowable load
- Lecture 68 - Modified bending equation
- Lecture 69 - Bending of a composite beam
- Lecture 70 - Connection design
- Lecture 71 - Moment of Intertia about arbitrarily oriented axis
- Lecture 72 - Example: Angle section
- Lecture 73 - Bending equation for bending about principal axis
- Lecture 74 - Bending equation about arbitrary axis
- Lecture 75 - Neutral axis
- Lecture 76 - Load not about principal axis
- Lecture 77 - Load about principal axis
- Lecture 78 - Displacement field
- Lecture 79 - Torsion equation
- Lecture 80 - Example problems
- Lecture 81 - Expression relating angle of twist with torsion and shear stress
- Lecture 82 - Example problems: Open sections
- Lecture 83 - Thin walled closed sections
- Lecture 84 - Example problems: Thin walled sections
- Lecture 85 - Cylindrical polar coordinate system
- Lecture 86 - Displacement field
- Lecture 87 - Governing differential equation and solution
- Lecture 88 - Example problems : Thick walled cylindrical vessel
- Lecture 89 - Thin walled pressure vessels
- Lecture 90 - General Principals
- Lecture 91 - Different failure modes
- Lecture 92 - Tresca Condition
- Lecture 93 - vonMises condition
- Lecture 94 - Maximum normal stress or rankine condition
- Lecture 95 - Mohr - Columb condition
- Lecture 96 - Drucker-Prager Condition
- Lecture 97 - General Concepts

[Lecture 98 - Euler critical load for simply supported column](#)

[Lecture 99 - Euler critical load for column with any boundary condition](#)

[Lecture 100 - Secant formula](#)

[Lecture 101 - Pressure vessel and failure theory](#)

[Lecture 102 - Determination of maximum load carrying capacity of a simple truss](#)

[Lecture 74 - Glass Processing - Applications, Innovations and Futuristic Trends - Part II](#)

[Lecture 75 - Sustainability on Glass Processing](#)

Lecture 1 - Calcium sulfoaluminate cement-based binder: Properties and application

Lecture 2 - Micro-structural characterisation of cementitious materials - Part 1

Lecture 3 - Micro-structural characterisation of cementitious materials - Part 2

Lecture 4 - Micro-structural characterisation of cementitious materials - Part 3

Lecture 5 - Interview with Prof Karen Scrivener

Lecture 6 - Performance of Fiber reinforced materials

Lecture 7 - Ultra-High performance concrete (UHPC): Material design and properties - Part 1

Lecture 8 - Ultra-High performance concrete (UHPC): Material design and properties - Part 2

Lecture 9 - Closed-Loop testing - Part 1

Lecture 10 - Closed-Loop testing - Part 2

Lecture 11 - Uni-axial tensile test of textile reinforced concrete (TRC) panel

Lecture 12 - Fiber reinforced concrete: Notched beam flexural test

Lecture 13 - Strain softening response of concrete Under uniaxial compression

Lecture 14 - Tension test of 7-wire steel strand

Lecture 15 - Bond Test of Strand-concrete System

Lecture 16 - Interview with Prof. S. P. Shah

Lecture 17 - Introduction to concrete durability

Lecture 18 - Sulphate attack of concrete

Lecture 19 - Development and performance approach for durability and service life prediction for structures

Lecture 20 - Colorimetric test to assess carbonation resistance in concrete

Lecture 21 - Experiments on durability index: Rapid chloride permeability test, Oxygen permeability test, and Water Sorptivity test

Lecture 22 - Prof. Mark Alexander

Lecture 23 - Chloride induced corrosion and service life of reinforced concrete structures - Part 1

Lecture 24 - Chloride induced corrosion and service life of reinforced concrete structures - Part 2

Lecture 25 - Corrosion control and cathodic protection of steel reinforcement: Past, present, and future

Lecture 26 - LCA of cement and concrete - Part 1

Lecture 27 - LCA of cement and concrete - Part 2

Lecture 28 - Chloride threshold testing using linear polarization resistance (LPR) and electrochemical impedance spectroscopy (EIS)

Lecture 29 - Interview with Prof George Sergi

- Lecture 14 - Productivity Measurement and Improvement, Construction Productivity, Productivity levels
- Lecture 15 - What is Productivity, Production?; Illustration
- Lecture 16 - Productivity and Production Impact; Visualizing Activity Productivity and Production Performance
- Lecture 17 - Profit, ROCE, Influences on Operational Productivity; Operational view vs. System view, Summary
- Lecture 18 - Outline, Planning and monitoring levels; Productivity Measurement System
- Lecture 19 - Measuring Output - Level of Effort (LOE)
- Lecture 20 - Productivity and Production Calculations: daily, weekly, cumulative
- Lecture 21 - Productivity and Production Calculations: Performance Evaluation
- Lecture 22 - Productivity and Production Calculations: Workhour Forecast and Analysis of Trends
- Lecture 23 - Factors Influencing Productivity, Productivity Improvement Approach, Summary
- Lecture 24 - Sampling/ Surveying Techniques - Data Sources in Construction
- Lecture 25 - Construction Activity with Workers doing VA/ NVAN/ NVA; WS vs PMS; Work Sampling
- Lecture 26 - Sampling basics, Sampling in construction
- Lecture 27 - Steps to Conduct a Work Sampling Study; WS Outcomes
- Lecture 28 - Illustration of Tour-based Work Sampling Approach
- Lecture 29 - Illustration of Crew-based Work Sampling Approach
- Lecture 30 - Explore relationship between WS Categories and Productivity; Summary
- Lecture 31 - Sampling/ Surveying Techniques - Foreman delay survey

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

- Lecture 32 - Sampling/ Surveying Techniques - Foreman delay survey - Implementation
- Lecture 33 - Foreman delay survey - Illustrations; Comparison - PMS vs WS vs FDS - discussion
- Lecture 34 - Value Stream, Value Stream Mapping (VSM), System vs Process, References
- Lecture 35 - Illustration: Value and Value Stream in Food Delivery
- Lecture 36 - Value, Value Stream, VSM/PM, Language, Basic VSM - current state and future state
- Lecture 37 - Key steps for VSM, Work: Degrees of Granularity, Measurement Metrics
- Lecture 38 - VSM - Example 1 (Reinforcement)
- Lecture 39 - VSM - Example 2 (Blockwork); Summary
- Lecture 40 - Flow Process Chart, Symbols, Process mapping - steps and timing, Measurement metrics
- Lecture 41 - Process mapping - Illustration: Reinforcement shifting
- Lecture 42 - VSM vs PM; Process Flow chart - variations; Swim-lane diagrams; Summary
- Lecture 43 - Understand the Basics of 5S, Explanations and 5S Steps
- Lecture 44 - Understand Each -S- in Detail - Sort, Set in Order, Shine
- Lecture 45 - Understand Each -S- in Detail - Standardize, Sustain
- Lecture 46 - 5S: Key Points, Benefits, Signs of a 5S Site
- Lecture 47 - Experiment 5S with Yourself First, Project Implementation, Facilitations, Why 5S May Fail?, Recap
- Lecture 48 - Understand the Applications of 5S through Case Studies\_2 cases
- Lecture 49 - Understand the Applications of 5S through Case Studies\_3 cases
- Lecture 50 - Understand the Applications of 5S through Case Study - Ms Diamond Barretto (Godrej Construction)
- Lecture 51 - Current Project Performance, Workflow Variation, Traditional PM vs Lean Production Management
- Lecture 52 - Some Key Lean Concepts, Focusing on frontline Execution, CPS - Collaborative Planning System
- Lecture 53 - CPS Process, Overall Schedules (Master Schedule,Phase Schedule,LAP, Weekly Plan),Constraint Analysis
- Lecture 54 - Collaborative -Pull- Planning, Percentage Plan Completed (PPC), Daily Huddle, Variance Analysis, RCA
- Lecture 55 - Lean Work Structuring
- Lecture 56 - Impact of PPC on Productivity, Key aspects,Advantages,The Necessary Conditions,Blocks - CPS,Summary
- Lecture 57 - COLPLASSE: Look-Ahead Plan, Constraint Analysis, Weekly Plan, Summary
- Lecture 58 - Lean Project Delivery System, Conclusion
- Lecture 59 - Understand the Applications of CPS/LPS through Case Studies
- Lecture 60 - CPS/LPS implementation in Construction Projects through a Panel of Experts - Part 1
- Lecture 61 - CPS/LPS implementation in Construction Projects through a Panel of Experts - Part 2
- Lecture 62 - CPS/LPS implementation in Construction Projects through a Panel of Experts - Part 3
- Lecture 63 - Introduction of Big Room Approach, Some Requirements for Efficient Working, Virtual BR Meetings
- Lecture 64 - Big Room Approach through Case Studies

Lecture 1 - What is Geographic Information Systems ?

Lecture 2 - Different components of GIS

Lecture 3 - Different types of vector data and concept of topology

Lecture 4 - Raster data models and comparisons with vector

Lecture 5 - TIN data model and comparisons with raster

Lecture 6 - Non-spatial data (attributes) and their type

Lecture 7 - Raster data compression techniques

Lecture 8 - Spatial database systems and their types

Lecture 9 - Pre-processing of spatial datasets

Lecture 10 - Geo-referencing

Lecture 11 - Different map projections

Lecture 12 - Spatial interpolation techniques

Lecture 13 - Digital Elevation Models and different types of resolutions

Lecture 14 - Quality assessment of freely available DEMS

Lecture 15 - GIS analysis - Part 1

Lecture 16 - GIS analysis - Part 2 (Overlaying Operations)

Lecture 17 - GIS analysis - Part 3 (Buffer Analysis)

Lecture 18 - Classification Methods

Lecture 19 - Errors in GIS and Key elements of maps

Lecture 20 - Limitations of GIS

Lecture 1 - Solar Geometry

Lecture 2 - Climate Classification

Lecture 3 - Thermal Comfort in Built Environment - 1

Lecture 4 - Thermal Comfort in Built Environment - 2

Lecture 5 - Thermal Adaptation

Lecture 6 - Bioclimatic Assessment

Lecture 7 - Thermal Performance of Building Envelop

Lecture 8 - Thermal Performance of Building Envelop - Indices and Measures (1/2)

Lecture 9 - Thermal Performance of Building Envelop - Indices and Measures (2/2)

Lecture 10 - Glazing and Shading Systems

Lecture 11 - Shading Analysis

Lecture 12 - Energy Efficiency and Simulation

Lecture 13 - Building Acoustics - Basics

Lecture 14 - Sound Propagation

Lecture 15 - Acoustic Quality Indicators (1/2)

Lecture 16 - Acoustic Quality Indicators (2/2)

Lecture 17 - Acoustic Design Considerations

Lecture 18 - Acoustic Materials

Lecture 19 - Lighting - Basics

Lecture 20 - Lighting – Design Concepts

Lecture 1 - Introduction (GPS Surveying and Applications)

Lecture 2 - GPS System

Lecture 3 - GPS Signal (Civilian Perspective)

Lecture 4 - GPS Receiver

Lecture 5 - GPS Software

Lecture 6 - GPS Position

Lecture 7 - GPS Positioning (Principle and Methods)

Lecture 8 - Field demonstration of GPS Positioning Method

Lecture 9 - GPS Observables (Types, Errors and Quality)

Lecture 10 - Errors in GPS Observables (Systematics Errors)

Lecture 11 - GPS Data Pre-Processing - I

Lecture 12 - GPS Data Pre-Processing - II

Lecture 13 - GPS Data Processing - I

Lecture 14 - GPS Data Processing - II

Lecture 15 - Quality Assessment of GPS Surveying

Lecture 16 - Procedure of GPS Surveying - I

Lecture 34 - Concept of digital elevation model (DEM) and how it is represented

Lecture 35 - Demonstration through GIS software

Lecture 36 - Various techniques to generate digital elevation model - 1

Lecture 37 - Various techniques to generate digital elevation model - 2

Lecture 38 - Various techniques to generate digital elevation model - 3

Lecture 39 - Digital Elevation Models and different types of resolutions

Lecture 40 - Demonstration through GIS software

Lecture 41 - How to assess quality of a DEM?

Lecture 42 - Integration of DEMs with satellite data

Lecture 43 - Demonstration through GIS software...

Lecture 44 - Common derivatives of DEMs - Slope and aspect - 1

Lecture 45 - Common derivatives of DEMs - Slope and aspect - 2

Lecture 46 - Common derivatives of DEMs - Slope and aspect - 3

Lecture 47 - Demonstration through GIS software

Lecture 48 - DEMs derivatives - 1

Lecture 49 - DEMs derivatives - 2

Lecture 50 - DEMs derivatives - 3

Lecture 51 - DEMs derivatives - 4

Lecture 52 - Shaded relief models and their applications

Lecture 53 - DEM based Surface Hydrologic Modelling - 1

Lecture 54 - DEM based Surface Hydrologic Modelling - 2

Lecture 55 - DEMs and Dam Simulation and its application in groundwater hydrology

Lecture 56 - Applications of DEMs in Viewshed and Flood Hazard Mapping

Lecture 57 - Applications of DEMs in solar and wind energy potential estimations

Lecture 58 - DEMs Sources, limitations and future of Digital Elevation Models

Lecture 59 - Errors in GIS and key elements of maps

Lecture 60 - Limitations of GIS

- Lecture 1 - Importance of water and wastewater treatment
- Lecture 2 - Life expectancy and real-world scenario
- Lecture 3 - Course outline
- Lecture 4 - Review of fundamentals
- Lecture 5 - Mass balance
- Lecture 6 - Mass Balance: Batch reactor, CSTR, and Plug flow reactors
- Lecture 7 - Mass balance: Comparison of CSTR and Plug flow reactor
- Lecture 8 - Mass Balance: Non ideal system and Water quality parameters
- Lecture 9 - Water quality: DO and ways to measure it
- Lecture 10 - Water quality: Nutrients in water
- Lecture 11 - Water quality: Total suspended solids and Pathogens
- Lecture 12 - Wastewater treatment plant: basic principals
- Lecture 13 - Wastewater treatment plant: Preliminary treatment
- Lecture 14 - Wastewater treatment plant: Sedimentation and basics
- Lecture 15 - Sedimentation: Discrete and Flocculant settling
- Lecture 16 - Design of primary settling tank
- Lecture 17 - Biological treatment: BOD and Nutrient removal
- Lecture 18 - Analysis of biological removal process(ASP)
- Lecture 19 - Activated sludge process: Material balance for aeration basin
- Lecture 20 - Oxygen transfer: types and basic principals
- Lecture 21 - Relevance of F/M ratio and Design Parameters of Activated Sludge Process
- Lecture 22 - Sludge Bulking and Activated Sludge Variations
- Lecture 23 - Sequencing Batch Reactor
- Lecture 24 - Nitrogen Removal - I
- Lecture 25 - Nitrogen Removal - II and Phosphorus Removal - I
- Lecture 26 - Phosphorus Removal - II
- Lecture 27 - Secondary Clarifiers and Attached Growth System
- Lecture 28 - Disinfection
- Lecture 29 - Chlorination Disinfection
- Lecture 30 - Disinfection By-products (DBPs) and Disinfectant Removal
- Lecture 31 - Water demand

- Lecture 32 - Water Quality Parameters
- Lecture 33 - Overview of Water Treatment
- Lecture 34 - Physico-Chemical treatment
- Lecture 35 - Coagulation - I
- Lecture 36 - Coagulation - II
- Lecture 37 - Rapid Mixing
- Lecture 38 - Flocculation - I
- Lecture 39 - Flocculation - II
- Lecture 40 - Flocculent settling
- Lecture 41 - Filtration
- Lecture 42 - Depth filtration
- Lecture 43 - Design of Sand filter and Surface filtration
- Lecture 44 - Disinfection
- Lecture 45 - Hardness - I
- Lecture 46 - Hardness - II
- Lecture 47 - Lime-Soda softening - I
- Lecture 48 - Lime-Soda softening - II
- Lecture 49 - Recarbonation
- Lecture 50 - Types of Softening Basin and Adsorption
- Lecture 51 - Adsorption
- Lecture 52 - Adsorption Isotherms
- Lecture 53 - Ion Exchange
- Lecture 54 - Nanofiltration and RO
- Lecture 55 - Aeration: Removal of Fe and Mn
- Lecture 56 - Residual Management
- Lecture 57 - Sludge Thickening
- Lecture 58 - Stabilization of Sludge
- Lecture 59 - Anaerobic and Aerobic digestion of sludge
- Lecture 60 - Conditioning, Dewatering and Disposal of Sludge

Lecture 1 - Introduction

Lecture 2 - Minerals and Rock Classes

Lecture 3 - Mineral Identification Procedure

Lecture 4 - Rock Identification Procedure

Lecture 5 - Geological Structures and Discontinuities

Lecture 6 - Spherical Representation of Geological Data - 1

Lecture 7 - Spherical Representation of Geological Data - 2

Lecture 8 - Spherical Representation of Geological Data - 3

Lecture 9 - Application of Graphical Representation of Geological Data

Lecture 10 - Laboratory Testing of Rocks - Sampling

Lecture 11 - Laboratory testing of Rocks - Preparations and UCS

Lecture 12 - Factors Influencing UCS and Modes of Failure in Compression

Lecture 13 - Failure Mechanism and Post-Failure Behaviour in Compression, Indirect Method for UCS

Lecture 14 - Indirect Method for UCS, Brazilian Test, Schmidt Rebound Hardness Test

Lecture 15 - Sound Velocity Test, Slake Durability Test, Swelling Pressure and Free Swell Test and Void Index Test

Lecture 16 - Shear Tests - 1

Lecture 17 - Shear Tests - 2

Lecture 18 - Engineering Classification of Intact Rocks, Concept of Rock Mass, RQD

Lecture 19 - Concept of Rock Mass, Factors Affecting Discontinuities

Lecture 20 - Factors Affecting Discontinuities

Lecture 21 - Classification of Rock Mass: Rock Mass Rating (RMR) - 1

Lecture 22 - Classification of Rock Mass: Rock Mass Rating (RMR) - 2

Lecture 23 - Classification of Rock Mass: Rock Mass Quality (Q-system) - 1

Lecture 24 - Classification of Rock Mass: Rock Mass Quality (Q-system) - 2

Lecture 25 - Classification of Rock Mass: Geological Strength Index (GSI)

Lecture 26 - Strength Criteria for Isotropic and Anisotropic Rock - 1

Lecture 27 - Strength Criteria for Isotropic and Anisotropic Rocks -2, Mohr's Failure Theory

Lecture 28 - Mohr-Coulomb Failure Criterion

Lecture 29 - Mohr-Coulomb Failure Criterion, Coulomb Navier Failure Criterion

Lecture 30 - Concept of Instantaneous  $c$  and  $\phi$ : Balmer Approach

Lecture 31 - Empirical Failure Criteria: Basics of Regression Analysis

Lecture 32 - Hoek and Brown Criterion (1980)

Lecture 33 - Parameters of Failure Criteria

Lecture 34 - Failure Criteria for Rock Mass

Lecture 35 - Tunneling: Underground Excavations

Lecture 36 - Tunneling: Ground Conditions

Lecture 37 - Elastic Stress Distribution Around Circular Tunnels - 1

Lecture 38 - Elastic Stress Distribution Around Circular Tunnels - 2

Lecture 39 - Elastic Analysis of Circular Tunnels - Displacements

Lecture 40 - Thick Wall Cylinder in Biaxial Stress Field

Lecture 41 - Elasto-Plastic Stress Distribution Around Circular Tunnel

Lecture 42 - Underground Excavation Failure Mechanisms

Lecture 43 - Structurally Controlled Failure: Roof Failure

Lecture 44 - Structurally Controlled Failure: Sidewall Failures - 1

Lecture 45 - Structurally Controlled Failure: Sidewall Failures - 2

Lecture 46 - Rock Mass Support Interaction Analysis - 1

Lecture 47 - Rock Mass Support Interaction Analysis - 2

Lecture 48 - Rock Slope Stability

Lecture 49 - Rock Slope Stability - Plane Failure

Lecture 50 - Rock Slope Stability - Wedge Failure

Lecture 51 - Rock Slope Stability - Circular Failure

Lecture 52 - Rock Slope Stability - Toppling Failure - 1

Lecture 53 - Rock Slope Stability - Toppling Failure - 2

Lecture 54 - Rock Slope Stability - Toppling Failure - 3

Lecture 55 - Rock Slope Stabilization

Lecture 56 - Foundations on Weak Rocks

Lecture 57 - Ultimate Bearing Capacity Using Bell's Approach

Lecture 58 - Bearing Capacity from Classification Approaches and Based on UCS

Lecture 59 - Bearing Capacity Based on Plate Load test; Treatment of Foundations

Lecture 60 - Dam Foundation Problems

- Lecture 1 - Introduction to Scientific Computations - I
- Lecture 2 - Introduction to Scientific Computations - II
- Lecture 3 - Basic Concepts of Linear Algebra
- Lecture 4 - Polynomial Interpolation and Numerical Quadrature - I
- Lecture 5 - Polynomial Interpolation and Numerical Quadrature - II
- Lecture 6 - Polynomial Interpolation and Numerical Quadrature - III
- Lecture 7 - Polynomial Interpolation and Numerical Quadrature - IV
- Lecture 8 - Mathematical Modelling and Approximate Solutions - I
- Lecture 9 - Mathematical Modelling and Approximate Solutions - II
- Lecture 10 - Mathematical Modelling and Approximate Solutions - III
- Lecture 11 - Approximation via Variational Principles
- Lecture 12 - Introduction to the Finite Element Concept
- Lecture 13 - Finite Elements of  $C^0$  Continuity in 1-D - I
- Lecture 14 - Finite Elements of  $C^0$  Continuity in 1-D - II
- Lecture 15 - Finite Elements of  $C^0$  Continuity in 1-D - III
- Lecture 16 - Finite Elements of  $C^0$  Continuity in 1-D - IV
- Lecture 17 - Finite Elements of  $C^1$  Continuity in 1-D - I
- Lecture 18 - Finite Elements of  $C^1$  Continuity in 1-D - II
- Lecture 19 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - I
- Lecture 20 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - II
- Lecture 21 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - III
- Lecture 22 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - IV
- Lecture 23 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - V
- Lecture 24 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - VI
- Lecture 25 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - VII
- Lecture 26 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - VIII
- Lecture 27 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - IX
- Lecture 28 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - X
- Lecture 29 - Finite Elements of  $C^0$  Continuity in 2-D and 3-D - XI

Lecture 1 - Introduction to Transportation Systems - I

Lecture 2 - Introduction to Transportation Systems - II

Lecture 3 - Concept of Sustainability

Lecture 4 - Current Scenario of Transportation in India

Lecture 5 - Climate Change: Indicators and Impacts

Lecture 6 - Impacts of Transportation Systems - I

Lecture 7 - Impacts of Transportation Systems - II

Lecture 8 - Impacts of Transportation Systems - III

Lecture 9 - Impacts of Transportation Systems - IV

Lecture 10 - Impacts of Transportation Systems - V

Lecture 11 - Introduction to Environment Impact Assessment (EIA)

Lecture 12 - EIA Processes - I

Lecture 13 - EIA Processes - II

Lecture 14 - Methodologies of EIA

Lecture 15 - EIA Process in India

Lecture 16 - Global practices in EIA process

Lecture 17 - EIA Case Study - I

Lecture 18 - EIA Case Study - II

Lecture 19 - EIA Case Study - III

Lecture 20 - EIA Case Study - IV

Lecture 21 - EIA Case Study - V

Lecture 22 - Introduction of Land use

Lecture 23 - Land use Planning and Zoning

Lecture 24 - Transit Oriented Development (TOD)

Lecture 25 - TOD Implementation

Lecture 26 - TOD Case study-I: Section of Delhi Metro

Lecture 27 - TOD Case study-II: TOD planning for Belgrade, Serbia

Lecture 28 - TOD Case study-III: Naya Raipur

Lecture 29 - Introduction to Sustainable Transport Planning

Lecture 30 - Sustainable Transport Planning and Approaches-I: The Traditional Transport Planning Process

Lecture 31 - Sustainable Transport Planning and Approaches-II: The Contemporary Planning Process

Lecture 32 - Sustainable Transport Planning and Approaches-III: Management Strategies

Lecture 33 - Life Cycle Assessment (LCA): An Introduction

Lecture 34 - Life Cycle Assessment: Theory and Practice

Lecture 35 - LCA Case Study

Lecture 36 - Material Flow Analysis (MFA)

Lecture 37 - Material Flow Analysis: Case Study

Lecture 38 - Concept of Circular Economy

Lecture 39 - Circular Economy in Transport Sector

Lecture 40 - Modelling of Transport Emissions - I

Lecture 41 - Modelling of Transport Emissions - II

Lecture 42 - Dispersion Models for Transport Emissions

Lecture 43 - Traffic Noise Emission Models

Lecture 44 - Initiatives and Policies for Environmental Sustainability

Lecture 45 - National Clean Air Programme and Transport Sector

Lecture 46 - Decarbonizing the Transport Sector

Lecture 47 - Alternate Fuels and Sustainable Transportation

Lecture 48 - Electric Vehicles and Sustainability

Lecture 49 - Emerging Transport Technology - Hyperloop

Lecture 50 - Case Study-I: Bus Rapid Transit System (BRTS)

Lecture 51 - Case Study-II: Mass Rapid Transit (MRT) Systems

Lecture 52 - Case Study-III: Sustainability in Airports

Lecture 53 - Case Study-IV: Sustainable Water Transport

Lecture 54 - Case Study-V: Non-Motorized Transport (NMT)

Lecture 55 - openLCA - An LCA Tool

Lecture 56 - openLCA Application - Case Study

Lecture 57 - Material Flow Analysis Tool - STAN

Lecture 58 - Sustainability Indicators

Lecture 59 - Sustainable Transport Appraisal Rating (STAR)

Lecture 60 - Measuring Sustainability

Lecture 1 - Introduction to Air Pollution - I

Lecture 2 - Introduction to Air Pollution - II

Lecture 3 - Impact of Air Pollution on Human Health

Lecture 4 - Impact of Air Pollution on Vegetation and Animals

Lecture 5 - Impact of Air Pollution on Building Materials and Structures

Lecture 6 - Impact of Air Pollution on Atmosphere, Soil and Water Bodies

Lecture 7 - Sources and Classification of Air Pollutants

Lecture 8 - Atmospheric Formation and Fate of Air Pollutants

Lecture 9 - Meteorological Parameters and Air Pollution

Lecture 10 - Atmospheric Stability and Lapse Rates

Lecture 11 - Atmospheric Stability and Plume Behaviour

Lecture 12 - Boundary Layer, Mixing Height, Stack Height and Plume Rise

Lecture 13 - Status of Air Quality Monitoring in India

Lecture 14 - Air Quality Index (AQI)

Lecture 15 - Introduction to Air Quality Modelling

Lecture 16 - Gaussian Dispersion Model for Point Source

Lecture 17 - Gaussian Dispersion Model for Line Source and Area Source

Lecture 18 - Determination of Concentration of Pollutants using Gaussian Dispersion Model

Lecture 19 - Assimilative Capacity of an Airshed

Lecture 20 - Emission Inventory

Lecture 21 - Transport Emission Inventory

Lecture 22 - Emission Inventory for Industrial Sector

Lecture 23 - Emission Inventory for Agriculture Sector

Lecture 24 - Emission Inventory for Residential and Commercial Sectors

Lecture 25 - Application of Remote Sensing/Satellite-Based Data in Air Quality Management

Lecture 26 - Emission Inventory: Case Study

Lecture 27 - Methods of Source Apportionment

Lecture 28 - Source apportionment using Receptor Modeling

Lecture 29 - Indoor Air Quality: An Introduction

Lecture 30 - Specific Sources and Types of Indoor Air Pollutants

Lecture 31 - Health Impacts Due to Indoor Air Pollution

- Lecture 32 - Assessment of Exposure to Indoor Air Pollution
- Lecture 33 - Indoor Air Quality Modelling
- Lecture 34 - Technologies to Mitigate Indoor Air Pollution
- Lecture 35 - Personal Exposure to Fine Particles: A Case Study
- Lecture 36 - Indoor Air Quality in Nursery Buildings, UAE – Case Study
- Lecture 37 - Global and Regional Environmental Issues - Ozone Depletion
- Lecture 38 - Global and Regional Environmental Issues - Global Warming
- Lecture 39 - Global and Regional Environmental Issues - Climate Change
- Lecture 40 - Global and Regional Environmental Issues - Acid Rain
- Lecture 41 - Introduction to Air Pollution Control
- Lecture 42 - Air Pollution Control Devices - Part 1
- Lecture 43 - Air Pollution Control Devices - Part 2
- Lecture 44 - Air Pollution Control Devices - Part 3
- Lecture 45 - Air Pollution Control Devices - Part 4

- Lecture 49 - Air Pollution Legislations and Regulations
- Lecture 50 - National Policies for Managing the Ambient Air Quality (AAQ)
- Lecture 51 - International Environmental Treaties to Reduce Air Pollution and GHG Emissions
- Lecture 52 - Impact of Lockdown on Air Quality
- Lecture 53 - Sector Wise Mitigation Measures to Control Air Pollution
- Lecture 54 - Challenges and the Way Forward
- Lecture 55 - Sampling and Analysis of PM10 in Ambient Air
- Lecture 56 - Sampling and Analysis of PM2.5 in Ambient Air
- Lecture 57 - Sampling and Analysis of SO2 and NO2 in Ambient Air
- Lecture 58 - Stack Emission Monitoring using Isokinetic Sampling
- Lecture 59 - Indoor Air Quality Assessment using Multi Gas Monitor
- Lecture 60 - Sampling and Analysis of PM10 and PM2.5 using Spectrometer

Lecture 1 - Basics of Rock Engineering: Introduction

Lecture 2 - Basics of Rock Engineering: coring, sampling, UCS of intact rock

Lecture 3 - Basics of Rock Engineering: Tensile strength and shear strength of intact rock

Lecture 4 - Basics of Rock Engineering: Classification of intact rocks, concept of rock mass, RQD

Lecture 5 - Basics of Rock Engineering: Classification of rock mass - 1

Lecture 6 - Basics of Rock Engineering: Classification of rock mass: Q-system and GSI

Lecture 7 - Basics of Rock Engineering: Failure criteria for rocks - 1

Lecture 8 - Basics of Rock Engineering: Empirical failure criteria

Lecture 9 - Tunneling: Underground excavations

Lecture 10 - Tunneling: Ground conditions

Lecture 11 - Planning of and exploration for underground construction projects

Lecture 12 - Underground excavation failure mechanisms

Lecture 13 - Application of stereographic projection method: roof failure

Lecture 14 - Application of stereographic projection method: sidewall failures - 1

Lecture 15 - Application of stereographic projection method: sidewall failures - 2

Lecture 16 - Elastic stress distribution around circular tunnels - 1

Lecture 17 - Elastic stress distribution around circular tunnels - 2

Lecture 18 - Elastic analysis of circular tunnels-displacements

Lecture 19 - Thick wall cylinder in biaxial stress field

Lecture 20 - Stress distribution around non-circular openings in elastic ground conditions - 1

Lecture 21 - Stress distribution around non-circular openings in elastic ground conditions - 2

Lecture 22 - Stress distribution under different in-situ stress conditions: design principles

Lecture 23 - Stress distribution for multiple openings

Lecture 24 - Openings in laminated rocks - 1

Lecture 25 - Openings in laminated rocks - 2

Lecture 26 - Openings in laminated rocks - 3

Lecture 27 - Openings in laminated rocks - 4

Lecture 28 - Elasto-plastic analysis of tunnels: Tresca yield criterion - 1

Lecture 29 - Elasto-plastic analysis of tunnels: Tresca yield criterion - 2

Lecture 30 - Elasto-plastic analysis of tunnels: Mohr-Coulomb criterion

Lecture 31 - Application of rock mass classification system: Terzaghi's rock load theory - 1

- Lecture 32 - Application of rock mass classification system: Terzaghi's rock load theory - 2
- Lecture 33 - Application of rock mass classification system: rock mass rating (RMR)
- Lecture 34 - Tunnel hazards
- Lecture 35 - Tunnel hazards: squeezing ground conditions
- Lecture 36 - Application of rock mass classification system: rock mass quality system - 1
- Lecture 37 - Application of rock mass classification system: rock mass quality system - 2, NATM, NMT
- Lecture 38 - Modulus of deformation of rock mass using Q-system, rock mass number, plate loading test
- Lecture 39 - Modulus of deformation of rock mass: uni-axial jacking/plate jacking test
- Lecture 40 - Modulus of deformation of rock mass: radial jacking test and Goodman jack test
- Lecture 41 - Rock mass support interaction analysis: ground response and support reaction curves - 1
- Lecture 42 - Rock mass support interaction analysis: ground response and support reaction curves - 2
- Lecture 43 - Rock mass support interaction analysis: influencing factors, Ladanyi's E-P analysis
- Lecture 44 - Ladanyi's elasto-plastic analysis of tunnels: analysis of stresses and deformations
- Lecture 45 - Rock-support interaction analysis: required support line, analysis of available support
- Lecture 46 - Rock-support interaction analysis: for shotcrete/concrete lining and blocked steel sets
- Lecture 47 - Rock-support interaction analysis: for ungrouted rock bolts, grouted rock bolts/cables
- Lecture 48 - Calculation sequence for rock-support interaction analysis - 1
- Lecture 49 - Calculation sequence for rock-support interaction analysis - 2
- Lecture 50 - Calculation sequence for rock-support interaction analysis - example
- Lecture 51 - Methods of tunnel excavation, various support systems: shotcrete
- Lecture 52 - Shotcrete
- Lecture 53 - Various support systems: rock bolts
- Lecture 54 - Permeability and groutability - 1
- Lecture 55 - Permeability and groutability - 2
- Lecture 56 - Rock stress determination: flat jack test
- Lecture 57 - Rock stress determination: hydraulic fracturing technique
- Lecture 58 - Instrumentation and monitoring of tunnels - 1
- Lecture 59 - Instrumentation and monitoring of tunnels - 2
- Lecture 60 - Few case studies

Lecture 1 - Equations of motion using Hamilton's principle

Lecture 2 - Equations of motion for continuous systems and Rayleigh's quotient

Lecture 3 - Rayleigh Ritz method and method of weighted residuals

Lecture 4 - FEM: motivations. Analysis of axially vibrating rods and Euler-Bernoulli beams

Lecture 5 - Beam elements. Reference system. Assembly of matrices. Imposition of BCS. Final equation of motion

Lecture 6 - FE modelling of planar structures

Lecture 7 - FE modelling of planar structures (Continued...)

Lecture 8 - FRF-s and damping models-1

Lecture 9 - FRF-s and damping models-2

Lecture 10 - Material damping models. Dynamic stiffness and transfer matrices

Lecture 11 - Twisting of circular bars and rectangular bars. Analysis of grids

Lecture 12 - 3D frames

Lecture 13 - Mathematical preliminaries and terminologies; Euler's forward and backward difference methods

Lecture 14 - Forward and backward Euler method. Central difference method

Lecture 15 - Second order implicit methods

Lecture 16 - Energy conservation. Nonlinear systems

Lecture 17 - Model reduction schemes

Lecture 18 - Substructuring schemes

Lecture 19 - Plane stress models

Lecture 20 - Plane stress models (Continued...)

Lecture 21 - 3d Solid element

Lecture 22 - Axisymmetric models. Plate bending elements.

Lecture 23 - Plate bending elements (Continued...)

Lecture 24 - Plate bending elements (Continued...)

Lecture 25 - Plate bending elements (Continued...)

Lecture 26 - Introduction

Lecture 27 - Introduction (Continued...)

Lecture 28 - Nonlinear dynamical systems, fixed points and bifurcations

Lecture 29 - Energy methods in stability analysis

Lecture 30 - FEM for stability analysis. Euler-Bernoulli beam and general formulations

Lecture 31 - 3D beam element; plate element; imperfection sensitive structures; beams on elastic foundations; rings and arches

[Lecture 32 - Dynamic analysis of stability and analysis of time varying systems](#)

[Lecture 33 - Dynamic analysis of stability and analysis of time varying systems](#)

[Lecture 34 - FE modelling of vehicle structure interactions](#)

[Lecture 35 - Inverse response sensitivity analysis](#)

[Lecture 36 - Inverse response sensitivity analysis \(Continued...\)](#)

[Lecture 37 - Introduction and review of continuum mechanics](#)

[Lecture 38 - Review of measures of strain and stress; balance laws](#)

[Lecture 39 - Total and updated Lagrangian formulations](#)

[Lecture 40 - Closure](#)

Lecture 1 - Introduction

Lecture 2 - Earthquake hazard: Mitigation and preparedness

Lecture 3 - Different Earthquake Hazards

Lecture 4 - Different Earthquake Hazards (Continued...)

Lecture 5 - Earthquake Terminologies

Lecture 6 - Plate Tectonics

Lecture 7 - Faults; Seismic Sources

Lecture 8 - Types of Earthquakes; Causes of Earthquakes

Lecture 9 - Introduction to Wave Propagation

Lecture 10 - Seismic Wave propagation;

Lecture 11 - Instrumentation to record Earthquake

Lecture 12 - Seismic Sensors

Lecture 13 - Seismic Instrumentation in India

Lecture 14 - Seismic Instrumentation in India (Continued...)

Lecture 15 - Intensity scales of Earthquake

Lecture 16 - Road Damage Intensity Scale; and Seismic Vulnerability assessment

Lecture 17 - Quantification of Earthquake (magnitude)

Lecture 18 - Energy released due to earthquakes

Lecture 19 - Interpretation of Earthquake records; Baseline correction

Lecture 20 - Interpretation of Earthquake records (Continued...); Time Domain Parameters

Lecture 21 - Time Domain Parameters (Continued...)

Lecture 22 - Duration parameters; Duration Prediction Equations

Lecture 23 - Frequency Domain Characteristics; Response Spectrum

Lecture 24 - Fourier Spectrum

Lecture 25 - Seismic Source Parameters;

Lecture 26 - Time history; response Spectra (design); Stochastic models

Lecture 27 - Ground Motion Simulation models

Lecture 28 - Prediction Relationships

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

**NPTEL : NOC:Design and Pedagogy of the Introductory Programming Course (Computer Science and Engineering)**

**Co-ordinators : Prof. Abhiram G Ranade**

Lecture 1 - Course Overview

Lecture 2 - Introduction and Survey.0: The standard approach to introductory programming

Lecture 3 - Introduction and Survey.1: Experience with the standard approach

Lecture 4 - Introduction and Survey.2: Alternative approaches, Summary, and Conclusion

Lecture 5 - Basic Ideas in Our Approach.0: Introduction

Lecture 6 - Basic Ideas in Our Approach.1: Examples of translating manual algorithms to computer programs

Lecture 7 - Basic Ideas in Our Approach.2: More examples

Lecture 8 - Basic Ideas in Our Approach.3: Should we teach students (manual) problem solving strategies?

Lecture 9 - Basic Ideas in Our Approach.4: The design of the course

Lecture 10 - Basic Ideas in Our Approach.5: Remarks on individual topics - 1

Lecture 11 - Basic Ideas in Our Approach.6: Remarks on individual topics - 2, Conclusion

Lecture 12 - Pedagogy.0: Introduction and basic principles

Lecture 13 - Pedagogy.1: Scaffolding, Lesson Plan

Lecture 14 - Pedagogy.2: A quick tour of the course - 1

Lecture 15 - Pedagogy.3: Tour-2

Lecture 16 - Pedagogy.4: Tour-3, Conclusion

Lecture 17 - Advanced Programming Topics.0: Introduction, Organization of medium sized programs

Lecture 18 - Advanced Programming Topics.1: Advanced memory management, Standard Library

Lecture 19 - Advanced Programming topics.2: Object Oriented Programming, Concluding remarks

Lecture 20 - In class questions, Assignments, Examinations.0: In class questions and lab assignments

Lecture 21 - In class questions, Assignments, Examinations.1: Examinations

Lecture 22 - Summing up

Lecture 1 - Introduction - Part 1

Lecture 2 - Introduction - Part 2

Lecture 3 - Introduction - Part 3

Lecture 4 - Introduction - Part 4

Lecture 5 - Problem Solving using Computer - Part 1

Lecture 6 - Problem Solving using Computer - Part 2

Lecture 7 - Problem Solving using Computer - Part 3

Lecture 8 - Problem Solving using Computer - Part 4

Lecture 9 - Problem Solving using Computer - Part 5

Lecture 10 - Basic Elements of Program - Part 1

Lecture 11 - Basic Elements of Program - Part 2

Lecture 12 - Basic Elements of Program - Part 3

Lecture 13 - Basic Elements of Program - Part 4

Lecture 14 - Program Design - Part 1

Lecture 15 - Program Design - Part 2

Lecture 16 - Program Design - Part 3

Lecture 17 - Simple cpp Graphics

Lecture 18 - Conditional Execution - Part 1

Lecture 19 - Most general form of if - Part 2

Lecture 20 - More general form of conditions - Part 3

Lecture 21 - A somewhat large program example - Part 4

Lecture 22 - Switch statement and logical data - Part 5

Lecture 23 - Loops - Part 1

Lecture 24 - Mark averaging - Part 2

Lecture 25 - The break and continue statements - Part 3

Lecture 26 - The for statement - Part 4

Lecture 27 - Euclid's algorithm for GCD - Part 5

Lecture 28 - Correctness proof for GCD - Part 6

Lecture 29 - Computing Mathematical Functions - Part 1 : Taylor series

Lecture 30 - Computing Mathematical Functions - Part 2 : Numerical integration

Lecture 31 - Computing Mathematical Functions - Part 3 : Bisection Method

- Lecture 32 - Computing Mathematical Functions - Part 4 : Newton Raphson Method
- Lecture 33 - Loops in various applications - Part 1 : Loops in various applications brute force algorithms
- Lecture 34 - Loops in various applications - Part 2 : Finding Pythagorean Triples
- Lecture 35 - Loops in various applications - Part 3 : Modelling a system: bargaining
- Lecture 36 - Loops in various applications - Part 4 : Simulating a water tank
- Lecture 37 - Loops in various applications - Part 5 : Arithmetic on very large numbers
- Lecture 38 - Functions - Part 1 : Basics
- Lecture 39 - Functions - Part 2 : Examples
- Lecture 40 - Functions - Part 3 : Reference parameters
- Lecture 41 - Functions - Part 4 : Pointers
- Lecture 43 - Recursion - Part 1 : Introduction
- Lecture 44 - Recursion - Part 2 : Recursive objects, Tree drawing
- Lecture 45 - Recursion - Part 3 : How to think about recursion
- Lecture 46 - Virahanka Numbers - Part 1 : Introduction
- Lecture 47 - Virahanka Numbers - Part 2 : Recursive Program
- Lecture 48 - Virahanka Numbers - Part 3 : Iterative Program and Conclusion
- Lecture 49 - Program Organization and Functions - Part 1 : Introduction
- Lecture 50 - Program Organization and Functions - Part 2 : Splitting into files
- Lecture 51 - Program Organization and Functions - Part 3 : Namespaces
- Lecture 52 - Program Organization and Functions - Part 4 : How to use C++ without simplecpp
- Lecture 53 - Advanced Features of Functions - Part 1 : Introduction and passing one function to another
- Lecture 54 - Advanced Features of Functions - Part 2 : Lambda expressions
- Lecture 55 - Advanced Features of Functions - Part 3 : Default values to parameters
- Lecture 56 - Advanced Features of Functions - Part 4 : Function overloading and lecture conclusion
- Lecture 57 - Array Part-1 - Part 1 : Introduction
- Lecture 58 - Array Part-1 - Part 2 : Marks averaging problem
- Lecture 59 - Array Part-1 - Part 3 : Histogram computation
- Lecture 60 - Array Part-1 - Part 4 : Marks display variation
- Lecture 61 - Array Part-1 - Part 5 : Polynomial multiplication
- Lecture 62 - Array Part-1 - Part 6 : Queues in dispatching taxis
- Lecture 63 - Array Part-1 - Part 7 : More efficient Queues in dispatching taxis
- Lecture 64 - Array Part-1 - Part 8 : Disk intersection
- Lecture 65 - Array Part-1 - Part 9 : Arrays of graphical objects and conclusion

Lecture 66 - Array Part-2 - Part 1 : Introduction

Lecture 67 - Array Part-2 - Part 2 : Interpretation of `aname[index]`

Lecture 68 - Array Part-2 - Part 3 : Arrays and function calls

Lecture 69 - Array Part-2 - Part 4 : A function to sort an array

Lecture 70 - More on Arrays - Part 1 : Textual data

Lecture 71 - More on Arrays - Part 2 : Functions on character strings

Lecture 72 - More on Arrays - Part 3 : Two dimensional arrays

Lecture 73 - More on Arrays - Part 4 : Command Line Arguments

Lecture 74 - Arrays and recursion - Part 1 : Binary Search Introduction

Lecture 75 - Arrays and recursion - Part 2 : Binary search analysis

Lecture 76 - Arrays and recursion - Part 3 : Mergesort overview

Lecture 77 - Arrays and recursion - Part 4 : Merge function

Lecture 78 - Arrays and recursion - Part 5 : Mergesort conclusion

Lecture 79 - Structures - Part 1 : Definition and instantiation

Lecture 80 - Structures - Part 2 : Operations on structures

Lecture 81 - Structures - Part 3 : An example program

Lecture 82 - Structures - Part 4 : Pointers and lecture conclusion

Lecture 83 - Structures Part 2 - Part 1 : Introduction to Member functions

Lecture 84 - Structures Part 2 - Part 2 : Vectors from Physics

Lecture 85 - Structures Part 2 - Part 3 : Taxi dispatch

Lecture 86 - Classes - Part 1 : Introduction

Lecture 87 - Classes - Part 2 : Constructors

Lecture 88 - Classes - Part 3 : Operator overloading

Lecture 89 - Classes - Part 4 : Access control

Lecture 90 - Classes - Part 5 : Classes for graphics and input output

Lecture 91 - Classes - Part 6 : General remarks

Lecture 92 - Representing variable length entities - Part 1 : Introduction

Lecture 93 - Representing variable length entities - Part 2 : Heap memory basics

Lecture 94 - Representing variable length entities - Part 3 : Pitfalls of using heap memory

Lecture 95 - Representing variable length entities - Part 4 : Automating memory management

Lecture 96 - Representing variable length entities - Part 5 : Implementing a class with automated memory management - 1

Lecture 97 - Representing variable length entities - Part 6 : Implementing a class with automated memory management - 2

Lecture 98 - Representing variable length entities - Part 7 : Using the implemented class and conclusion

[Lecture 99 - The Standard Library - Part 1 : Class string](#)

[Lecture 100 - The Standard Library - Part 2 : Class vector](#)

[Lecture 101 - The Standard Library - Part 3 : Sorting vectors and arrays](#)

[Lecture 102 - The Standard Library - Part 4 : Classes map and unordered\\_map](#)

[Lecture 103 - The Standard Library - Part 5 : Iterators](#)

[Lecture 104 - Data structure based programming - Part 1 : Introduction](#)

[Lecture 105 - Data structure based programming - Part 2 : Set and pair classes](#)

[Lecture 106 - Data structure based programming - Part 3 : Implementation of standard library data structures](#)

[Lecture 107 - Data structure based programming - Part 4 : Composing data structures](#)

[Lecture 108 - Data structure based programming - Part 5 : typedef and lecture conclusion](#)

[Lecture 109 - Medium size programs - Part 1 : The new marks display program](#)

[Lecture 110 - Medium size programs - Part 2 : Manual algorithm for new marks display](#)

[Lecture 111 - Medium size programs - Part 3 : RSMTAB and rest of the program](#)

[Lecture 112 - Medium size programs - Part 4 : Sophisticated solutions to marks display](#)

[Lecture 113 - A graphical editor and solver for circuits - Part 1 : Outline](#)

[Lecture 114 - A graphical editor and solver for circuits - Part 2 : Main program and organization](#)

[Lecture 115 - A graphical editor and solver for circuits - Part 3 : Mathematical representation of the circuit](#)

[Lecture 116 - A graphical editor and solver for circuits - Part 4 : Extensions and concluding remarks](#)

[Lecture 117 - Cosmological simulation - Part 1 : Introduction and First order Euler method](#)

[Lecture 118 - Cosmological simulation - Part 2 : Second order Euler method](#)

[Lecture 119 - Cosmological simulation - Part 3 : The program](#)

[Lecture 120 - Cosmological simulation - Part 4 : Concluding remarks](#)

Lecture 1 - Introduction

Lecture 2 - Analogy for CEO's Problem

Lecture 3 - Discussing the CEO's Problem

Lecture 4 - From the CEO's Company to Layers in a Network

Lecture 5 - Layers in Detail

Lecture 6 - Layered Nature of a Network

Lecture 7 - Introduction to Internet Data Capturing using Wireshark

Lecture 8 - Network data captured while requesting a website

Lecture 9 - What is Cisco Packet Tracer

Lecture 10 - Modes of Cisco Packet Tracer

Lecture 11 - Getting Cisco Packet Tracer

Lecture 12 - Logical and Physical Typologies in Cisco Packet Tracer

Lecture 13 - Devices on Cisco Packet Tracer

Lecture 14 - Introduction to the Cisco Packet Tracer Activity for Week 1

Lecture 15 - Introduction to the campus network on Cisco Packet Tracer

Lecture 16 - Loading the page in Simulation Mode

Lecture 17 - Inspecting the packets in Simulation Mode

Lecture 18 - Editing the dummy website on Cisco Packet Tracer

Lecture 19 - Summary of the Cisco Packet Tracer Activity

Lecture 20 - Introduction to Anupam's Adventure

Lecture 21 - Anupam's adventure brings us to IP Addressing

Lecture 22 - Addressing at various layers

Lecture 23 - IP Addresses

Lecture 24 - Address Translation

Lecture 25 - Introduction to IP Addressing

Lecture 26 - Creating a network with Sub-net mask

Lecture 27 - Nomenclature of a sub-net mask

Lecture 28 - Network addresses and Private networks

Lecture 29 - Introduction to the Addressing Topology

Lecture 30 - Addressing a local network and DHCP

Lecture 31 - Addressing a local network manually

Lecture 32 - Addressing in Public and Private Networks

Lecture 33 - Verifying Connectivity using Ping

Lecture 34 - Using network address translation to communicate on internet

Lecture 35 - Using Sub nets and Summary of addressing

Lecture 36 - Summary of the week

Lecture 37 - Analogy for the week 2

Lecture 38 - Discussion on dabbawala analogy

Lecture 39 - From dabbawalas to routers and switches

Lecture 40 - What is routing ?

Lecture 41 - Static routing in a router in CPT

Lecture 42 - How does a switch forwards packets CPT

Lecture 43 - How to add static route in a router? (CPT)

Lecture 44 - Traveler's dilemma

Lecture 45 - Discussing the Traveler's dilemma

Lecture 46 - From Traveler's dilemma to Dynamic Routing

Lecture 47 - Dynamic Routing with Distance Vector

Lecture 48 - Distance Vector Routing in Detail

Lecture 49 - Dynamic Routing with Link State

Lecture 50 - Setting up dynamic routing in Packet Tracer

Lecture 51 - Summary of the week

Lecture 52 - Introduction to analogy for week 3

Lecture 53 - Analogy for week 3

Lecture 54 - Questions on analogy for week 3

Lecture 55 - Understanding the new order requirements

Lecture 56 - Introduction to Transport Layer

Lecture 57 - Introduction to TCP

Lecture 58 - Introduction to UDP

Lecture 59 - Exploring UDP on Cisco Packet Tracer

Lecture 60 - TCP Connection Establishment

Lecture 61 - TCP Connection Closure

Lecture 62 - Summary of TCP and UDP on Cisco Packet Tracer

Lecture 63 - The story of the delivery fiasco

Lecture 64 - From delivery fiasco to Port Numbers

- Lecture 65 - Application Layer in depth
- Lecture 66 - Port number in Wireshark
- Lecture 67 - Summary of port number and PAT
- Lecture 68 - Summary of the entire TCP IP stack
- Lecture 69 - Introducing the analogy for week 4
- Lecture 70 - The secret box
- Lecture 71 - Questions on analogy for week 4
- Lecture 72 - Secret of the secret box
- Lecture 73 - From secret box to encryption
- Lecture 74 - Introduction to security and CIA
- Lecture 75 - Information Security and Defence in Depth
- Lecture 76 - Information Classification and Access Control
- Lecture 77 - Process Management
- Lecture 78 - Introduction to Network Security
- Lecture 79 - Network Breach and Countermeasures
- Lecture 80 - Internet Security
- Lecture 81 - Securing the Internet Usage
- Lecture 82 - Internet Security Products
- Lecture 83 - Personal Computing Device Recommendations
- Lecture 84 - Responsible Behavior on the Internet
- Lecture 85 - Best practices for home Network and Media Devices
- Lecture 86 - Closing thoughts on security
- Lecture 87 - The story of a family trip
- Lecture 88 - The troubleshooting approach
- Lecture 89 - Troubleshooting Physical and Data Link Layers
- Lecture 90 - Troubleshooting Network Layer
- Lecture 91 - Troubleshooting Transport and Application Layers
- Lecture 92 - Troubleshooting Summary
- Lecture 93 - Troubleshooting Heuristics
- Lecture 94 - Troubleshooting Challenge - 1
- Lecture 95 - Troubleshooting challenge - 2
- Lecture 96 - Troubleshooting Challenge - 3
- Lecture 97 - Thats How we Troubleshoot

[Lecture 98 - Week Summary](#)

**NPTEL : NOC:Introduction to Computer and Network Performance Analysis using Queuing Systems (Computer Science and Engineering)**

**Co-ordinators : Prof. Varsha Apte**

Lecture 1 - Introduction, why do delays happen, contention for resources

Lecture 2 - Performance metrics and parameters

Lecture 3 - Introducing Queuing Systems

Lecture 4 - Memoryless Distributions

Lecture 5 - Operational Laws

Lecture 6 - Asymptotic Analysis of G/G/1, G/G/1/K queues

Lecture 7 - Asymptotic Analysis of G/G/c/K queues

Lecture 8 - Little's Law

Lecture 9 - Little's Law examples and A Case Study of Open Load test on a Web server

Lecture 10 - Some results for M/G/1 queue and Memoryless Arrivals

Lecture 11 - Continuing the Case Study of Open Load test on a web server (Response Time)

Lecture 12 - Open queuing networks - tandem queuing network

Lecture 13 - Open queuing networks - general (Jackson) queuing networks

Lecture 14 - Open queuing networks - examples

Lecture 15 - Closed Queuing Systems

Lecture 16 - Closed Queuing System (Continued...)

Lecture 17 - Case study of Closed Load Test on a Web Server

Lecture 18 - General formulation of Jacksonian Closed Queuing Networks

Lecture 19 - Mean Value Analysis for Closed Queuing Networks

Lecture 20 - Mean Value Analysis examples, Case Study of a Load test on a web server, Closing Remarks

Lecture 1 - Introduction, why do delays happen, contention for resources

Lecture 2 - Performance metrics and parameters

Lecture 3 - Introducing Queuing Systems

Lecture 4 - Memoryless Distributions

Lecture 5 - Operational Laws

Lecture 6 - Aumann model of incomplete information: Definition and Examples

Lecture 7 - Knowledge operator: Definition and Examples

Lecture 8 - Common knowledge: Definition and Examples

Lecture 9 - The structural theorem of common knowledge

Lecture 10 - Proof of the structural theorem (forward direction)

Lecture 11 - Proof of the structural theorem (backward direction)

Lecture 12 - Aumann model of incomplete information with belief: Definition and Examples

Lecture 13 - Aumann's agreement theorem

Lecture 14 - Zero-sum game definition and Security strategies

Lecture 15 - Saddle point strategies

Lecture 16 - Further properties of saddle point strategies

Lecture 17 - Mixed strategies

Lecture 18 - Weirstrass lemma and existence of a mixed saddle point strategy

Lecture 19 - Von Nuenmann minmax theorem

Lecture 20 - Computing mixed saddle point strategy: Holmes and Moriarty

Lecture 21 - Computing mixed strategy saddle point: 2X2 matrix game

Lecture 22 - Computing mixed strategy saddle point: 2X3 matrix game

Lecture 23 - Nash equilibrium of a non zero-sum game and its relation with Kakutani fixed

Lecture 24 - Proof: Existence of Nash equilibrium (Condition 1 of Kakutani fixed point)

Lecture 25 - Proof: Existence of Nash equilibrium (Condition 2 of Kakutani fixed point)

Lecture 26 - Existence of Nash equilibrium for infinite strategy space (Using Brower's)

Lecture 27 - Quantal Response: Motivation

Lecture 28 - Quantal Response: Formal model

Lecture 29 - Dynamic games definition

Lecture 30 - Solution concept in dynamic games

Lecture 31 - Relation of the heuristic solution with the Nash equilibrium of the standard

- Lecture 32 - Example of a Threat equilibrium
- Lecture 33 - Interpreting the threat equilibrium in standard normal form of the dynamic game
- Lecture 34 - Extensive form games - I
- Lecture 35 - Extensive form games - II
- Lecture 36 - Single Act Games
- Lecture 37 - Informationally inferior games
- Lecture 38 - Information Structure in Single Act Games
- Lecture 39 - Nested and Ladder Nested Extensive form games
- Lecture 40 - Equilibrium Algorithm
- Lecture 41 - Stage-wise multi act games
- Lecture 42 - Feedback equilibrium

Lecture 1 - What is theory of computation? Set membership problem, basic notions like alphabet, strings, formal languages

Lecture 2 - Introduction to finite automaton

Lecture 3 - Finite automata continued, deterministic finite automata (DFAs), language accepted by a DFA

Lecture 4 - Regular languages, their closure properties

Lecture 5 - DFAs solve set membership problems in linear time, pumping lemma

Lecture 6 - More examples of nonregular languages, proof of pumping lemma, pumping lemma as a game, converse of pumping lemma does not hold

Lecture 7 - A generalization of pumping lemma, nondeterministic finite automata (NFAs), computation trees for NFAs

Lecture 8 - Formal description of NFA, language accepted by NFA, such languages are also regular

Lecture 9 - 'Guess and verify' paradigm for nondeterminism

Lecture 10 - NFA's with epsilon transitions

Lecture 11 - Regular expressions, they denote regular languages

Lecture 12 - Construction of a regular expression for a language given a DFA accepting it. Algebraic closure properties of regular languages

Lecture 13 - Closure properties (Continued...)

Lecture 14 - Closure under reversal, use of closure properties

Lecture 15 - Decision problems for regular languages

Lecture 16 - About minimization of states of DFAs. Myhill-Nerode theorem

Lecture 17 - Continuation of proof of Myhill-Nerode theorem

Lecture 18 - Application of Myhill-Nerode theorem. DFA minimization

Lecture 19 - DFA minimization (Continued...)

Lecture 20 - Introduction to context free languages (cfls) and context free grammars (cfgs). Derivation of strings by cfgs

Lecture 21 - Languages generated by a cfg, leftmost derivation, more examples of cfgs and cfls

Lecture 22 - Parse trees, inductive proof that  $L$  is  $L(G)$ . All regular languages are context free

Lecture 23 - Towards Chomsky normal forms: elimination of useless symbols, analysis of reachable symbols, generating nonterminals, order of substeps matter

Lecture 24 - Simplification of cfgs continued, Removal of epsilon productions: algorithm and its correctness

Lecture 25 - Elimination of unit productions. Converting a cfg into Chomsky normal form. Towards pumping lemma for cfls

Lecture 26 - Pumping lemma for cfls. Adversarial paradigm

Lecture 27 - Completion of pumping lemma proof. Examples of use of pumping lemma. Converse of lemma does not hold. Closure properties of cfls

Lecture 28 - Closure properties continued. cfls not closed under complementation

Lecture 29 - Another example of a cfl whose complement is not a cfl. Decision problems for cfls

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

Lecture 30 - More decision problems. CYK algorithm for membership decision

Lecture 31 - Introduction to pushdown automata (pda)

Lecture 32 - pda configurations, acceptance notions for pdas. Transition diagrams for pdas

Lecture 33 - Equivalence of acceptance by empty stack and acceptance by final state

Lecture 34 - Turing machines (TM): motivation, informal definition, example, transition diagram

Lecture 35 - Execution trace, another example (unary to binary conversion)

Lecture 36 - Example continued. Finiteness of TM description, TM configuration, language acceptance, definition of recursively enumerable (r.e.) languages

Lecture 37 - Notion of non-acceptance or rejection of a string by a TM. Multitrack TM, its equivalence to standard TM. Multitape TMs

Lecture 38 - Simulation of multitape TMs by basic model. Nondeterministic TM (NDTM). Equivalence of NDTMs with deterministic TMs

Lecture 39 - Counter machines and their equivalence to basic TM model

Lecture 40 - TMs can simulate computers, diagonalization proof

Lecture 41 - Existence of non-r.e. languages, recursive languages, notion of decidability

Lecture 42 - Separation of recursive and r.e. classes, halting problem and its undecidability

Lecture 6 - Conditional probability, Partition formula

Lecture 7 - Independent events, Bayes theorem

Lecture 8 - Fallacies, Random variables

Lecture 9 - Expectation

Lecture 10 - Conditional Expectation

Lecture 11 - Important Random Variables

Lecture 12 - Continuous Random Variables

Lecture 13 - Equality Checking, Poisson Distribution

Lecture 14 - Concentration Inequalities, Variance

Lecture 15 - Weak Linearity of Variance, Law of Large Numbers

Lecture 16 - Chernoff's Bound. K-wise Independence

Lecture 17 - Union and Factorial Estimates

Lecture 18 - Stochastic Process: Markov Chains

Lecture 19 - Drunkard's walk, Evolution of Markov Chains

Lecture 20 - Stationary Distribution

Lecture 21 - Perron-Frobenius Theorem, Page Rank Algorithm

Lecture 22 - Page Rank Algorithm: Ergodicity

Lecture 23 - Cell Genetics

Lecture 24 - Random Sampling

Lecture 25 - Biased Coin Tosses, Hashing

Lecture 26 - Hashing, Introduction to Probabilistic Methods

Lecture 27 - Ramsey Numbers, Large Cuts in Graphs

Lecture 28 - Sum Free Subsets, Discrepancy

Lecture 29 - Extremal Set Families

Lecture 30 - Super Concentrators

Lecture 31 - Streaming Algorithms - I

Lecture 1 - Introduction

Lecture 2 - Standard Bounds

Lecture 3 - Shannon's Theorem

Lecture 4 - Riordon-Shannon Theorem

Lecture 5 - Khrapchenko's Theorem

Lecture 6 - Proof of Khrapchenko's Theorem

Lecture 7 - Application of Khrapchenko's Theorem

Lecture 8 - Nechiporuk's Theorem

Lecture 9 - Application of Nechiporuk's Theorem

Lecture 10 - Subbotovskaya's Theorem - I

Lecture 11 - Subbotovskaya's Theorem - II

Lecture 12 - Applications of Subbotovskaya's Theorem

Lecture 13 - Upper and Lower Bounds on the Andreev Function

Lecture 14 - Upper and Lower Bounds on the Andreev Function

Lecture 15 - Polynomial Size Monotone Formula for MAJORITY (Valiant's Theorem) - II

Lecture 16 - Circuits for Addition - Ripple Adder and Carry Lookahead Adder

Lecture 17 - Circuits for Addition - Parallel Prefix Sum Method

Lecture 18 - Circuits for Iterated Addition and Multiplication

Lecture 19 - Bounded Depth Circuit Classes

Lecture 20 - Basic Circuit for Division using Newton-Raphson Method

Lecture 21 - Division in NC1 (Beame, Cook, Hoover Theorem) - I

Lecture 22 - Division in NC1 (Beame, Cook, Hoover Theorem) - II

Lecture 23 - Division in NC1 (Beame, Cook, Hoover Theorem) - III

Lecture 24 - Division in NC1 (Beame, Cook, Hoover Theorem) - IV

Lecture 25 - Division in NC1 (Beame, Cook, Hoover Theorem) - V

Lecture 26 - Division in NC1 (Beame, Cook, Hoover Theorem) - VI

Lecture 27 - Relation between Bounded Depth Circuit Classes and Uniform Complexity Classes - I

Lecture 28 - Relation between Bounded Depth Circuit Classes and Uniform Complexity Classes - II

Lecture 29 - Reducing Circuit Depth

Lecture 30 - P is in P/poly

Lecture 31 - Discussion on Lower Circuit Bounds for Bounded Depth Circuit Classes

- Lecture 32 - Monotone Circuit Lower Bound for Clique (Razborov's Theorem) - I
- Lecture 33 - Monotone Circuit Lower Bound for Clique (Razborov's Theorem) - II
- Lecture 34 - Monotone Circuit Lower Bound for Clique (Razborov's Theorem) - III
- Lecture 35 - Monotone Circuit Lower Bound for Clique (Razborov's Theorem) - IV
- Lecture 36 - Monotone Circuit Lower Bound for Clique (Razborov's Theorem) - V
- Lecture 37 - Monotone Circuit Lower Bound for Clique (Razborov's Theorem) - VI
- Lecture 38 - Circuit Lower Bound for Parity by Approximating Circuits using Polynomials (Razborov-Smolensky Theorem) - I
- Lecture 39 - Circuit Lower Bound for Parity by Approximating Circuits using Polynomials (Razborov-Smolensky Theorem) - II
- Lecture 40 - Circuit Lower Bound for Parity by Approximating Circuits using Polynomials (Razborov-Smolensky Theorem) - III
- Lecture 41 - Circuit Lower Bound for Parity using Switching Lemma (Hastad's Theorem)
- Lecture 42 - Circuit Lower Bound for Parity using Switching Lemma (Hastad's Theorem)
- Lecture 43 - Circuit Lower Bound for Parity using Switching Lemma (Hastad's Theorem)
- Lecture 44 - Proof of Hastad's Switching Lemma - I
- Lecture 45 - Proof of Hastad's Switching Lemma - II
- Lecture 46 - Communication Complexity of a Function
- Lecture 47 - Relation Between Communication Complexity and Circuit Depth (Karchmer-Wigderson Theorem) - I
- Lecture 48 - Relation Between Communication Complexity and Circuit Depth (Karchmer-Wigderson Theorem) - II
- Lecture 49 - Bounded Width Branching Programs = NC1 (Barrington's Theorem) - I
- Lecture 50 - Bounded Width Branching Programs = NC1 (Barrington's Theorem) - II
- Lecture 51 - Width 3 Branching Programs = MOD3 o MOD2 Circuits (Barrington's Theorem) - I
- Lecture 52 - Width 3 Branching Programs = MOD3 o MOD2 Circuits (Barrington's Theorem) - II
- Lecture 53 - Uniform AC0 can be simulated by depth 3 Threshold circuits of quasipolynomial size (Allender-Hertramph Theorem) - I
- Lecture 54 - Uniform AC0 can be simulated by depth 3 Threshold circuits of quasipolynomial size (Allender-Hertramph Theorem) - II
- Lecture 55 - Valient-Vazirani Theorem - I
- Lecture 56 - Valient-Vazirani Theorem - II
- Lecture 57 - Natural Proof Barrier (Razborov-Rudich Theorem) - I
- Lecture 58 - Natural Proof Barrier (Razborov-Rudich Theorem) - II
- Lecture 59 - Pseudorandom Function Generator by Goldreich, Goldwasser and Micali - I
- Lecture 60 - Pseudorandom Function Generator by Goldreich, Goldwasser and Micali - II

[Lecture 38 - Search Engine And Web Crawlers : Part-I](#)

[Lecture 39 - Search Engine And Web Crawlers : Part-II](#)

[Lecture 40 - Course Summary And Conclusion](#)

Lecture 1 - Introduction

Lecture 2 - C Programming - I

Lecture 3 - C Programming - II

Lecture 4 - C Programming - III

Lecture 5 - Data Structuring : Case Study - I

Lecture 6 - Data Structuring : Case Study - II

Lecture 7 - Data Structuring : Case Study - III

Lecture 8 - Problem Decomposition By Recursion - I

Lecture 9 - Problem Decomposition By Recursion - II

Lecture 10 - Problem Decomposition By Recursion - III

Lecture 11 - Merge sort And Quick sort

Lecture 12 - Characters And Strings

Lecture 13 - Arrays: Addresses And Contents

Lecture 14 - Structures - I

Lecture 15 - Structures - II

Lecture 16 - Dynamic Allocation Part - I

Lecture 17 - Linked Lists - I

Lecture 18 - Complexity (Efficiency) of Algorithms

Lecture 19 - Asymptotic Growth Functions

Lecture 20 - Asymptotic Analysis of Algorithms

Lecture 21 - Data Structuring

Lecture 22 - Search Trees

Lecture 23 - Search Trees - II

Lecture 24 - Search Trees - III

Lecture 25 - 2-3 Trees

Lecture 26 - Algorithm Design - I

Lecture 27 - Algorithm Design - II

Lecture 28 - Algorithm Design - III

Lecture 29 - Graphs - I

Lecture 30 - Graphs - II

Lecture 31 - Graphs - III

Lecture 1 - Introduction

Lecture 2 - Levels of Testing

Lecture 3 - Basic Concepts in Testing

Lecture 4 - Basic Concepts in Testing (Continued...)

Lecture 5 - Unit Testing

Lecture 6 - Equivalence and BV Testing

Lecture 7 - Special Value Testing

Lecture 8 - Combinatorial Testing

Lecture 9 - Pairwise Testing

Lecture 10 - White Box Testing

Lecture 11 - MC/DC Testing

Lecture 12 - MC/DC Testing (Continued...)

Lecture 13 - Path Testing

Lecture 14 - Dataflow and Mutation Testing

Lecture 15 - Mutation Testing

Lecture 16 - Integration Testing

Lecture 17 - System Testing

Lecture 18 - Regression Testing

Lecture 19 - Testing Object-Oriented Program - Part 1

Lecture 20 - Testing Object-Oriented Program - Part 2

Lecture 1 - Module 1 : Recap of C

Lecture 2 - Module 1 : Recap of C

Lecture 3 - Module 1 : Recap of C

Lecture 4 - Module 2 : Programs with IO and Loop

Lecture 5 - Module 3 : Arrays and Strings

Lecture 6 - Module 4 : Sorting and Searching

Lecture 7 - Module 5 : Stack and its Applications

Lecture 8 - Module 6 : Constants and Inline Functions

Lecture 9 - Module 6 : Constants and Inline Functions (Continued...)

Lecture 10 - Module 7 : Reference and Pointer

Lecture 11 - Module 7 : Reference and Pointer (Continued...)

Lecture 12 - Module 8 : Default Parameters and Function Overloading

Lecture 13 - Module 8 : Default Parameters and Function Overloading (Continued...)

Lecture 14 - Module 8 : Default Parameters and Function Overloading (Continued...)

Lecture 15 - Module 9 : Operator Overloading

Lecture 16 - Module 9 : Operator Overloading (Continued...)

Lecture 17 - Module 10 : Dynamic Memory Management

Lecture 18 - Module 10 : Dynamic Memory Management (Continued...)

Lecture 19 - Module 11 : Classes and Objects

Lecture 20 - Module 11 : Classes and Objects (Continued...)

Lecture 21 - Module 12 : Access Specifiers

Lecture 22 - Module 12 : Access Specifiers (Continued...)

Lecture 23 - Module 13 : Constructors, Destructors and Object Lifetime

Lecture 24 - Module 13 : Constructors, Destructors and Object Lifetime (Continued...)

Lecture 25 - Module 13 : Constructors, Destructors and Object Lifetime (Continued...)

Lecture 26 - Module 14 : Copy Constructor and Copy Assignment Operator

Lecture 27 - Module 14 : Copy Constructor and Copy Assignment Operator (Continued...)

Lecture 28 - Module 14 : Copy Constructor and Copy Assignment Operator (Continued...)

Lecture 29 - Module 15 : Const-ness

Lecture 30 - Module 15 : Const-ness (Continued...)

Lecture 31 - Module 16 : Static Members

- Lecture 32 - Module 17 : friend Function and friend Class
- Lecture 33 - Module 18 : Overloading Operator for User Defined Types - Part I
- Lecture 34 - Module 19 : Overloading Operator for User Defined Types - Part II
- Lecture 35 - Module 20 : Namespace
- Lecture 36 - Module 21 : Inheritance - Part I
- Lecture 37 - Module 22 : Inheritance - Part II
- Lecture 38 - Module 23 : Inheritance - Part III
- Lecture 39 - Module 24 : Inheritance - Part IV
- Lecture 40 - Module 25 : Inheritance - Part V
- Lecture 41 - Module 26 : Dynamic Binding - Part I
- Lecture 42 - Module 27 : Dynamic Binding (Polymorphism) - Part II
- Lecture 43 - Module 28 : Dynamic Binding (Polymorphism) - Part III
- Lecture 44 - Module 29 : Dynamic Binding (Polymorphism) - Part IV
- Lecture 45 - Module 30 : Dynamic Binding (Polymorphism) - Part V
- Lecture 46 - Module 31 : Virtual Function Table
- Lecture 47 - Module 32 : Type casting and cast operators - Part I
- Lecture 48 - Module 33 : Type casting and cast operators - Part II
- Lecture 49 - Module 34 : Type casting and cast operators - Part III
- Lecture 50 - Module 35 : Multiple Inheritance
- Lecture 51 - Module 35 : Multiple Inheritance (Continued...)
- Lecture 52 - Module 36 : Exceptions (Error Handling in C) - Part I
- Lecture 53 - Module 37 : Exceptions (Error Handling in C) - Part II
- Lecture 54 - Module 38 : Template (Function Template) - Part I
- Lecture 55 - Module 39 : Template (Function Template) - Part II
- Lecture 56 - Module 40 : Closing Comments

Lecture 1 - Introduction

Lecture 2 - Different Types of Learning

Lecture 3 - Hypothesis Space and Inductive Bias

Lecture 4 - Evaluation and Cross-Validation

Lecture 5 - Tutorial - I

Lecture 6 - Linear Regression

Lecture 7 - Introduction to Decision Trees

Lecture 8 - Learning Decision Tree

Lecture 9 - Overfitting

Lecture 10 - Python Exercise on Decision Tree and Linear Regression

Lecture 11 - Tutorial - II

Lecture 12 - k-Nearest Neighbour

Lecture 13 - Feature Selection

Lecture 14 - Feature Extraction

Lecture 15 - Collaborative Filtering

Lecture 16 - Python Exercise on kNN and PCA

Lecture 17 - Tutorial - III

Lecture 18 - Bayesian Learning

Lecture 19 - Naive Bayes

Lecture 20 - Bayesian Network

Lecture 21 - Python Exercise on Naive Bayes

Lecture 22 - Tutorial - IV

Lecture 23 - Logistic Regression

Lecture 24 - Introduction Support Vector Machine

Lecture 25 - SVM : The Dual Formulation

Lecture 26 - SVM : Maximum Margin with Noise

Lecture 27 - Nonlinear SVM and Kernel Function

Lecture 28 - SVM : Solution to the Dual Problem

Lecture 29 - Python Exercise on SVM

Lecture 30 - Introduction

Lecture 31 - Multilayer Neural Network

[Lecture 32 - Neural Network and Backpropagation Algorithm](#)

[Lecture 33 - Deep Neural Network](#)

[Lecture 34 - Python Exercise on Neural Network](#)

[Lecture 35 - Tutorial - VI](#)

[Lecture 36 - Introduction to Computational Learning Theory](#)

[Lecture 37 - Sample Complexity : Finite Hypothesis Space](#)

[Lecture 38 - VC Dimension](#)

[Lecture 39 - Introduction to Ensembles](#)

[Lecture 40 - Bagging and Boosting](#)

[Lecture 41 - Introduction to Clustering](#)

[Lecture 42 - Kmeans Clustering](#)

[Lecture 43 - Agglomerative Hierarchical Clustering](#)

[Lecture 44 - Python Exercise on kmeans clustering](#)

Lecture 1 - Challenges in Software Engineering

Lecture 2 - Complexity of Software

Lecture 3 - Complexity of Software (Continued...)

Lecture 4 - Structure and Attributes of a Complex System

Lecture 5 - Structure and Attributes of a Complex System (Continued...)

Lecture 6 - Object-Oriented Analysis and Design

Lecture 7 - Bringing Order to Chaos

Lecture 8 - Bringing Order to Chaos (Continued...)

Lecture 9 - Evolution of Object Models - Programming Languages and Paradigms

Lecture 10 - Foundations of the Object Model - OOA, OOD and OOP

Lecture 11 - Foundations of the Object Model - OOA, OOD and OOP (Continued...)

Lecture 12 - Elements of Object Model (Major) : Abstraction and Encapsulation

Lecture 13 - Elements of Object Model (Major) : Abstraction and Encapsulation (Continued...)

Lecture 14 - Elements of the Object Model (Major) : Modularity and Hierarchy

Lecture 15 - Elements of the Object Model (Major) : Modularity and Hierarchy (Continued...)

Lecture 16 - Elements of the Object Model (Minor) : Typing, Concurrency and Persistence

Lecture 17 - Elements of the Object Model (Minor) : Typing, Concurrency and Persistence (Continued...)

Lecture 18 - Nature of an object : State, Behavior and Identity

Lecture 19 - Nature of an object : State, Behavior and Identity (Continued...)

Lecture 20 - Relationships among objects

Lecture 21 - Relationships among objects (Continued...)

Lecture 22 - Nature of a class : Interface and Implementation

Lecture 23 - Nature of a class : Interface and Implementation (Continued...)

Lecture 24 - Relationships among classes

Lecture 25 - Relationships among classes (Continued...)

Lecture 26 - How to Build Quality Classes and Objects

Lecture 27 - Tutorial : LMS

Lecture 28 - How to Identify Classes and Objects ?

Lecture 29 - Identification of Classes, Objects and Relationship in LMS

Lecture 30 - Identification of Classes, Objects and Relationship in LMS (Continued...)

Lecture 31 - Identification of Classes, Objects and Relationship in LMS (Continued...)

[Lecture 32 - Identification of Classes, Objects and Relationship in LMS \(Continued...\)](#)

[Lecture 33 - Overview of UML](#)

[Lecture 34 - SDLC Phases and UML Diagrams](#)

[Lecture 35 - Use-Case Diagrams - Part I](#)

[Lecture 36 - Use-Case Diagrams - Part II](#)

[Lecture 37 - Use-Case Diagrams - Part III](#)

[Lecture 38 - Class Diagrams - Part 1 \(Class, Property and Operation\)](#)

[Lecture 39 - Class Diagrams - Part 2 \(Association, Weak and Strong Aggregation\)](#)

[Lecture 40 - Class Diagrams - Part 3 \(Generalization, Dependency and Constraints\)](#)

[Lecture 41 - Sequence Diagrams - Part 1](#)

[Lecture 42 - Sequence Diagrams - Part 2](#)

[Lecture 43 - Communication Diagram](#)

[Lecture 44 - Activity Diagrams - Part II](#)

[Lecture 45 - Activity Diagrams - Part II](#)

[Lecture 46 - Activity Diagrams - Part III](#)

[Lecture 47 - Interaction Overview Diagram](#)

[Lecture 48 - State Machine Diagrams - Part I](#)

[Lecture 49 - State Machine Diagrams - Part II](#)

[Lecture 50 - State Machine Diagrams - Part III](#)

[Lecture 51 - Various UML Diagrams](#)

[Lecture 52 - Closing Comments](#)

Lecture 1 - Introduction

Lecture 2 - Network Analysis - I

Lecture 3 - Network Analysis - II

Lecture 4 - Network Analysis - III

Lecture 5 - Network Analysis - IV

Lecture 6 - Network Analysis - V

Lecture 7 - Network Analysis - VI

Lecture 8 - Social Network Principles - I

Lecture 9 - Social Network Principles - II

Lecture 10 - Social Network Principles - III

Lecture 11 - Social Network Principles - IV

Lecture 12 - Community Analysis - I

Lecture 13 - Community Analysis - II

Lecture 14 - Community Analysis - III

Lecture 15 - Community Analysis - IV

Lecture 16 - Community Analysis - V

Lecture 17 - Community Analysis - VI

Lecture 18 - Citation Analysis - I

Lecture 19 - Citation Analysis - II

Lecture 20 - Citation Analysis - III

Lecture 21 - Citation Analysis - IV

Lecture 1 - Insertion Sort and Asymptotic Analysis

Lecture 2 - Solving Recurrences

Lecture 3 - Divide and Conquer Paradigm

Lecture 4 - Quick Sort

Lecture 5 - Heap Sort

Lecture 6 - Decision Tree

Lecture 7 - Linear Time Sorting

Lecture 8 - Order Statistics

Lecture 9 - Hashing

Lecture 10 - Universal Hashing, BST Sort

Lecture 11 - Red-Black Tree

Lecture 12 - Augmenting Data Structure

Lecture 13 - Computational Geometry

Lecture 14 - Van Emde Boas Data Structure

Lecture 15 - Dynamic Programming

Lecture 16 - Graph Algorithm

Lecture 17 - BFS and DFS

Lecture 18 - Dijkstra

Lecture 19 - Bellman Ford

Lecture 20 - Floyd Marshall

- Lecture 1 - Introduction to the Course
- Lecture 2 - What Do We Do in NLP
- Lecture 3 - Why is NLP hard
- Lecture 4 - Empirical Laws
- Lecture 5 - Text Processing: Basics
- Lecture 6 - Spelling Correction: Edit Distance
- Lecture 7 - Weighted Edit Distance, Other Variations
- Lecture 8 - Noisy Channel Model for Spelling Correction

- [Lecture 63 - Some Case Studies](#)
- [Lecture 64 - Summarization Of The Course](#)

Lecture 1 - Insertion sort

Lecture 2 - Analysis of Insertion Sort

Lecture 3 - Asymptotic Analysis

Lecture 4 - Recurrence of Merge Sort

Lecture 5 - Substitution Method

Lecture 6 - The Master Method

Lecture 7 - Divide-and-Conquer

Lecture 8 - Divide-and-Conquer (Continued...)

Lecture 9 - Straseen's Algorithms

Lecture 10 - QuickSort

Lecture 11 - Analysis of Quicksort

Lecture 12 - Randomized Quicksort

Lecture 13 - Heap

Lecture 14 - Heap Sort

Lecture 15 - Decision Tree

Lecture 16 - Linear time Sorting

Lecture 17 - Radix Sort and Bucket Sort

Lecture 18 - Order Statistics

Lecture 19 - Randomised Order Statistics

Lecture 20 - Worst case linear time order statistics

Lecture 21 - Hash Function

Lecture 22 - Open Addressing

Lecture 23 - Universal Hashing

Lecture 24 - Perfect Hashing

Lecture 25 - Binary Search Tree (BST) Sort

Lecture 26 - Randomly build BST

Lecture 27 - Red Black Tree

Lecture 28 - Red Black Tree (Continued...)

Lecture 29 - Augmentation of data structure

Lecture 30 - Interval trees

Lecture 31 - Fixed universe successor

[Lecture 32 - Van Emde Boas data structure](#)

[Lecture 33 - Amortized analysis](#)

[Lecture 34 - Computational Geometry](#)

[Lecture 35 - Computational Geometry \(Continued...\)](#)

[Lecture 36 - Dynamic Programming](#)

[Lecture 37 - Longest common subsequence](#)

[Lecture 38 - Graphs](#)

[Lecture 39 - Prim's Algorithms](#)

[Lecture 40 - Graph Search](#)

[Lecture 41](#)

[Lecture 42](#)

[Lecture 43](#)

[Lecture 44](#)

[Lecture 45](#)

[Lecture 46](#)

[Lecture 47](#)

[Lecture 48](#)

[Lecture 49](#)

[Lecture 50](#)

[Lecture 51](#)

[Lecture 52 - Union-Find](#)

[Lecture 53 - Augmented disjoint set data structure](#)

[Lecture 54 - Network flow](#)

[Lecture 55 - Network Flow \(Continued...\)](#)

[Lecture 56 - Network Flow \(Continued...\)](#)

[Lecture 57 - More on Dynamic Programming](#)

[Lecture 58 - More on Dynamic Programming \(Continued...\)](#)

[Lecture 59 - Computational Complexity](#)

[Lecture 60 - Computational Complexity \(Continued...\)](#)

Lecture 1

Lecture 2

Lecture 3

Lecture 4

Lecture 5

Lecture 6 - Verilog Language Features - Part 1

Lecture 7 - Verilog Language Features - Part 2

Lecture 8 - Verilog Language Features - Part 3

Lecture 9 - Verilog Operators

Lecture 10 - Verilog Modeling Examples

Lecture 11 - Verilog Modeling Examples (Continued...)

Lecture 12 - Verilog Description Styles

Lecture 13 - Procedural Assignment

Lecture 14 - Procedural Assignment (Continued...)

Lecture 15 - Procedural Assignment (Examples)

Lecture 16 - Blocking / Non-Blocking Assignments - Part 1

Lecture 17 - Blocking / Non-Blocking Assignments - Part 2

Lecture 18 - Blocking / Non-Blocking Assignments - Part 3

Lecture 19 - Blocking / Non-Blocking Assignments - Part 4

Lecture 20 - User Defined Primitives

Lecture 21 - Verilog Test Bench

Lecture 22 - Writing Verilog Test Benches

Lecture 23 - Modeling Finite State Machines

Lecture 24 - Modeling Finite State Machines (Continued...)

Lecture 25 - Datapath And Controller Design - Part 1

Lecture 26 - Datapath And Controller Design - Part 2

Lecture 27 - Datapath And Controller Design - Part 3

Lecture 28 - Synthesizable Verilog

Lecture 29 - Some Recommended Practices

Lecture 30 - Modeling Memory

Lecture 31 - Modeling Register Banks

[Lecture 32 - Basic Pipelining Concepts](#)

[Lecture 33 - Pipeline Modeling - Part 1](#)

[Lecture 34 - Pipeline Modeling - Part 2](#)

[Lecture 35 - Switch Level Modeling - Part 1](#)

[Lecture 36 - Switch Level Modeling - Part 2](#)

[Lecture 37 - Pipeline Implementation Of A Processor - Part 1](#)

[Lecture 38 - Pipeline Implementation Of A Processor - Part 2](#)

[Lecture 39 - Pipeline Implementation Of A Processor - Part 3](#)

[Lecture 40 - Verilog Modeling Of The Processor - Part 1](#)

[Lecture 41 - Verilog Modeling Of The Processor - Part 2](#)

Lecture 1 - Introduction to IoT- Part I

Lecture 2 - Introduction to IoT- Part II

Lecture 3 - Sensing

Lecture 4 - Actuation

Lecture 5 - Basics of IoT Networking - Part I

Lecture 6 - Basics of IoT Networking - Part II

Lecture 7 - Basics of IoT Networking - Part III

Lecture 8 - Basics of IoT Networking - Part IV

Lecture 9 - Connectivity Technologies - Part I

Lecture 10 - Connectivity Technologies - Part II

Lecture 11 - Connectivity Technologies - Part III

Lecture 12 - Connectivity Technologies - Part IV

Lecture 13 - Connectivity Technologies - Part V

Lecture 14 - Sensor Networks - I

Lecture 15 - Sensor Networks - II

Lecture 16 - Sensor Networks - III

Lecture 17 - Sensor Networks - IV

Lecture 18 - Sensor Networks - V

Lecture 19 - UAV Networks

Lecture 20 - Machine to Machine Communication

Lecture 21 - Interoperability in Internet of Things

Lecture 22 - Introduction to Arduino - I

Lecture 23 - Introduction to Arduino - II

Lecture 24 - Integration of Sensor and Actuators with Arduino - I

Lecture 25 - Integration of Sensor and Actuators with Arduino - II

Lecture 26 - Introduction to Python Programming - I

Lecture 27 - Introduction to Python Programming - II

Lecture 28 - Introduction to Raspberry Pi - I

Lecture 29 - Introduction to Raspberry Pi - II

Lecture 30 - Implementation of IoT with Raspberry Pi - I

Lecture 31 - Implementation of IoT with Raspberry Pi - II

- Lecture 32 - Implementation of IoT with Raspberry Pi - III
- Lecture 33 - Software Defined Networking - Part I
- Lecture 34 - Software Defined Networking - Part II
- Lecture 35 - Software Defined IoT Networking - I
- Lecture 36 - Software Defined IoT Networking - II
- Lecture 37 - Cloud Computing-Fundamental
- Lecture 38 - Cloud Computing-Service Model
- Lecture 39 - Cloud Computing-Service Management and Security
- Lecture 40 - Cloud Computing - Case Studies
- Lecture 41 - Cloud Computing - Practical
- Lecture 42 - Sensor-Cloud - I
- Lecture 43 - Sensor-Cloud - II
- Lecture 44 - Fog Computing - I
- Lecture 45 - Fog Computing - II
- Lecture 46 - Smart Cities and Smart Homes - I
- Lecture 47 - Smart Cities and Smart Homes - II
- Lecture 48 - Smart Cities and Smart Homes - III
- Lecture 49 - Connected Vehicles - I
- Lecture 50 - Connected Vehicles - II
- Lecture 51 - Smart Grid - I
- Lecture 52 - Smart Grid - II
- Lecture 53 - Industrial Internet of Things - I
- Lecture 54 - Industrial Internet of Things - II
- Lecture 55 - Data Handling and Analytics - I
- Lecture 56 - Data Handling and Analytics - II
- Lecture 57 - Case Study: Agriculture
- Lecture 58 - Case Study: Healthcare
- Lecture 59 - Case Study: Activity Monitoring - I
- Lecture 60 - Case Study: Activity Monitoring - II

- Lecture 1 - Cloud Computing Overview
- Lecture 2 - Cloud Computing Overview (Continued...)
- Lecture 3 - Cloud Computing - Introduction
- Lecture 4 - Cloud Computing Architecture
- Lecture 5 - Cloud Computing Architecture (Continued...)
- Lecture 6 - Cloud Computing Architecture - Deployment Models
- Lecture 7 - Cloud Computing Virtualization
- Lecture 8 - Cloud Computing XML Basics
- Lecture 9 - Cloud Computing XML Basics - II
- Lecture 10 - Cloud Computing Web Services, Service Oriented Architecture
- Lecture 11 - Service Level Agreement
- Lecture 12 - Cloud Economics
- Lecture 13 - Managing Data
- Lecture 14 - Introduction to MapReduce
- Lecture 15 - Open Stack
- Lecture 16 - Cloud Computing - Opensource Cloud - Openstack Demo
- Lecture 17 - Cloud Computing Case Study with a commercial Cloud - Microsoft Azure
- Lecture 18 - Cloud Computing Demo - Microsoft Azure
- Lecture 19 - Cloud Computing Case Study - Google Cloud Platform (GCP)
- Lecture 20 - Cloud Computing Demo - Google Cloud Platform (GCP)
- Lecture 21 - SLA-Tutorial
- Lecture 22 - Cloudeconomics-Tutorial
- Lecture 23 - MapReduce-Tutorial
- Lecture 24 - Resource Management - I
- Lecture 25 - Resource Management - II
- Lecture 26 - Cloud Computing: Security - I
- Lecture 27 - Cloud Computing: Security - II
- Lecture 28 - Cloud Computing: Security - III
- Lecture 29 - Cloud Computing: Security Issues in Collaborative SaaS Cloud
- Lecture 30 - Cloud Computing: Broker for Cloud Marketplace
- Lecture 31 - Mobile Cloud Computing - I

[Lecture 32 - Mobile Cloud Computing - II](#)

[Lecture 33 - Fog Computing - I](#)

[Lecture 34 - Fog Computing - II](#)

[Lecture 35 - Use Case-Geo-spatial Cloud](#)

[Lecture 36 - Introduction to DOCKER Container](#)

[Lecture 37 - Green Cloud](#)

[Lecture 38 - Sensor Cloud Computing](#)

[Lecture 39 - IoT Cloud](#)

[Lecture 40 - Course Summary and Research Areas](#)

[Lecture 41 - Cloud-Fog Computing - Overview](#)

[Lecture 42 - Resource Management - I](#)

[Lecture 43 - Resource Management - II](#)

[Lecture 44 - Cloud Federation](#)

[Lecture 45 - VM Migration - Basics Migration strategies](#)

[Lecture 46 - VM Migration - Basics Migration strategies](#)

[Lecture 47 - Containers Container based Virtualization Kubernetes Docker Container](#)

[Lecture 48 - Docker Container - Overview Docker - Components Docker - Architecture](#)

[Lecture 49 - Docker Container - Demo](#)

[Lecture 50 - Docker Container - Demo](#)

[Lecture 51 - Dew Computing](#)

[Lecture 52 - Serverless Computing - I](#)

[Lecture 53 - Serverless Computing - II](#)

[Lecture 54 - Sustainable Cloud Computing - I](#)

[Lecture 55 - Sustainable Cloud Computing - II](#)

[Lecture 56 - Cloud Computing in 5G Era](#)

[Lecture 57 - CPS and Cloud Computing](#)

[Lecture 58 - Case Study I \(Spatial Cloud Computing\)](#)

[Lecture 59 - Case Study II \(Internet of Health Things\) - Part A](#)

[Lecture 60 - Case Study II \(Internet of Health Things\) - Part B](#)

Lecture 1 - Introduction

Lecture 2 - Idea of Algorithms

Lecture 3 - Flow Chart and Pseudocode

Lecture 4 - Introduction to Programming Language Concepts

Lecture 5 - Variables and Memory

Lecture 6 - Types of Software and Compilers

Lecture 7 - Introduction to C Programming Language

Lecture 8 - Variables and Variable Types in C

Lecture 9 - Introducing Functions

Lecture 10 - Address and Content of Variables and Types

Lecture 11 - Assignment Statement and Operators in C

Lecture 12 - Arithmetic Expressions and Relational Expressions

Lecture 13 - Logical Operators and Change in Control Flow

Lecture 14 - Use of Logical Operatoers in Branching

Lecture 15 - Branching : IF-ELSE Statement

Lecture 16 - IF-ELSE Statement (Continued...)

Lecture 17 - Switch statement

Lecture 18 - Switch Statement (Continued...) and Introduction to Loops

Lecture 19 - Implementing Repetitions (Loops)

Lecture 20 - Implementation of Loops with for Statement (Continued...)

Lecture 21 - For Statement (Continued...)

Lecture 22 - Example of If-Else

Lecture 23 - Example of Loops

Lecture 24 - Example of Loops (Continued...)

Lecture 25 - Example of Loops (Continued...), Use of FOR Loops

Lecture 26 - Introduction to Arrays

Lecture 27 - Arrays (Continued...)

Lecture 28 - Arrays (Continued...)

Lecture 29 - Program using Arrays

Lecture 30 - Array Problem

Lecture 31 - Linear Search

- Lecture 32 - Character Array and Strings
- Lecture 33 - String Operations
- Lecture 34 - 2-D Array Operation
- Lecture 35 - Introducing Functions
- Lecture 36 - More on Functions
- Lecture 37 - Function (Continued...)
- Lecture 38 - Scanf and Printf Functions; Function Prototype
- Lecture 39 - Parameter Passing in Function Revision
- Lecture 40 - Parameter Passing in Function Revision (Continued...)
- Lecture 41 - Substitution of # include and Macro
- Lecture 42 - search as a function
- Lecture 43 - Binary Search
- Lecture 44 - Binary Search (Continued...)
- Lecture 45 - Sorting Methods
- Lecture 46 - Bubble Sort (Continued...)
- Lecture 47 - Use of Pointer in Function : Context Bubble Sort
- Lecture 48 - Arrays at Strings
- Lecture 49 - Data Representation
- Lecture 50 - Bisection Method
- Lecture 51 - Interpolation
- Lecture 52 - Trapezoidal Rule and Runge-Kutta Method
- Lecture 53 - Recursion
- Lecture 54 - Recursion (Continued...)
- Lecture 55 - Structure
- Lecture 56 - Structure (Continued...)
- Lecture 57 - Structure with typedef
- Lecture 58 - Pointer
- Lecture 59 - Pointer (Continued...)
- Lecture 60 - Pointer in Structures
- Lecture 61 - Dynamic Allocation and File

Lecture 1 - Introduction

Lecture 2 - Basics of Task scheduling

Lecture 3 - Cyclic executives

Lecture 4 - Cyclic Scheduler

Lecture 5 - Cyclic Scheduler

Lecture 6 - Exercises on Frame size Selection

Lecture 7 - Event-driven schedulers

Lecture 8 - Rate Monotonic Algorithm

Lecture 9 - RMA Task Schedulability

Lecture 10 - Rate Monotonic Analysis

Lecture 11 - RMA Generalizations

Lecture 12 - Further RMA Generalizations

Lecture 13 - Resource Sharing among Real-Time Tasks

Lecture 14 - Solution to Priority Inversion Problem

Lecture 15 - Highest Locker Protocol

Lecture 16 - Priority Ceiling Protocol

Lecture 17 - PCP Priority Inversions

Lecture 18 - Analysis of PCP priority inversions

Lecture 19 - Some basic issues in Real-Time Operating Systems

Lecture 20 - Unix as a Real-Time operating System

Lecture 1 - Introduction to soft computing

Lecture 2 - Introduction to Fuzzy Logic

Lecture 3 - Fuzzy membership functions (Continued...) and Defining Membership functions

Lecture 4 - Fuzzy operations

Lecture 5 - Fuzzy relations

Lecture 6 - Fuzzy Relations (Continued...) and Fuzzy propositions

Lecture 7 - Fuzzy implications

Lecture 8 - Fuzzy Inferences

Lecture 9 - Defuzzification techniques (Part-I)

Lecture 10 - Defuzzification Techniques (Part-I) (Continued...)

Lecture 11 - Fuzzy logic controller

Lecture 12 - Fuzzy Logic Controller (Continued...)

Lecture 13 - Fuzzy logic controller (Continued...)

Lecture 14 - Concept of Genetic Algorithm

Lecture 15 - Concept of Genetic Algorithm (Continued...) and GA Strategies

Lecture 16 - GA Operator : Encoding schemes

Lecture 17 - GA operator : encoding scheme (Continued...)

Lecture 18 - GA Operator : Selection

Lecture 19 - GA Operator : Selection (Continued...)

Lecture 20 - GA Operator : Crossover techniques

Lecture 21 - GA Operator : Crossover (Continued...)

Lecture 22 - GA Operator : Crossover (Continued...)

Lecture 23 - GA Operator : Mutation and others

Lecture 24 - Multi-objective optimization problem solving

Lecture 25 - Multi-objective optimization problem solving (Continued...)

Lecture 26 - Concept of domination

Lecture 27 - Non-Pareto based approaches to solve MOOPs

Lecture 28 - Non-Pareto based approaches to solve MOOPs (Continued...)

Lecture 29 - Pareto-Based approaches to solve MOOPs

Lecture 30 - Pareto-based approaches to solve MOOPs (Continued...)

Lecture 31 - Pareto-based approach to solve MOOPs

[Lecture 32 - Pareto-based approach to solve MOOPs \(Continued...\)](#)

[Lecture 33 - Pareto-based approach to solve MOOPs \(Continued...\)](#)

[Lecture 34 - Introduction to Artificial Neural Network](#)

[Lecture 35 - ANN Architectures](#)

[Lecture 36 - Training ANNs](#)

[Lecture 37 - Training ANNs \(Continued....\)](#)

[Lecture 38 - Training ANNs \(Continued....\)](#)

[Lecture 39 - Training ANNs \(Continued....\)](#)

[Lecture 40 - Soft computing tools](#)

Lecture 1 - Introduction, Knowledge Discovery Process

Lecture 2 - Data Preprocessing - I

Lecture 3 - Data Preprocessing - II

Lecture 4 - Association Rules

Lecture 5 - Apriori algorithm

Lecture 6 - Rule generation

Lecture 7 - Classification

Lecture 8 - Decision Tree - I

Lecture 9 - Decision Tree - II

Lecture 10 - Decision Tree - III

Lecture 11 - Decision Tree - IV

Lecture 12 - Bayes Classifier - I

Lecture 13 - Bayes Classifier - II

Lecture 14 - Bayes Classifier - III

Lecture 15 - Bayes Classifier - IV

Lecture 16 - Bayes Classifier - V

Lecture 17 - K Nearest Neighbor - I

Lecture 18 - K Nearest Neighbor - II

Lecture 19

Lecture 20

[Lecture 42 - Dimensionality Reduction - II](#)

[Lecture 43 - Tutorial](#)

[Lecture 44 - Live Session](#)

Lecture 1 - Course Overview

Lecture 2 - Introduction to DBMS/1

Lecture 3 - Introduction to DBMS/2

Lecture 4 - Introduction to Relational Model/1

Lecture 5 - Introduction to Relational Model/2

Lecture 6 - Introduction to SQL/1

Lecture 7 - Introduction to SQL/2

Lecture 8 - Introduction to SQL/3

Lecture 9 - Intermediate SQL/1

Lecture 10 - Intermediate SQL/2

Lecture 11 - Advanced SQL

Lecture 12 - Formal Relational Query Languages

Lecture 13 - Entity-Relationship Model/1

Lecture 14 - Entity-Relationship Model/2

Lecture 15 - Entity-Relationship Model/3

Lecture 16 - Relational Database Design

Lecture 17 - Relational Database Design (Continued...)

Lecture 18 - Relational Database Design/3

Lecture 19 - Relational Database Design (Continued...)

Lecture 20 - Relational Database Design/5

Lecture 21 - Application Design and Development/1

Lecture 22 - Application Design and Development/2

Lecture 23 - Application Design and Development/3

Lecture 24 - Storage and File Structure/1: Storage

Lecture 25 - Storage and File Structure/2: File Structure

Lecture 26 - Indexing and Hashing/1 : Indexing/1

Lecture 27 - Indexing and Hashing/2 : Indexing/2

Lecture 28 - Indexing and Hashing/3 : Indexing/3

Lecture 29 - Indexing and Hashing/4 : Hashing

Lecture 30 - Indexing and Hashing/5 : Index Design

Lecture 31 - Transactions/1

[Lecture 32 - Transactions/2 : Serializability](#)

[Lecture 33 - Transactions/3 : Recoverability](#)

[Lecture 34 - Concurrency Control/1](#)

[Lecture 35 - Concurrency Control/2](#)

[Lecture 36 - Recovery/1](#)

[Lecture 37 - Recovery/2](#)

[Lecture 38 - Query Processing and Optimization/1 : Processing](#)

[Lecture 39 - Query Processing and Optimization/2 : Optimization](#)

[Lecture 40 - Course Summarization](#)

[Lecture 41 - Live Session](#)

[Lecture 42 - Live Session - 2](#)

Lecture 1 - Introduction - I

Lecture 2 - Introduction - II

Lecture 3 - Introduction - III

Lecture 4 - Introduction - IV

Lecture 5 - Introduction - V

Lecture 6 - Life Cycle Model

Lecture 7 - Life Cycle Model

Lecture 8 - Waterfall Model

Lecture 9 - Waterfall Derivatives

Lecture 10 - Incremental Model

Lecture 11 - Evolutionary Model

Lecture 12 - Agile Model

Lecture 13 - Extreme Programming and Scrum

Lecture 14 - Scrum

Lecture 15 - Introduction to requirement specification

Lecture 16 - Requirement gathering and analysis

Lecture 17 - Functional requirements

Lecture 18 - Representation of complex programming logic

Lecture 19 - Design Fundamentals

Lecture 20 - Modular Design

Lecture 21 - Classification of Cohesion

Lecture 22 - Classification of Coupling

Lecture 23 - Introduction to structured analysis and structured design

Lecture 24 - Basics of Data Flow Diagrams (DFD)

Lecture 25 - Developing DFD Model

Lecture 26 - Examples of DFD Model development

Lecture 27 - DFD Model - More Examples

Lecture 28 - Essentials of Structure Chart

Lecture 29 - Transform Analysis, Transaction Analysis

Lecture 30 - Structured Design Examples

Lecture 31 - Use Case Modelling

- Lecture 32 - Factoring Use Cases
- Lecture 33 - Overview of Class diagram
- Lecture 34 - Inheritance relationship
- Lecture 35 - Association relationship

- Lecture 44 - Design of Registers - Part III
- Lecture 45 - Design of Counters - Part I
- Lecture 46 - Design of Counters - Part II
- Lecture 47 - Digital-to-Analog Converter - Part I
- Lecture 48 - Digital-to-Analog Converter - Part II
- Lecture 49 - Analog-to-Digital Converter - Part I
- Lecture 50 - Analog-to-Digital Converter - Part II
- Lecture 51 - Analog-to-Digital Converter - Part III
- Lecture 52 - Asynchronous Sequential Circuits - Part I
- Lecture 53 - Asynchronous Sequential Circuits - Part II
- Lecture 54 - Algorithmic State Machine (ASM Chart
- Lecture 55 - Testing of Digital Circuits
- Lecture 56 - Fault Modeling
- Lecture 57 - Test Pattern Generation
- Lecture 58 - Design for Testability
- Lecture 59 - Built-in Self-Test - Part I
- Lecture 60 - Built-in Self-Test - Part II

Lecture 1 - Background: Introduction

Lecture 2 - Probability: Concentration inequalities

Lecture 3 - Linear algebra: PCA, SVD

Lecture 4 - Optimization: Basics, Convex, GD

Lecture 5 - Machine Learning: Supervised, generalization, feature learning, clustering.

Lecture 6 - Memory-efficient data structures: Hash functions, universal / perfect hash families

Lecture 7 - Bloom filters

Lecture 8 - Sketches for distinct count

Lecture 9 - Sketches for distinct count (Continued...)

Lecture 10 - Misra-Gries sketch

Lecture 11 - Frequent Element: Space Saving and Count Min

Lecture 12 - Frequent Element: Count Sketch

Lecture 13 - Near Neighbors

Lecture 14 - Locality Sensitive Hashing

Lecture 15 - Building LSH Tables

Lecture 16 - Approximate near neighbors search: Extensions e.g. multi-probe, b-bit hashing, Data dependent variants

Lecture 17 - Approximate near neighbors search: Extensions e.g. multi-probe, b-bit hashing, Data dependent variants (Continued...)

Lecture 18 - Approximate near neighbors search: Extensions e.g. multi-probe, b-bit hashing, Data dependent variants (Continued...)

Lecture 19 - Randomized Numerical Linear Algebra: Random projection

Lecture 20 - Randomized Numerical Linear Algebra: Random projection (Continued...)

Lecture 21 - Randomized Numerical Linear Algebra: a) Matrix multiplication + QB decomposition

Lecture 22 - Randomized Numerical Linear Algebra: b) CUR+CX

Lecture 23 - Randomized Numerical Linear Algebra: a) L2 regression using RP

Lecture 24 - Randomized Numerical Linear Algebra: b) Leverage scores

Lecture 25 - Randomized Numerical Linear Algebra: c) Hash Kernels + Kitchen Sink

Lecture 26 - Map-reduce and Hadoop

Lecture 27 - Hadoop System

Lecture 28 - Hadoop System (Continued...)

Lecture 29 - Hadoop System (Continued...)

Lecture 30 - Spark

Lecture 31 - Spark (Continued...)

Lecture 19 - Introduction to Neural Network

Lecture 20 - Neural Network - II

Lecture 21 - Multilayer Perceptron - I

Lecture 22 - Multilayer Perceptron - II

Lecture 23 - Backpropagation Learning

Lecture 24 - Loss Function

Lecture 25 - Backpropagation Learning- Example - I

Lecture 26 - Backpropagation Learning- Example - II

Lecture 27 - Backpropagation Learning- Example - III

Lecture 28 - Autoencoder

Lecture 29 - Autoencoder Vs PCA - I

Lecture 30 - Autoencoder Vs PCA - II

Lecture 31 - Autoencoder Training

- Lecture 32 - Autoencoder Variants - I
- Lecture 33 - Autoencoder Variants - II
- Lecture 34 - Convolution
- Lecture 35 - Cross Correlation
- Lecture 36 - CNN Architecture
- Lecture 37 - MLP versus CNN, Popular CNN Architecture: LeNet
- Lecture 38 - Popular CNN Architecture: AlexNet
- Lecture 39 - Popular CNN Architecture: VGG16, Transfer Learning
- Lecture 40 - Vanishing and Exploding Gradient
- Lecture 41 - GoogleNet
- Lecture 42 - ResNet, Optimisers: Momentum Optimiser
- Lecture 43 - Optimisers: Momentum and Nesterov Accelerated Gradient (NAG) Optimiser
- Lecture 44 - Optimisers: Adagrad Optimiser
- Lecture 45 - Optimisers: RMSProp, AdaDelta and Adam Optimiser
- Lecture 46 - Normalization
- Lecture 47 - Batch Normalization - I
- Lecture 48 - Batch Normalization - II
- Lecture 49 - Layer, Instance, Group Normalization
- Lecture 50 - Training Trick, Regularization, Early Stopping
- Lecture 51 - Face Recognition
- Lecture 52 - Deconvolution Layer
- Lecture 53 - Semantic Segmentation - I
- Lecture 54 - Semantic Segmentation - II
- Lecture 55 - Semantic Segmentation - III
- Lecture 56 - Image Denoising
- Lecture 57 - Variational Autoencoder - I
- Lecture 58 - Variational Autoencoder - II
- Lecture 59 - Variational Autoencoder - III
- Lecture 60 - Generative Adversarial Network

Lecture 1 - Fundamentals of Image Processing - Part I

Lecture 2 - Fundamentals of Image Processing - Part II

Lecture 3 - Image Transform - Part I

Lecture 4 - Image Transform - Part II

Lecture 5 - Projective Geometry - Part I

Lecture 6 - Projective Geometry - Part II

Lecture 7 - Projective Transformation

Lecture 8 - Homography: Properties - Part I

Lecture 9 - Homography: Properties - Part II

Lecture 10 - Homography: Properties - Part III

Lecture 11 - Camera Geometry - Part I

Lecture 12 - Camera Geometry - Part II

Lecture 13 - Camera Geometry - Part III

Lecture 14 - Camera Geometry - Part IV

Lecture 15 - Camera Geometry - Part V

Lecture 16 - Stereo Geometry - Part I

Lecture 17 - Stereo Geometry - Part II

Lecture 18 - Stereo Geometry - Part III

Lecture 19 - Stereo Geometry - Part IV

Lecture 20 - Stereo Geometry - Part V

Lecture 21 - Stereo Geometry - Part VI

Lecture 22 - Stereo Geometry - Part VII

Lecture 23 - Stereo Geometry - Part VIII

Lecture 24 - Feature Detection And Description - Part I

Lecture 25 - Feature Detection And Description - Part II

Lecture 26 - Feature Detection And Description - Part III

Lecture 27 - Feature Detection And Description - Part IV

Lecture 28 - Feature Detection And Description - Part V

Lecture 29 - Feature Matching And Model Fitting- Part I

Lecture 30 - Feature Matching And Model Fitting- Part II

Lecture 31 - Feature Matching And Model Fitting- Part III

- Lecture 32 - Feature Matching And Model Fitting- Part IV
- Lecture 33 - Feature Matching And Model Fitting- Part V
- Lecture 34 - Color Fundamentals And Processing-Part I
- Lecture 35 - Color Fundamentals And Processing-Part II
- Lecture 36 - Color Fundamentals And Processing-Part III
- Lecture 37 - Color Fundamentals And Processing-Part IV
- Lecture 38 - Color Fundamentals And Processing-Part V
- Lecture 39 - Color Fundamentals And Processing-Part VI
- Lecture 40 - Color Fundamentals And Processing-Part VII
- Lecture 41 - Range Image Processing - Part I
- Lecture 42 - Range Image Processing - Part II
- Lecture 43 - Range Image Processing - Part III
- Lecture 44 - Range Image Processing - Part IV
- Lecture 45 - Range Image Processing - Part V
- Lecture 46 - Clustering and Classification - Part I
- Lecture 47 - Clustering and Classification - Part II
- Lecture 48 - Clustering and Classification - Part III
- Lecture 49 - Clustering and Classification - Part IV
- Lecture 50 - Clustering and Classification - Part V
- Lecture 51 - Dimensional Reduction And Sparse Representation - Part I
- Lecture 52 - Dimensional Reduction And Sparse Representation - Part II
- Lecture 53 - Dimensional Reduction And Sparse Representation - Part III
- Lecture 54 - Dimensional Reduction And Sparse Representation - Part IV
- Lecture 55 - Deep Neural Architecture And Applications - Part I
- Lecture 56 - Deep Neural Architecture And Applications - Part II
- Lecture 57 - Deep Neural Architecture And Applications - Part III
- Lecture 58 - Deep Neural Architecture And Applications - Part IV
- Lecture 59 - Deep Neural Architecture And Applications - Part V
- Lecture 60 - Deep Neural Architecture And Applications - Part VI

Lecture 1 - Introduction to Ethical Hacking

Lecture 2 - Basic Concepts of Networking - Part I

Lecture 3 - Basic Concepts of Networking - Part II

Lecture 4 - TCP/IP Protocol Stack - Part I

Lecture 5 - TCP/IP Protocol Stack - Part II

Lecture 6 - IP addressing and routing - Part I

Lecture 7 - IP addressing and routing - Part II

Lecture 8 - TCP and UDP - Part I

Lecture 9 - TCP and UDP - Part II

Lecture 10 - IP subnetting

Lecture 11 - Routing protocols - Part I

Lecture 12 - Routing protocols - Part II

Lecture 13 - Routing protocols - Part III

Lecture 14 - IP version 6

Lecture 15 - Routing examples

Lecture 16 - Demonstration - Part I

Lecture 17 - Demonstration - Part II

Lecture 18 - Demonstration - Part III

Lecture 19 - Nessus Installation

Lecture 20 - How to use nessus

Lecture 21 - Metasploit Exploiting System Software - I

Lecture 22 - Metasploit Exploiting System Software - II

Lecture 23 - Metasploit Exploiting System Software and Privilege

Lecture 24 - Metasploit Social Eng Attack

Lecture 25 - MITM (Man in The middle) Attack

Lecture 26 - Basic concepts of cryptography

Lecture 27 - Private-key cryptography - Part I

Lecture 28 - Private-key cryptography - Part II

Lecture 29 - Public-key cryptography - Part I

Lecture 30 - Public-key cryptography - Part II

Lecture 31 - Cryptographic hash functions - Part I

- Lecture 32 - Cryptographic hash functions - Part II
- Lecture 33 - Digital signature and certificate
- Lecture 34 - Applications - Part I
- Lecture 35 - Applications - Part II
- Lecture 36 - Steganography
- Lecture 37 - Biometrics
- Lecture 38 - Network Based Attacks - Part I
- Lecture 39 - Network Based Attacks - Part II
- Lecture 40 - DNS and Email Security
- Lecture 41 - Password cracking
- Lecture 42 - Phishing attack
- Lecture 43 - Maloeware
- Lecture 44 - Wifi hacking
- Lecture 45 - Dos and DDos attack
- Lecture 46 - Elements of Hardware Security
- Lecture 47 - Side Channel Attacks - Part I
- Lecture 48 - Side Channel Attacks - Part II
- Lecture 49 - Physical Unclonable Function
- Lecture 50 - Hardware Trojan
- Lecture 51 - Web Application Vulnerability Scanning
- Lecture 52 - SQL Injection Authentication Bypass - Part 1
- Lecture 53 - SQL Injection Error Based - Part 2
- Lecture 54 - SQL Injection Error Based from Web Application - Part 3
- Lecture 55 - SQLMAP
- Lecture 56 - Cross Site Scripting
- Lecture 57 - File Upload Vulnerability
- Lecture 58 - The NMAP Tool: A Relook - Part I
- Lecture 59 - The NMAP Tool: A Relook - Part II
- Lecture 60 - The NMAP Tool: A Relook - Part III
- Lecture 61 - Network Analysis using Wireshark
- Lecture 62 - Summarization of the Course

# DIGIMAT - The No.1 Autonomous Learning Platform for Creative Learning

**NPTEL : NOC:Google Cloud Computing Foundation Course (Computer Science and Engineering)**

**Co-ordinators : Prof. Soumya Kanti Ghosh**

Lecture 1 - Introduction to Cloud

Lecture 2 - Cloud Computing

Lecture 3 - Cloud vs Traditional Architecture

Lecture 4 - Iaas, PaaS and SaaS

Lecture 5 - Google Cloud Architecture

Lecture 6 - Cloud Computing Recap Quiz

Lecture 7 - Summary - Cloud Computing

Lecture 8 - Introduction - Start with a Solid Platform

Lecture 9 - The GCP Console

Lecture 10 - Understanding Projects

Lecture 11 - Billing in GCP

Lecture 12 - Install and Configure Cloud SDK

Lecture 13 - Use Cloud Shell

Lecture 14 - GCP APIs

Lecture 15 - Cloud Console Mobile App

Lecture 16 - Recap Quiz - Start with a Solid Foundation

Lecture 17 - Introduction

Lecture 18 - Compute Options in the Cloud

Lecture 19 - Exploring IaaS with Compute Engine

Lecture 20 - Configuring Elastic Apps with Autoscaling

Lecture 21 - Exploring PaaS with App Engine

Lecture 22 - Event Driven Programs with Cloud Functions

Lecture 23 - Containerizing and Orchestrating Apps with GKE

Lecture 24 - Summary

Lecture 25 - Introduction

Lecture 26 - Storage Options in the Cloud

Lecture 27 - Structured and Unstructured Storage in the Cloud

Lecture 28 - Unstructured Storage using Cloud Storage

Lecture 29 - SQL Managed Services

Lecture 30 - Exploring Cloud SQL

Lecture 31 - Cloud Spanner as a Managed Service

**HTML Links for 1,14,300+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai**

Lecture 32 - NoSQL Managed Services Options

Lecture 33 - Cloud Datastore a NoSQL Document Store

Lecture 34 - Cloud Bigtable as a NoSQL Option

Lecture 35 - Summary

Lecture 36 - Introduction to API

Lecture 37 - The Purpose of APIs

Lecture 38 - Cloud Endpoints

Lecture 39 - Using Apigee

Lecture 40 - Managed Message Services

Lecture 41 - Cloud Pub/Sub

Lecture 42 - Recap Quiz - There's an API for that!

Lecture 43 - Introduction - Cloud Security

Lecture 44 - Introduction to security in the cloud

Lecture 45 - Understanding the shared security model

Lecture 46 - Explore encryption options

Lecture 47 - Understand authentication and authorization

Lecture 48 - Identify best practices for authorization

Lecture 49 - Recap Quiz - Security

Lecture 50 - Summary - Security

Lecture 51 - Introduction

Lecture 52 - Intro to Networking in the Cloud

Lecture 53 - Defining a Virtual Private Cloud

Lecture 54 - Public and Private IP Address Basics

Lecture 55 - Googles Network Architecture

Lecture 56 - Routes and Firewall Rules in the Cloud

Lecture 57 - Multiple VPC Networks

Lecture 58 - Building Hybrid Clouds

Lecture 59 - Different Options for Load Balancing

Lecture 60 - Recap Quiz

Lecture 61 - Summary

Lecture 62 - Introduction - Let Google keep an eye on things

Lecture 63 - Introduction to IaC

Lecture 64 - Cloud Deployment Manager

[Lecture 65 - Monitoring and Managing Your Services, Apps, and Infra](#)

[Lecture 66 - Stackdriver](#)

[Lecture 67 - Recap Quiz - Let Google keep an eye on things](#)

[Lecture 68 - Summary - Let Google keep an eye on things](#)

[Lecture 69 - Introduction - You have the data, but what are you doing with it?](#)

[Lecture 70 - Intro to Big Data Managed Services in the Cloud](#)

[Lecture 71 - Leverage Big Data Operations with Cloud Dataproc](#)

[Lecture 72 - Build ETL Pipelines using Cloud Dataflow](#)

[Lecture 73 - BigQuery Googles Enterprise Data Warehouse](#)

[Lecture 74 - Recap Quiz - You have the data, but what are you doing with it?](#)

[Lecture 75 - Summary - You have the data, but what are you doing with it?](#)

[Lecture 76 - Introduction](#)

[Lecture 77 - Introduction to ML](#)

[Lecture 78 - ML and GCP](#)

[Lecture 79 - Building Bespoke ML models](#)

[Lecture 80 - Cloud AutoML](#)

[Lecture 81 - Googles Pre-trained ML APIs](#)

[Lecture 82 - Recap Quiz](#)

[Lecture 83 - Summary](#)

Lecture 1 - Introduction

Lecture 2 - Basic Concepts in UML

Lecture 3 - Introduction to Use case Modelling

Lecture 4 - Factoring Use Cases

Lecture 5 - Use Case Examples

Lecture 6 - Use Case Guidelines

Lecture 7 - Class Diagram

Lecture 8 - Class Relations

Lecture 9 - Binary and Unary Associations

Lecture 10 - Implementation of Association Relation in Java

Lecture 11 - Implementation of Association in General Case

Lecture 12 - Association Class and Ternary Association

Lecture 13 - Qualified Association

Lecture 14 - Aggregation and Composition

Lecture 15 - Dependency Relation

Lecture 16 - Class Diagram Exercises

Lecture 17 - Interfaces, Packages and Abstract Classes

Lecture 18 - Polymorphism

Lecture 19 - State Machine Diagrams

Lecture 20 - State Charts Overview

Lecture 21 - Features of State Machine Model

Lecture 22 - Example of State Machine Modelling

Lecture 23 - Encoding a State Machine - I

Lecture 24 - Encoding a State Machine - II

Lecture 25 - Interaction Diagrams

Lecture 26 - Sequence Diagram - I

Lecture 27 - Sequence Diagram - II

Lecture 28 - Activity Diagram

Lecture 29 - Introduction to OOAD

Lecture 30 - OOAD - I

Lecture 31 - OOAD - II

Lecture 32 - Example Application of OOAD

Lecture 33 - CRD Cards

Lecture 34 - Open/Closed Principle

Lecture 35 - LSP, ISP Principles

Lecture 36 - DIP Principle

Lecture 37 - Introduction to Design Pattern

Lecture 38 - GRASP Pattern: Introduction

Lecture 39 - Expert and Creator Pattern

Lecture 40 - Pure Fabrication, Law of Demeter

Lecture 41 - Introduction to GOF Patterns

Lecture 42 - Facade Pattern

Lecture 43 - Observer Pattern - I

Lecture 44 - Observer Pattern - II

Lecture 45 - Singleton Pattern - I

Lecture 46 - Singleton Pattern - II

Lecture 47 - State Pattern - I

Lecture 48 - State Pattern - II

Lecture 49 - Composite Pattern - I

Lecture 50 - Composite Pattern - II

Lecture 51 - Adapter Pattern - I

Lecture 52 - Adapter Pattern - II

Lecture 53 - Bridge Pattern - I

Lecture 54 - Bridge Pattern - II

Lecture 55 - Proxy Pattern - I

Lecture 56 - Proxy Pattern - II

Lecture 57 - Decorator Pattern - I

Lecture 58 - Decorator Pattern - II

Lecture 59 - Decorator Pattern - III

Lecture 60 - Iterator Pattern

Lecture 1 - Introduction and Course Plan

Lecture 2 - Generic Methods

Lecture 3 - Basics of Generic Class

Lecture 4 - Parameterized Generic Class

Lecture 5 - Bounded Argument Generic Class

Lecture 6 - Basics of the Framework

Lecture 7 - Collection in JCF

Lecture 8 - Set of JCF

Lecture 9 - Map Framework

Lecture 10 - Java Legacy Classes

Lecture 11 - Array Data Structures

Lecture 12 - Programming for Arrays

Lecture 13 - Class ArrayList for Arrays

Lecture 14 - Arrays for Arrays

Lecture 15 - Vector Class for Arrays

Lecture 16 - Linked List Data Structure - Part I

Lecture 17 - Linked List Data Structure - Part II

Lecture 18 - Programming for Linked Lists - Part I

Lecture 19 - Programming for Linked Lists - Part II

Lecture 20 - Linked Lists Using JCF

Lecture 21 - Stack Data Structures

Lecture 22 - Programming for Stack

Lecture 23 - Stack Using JCF

Lecture 24 - Queue Data Structure

Lecture 25 - Programming for Queue

Lecture 26 - Queue Using JCF

Lecture 27 - Understanding Tree Data Structures

Lecture 28 - Operations on Binary Tree Data Structures

Lecture 29 - Binary Search Tree

Lecture 30 - Programming for Binary Search Tree

Lecture 31 - Height Balanced Binary Search Tree

[Lecture 32 - Heap Tree](#)

[Lecture 33 - Programming for Heap Tree](#)

[Lecture 34 - Huffman Tree](#)

[Lecture 35 - Graph Structures](#)

[Lecture 36 - Graph Algorithms](#)

[Lecture 37 - Map Framework in Java](#)

[Lecture 38 - Applications of Map - Part I](#)

[Lecture 39 - Applications of Map - Part II](#)

[Lecture 40 - Collection Set](#)

[Lecture 41 - Operations on Set Collection](#)

[Lecture 42 - Introduction to java.io](#)

[Lecture 43 - IO with Byte Streams](#)

[Lecture 44 - IO with Character Streams](#)

[Lecture 45 - File Input-Output](#)

[Lecture 46 - Random Access File](#)

[Lecture 47 - Linear Searching Algorithms](#)

[Lecture 48 - Non-linear Searching Algorithms](#)

[Lecture 49 - Programs for Searching](#)

[Lecture 50 - Sorting Algorithms - Part I](#)

[Lecture 51 - Improved Sorting Algorithms](#)

[Lecture 52 - Advanced Sorting Algorithms](#)

[Lecture 53 - Programs for Sorting - Part I](#)

[Lecture 54 - Programs for Sorting - Part II](#)

[Lecture 55 - Sorting Using JCF](#)

[Lecture 56 - String Class](#)

[Lecture 57 - Applications of String](#)

[Lecture 58 - StringBuffer Class](#)

[Lecture 59 - Miscellaneous Utilities](#)

[Lecture 60 - Java Cursors](#)

Lecture 1 - Introduction

Lecture 2 - Introduction

Lecture 3 - Characteristics of a real-time embedded system

Lecture 4 - Characteristics of a real-time embedded system

Lecture 5 - Types of real-time tasks

Lecture 6 - Events in a Real-Time System

Lecture 7 - Types of time constraints

Lecture 8 - Basics of Real-Time Task scheduling

Lecture 9 - Clock-driven schedulers

Lecture 10 - Basics of Cyclic schedulers

Lecture 11 - Cyclic Scheduler

Lecture 12 - Frame size constraints

Lecture 13 - Frame size selection: Examples

Lecture 14 - Event-driven scheduling

Lecture 15 - EDF scheduler

Lecture 16 - Variants of EDF and Rate Monotonic Scheduling

Lecture 17 - Rate Monotonic Schedulability Analysis

Lecture 18 - Rate Monotonic Schedulability Analysis

Lecture 19 - Rate Monotonic Scheduling: Miscellaneous issues

Lecture 20 - RMS Generalizations

Lecture 21 - RMS Generalizations

Lecture 22 - Handling aperiodic and sporadic tasks in rate monotonic scheduling

Lecture 23 - Handling aperiodic and sporadic tasks in rate monotonic scheduling

Lecture 24 - Coping up with Insufficient number of priorities

Lecture 25 - Handling task jitter and precedence ordering

Lecture 26 - Resource Sharing Among Real-Time Tasks

Lecture 27 - Basic priority inheritance protocol (PIP)

Lecture 28 - Highest Locker Protocol (HLP)

Lecture 29 - Priority Ceiling Protocol (PCP)

Lecture 30 - Working of Priority Ceiling Protocol

Lecture 31 - Analysis of Priority Ceiling Protocol

- Lecture 32 - Introduction to Multiprocessor and Distributed Systems
- Lecture 33 - Static Allocation of Tasks
- Lecture 34 - Dynamic Allocation of Tasks
- Lecture 35 - Centralized Clock Synchronization in Distributed RT Systems
- Lecture 36 - Distributed Clock Synchronization in R-T Systems
- Lecture 37 - A Few Basics in Real-Time Operating Systems
- Lecture 38 - Time Services
- Lecture 39 - Unix as a Real-Time Operating System
- Lecture 40 - Unix as a Real-Time Operating System (Continued...)
- Lecture 41 - Windows as RTOS
- Lecture 42 - POSIX
- Lecture 43 - Unix-Based Real-Time Operating Systems
- Lecture 44 - A survey of some contemporary Real-Time Operating Systems
- Lecture 45 - A survey of some contemporary Real-Time Operating Systems (Continued...)
- Lecture 46 - Benchmarking Real-Time Systems
- Lecture 47 - Introduction to Real-Time Communication
- Lecture 48 - Basics of Real-Time Communication
- Lecture 49 - Basics of Networking
- Lecture 50 - Basics of Internet
- Lecture 51 - Real-Time Communication in a LAN
- Lecture 52 - Bounded Access Protocols for LANs
- Lecture 53 - Performance Comparison and QoS Framework
- Lecture 54 - Routing and Resource Reservation
- Lecture 55 - Rate Control
- Lecture 56 - QoS Models and Soft Real-Time Communication in a LAN
- Lecture 57 - Review of Basic Database Concepts
- Lecture 58 - Applications and Issues of Real-Time Database
- Lecture 59 - Characteristics of Temporal Data
- Lecture 60 - Locking-Based Concurrency Control In Real-Time Databases
- Lecture 61 - Concurrency Control In Real-Time Databases and Commercial RT Databases

- Lecture 1 - Introduction on Proteins
- Lecture 2 - Introduction on Proteins (Continued...) and Sequence Database
- Lecture 3 - Protein Data Bank

Lecture 1 - Course Outline

Lecture 2 - Quick Recap 01: Recap of C/1

Lecture 3 - Quick Recap 02: Recap of C/2

Lecture 4 - Course Overview

Lecture 5 - IO and Loop

Lecture 6 - Arrays and Strings

Lecture 7 - Sorting and Searching

Lecture 8 - Stack and Common Data Structures/Containers

Lecture 9 - Tutorial 1: How to build a C/C++ program?: Part 1: C Preprocessor (CPP)

Lecture 10 - Constants and Inline Functions

Lecture 11 - Reference and Pointer

Lecture 12 - Default Parameters and Function Overloading

Lecture 13 - Operator Overloading

Lecture 14 - Dynamic Memory Management

Lecture 15 - Tutorial 2: How to build a C/C++ program?: Part 2: Build Pipeline

Lecture 16 - Static Members

Lecture 17 - Classes and Objects

Lecture 18 - Access Specifiers

Lecture 19 - Constructors, Destructors and Object Lifetime

Lecture 20 - Copy Constructor and Copy Assignment Operator

Lecture 21 - Const-ness

Lecture 22 - Tutorial 3: How to build a C/C++ program?: Part 3: make Utility

Lecture 23 - Inheritance: Part 3 (Constructor and Destructor - Object Lifetime)

Lecture 24 - Friend Function and Friend Class

Lecture 25 - Overloading Operator for User-Defined Types: Part 1

Lecture 26 - Overloading Operator for User-Defined Types: Part 2

Lecture 27 - Namespace

Lecture 28 - Tutorial 4: How to build a C/C++ program?: Part 4: Static and Dynamic Library

Lecture 29 - Inheritance: Part 2 (Data Member and Member Function - Override and Overload)

Lecture 30 - Inheritance: Part 3 (Constructor and Destructor - Object Lifetime)

Lecture 31 - Inheritance: Part 4: Phone Hierarchy

- Lecture 32 - Inheritance: Part 5: private and protected Inheritance
- Lecture 33 - Tutorial 5: Mixing C and C++ Code: Part 1: Issues and Resolutions
- Lecture 34 - Polymorphism: Part 1: Type Casting
- Lecture 35 - Polymorphism: Part 2: Static and Dynamic Binding
- Lecture 36 - Polymorphism: Part 3: Abstract Base Class
- Lecture 37 - Polymorphism: Part 4: Staff Salary Processing using C
- Lecture 38 - Polymorphism: Part 5: Staff Salary Processing using C++
- Lecture 39 - Tutorial 6: Mixing C and C++ Code: Part 2: Project Example
- Lecture 40 - Virtual Function Table
- Lecture 41 - Type Casting and Cast Operators: Part 1
- Lecture 42 - Type Casting and Cast Operators: Part 2
- Lecture 43 - Type Casting and Cast Operators: Part 3
- Lecture 44 - Multiple Inheritance
- Lecture 45 - Tutorial 7: How to design a UDT like built-in types?: Part 1: Fraction UDT
- Lecture 46 - Exceptions (Error handling in C): Part 1
- Lecture 47 - Exceptions (Error handling in C++): Part 2
- Lecture 48 - Template (Function Template): Part 1
- Lecture 49 - Template (Class Template): Part 2
- Lecture 50 - Functors: Function Objects
- Lecture 51 - Tutorial 8: How to design a UDT like built-in types?: Part 2: Int and Poly UDT
- Lecture 52 - Input-Output: File Handling in C
- Lecture 53 - Input-Output: Streams in C++
- Lecture 54 - C++ Standard Library: Part 1 (Generic Programming)
- Lecture 55 - C++ Standard Library: Part 2 (STL)
- Lecture 56 - C++ Standard Library: Part 3 (STL)
- Lecture 57 - Tutorial 9: How to design a UDT like built-in types?: Part 3: Updates and Mixes of UDTs
- Lecture 58 - C++11 and beyond: General Features: Part 1
- Lecture 59 - C++11 and beyond: General Features: Part 2
- Lecture 60 - C++11 and beyond: General Features: Part 3
- Lecture 61 - C++11 and beyond: General Features: Part 4: Rvalue and Move/1
- Lecture 62 - C++11 and beyond: General Features: Part 5: Rvalue and Move/2
- Lecture 63 - Tutorial 10: How to optimize C++11 programs using Rvalue and Move Semantics?
- Lecture 64 - C++11 and beyond: General Features: Part 6: Rvalue and Perfect Forwarding

[Lecture 65 - C++11 and beyond: General Features: Part 7: Lambda in C++/1](#)

[Lecture 66 - C++11 and beyond: General Features: Part 8: Lambda in C++/2](#)

[Lecture 67 - C++11 and beyond: Class Features](#)

[Lecture 68 - C++11 and beyond: Non-class Types and Template Features](#)

[Lecture 69 - Tutorial 11: Compatibility of C and C++: Part 1: Significant Features](#)

[Lecture 70 - C++11 and beyond: Resource Management by Smart Pointers: Part 1](#)

[Lecture 71 - C++11 and beyond: Resource Management by Smart Pointers: Part 2](#)

[Lecture 72 - C++11 and beyond: Concurrency: Part 1](#)

[Lecture 73 - C++11 and beyond: Concurrency: Part 2](#)

[Lecture 74 - Closing Comments](#)

[Lecture 75 - Tutorial 12: Compatibility of C and C++: Part 2: Summary](#)

Lecture 1 - The Model of Decentralization

Lecture 2 - What is Blockchain

Lecture 3 - Basic Cryptographic Primitives - I

Lecture 4 - Basic Cryptographic Primitives - II

Lecture 5 - Basic Cryptographic Primitives - III

Lecture 6 - Basic Cryptographic Primitives - IV

Lecture 7 - Basic Cryptographic Primitives - V

Lecture 8 - Distributed Systems for Decentralization - The Beginning

Lecture 9 - The Evolution of Cryptocurrencies

Lecture 10 - Open Consensus and Bitcoin

Lecture 11 - Bitcoin Mining and Beyond

Lecture 12 - Smart Contracts and the Permissioned Models of Blockchain

Lecture 13 - Blockchain Elements - I

Lecture 14 - Blockchain Elements - II

Lecture 15 - Blockchain Elements - III

- Lecture 60 - Blockchain for Decentralized Marketplace - Part 2

Lecture 1 - Introduction

Lecture 2 - Assumptions of Game Theory

Lecture 3 - Examples of Games

Lecture 4 - Equilibrium Concepts

Lecture 5 - Nash Equilibrium

Lecture 6 - Indifference Principle

Lecture 7 - Security of Players

Lecture 8 - Minmax Theorem

Lecture 9 - Implications of Minmax Theorem

Lecture 10 - MSNEs of Matrix Games

Lecture 11 - Iterative Eliminations of Dominated Strategies

Lecture 12 - Iterative Eliminations of Dominated Strategies (Continued...)

Lecture 13 - Braess's paradox

Lecture 14 - Yao's Lemma and its applications

Lecture 15 - Support Enumeration Algorithm

Lecture 16 - Succinct game

Lecture 17 - Potential Games

Lecture 18 - Best Response Dynamics

Lecture 19 - Fast Convergence of Best Response Dynamics

Lecture 20 - Computing  $\epsilon$ -PSNE for Network Congestion Games

Lecture 21 - PSNE for Congestion Games

Lecture 22 - PSNE for Symmetric Congestion Games

Lecture 23 - Functional NP

Lecture 24 - PPAD Class

Lecture 25 - Sperner's Lemma

Lecture 26 - Approximate MSNE Computation

Lecture 27 - Correlated Equilibrium

Lecture 28 - Coarse Correlated Equilibrium

Lecture 29 - External Regret Framework

Lecture 30 - Multiplicative Weight Algorithm

Lecture 31 - Multiplicative Weight Algorithm (Continued...)

Lecture 32 - Swap Regret and Correlated Equilibrium

Lecture 33 - Swap Regret to External Regret Reduction

Lecture 34 - Braess's paradox and Pigou's Network

Lecture 35 - PoA of Selfish Routing Game

Lecture 36 - PoA of Selfish Load Balancing Game

Lecture 37 - Bayesian Game

Lecture 38 - BNE of First Price Auction

Lecture 39 - Extensive Form Game

Lecture 40 - Mechanism Design Introduction

Lecture 41 - Implementation of Social Choice Functions

Lecture 42 - Revelation Principle

Lecture 43 - Properties of Social Choice Function

Lecture 44 - Gibbard-Satterthwaite Theorem

Lecture 45 - Quasilinear Environment

Lecture 46 - Ex-Post Efficiency

Lecture 47 - VCG Mechanism

Lecture 48 - Example of VCG Mechanism

Lecture 49 - Weighted VCG

Lecture 50 - Affine Maximizer

Lecture 51 - Recap of Topics Discussed so Far

Lecture 52 - Single Parameter Domain

Lecture 53 - DSIC in Single Parameter Domain

Lecture 54 - Mayerson's Lemma

Lecture 55 - Sponsored Search Auction

Lecture 56 - Intermediate Domain

Lecture 57 - Algorithmic Mechanism Design

Lecture 58 - Stable Matching

Lecture 59 - Gale-Shapley Algorithm

Lecture 60 - Properties of Stable Matching

Lecture 1 - Introduction

Lecture 13 - Queuing theory - I (Continued)

Lecture 14 - Queuing theory - II

Lecture 15 - Queuing theory - III

Lecture 16 - Queuing theory - IV

Lecture 17 - Queuing theory - V

Lecture 18 - Queuing theory - VI

Lecture 19 - Queuing networks - I

Lecture 20 - Queuing networks - II

Lecture 21 - Slotted Aloha Markov model

Lecture 22 - Simulations - I

Lecture 23 - Simulations - II

Lecture 24 - Simulations - III

Lecture 25 - Operational laws - I

Lecture 26 - Operational laws - II

Lecture 27 - Open and closed queuing networks

Lecture 28 - Approximate MVA

Lecture 29 - Convolution algorithm - I

Lecture 30 - Convolution algorithm - II

Lecture 31 - Load-dependent service centers

[Lecture 32 - Hierarchical decomposition](#)

[Lecture 33 - Balanced Job Bounds](#)

[Lecture 34 - Confidence interval for proportions and introduction to experimental design](#)

[Lecture 35 - 2k factorial design](#)

[Lecture 36 - 2k r factorial design and 2k-p fractional factorial design](#)

[Lecture 37 - Programming aspects of discrete-event simulations - I](#)

[Lecture 38 - Programming aspects of discrete-event simulations - II](#)

[Lecture 39 - Discrete-event simulations - III](#)

[Lecture 40 - PetriNets - I](#)

[Lecture 41 - PetriNets - II](#)

[Lecture 42 - PetriNets - III](#)

Lecture 1 - Grammars and Natural Language Processing

Lecture 2 - Grammars and Languages Generated

Lecture 3 - Grammars and Languages Generated (Continued.)

Lecture 4 - Ambiguity in CFG

Lecture 5 - Simplification of CFG

Lecture 6 - Removal of Unit Productions, Chomsky Normal Form for CFG

Lecture 7 - Greibach Normal Form for CFG

Lecture 8 - Final State Automata

Lecture 9 - Non Deterministic FSA

Lecture 10 - Non Deterministic FSA (Continued.)

Lecture 11 - Non Deterministic FSA with E(Epsilon)- Moves

Lecture 12 - Equivalence Between FSA and Type 3 Grammars

Lecture 13 - Regular Expressions, Regular Expressions to NFSA

Lecture 14 - DFSA to Regular Expressions

Lecture 15 - Problems and Solutions - I

Lecture 16 - Pumping Lemmas for Regular Sets and CFL

Lecture 17 - MYHILL - Nerode Theorem

Lecture 18 - Minimization of DFSA

Lecture 19 - FSA with output Moore and Mealy Machines

Lecture 20 - Pushdown Automata

Lecture 21 - Pushdown Automata, Equivalence Between Acceptance by Empty Store and Acceptance by Final State

Lecture 22 - Pushdown Automata CFG to PDA

Lecture 23 - Pushdown Automata PDA to CFG

Lecture 24 - Problems and Solutions - II

Lecture 25 - Problems and Solutions - III

Lecture 26 - Turing Machines

Lecture 27 - Turing Machines (Continued.)

Lecture 28 - Turing Machine as Acceptor, Techniques for TM Construction

Lecture 29 - Generalized Versions of Turing Machines

Lecture 30 - Turing Machine as a Generating Device

Lecture 31 - Recursive Sets, Recursively Innumerable Sets, Encoding of TM, Halting Problem

[Lecture 32 - Problems and Instances, Universal TM, Decidability](#)

[Lecture 33 - RICE'S Theorem, Linear Bounded Automata, Properties of TM](#)

[Lecture 34 - POST'S Correspondence Problems](#)

[Lecture 35 - POST'S Correspondence Problems \(Continued.\), Time and Tape Complexity of TM](#)

[Lecture 36 - NP - Complete Problems, Cook's Theorem](#)

[Lecture 37 - NP - Complete Problems \(Continued.\)](#)

[Lecture 38 - Regulated Rewriting](#)

[Lecture 39 - L-Systems](#)

[Lecture 40 - Grammar Systems](#)

[Lecture 41 - DNA Computing](#)

[Lecture 42 - Membrane Computing](#)

Lecture 1 - Introduction

Lecture 2 - CRT Display Devices

Lecture 3 - CRT Display Devices (Continued...)

Lecture 4 - CRT Display Devices (Continued...)

Lecture 5 - CRT Display Devices (Continued...)

Lecture 6 - Transformations in 2D

Lecture 7 - Transformations in 2D (Continued...)

Lecture 8 - Three Dimensional Graphics

Lecture 9 - Three Dimensional Graphics (Continued...)

Lecture 10 - Three Dimensional Graphics (Continued...)

Lecture 11 - Projection Transformations And Viewing Pipeline

Lecture 12 - 3D Viewing - Projection Transformations And Viewing Pipeline

Lecture 13 - Scan Converting Lines, Circles And Ellipses

Lecture 14 - Scan Converting Lines, Circles And Ellipses (Continued...)

Lecture 15 - Scan Converting Lines, Circles And Ellipses (Continued...)

Lecture 16 - Scan Converting Lines, Circles And Ellipses (Continued...)

Lecture 17 - Scan Converting Lines, Circles And Ellipses (Continued...)

Lecture 18 - Polyfill- Scan Conversion Of A Polygon

Lecture 19 - Scan Conversion Of A Polygon (Continued...)

Lecture 20 - Clipping - Lines And Polygons

Lecture 21 - Clipping Lines And Polygons

Lecture 22 - Clipping Lines

Lecture 23 - Solid Modelling

Lecture 24 - Solid Modelling

Lecture 25 - Solid Modelling (Continued...)

Lecture 26 - Visible Surface Detection

Lecture 27 - Visible Surface Detection (Continued...)

Lecture 28 - Visible Surface Detection (Continued...)

Lecture 29 - Visible Surface Detection (Continued...)

Lecture 30 - Visible Surface Detection (Continued...)

Lecture 31 - Visible Surface Detection (Continued...)

[Lecture 32 - Visible Surface Detection \(Continued...\)](#)

[Lecture 33 - Illumination And Shading](#)

[Lecture 34 - Illumination And Shading \(Continued...\)](#)

[Lecture 35 - Illumination And Shading \(Continued...\)](#)

[Lecture 36 - Curve Representation](#)

[Lecture 37 - Curve Representation \(Continued...\)](#)

[Lecture 38 - Curves And Surface Representation](#)

[Lecture 39 - Graphics Programming Using Open GL](#)

[Lecture 40 - Graphics Programming Using Open GL \(Continued...\)](#)

[Lecture 41 - Advanced Topics: Anti Aliasing,Color,Soft Objects,Animation,Visual Effects,System Architectures](#)

[Lecture 42 - Digital Image Processing Image Compression-Jpeg-Enhancements](#)

[Lecture 43 - Digital Image Processing \(Continued...\)](#)
