Lecture 56 - Pitch Preparation

Lecture 57 - Wicket Keeping Standing UP

Lecture 58 - Wicket Keeping Standing Back

Lecture 59 - Key points of wicket keeping skill

Lecture 60 - How to coach

Lecture 61 - Efficient Conduct of a Practice Session

Lecture 62 - How to Shoot Videos

Lecture 63 - Methods and Approach of Batting

Lecture 64 - Tactics in Cricket

Lecture 65 - Chucking in cricket

Lecture 66 - Myth and true in Cricket

Lecture 67 - Diet Chart

Lecture 68 - Beat the Heat

Lecture 69 - Motivation

Lecture 70 - How to conduct Fielding Drill

Lecture 71 - Warmup and Cooling Down Exercises

Lecture 72 - Revisions of Batting Setup and Front Foot Shorts

Lecture 73 - Revisions of Cut,Pull and Hook Shots

Lecture 74 - Revisions of Bowling Skill

NPTEL : NOC:Mastering Speaking and Presentations: A Case Based Approach (Humanities and Social Sciences)

Co-ordinators : Prof. Seema Singh

Lecture 1 - Course Introduction

Lecture 2 - Pre-Assessment

Lecture 3 - Vocabulary Made Easy

Lecture 4 - The Power of Words

Lecture 5 - Case Studies 1 - Mr. Akshat Ranjit Kumar and Mr. Vijendra Singh Shyam

Lecture 6 - Spoken English Part 1: Introduction to Word Accent

Lecture 7 - Word Accent: Disyllabic Words

Lecture 8 - Word Accent: Shift of Accent in Disyllabic Words

Lecture 9 - Word Accent: Polysyllabic Words

Lecture 10 - Case Studies 2 - Ms. Pooja Saini and Mr. Akshath Surwase

Lecture 11 - Spoken English Part 2: Introduction to Rhythm

Lecture 12 - Introduction to Rhythm

Lecture 13 - Rising Intonation

Lecture 14 - Falling Intonation

Lecture 15 - Case Studies 3 - Aditya Raj, A Rohith Kumar and Naini Suhas Reddy

Lecture 16 - Spoken English Part 3 - Introduction to Spoken English in Specific Scenarios

Lecture 17 - How to Speak in Formal Settings

Lecture 18 - How to Speak with People Lower in Hierarchy than You

Lecture 19 - Telephone Skills: Taking and Making Calls, Voice, Intonation, and Language

Lecture 20 - Case Studies 4 - Devansh Gupta, Om Jain and Sujesh Sheshadri

Lecture 21 - Impactful Presentations Part 1 - Introduction to Body Langauge and Voice Modulation

Lecture 22 - The role of Nonverbal Communication in delivering impactful Presentations

Lecture 23 - Body Language: Mechanics and Style

Lecture 24 - Voice Modulation - Voice Projection, Replacing Fillers, and Emphasis

Lecture 25 - Case Studies 5 - Anuj Kumar, Yash Gupta and Pawan Sharma

Lecture 26 - Impactful Presentations Part 2: The Power of Pause

Lecture 27 - Pause to engage audience in a conversation

Lecture 28 - Combine Pause and Repetition Techniques

Lecture 29 - Demonstrate Confidence and Control to Establish your Presence

Lecture 30 - Case Studies 6 - Soumyashree Nayak,Vedant Sharma, D S Ram and Yogesh Kushwaha

Lecture 31 - Impactful Presentations Part 3: Introduction to Empathy

Lecture 32 - The Role of Empathy in Delivering Impactful Presentations

Lecture 33 - How to make your Presentations have an Impact on your Audiences

Lecture 34 - Key Takeaways on Impactful Presentations that leave lasting Impressions

Lecture 35 - Case Studies 7 - S Ayush, Akshit Goyal, Shivang Devina and Raunak Dariyal

Lecture 36 - Case Studies on Effective Speaking and Impactful Presentations - Part I

Lecture 37 - Case Studies on Effective Speaking and Impactful Presentations - Part II

Lecture 38 - Case Observation 1 - Tatoo History, Art, and Culture - by Crow

Lecture 39 - Case Observation 2 - Effective Presentations by Ms. Akriti Agarwal

Lecture 40 - Course Conclusion

NPTEL : NOC:Modernisation and Creative Communication (Humanities and Social Sciences)

Co-ordinators : Prof. Saswat Samay Das, Prof. Ananya Roy Pratihar

Lecture 1 - Modernisation: Introduction and Contemporaneity - Part 1

Lecture 2 - Modernisation: Introduction and Contemporaneity - Part 2

Lecture 3 - Modernisation and Creativity

Lecture 4 - Modernisation Theory: Evolution, Analysis and Applications

Lecture 5 - Tools of Modernisation

Lecture 6 - Modernity, Modernism and Modernisation

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Aspects of Western Philosophy (Humanities and Social Sciences)

Co-ordinators : Dr. Sreekumar Nellickappilly

Lecture 1 - Greek Philosophy: Ionians, Pythagoras, Parmenides, Heraclitus and Democritus

Lecture 2 - Sophists, Socrates; philosophy of man; relativism and subjectivism; the idea of good

Lecture 3 - Platos idealism: theory of ideas

Lecture 4 - Plato: theory of knowledge, method of dialectic; theory of soul

Lecture 5 - Aristotles criticism of Platonic idealism and the concepts of Form and Matter

Lecture 6 - Aristotles theory of causation; potentiality and actuality

Lecture 7 - Medieval philosophy: St. Augustine and the Problem of evil; St. Thomas Aquinass concepts of faith and reason; proofs for the existence of God.

Lecture 8 - Modern Philosophy: mail characteristic features; renaissance and scientific revolution; rationalism and empiricism: main features.

Lecture 9 - Descartes: the method in philosophy; the concepts of doubt and indubitable knowledge.

Lecture 10 - Descartes: the mind-body dualism; the concept of God and proofs for Gods existence

Lecture 11 - Spinoza: the concepts of Substance, attributes and modes.

Lecture 12 - Spinozas pantheism-God and nature

Lecture 13 - Leibniz: Monadology; the mind-body problem revisited; concept of God; the concept of pre-established harmony

Lecture 14 - The empiricism of John Locke: ideas and their classification; refutation of innate ideas

Lecture 15 - John Locke: theory of knowledge; concept of substance; the primary and secondary qualities

Lecture 16 - Berkeley: the refutation of the distinction between primary and secondary qualities, immaterialism

Lecture 17 - Berkeleys critique of abstract ideas, esse est percipi, the problem of solipsism; God and self

Lecture 18 - Hume : Impressions and ideas, knowledge concerning relations of ideas and knowledge concerning matters of fact, induction and causality.

Lecture 19 - The external world and the self, personal identity, rejection of metaphysics, scepticism, reason and the passions.

Lecture 20 - Critical Philosophy: characteristic features; kantd objectives: the classification of judgements, possibility of synthetic a priori judgements, the Copernican revolution

Lecture 21 - Kant: forms of sensibility, categories of understanding; the process of knowledge acquisition; phenomenon and noumenon,

Lecture 22 - The Ideas of Reason-soul, God and world as a whole; antinomies; rejection of speculative metaphysics.

Lecture 23 - Kants ethics; freedom and immortality, problems with Kant.

Lecture 24 - Hegel : The conception of Geist (spirit), the dialectical method, concepts of being, non-being and becoming,

Lecture 25 - Absolute idealism; consciousness, self consciousness and reason.

Lecture 26 - Karl Marx: historical materialism; the significance of the proletariat; the base structure-superstructure division.

Lecture 27 - Nietzsche : Critique of western culture, religion and morality; will to power; the idea of superman.

Lecture 28 - Linguistic turn in British philosophy: Russells logical atomism and the refutation of idealism.

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 29 - Wittgenstein : early Wittgensteins conception of language and reality; the picture theory of meaning

Lecture 30 - Later Wittgensteins conception of language games and forms of life; meaning and use.

Lecture 31 - Logical positivism; against metaphysics and a scientific conception of philosophy; the limitation of logical positivism

Lecture 32 - Husserl : Phenomenology and the methods of reduction; the principle of intentionality.

Lecture 33 - Phenomenological reduction, eidetic reduction and transcendental reduction; transcendental subjectivity; the pure subject.

Lecture 34 - Heidegger : phenomenological hermeneutics; concept of Being; man as being-in-the-world; destruction of the western intellectual tradition.

Lecture 35 - Authentic and inauthentic existence; Truth as disclosure

Lecture 36 - Existentialism: main features; existence precedes essence; freedom and responsibility; finiteness and situatedness of human existence

Lecture 37 - Sartres conception of human existence; man is condemned to be free; rejection of essentialism

Lecture 38 - The concept of being-in-itself, being-for-itself and being-for-others

Lecture 39 - Postmodernism: major trends and chief characteristic features; conceptions of human subject; different postmodern approaches

Lecture 40 - Deconstruction, feminism, discourse theory etc.

Lecture 18 - Overview of data analysis

Lecture 19 - Ethical framework for health research

Lecture 20 - Conducting clinical trials

Lecture 21 - Preparing a concept paper for research projects

Lecture 22 - Elements of a protocol for research studies

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:American Literature and Culture (Humanities and Social Sciences)

Co-ordinators : Dr. Aysha Iqbal Viswamohan

Lecture 1 - Lecture 1 - Introduction to the course on American Literature and Culture

Lecture 2 - Lecture 2 - Henry James : Introduction

Lecture 3 - Lecture 3 - Henry James : The Portrait of a Lady

Lecture 4 - Lecture 4 - Henry James : The Portrait of a Lady (Chapter 1-20)

Lecture 5 - Lecture 5 - Henry James : The Portrait of a Lady (Chapter 1-20 continued)

Lecture 6 - Lecture 6 - Henry James : The Portrait of a Lady (Chapter 1-20 continued)

Lecture 7 - Lecture 7 - Henry James : The Portrait of a Lady (Chapter 21-35)

Lecture 8 - Lecture 8a - Henry James : The Portrait of a Lady (Chapter 21-34)

Lecture 9 - Lecture 8b - Henry James : The Portrait of a Lady (Chapter 35)

Lecture 10 - Lecture 9a - Theodore Dreiser : An American Tragedy- Introduction

Lecture 11 - Lecture 9b - Theodore Dreiser : An American Tragedy

Lecture 12 - Lecture 10a - Theodore Dreiser : An American Tragedy

Lecture 13 - Lecture 10b - Theodore Dreiser : An American Tragedy

Lecture 14 - Lecture 10c - Theodore Dreiser : An American Tragedy

Lecture 15 - Lecture 11 - Herman Melville : Moby Dick

Lecture 16 - Lecture 12 - Herman Melville : Moby Dick

Lecture 17 - Lecture 12a - Herman Melville : A brief overview

Lecture 18 - Lecture 13a - Short Story

Lecture 19 - Lecture 13b - Flannery O'Connor : A brief overview

Lecture 20 - Lecture 14 - Flannery O'Connor

Lecture 21 - Lecture 15 - Ernest Hemingway : A brief overview

Lecture 22 - Lecture 16 - Ernest Hemingway : The Sun also Rises

Lecture 23 - Lecture 17 - Ernest Hemingway : The Sun also Rises

Lecture 24 - Lecture 18 - Ernest Hemingway : The Sun also Rises

Lecture 25 - Lecture 19 - Ernest Hemingway : The Sun also Rises

Lecture 26 - Lecture 20 - F. Scott Fitzgerald : A brief overview

Lecture 27 - Lecture 21 - Romanticism

Lecture 28 - Lecture 22 - Edgar Allen Poe : Annabel Lee

Lecture 29 - Lecture 23 - American Drama

Lecture 30 - Lecture 24 - Lillian Hellman

Lecture 31 - Lecture 25 - Lillian Hellman : The Children's Hour

Lecture 32 - Lecture 26 - Lillian Hellman : The Children's Hour

Lecture 33 - Lecture 27 - Lillian Hellman : The Children's Hour

Lecture 34 - Lecture 28 - Arthur Miller : The Dramatist, his life and works

Lecture 35 - Lecture 29 - Arthur Miller : A View From The Bridge

Lecture 36 - Lecture 30 - Arthur Miller : A View From The Bridge

Lecture 37 - Lecture 31 - Arthur Miller : A View From The Bridge

Lecture 38 - Lecture 32 - Eugene O'Neill : An Introduction

Lecture 39 - Lecture 33 - Eugene O'Neill : Desire Under the Elms

Lecture 40 - Lecture 34 - Edith Wharton : An Introduction

Lecture 41 - Lecture 35 - Edith Wharton : Age Of Innocence

Lecture 42 - Lecture 36 - Edith Wharton : The Age of Innocence

Lecture 43 - Lecture 37 - Edith Wharton : The Age of Innocence

Lecture 44 - Lecture 38 - Christopher Hitchens : Jewish Power, Jewish Peril

Lecture 45 - Lecture 39 - Hart Crane : The Bridge

NPTEL : NOC:Economics of IPR (Humanities and Social Sciences)

Co-ordinators : Prof.Nalin Bharti

Lecture 1 - Introduction to IPR - Historical Overview from GATT to WTO

Lecture 2 - Why IPR Matters

Lecture 3 - Application of IPR in the Global World

Lecture 4 - Economic Perspective on IPR

Lecture 5 - Types of IPR Its introduction and objectives

Lecture 6 - Globalization of IPR

Lecture 7 - Economics of Copyright

Lecture 8 - Economics of Patent

Lecture 9 - Economics of Trademarks

Lecture 10 - Economics of Trade Secrets

Lecture 11 - Economics of Industrial Design

Lecture 12 - Issues in Contemporary Patent

Lecture 13 - Critical Issues in Copyright and Related Rights

Lecture 14 - Issues in Traditional Knowledge

Lecture 15 - Plant Varieties Protection and Biotechnology

Lecture 16 - Commercialization of Intellectual Property and Unfair Competition

Lecture 17 - Disputes related to Patent in WTO

Lecture 18 - Disputes related to copyright, etc. in WTO

Lecture 19 - IP and Development

Lecture 20 - Summarizing the course

NPTEL : NOC:Applied Linguistics (Humanities and Social Sciences)

Co-ordinators : Prof. Rajesh Kumar

Lecture 1 - Introduction

Lecture 2 - Language

Lecture 3 - Language in Society

Lecture 4 - Acquisition

Lecture 5 - Vocal Apparatus

Lecture 6 - Places and Manners of Articulation

Lecture 7 - Word Formation Phonotactic Rules

Lecture 8 - Rules of Word Formation

Lecture 9 - Sentences- an introduction

Lecture 10 - Components of a Sentence

Lecture 11 - Grammaticality and Acceptability

Lecture 12 - Subject and Verb in a sentence

Lecture 13 - Sentence : Objects and Verbs

Lecture 14 - Application of linguistic structure in social theory

Lecture 15 - Second Language Acquisition

Lecture 16 - Language and Multilingualism

Lecture 17 - Language, Culture and Cognition

Lecture 18 - Classroom discussion on Language, Culture and Cognition

Lecture 19 - Language and Gender

Lecture 20 - Language, Media and Network society

Lecture 21 - Language Teaching

Lecture 22 - Language Teaching Methods - I

Lecture 23 - Language Teaching Methods - II

Lecture 24 - Materials and Assessment in Teaching Language

Lecture 25 - Disability and Learning Disorder

Lecture 26 - Language Development and Specific Difficulties

Lecture 27 - Dyslexia: A Developmental Phenomenon or a Disorder

Lecture 28 - Specific Learning Difficulties

Lecture 29 - Language and Computers

Lecture 30 - Language, Computers and Applications

Lecture 31 - Language and Education

Lecture 32 - Language and Application

NPTEL : NOC:English Language for Competitive Exams (Humanities and Social Sciences)

Co-ordinators : Dr. Aysha Iqbal Viswamohan

Lecture 1 - What is Reading Comprehension?

Lecture 2 - Literature and reading comprehension

Lecture 3 - Scientific passages and reading comprehension

Lecture 4 - Analyze a task - 1

Lecture 5 - Analyze a task - 2

Lecture 6 - Reading - Comprehending Scientific Passages

Lecture 7 - Comprehending Literary Passages - 1

Lecture 8 - Comprehending Literary Passages - 2

Lecture 9 - Academic writing

Lecture 10 - Text - Completion

Lecture 11 - Analogy

Lecture 12 - Writing : Long Essays

Lecture 13 - Writing : Long Essays (Continued...)

Lecture 14 - Listening

Lecture 15 - Writing : Imaginative Essays

Lecture 16 - Listening for Specific Information

Lecture 17 - Reading Comprehension

Lecture 18 - (Lecture Missing)

Lecture 19 - Reading Comprehension: Long Passages

Lecture 20 - Verbal Analogy and Vocabulary

Lecture 21 - Vocabulary: Word Families and Confusable Words

Lecture 22 - Vocabulary: word origins and confusable words

Lecture 23 - Vocabulary: Text Completion - Part 1

Lecture 24 - Vocabulary: Text Completion - Part 2

Lecture 25 - Vocabulary: Text Completion - Part 3

Lecture 26 - Vocabulary: Synonyms, Meanings and Confusable Words

Lecture 27 - Text Completion

Lecture 28 - Text Completion (Continued...)

Lecture 29 - Analogy and Text Completion

Lecture 30 - Text Completion (Continued...)

Lecture 31 - Text Completion - Part 4

Lecture 32 - Names and Vocabulary

Lecture 33 - Latin Terms in English Vocabulary

Lecture 34 - Greek Mythology and Vocabulary

Lecture 35 - Green Names and Foreign Words

Lecture 36 - Vocabulary Practice Test

Lecture 37 - Analogy

Lecture 38 - Foreign Words and Names

Lecture 39 - Suffixes and Reference Words

Lecture 40 - Uncommon Words - Part 1

Lecture 41 - Uncommon Words - Part 2

Lecture 42 - More Uncommon Words

Lecture 43 - More Uncommon Words (Continued...)

Lecture 44 - Vocabulary and Analogy

Lecture 45 - Vocabulary: Mixed Bag

Lecture 46 - Subject-Verb Agreement and Sentence Correction

Lecture 47 - Sentence Correction

Lecture 48 - Conditional Clauses, Prepositions and Reported Speech

Lecture 49 - Clauses

Lecture 50 - Modifiers, Active Voice and Passive Voice

Lecture 51 - Gerunds and Infinitives

Lecture 52 - Coordinators and Conjunctions - Part 1

Lecture 53 - Coordinators and Conjunctions - Part 2

Lecture 54 - Grammar: Words and Expressions

Lecture 55 - Grammar: Phrasal Verbs

Lecture 56 - Punctuation

Lecture 57 - Punctuation (Continued...)

Lecture 58 - Revision - Vocabulary

Lecture 59 - Revision - Subject verb agreement

Lecture 60 - Read and Revise

NPTEL : NOC:Ethics (Humanities and Social Sciences)

Co-ordinators : Dr. Sreekumar Nellickappilly

Lecture 1 - Ethics and Morals: Introductory Remarks

Lecture 2 - Different Approaches to Ethics

Lecture 3 - Historical Perspectives: Agent-Centric Moral Theory of the East and the West

Lecture 4 - Medieval and Modern Moral Theories

Lecture 5 - Socratic Framework in Morla Philosophy

Lecture 6 - Eudaimonism to Divine Command

Lecture 32 - Perfekt von untrennbaren Verben | Wie lÃ¶se ich meine Probleme beim Lernen ?

Lecture 33 - RatschlÃ¤ge mit sollten | Sprache und Berufe | Wir lesen vor. (Lektion 7)

Lecture 34 - Exkurs ins Absurde! | Generationenprojekte (Lektion 7)

Lecture 35 - Generationenprojekte - wir hÃ¶ren die Texte

Lecture 36 - Welche Sportart mÃ¶chtest du ausprobieren? | deshalb, trotzdem

Lecture 37 - Wiederholung Lektion 7 | Wir machen mit â€‹Lektion 8 weiter.

Lecture 38 - WofÃ¼r entscheiden sich Sandra und Conny ? | Fragewort WO + PrÃ¤position

Lecture 39 - Alles Ã¼ber FragewÃ¶rter: mit und ohne PrÃ¤positionen

Lecture 40 - Eine Stadt entdecken | Wir beginnen Lektion 9

Lecture 41 - Lektion 9 | Interessante HÃ¤user und Wohnungen

Lecture 42 - Lektion 9 | Die lieben Nachbarn

Lecture 43 - Lektion 9 | HÃ¶fliche Bitte | wenn und als

Lecture 44 - Lektion 9 | Wir Ã¼ben als und wenn. | SÃ¤tze und Wortgruppen

Lecture 45 - Die Deutschen und ihre Haustiere

Lecture 46 - Wir beginnen Lektion 10 | Der Superlativ

Lecture 47 - Welche/r/s und Was fÃ¼r ein/e...

Lecture 48 - Lektion 10 | etwas, man, niemand, jemand...

Lecture 49 - Der Relativsatz | Wir machen Lektion 10 zu Ende

Lecture 50 - Wir machen Lektion 11. | K 2 - Verben und W-Fragen mit PrÃ¤positionen

Lecture 51 - Lektion 12 | Wir sind mit unserem Kurs fertig!

NPTEL : NOC:German-I (Humanities and Social Sciences)

Co-ordinators : Prof. Milind Brahme

Lecture 1 - Herzlich willkommen!

Lecture 2 - Wie ist dein Name ?

Lecture 3 - Ich trinke gern Kaffee

Lecture 4 - Wir konjugieren die Verben

Lecture 5 - A bit of history and ZAHLEN

Lecture 6 - Verben, W-Fragen, Ja-Nein Fragen, Imperativ

Lecture 7 - das Alphabet, die Woche, das Jahr

Lecture 8 - Was sind deine Hobbys ? Formular ausfullen

Lecture 9 - Mein Lehrbuch | Meine personlichen Daten

Lecture 10 - Mein Arbeitsbuch

Lecture 11 - Wir beginnen Lektion 3

Lecture 12 - Wir lesen Lektion 3

Lecture 13 - Kein | Unregelmabige Verben | Ein Lied

Lecture 14 - Wer ist das? | ich-mein; du-dein

Lecture 15 - Lektion 4 Guten Appetit!

Lecture 16 - Das Essen | Some revision

Lecture 17 - mag oder mÃ¶chte | der Akkusativ

Lecture 18 - Ein Lesetext | die Uhr

Lecture 19 - die Uhrzeit | trennbare Verben

Lecture 20 - Familie und Possessiv

Lecture 21 - Wir machen Lektion 6 | Ordinalzahlen

Lecture 22 - Wie feierst du deinen Geburtstag?

Lecture 23 - der Akkusativ | ein WÃ¼rfelspiel

Lecture 24 - das Kaffeehaus |die Kneipe |der Biergarten

Lecture 25 - Lektion 6: Freizeitprogramm

Lecture 26 - Sprache, BundeslÃ¤nder, StÃ¤dte | Wir beginnen Lektion 7

Lecture 27 - Akkusativ-Dativ | Annika im BÃ¼ro | Wir machen Kaffee

Lecture 28 - Lektion 7 -- formeller Brief

Lecture 29 - Wie lernst du Deutsch ? Wir hÃ¶ren ein deutsches Lied

Lecture 30 - Wir lernen die PrÃ¤positionen

Lecture 31 - HÃ¶rverstÃ¤ndnis | Wir beginnen Lektion 8

Lecture 32 - Lektion 8 -- Haus-Wohnung-MÃ¶bel-GerÃ¤te

Lecture 33 - Extra Lektion on Modal Verbs

Lecture 34 - Eine E-Mail schreiben | Eine Wohnung beschreiben

Lecture 35 - Warum ist die Miete so hoch ? | Vorteile und Nachteile

Lecture 36 - Die neue Wohnung -- Was ist wo ? | WechselprÃ¤positionen

Lecture 37 - gefallen, gehÃ¶ren, passen, schmecken

Lecture 38 - Lektion 9 | Wir lernen das Perfekt

Lecture 39 - Lektion 9 | Wir Ã¼ben das Perfekt

Lecture 40 - Was hast du in den Ferien gemacht ?

Lecture 41 - Lektion 9 | Die Jobsuche

Lecture 42 - Lektion 9 | TelefongesprÃ¤che

Lecture 43 - Im Kaufhaus | Welche/Diese

Lecture 44 - Lektion 11 | Korper und Gesundheit

Lecture 45 - Gesund und munter | Wir machen Lektion 11 zu Ende

Lecture 46 - Ab in den Urlaub | Wir machen Lektion 12

Lecture 49 - Discussion 3 - Drama

Lecture 50 - Discussion 4 - Novel

NPTEL : NOC:German - III (Humanities and Social Sciences)

Co-ordinators : Prof. Milind Brahme

Lecture 1 - GUTE REISE. Reisen, Ferien und Urlaub

Lecture 2 - Infinitiv mit zu

Lecture 3 - Wir lernen das Verb lassen

Lecture 4 - Das Verb lassen / Ãœber eine Reise sprechen und schreiben

Lecture 5 - Wir Machen Lektion 1 Zu Ende

Lecture 6 - Wir Sprechen Ãœber Vorlieben Und Abneigungen

Lecture 7 - Mein Lieblingsurlaub

Lecture 8 - Wir beginnen mit Kapitel 2

Lecture 9 - Kapitel 2. Wir Lernen Die Konnektoren -- Weil, Deshalb, Obwohl Und Trotzdem

Lecture 10 - Der Genitiv

Lecture 11 - Der Genitiv -- Die PrÃ¤positionen wegen und trotz -- Wir machen Lektion 2 zu Ende

Lecture 12 - Wir machen Lektion 3.

Lecture 13 - Das PrÃ¤teritum

Lecture 14 - Technik im Alltag

Lecture 15 - Die PrÃ¤positionen vor, nach und wÃ¤hrend.

Lecture 16 - Neue Technologien - Eine Meinung

Lecture 17 - Wir Ã¼ben Konnektoren. Wir beginnen mit Lektion 4

Lecture 18 - Wir machen mit Lektion 4 weiter

Lecture 19 - Wir lernen das PrÃ¤teritum und den Konjunktiv 2

Lecture 20 - Verben mit PrÃ¤positionen - Lektion 4

Lecture 21 - Wir machen Lektion 4 zu Ende

Lecture 22 - Was bedeutet GlÃ¼ck fÃ¼r mich?

Lecture 23 - Umweltfreundlich? Wir machen Lektion 5

Lecture 24 - GlÃ¼cklich sein und umweltfreundlich leben. Lektion 5: Komparativ und Superlativ

Lecture 25 - Wir wiederholen Adjektiv- und n-Deklination

Lecture 26 - Umweltschutz und Tierschutz. Wir machen Lektion 5 zu Ende.

Lecture 27 - Wir bereiten uns auf eine PrÃ¤sentation vor.

Lecture 28 - Relativsatz 1

Lecture 29 - Relativsatz 2. Und wir lesen eine kleine Geschichte.

Lecture 30 - Zukunftszeichen und VorsÃ¤tze fÃ¼rs neue Jahr: Wir lernen Futur I.

Lecture 31 - Relativsatz - eine Wiederholung | Zukunft: Hamburg 2030

Lecture 32 - Was kann ich fÃ¼r die Umwelt tun? (I)

Lecture 33 - Was kann ich fÃ¼r die Umwelt tun? (II)

Lecture 34 - Was kann ich fÃ¼r die Umwelt tun? (III)

Lecture 35 - Kleines StÃ¤de-Quiz

Lecture 36 - Was kann ich fÃ¼r die Umwelt tun? (IV)

Lecture 37 - Wir lernen und Ã¼ben das Plusquamperfekt.

Lecture 38 - Wir beginnen mit Kapitel 7.

Lecture 39 - Thema Beziehungskisten. Wir lernen dabei temporale NebensÃ¤tze kennen.

Lecture 40 - Wir Ã¼ben temporale NebensÃ¤tze.

Lecture 41 - BerÃ¼hmte Paare. Wir machen Kapitel 7 zu Ende.

Lecture 42 - Wir beginnen mit Kapitel 8.

Lecture 43 - Im Krankenhaus. brauchen nicht und brauchen nur + zu | dass Stze und Infinitiv Stze

Lecture 44 - Wir wiederholen und ben das Reflexiv.

Lecture 45 - Wofr interessierst du dich? | Reflexiv und zweiteilige Konnektoren: Wir machen Kapitel 8 zu Ende.

Lecture 46 - Thema: Hotel Mama. Prasentationen der Lernenden. (I)

Lecture 47 - Hotel Mama. Prasentationen der Lernenden. (II)

Lecture 48 - PrÃ¤sentationen der Lernenden zum Thema Hotel Mama (III)

Lecture 49 - ErgÃ¤nzung der Adjektivdeklination. Wir beginnen mit Kapitel 9.

Lecture 50 - PrÃ¤sentationen der Lernenden zum Thema Hotel Mama (IV)

Lecture 51 - Wir sehen einen Film zum Thema Hotel Mama.

Lecture 52 - Stellung von nicht im Satz.| Volkslieder

Lecture 53 - Wir lernen das Passiv.

Lecture 54 - Wir lernen und Ã¼ben das Passiv.

Lecture 55 - Wir Ã¼ben das Passiv. (II) | PrÃ¤positionen mit dem Genitiv | Wir machen Kapitel 10 zu Ende.

Lecture 56 - Adjektivdeklination - Wiederholung | Kapitel 11: ArtikelwÃ¶rter als Pronomen

Lecture 57 - Kapitel 11: Adjektiv als Nomen | SprichwÃ¶rter | ErgÃ¤nzung zu den RelativsÃ¤tzen

Lecture 58 - Kapitel 11: StÃ¤dterankings | RelativsÃ¤tze mit was und wo

Lecture 59 - Wir machen Kapitel 11 zu Ende. | SÃ¤tze mit je...desto

Lecture 60 - Kapitel 12: Verben als Adjektive - Partizip 2 und Partizip 1

Lecture 61 - Wir lernen und ?ben das Passiv.

Lecture 62 - Kapitel 12: Lesetexte zu den Themen Globalisierung und Gewissensfragen

Lecture 63 - Zwei Prasentationen zum Thema: Leben - in der Stadt oder auf dem Land?

Lecture 64 - Kapitel 12: Lesetext -- Die Fuggerei in Augsburg

Lecture 65 - Zwei Prasentationen zum Thema: Leben - in der Stadt oder auf dem Land? (II)

Lecture 66 - Prasentationen zum Thema: Leben - in der Stadt oder auf dem Land? (III)

Lecture 67 - Prasentationen zum Thema: Leben - in der Stadt oder auf dem Land? (IV)

Lecture 68 - Prasentationen zum Thema: Leben - in der Stadt oder auf dem Land? (V) | Wir lernen

Lecture 69 - Wir lernen, wie man einen informellen Brief oder eine informelle E-Mail schreibt

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Appreciating Hindustani Music (Humanities and Social Sciences)

Co-ordinators : Prof. Lakshmi Sreeram

Lecture 1 - Hindustani Music - A World of Colour, Romance and History

Lecture 2 - Classical or Shastriya - What's in a Name !

Lecture 3 - Dhrupad, Khayal and Instrumental Music: A Bird's-eye View

Lecture 4 - Hindustani Music is Raga Sangeet

Lecture 5 - The Textual Tradition

Lecture 6 - Swara and Shruti: Tone and Microtone

Lecture 7 - Swara and Shruti in the Textual Tradition

Lecture 8 - Tanpura - The King of Overtones

Lecture 9 - Entering the World of Raga â€“ Raga and Swara

Lecture 10 - The World of Raga 2 : Strong and Weak Notes

Lecture 11 - The World of Raga 3 : Ornament

Lecture 12 - The World of Raga 4 : Paths of a Raga

Lecture 13 - Raga and Time Association

Lecture 14 - Raga-Lakshana or Features of Raga

Lecture 15 - Defining Raga

Lecture 16 - Classification of Ragas - The Mela or Thaat System

Lecture 17 - Classification of Ragas - The Raagaanga System

Lecture 18 - Classification of Ragas - Raga Ragini System

Lecture 19 - Extending the Raga Corpus - Winds from the South

Lecture 20 - Extending the Raga Corpus - Jod Ragas

Lecture 21 - Principles of Time in Hindustani Music - Tala and Laya

Lecture 22 - Some Aspects of Tala and a Few Important Talas

Lecture 23 - Tabla as Keeper of Tala in Khayal

Lecture 24 - Khayal, A Compositional Form - 1

Lecture 25 - Khayal, A Compositional Form - 2

Lecture 26 - Khayal Compositions by Contemporary Composers

Lecture 27 - The Vilambit Khayal

Lecture 28 - Tarana and Trivat

Lecture 29 - Raga Vistaar or Badhat - Improvisation in Khayal

Lecture 30 - Ashtaanga of Khayal - The Many Limbs of a Khayal Presentation

Lecture 31 - A Typical Khayal Concert

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - A Khayal Rendition of Raga Bageshri by Dr. Lakshmi Sreeram

Lecture 33 - Gharanas - Schools/Styles of Khayal

Lecture 34 - Gharanas of Khayal - An Introduction

Lecture 35 - Gharanas of Khayal - Early Masters

Lecture 36 - Gharanas of Khayal - Twentieth Century Masters

Lecture 37 - Gharana - Lecture Demonstration by Pt. Satyasheel Deshpande

Lecture 38 - Melodic Accompaniment in Khayal

Lecture 39 - The Harmonium as Accompaniment for Khayal - Guest Lecture

Lecture 40 - Dhrupad and Khayal - Some Comparative Remarks

Lecture 41 - Dhrupad - An Overview

Lecture 42 - Dhrupad - Style and Structure

Lecture 43 - Dhrupad - Aalaap

Lecture 44 - Dhrupad - Song Texts in Different Talas

Lecture 45 - Dhamaar - A Compositional Form

Lecture 46 - Sadra - A Compositional Form

Lecture 47 - The Enchanting World of Thumri

Lecture 48 - Instrumental Music - A Brief Overview

Lecture 49 - The Sitar - The Instrument, Technique and Presentation

Lecture 50 - The Sarod - A Lecdem

Lecture 51 - Art of the Tabla - Introduction

Lecture 52 - Bhakthande and Paluskar - The 20th Century Reformers of Hindustani Music

Lecture 53 - Hindustani Music in a World of Millions of Views

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:An Introduction to Indian Literary Theory (Humanities and Social Sciences)

Co-ordinators : Prof. Sreenath V.S

Lecture 1 - The Social History of Sanskrit and the Origin of KÃ„vya

Lecture 2 - The RÃ„mÃ„yaÃ¡Â¹â€¡a and Sanskrit Literary Theory

Lecture 3 - The Genesis and Evolution of Sanskrit Literary Theory

Lecture 4 - The Actual Relation Between KÃ„vyaÃ…â€ºÃ„stra or KÃ„vya

Lecture 5 - Sanskrit KÃ„vyaÃ…â€ºÃ„stra in the Medieval Period

Lecture 6 - Sanskrit Literary Theoreticians - Early Period

Lecture 7 - Sanskrit Literary Theoreticians - Medieval Period A

Lecture 8 - Sanskrit Literary Theoreticians - Medieval Period B

Lecture 9 - Sanskrit Literary Theory in the Colonial Period

Lecture 10 - Sanskrit poetics in the Postcolonial Phase

Lecture 11 - Reader in Sanskritic kÃ„vya tradition

Lecture 12 - Who is the ideal spectator for nÃ„Ã¡Â¹Âya?

Lecture 13 - DaÃ…â€ºarÃ…Â«paka: Ten dramatic forms - Part I

Lecture 14 - DaÃ…â€ºarÃ…Â«paka: Ten dramatic forms - Part II

Lecture 15 - UparÃ…Â«pakas

Lecture 16 - KÃ„vya and the Three Languages

Lecture 17 - KÃ„vyasvarÃ…Â«pa or the Ontology of Poetry

Lecture 18 - Bharata and the Idea of Rasa

Lecture 19 - The Beginning of Rasa Discourse in Literary Theory

Lecture 20 - Rasa Theory and Ã„â,¬nandavardhana

Lecture 21 - Rasa Theory and BhaÃ¡Â¹ÂÃ¡Â¹Â LollaÃ¡Â¹Âa

Lecture 22 - Rasa Theory and Ã…Å¡ri Ã…Å¡aÃ¡Â¹â€¦kuka

Lecture 23 - Rasa Theory and BhaÃ¡Â¹ÂÃ¡Â¹Âa Tauta

Lecture 24 - Rasa Theory and BhaÃ¡Â¹ÂÃ¡Â¹Âa NÃ„yaka

Lecture 25 - Rasa Theory and Abhinavagupta

Lecture 26 - Rasa Theory, RÃ„macandra and GuÃ¡Â¹â€¡acandra

Lecture 27 - Rasa Theory and VidyÃ„dhara

Lecture 28 - The Theory of Alamkara

Lecture 29 - The Concept of Aucitya: An Introduction

Lecture 30 - The Concept of Aucitya and KÃ¡Â¹Â£emendra

Lecture 31 - Two Ways of Implementing Aucitya - Part 1

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Two Ways of Implementing Aucitya - Part 2

Lecture 33 - Aucitya and KaviÃ…â€ºikÃ¡Â¹Â£a

Lecture 34 - Aucitya and the Readers

Lecture 35 - Aucitya and the Opinion of Literary Theoreticians

Lecture 36 - Aucitya and Ã„â,¬nandavardhana

Lecture 37 - Guna or Poetic Merit: Bharata and Bhamaha

Lecture 38 - Guna or Poetic Merit: DaÃ¡Â¹â€¡Ã¡Â¸in and UdbhaÃ¡Â¹Âa

Lecture 39 - Guna or Poetic Merit: VÃ„man's Contribution

Lecture 40 - Guna or Poetic Merit: Ã„â,¬nandavardhana, NamidÃ„shu and PratihÃ„renduraja

Lecture 41 - Guna or Poetic Merit: Bhoja

Lecture 42 - Guna or Poetic Merit: ViÃ…â€ºveÃ…â€ºvara and the author of AgnipurÃ„Ã¡Â¹â€¡a

Lecture 43 - Guna or Poetic Merit: MammaÃ¡Â¹Â's View

Lecture 44 - RÃ„Â«ti or the Theory of Poetic Styles

Lecture 45 - Theory of Dosa or Poetic Blemish: Bharat's View

Lecture 46 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: BhÃ„mah's View

Lecture 47 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: DaÃ¡Â¹â€¡dinÃ¢â,¬â„¢s View

Lecture 48 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: VÃ„man's View

Lecture 49 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: Ã„â,¬nandavardhana and MammaÃ¡Â¹Â's Views

Lecture 50 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: MammaÃ¡Â¹Â's View II

Lecture 51 - Theory of DoÃ¡Â¹Â£a or Poetic Blemish: Ã„â,¬nandavardhana and MammaÃ¡Â¹Â's View III

Lecture 52 - Vakrokti: An Introduction

Lecture 53 - Vakrokti: Pada-pÃ…Â«rvÃ„rtha-vakrata - I

Lecture 54 - Vakrokti: Pada-pÃ…Â«rvÃ„rtha-vakrata - II

Lecture 55 - Vakrokti: Pada-pÃ…Â«rvÃ„rtha-vakrata - III

Lecture 56 - PadaparÃ„rddha vakratÃ„

Lecture 57 - VÃ„kya-vakratÃ„

Lecture 58 - PrakaraÃ¡Â¹â€¡a-vakratÃ„

Lecture 59 - Prabandha vakratÃ„

Lecture 60 - Dhvani: AvivakÃ¡Â¹Â£ita-vÃ„cya

Lecture 61 - VivakÃ¡Â¹Â£itÃ„nya-paravÃ„cya

NPTEL : NOC:Host-Pathogen Interaction (Immunology) (Humanities and Social Sciences)

Co-ordinators : Prof. Himanshu Kumar

Lecture 1 - History of Immunology - 1

Lecture 2 - History of Immunology - 2

Lecture 3 - History of Immunology - 3

Lecture 4 - History of Immunology - 4 (Nobel Prizes in Immunology)

Lecture 5 - Branches of Immunology

Lecture 6 - An Introduction of Immune system-immunity properties

Lecture 7 - An Introduction of Immune system-link between innate and adaptive immunity

Lecture 8 - An Introduction of immune organs

Lecture 9 - Immune organs - 1

Lecture 10 - Immune organs - 2

Lecture 11 - Immune organs - 3

Lecture 12 - Cells of Immune System - Hematopoiesis

Lecture 13 - Cells of Immune System - Transgenesis - 1

Lecture 14 - Cells of Immune System - Transgenesis - 2

Lecture 15 - Cells of Immune System and and its role in Host Defense - PBMC isolation

Lecture 16 - Cells of Immune System and and its role in Host Defense - Neutrophils

Lecture 17 - Cells of Immune System and and its role in Host Defense - Eosinophils, Basophils, Mast cells

Lecture 18 - Cells of Immune System and and its role in Host Defense - Dendritic cells

Lecture 19 - Cells of Immune System and and its role in Host Defense - Macrophages

Lecture 20 - Cells of Immune System and and its role in Host Defense - Natural Killer cells and NK T cells

Lecture 21 - Cells of Immune System and and its role in Host Defense - B and T cells

Lecture 22 - Basics of Cytokines

Lecture 23 - Basics of Cytokines-Cytokine function and other Immune Mediators

Lecture 24 - Inflammation and Signature of Inflammation

Lecture 25 - Signatures of Inflammation

Lecture 26 - Application of Interferons in Therapies

Lecture 27 - Application of Cytokines in Therapies and Research

Lecture 28 - Introduction of Innate Immunity

Lecture 29 - Introduction of Innate Immunity - Physical, Bio-chamical and Microbiological Barriers

Lecture 30 - Introduction of Innate Immunity - skin

Lecture 31 - Introduction of Innate Immunity - Mucosal Surfaces and Microbiological Barrier

Lecture 32 - Concept of Pattern - recognition receptors (PRRs)

Lecture 33 - Pattern-recognition receptors - TLRs and TLR Ligand

Lecture 34 - Pattern-recognition receptors - TLRs Signaling and MyD88 and TRIF-dependent signalling

Lecture 35 - Pattern-recognition receptors - TLRs and Diseases

Lecture 36 - Pattern-recognition receptors - TLRs and Therapeutics

Lecture 37 - Pattern-recognition receptors - RLR

Lecture 38 - Pattern-recognition receptors - RLR Signaling pathways

Lecture 39 - Pattern-recognition receptors - RLR associated-Diseases and therapeutics

Lecture 40 - Pattern-recognition receptors - NLR and NLR Signaling pathways

Lecture 41 - Pattern-recognition receptors - NLR and Diseases

Lecture 42 - Pattern-recognition receptors - Discovery of DNA Sensor

Lecture 43 - Pattern-recognition receptors - DNA Sensor and Signaling pathway

Lecture 44 - Pattern-recognition receptors - DNA Sensor and Diseases

Lecture 45 - Innate Immunity - Complement Introduction

Lecture 46 - Complement - Classical Pathway

Lecture 47 - Complement - Alternative and Lectin Pathway

Lecture 48 - Complement - Regulation and Diseases

Lecture 49 - Introduction to the adaptive Immunity

Lecture 50 - Adaptive Immunity - Antigen

Lecture 51 - Adaptive Immunity - Antigen/Immunogen Properties

Lecture 52 - Adaptive Immunity - B and T cells Antigenic epitopes

Lecture 53 - Adaptive Immunity - Antibodies

Lecture 54 - Adaptive Immunity - Antibody types

Lecture 55 - Adaptive Immunity - Antibody Diversity

Lecture 56 - Adaptive Immunity - T cells and T cell-mediated Immune responses

Lecture 57 - Host-virus interaction

Lecture 58 - Innate Immunity during virus infection - Type I Interferon-dependent

Lecture 59 - Innate Immunity during virus infection - Type I Interferon-independent

Lecture 60 - Innate immune evasion by viruses

Lecture 61 - Adaptive Immune Responses Against Viruses

Lecture 62 - Adaptive immune evasion by viruses

Lecture 63 - Influenza Virus and Disease - 1

Lecture 64 - Influenza Virus and Disease - 2

Lecture 65 - Influenza Virus and Disease - 3

Lecture 66 - Influenza Virus and Disease - 4

Lecture 67 - Influenza Virus and Disease - 5

Lecture 68 - Influenza Virus and Disease - 6

Lecture 69 - Arbovirus and Aroboviral diseases

Lecture 70 - Arbovirus and Dengue virus infection

Lecture 71 - Arbovirus and Zika virus infection

Lecture 72 - Introduction to Bacterial Infection

Lecture 73 - Virulence factor during Bacterial Infection

Lecture 74 - Bacterial Infection - Tuberculosis - 1

Lecture 75 - Bacterial Infection - Tuberculosis - 2

Lecture 76 - Bacterial Infection - Tuberculosis - 3

Lecture 77 - Fungal Infection - 1

Lecture 78 - Fungal Infection - 2

Lecture 79 - Introduction to the parasite infection and Malaria

Lecture 80 - Parasite infection - Trpanosomiasis (African Sleeping Sickness)

NPTEL : NOC:Indian Feminisms: Concepts and Issues (Humanities and Social Sciences)

Co-ordinators : Prof. Anandita Pan

Lecture 1 - What is Feminism ?

Lecture 2 - Making of Indian Feminism - Part 1

Lecture 3 - Making of Indian Feminism - Part 2

Lecture 4 - Women's Activism

Lecture 5 - Gender and Anti-caste movements

Lecture 6 - Dalit Women's Activism

Lecture 7 - Identity, Difference and Intersectionality - Part 1

Lecture 8 - Identity, Difference and Intersectionality - Part 2

Lecture 9 - Nation and the Construction of Woman

Lecture 10 - Social Reformation - Part 1

Lecture 11 - Social Reformation - Part 2

Lecture 12 - Nationalism and the 'Women's Question

Lecture 13 - Nationalism and the New Patriarchy

Lecture 14 - Concept of Endogamy

Lecture 15 - Nation through the Lens of Women's Autobiographies

Lecture 16 - Gender and Violence

Lecture 17 - Theorising Violence - Dowry

Lecture 18 - Theorising Violence - Domestic Violence

Lecture 19 - Theorising Violence - Rape

Lecture 20 - Theorising Violence - Heteronormativity and Sexuality

Lecture 21 - Resisting Violence

Lecture 22 - Gender and Labour

Lecture 23 - Women's Labour in India - The 20th Century

Lecture 24 - Gender and Class

Lecture 25 - Sexual Harassment in Workplace

Lecture 26 - Gender, Labour, and Agency - Part 1

Lecture 27 - Gender, Labour, and Agency - Part 2

Lecture 28 - Through the Lens of Gender - Textual Analysis

Lecture 29 - Feminist Futures

NPTEL : NOC:United Nations Sustainable Development Goals (Humanities and Social Sciences)

Co-ordinators : Prof. Shiva Ji

Lecture 1 - Introduction, United Nations and a World in Order

Lecture 2 - Scenario of Current Model of Growth and Development

Lecture 3 - Need for Change

Lecture 4 - Definition of Sustainability, Aspects of Sustainability, Transition from MDGs to SDGs - Part 1

Lecture 5 - Definition of Sustainability, Aspects of Sustainability, Transition from MDGs to SDGs - Part 2

Lecture 6 - The Role of UN and the Need for SDGs and Adoption by the World

Lecture 7 - Scope and Inclusion and Agenda 2030

Lecture 8 - Our Common Future and Philosophy behind SDGs

Lecture 9 - Distinction between Development and Sustainable Development

Lecture 10 - Circular economy

Lecture 11 - Design for sustainability

Lecture 12 - Thinking Alternatives and Innovation

Lecture 13 - Causal Mapping, Systemic Mapping and Problem Identification

Lecture 14 - Identifying probable interventions for SD, Framework and Structuring of Seventeen SDGs

Lecture 15 - No Poverty - Part 1

Lecture 16 - No Poverty - Part 2

Lecture 17 - Zero Hunger - Part 1

Lecture 18 - Zero Hunger - Part 2

Lecture 19 - Good Health and Well-being - Part 1

Lecture 20 - Good Health and Well-being - Part 2

Lecture 21 - Quality Education - Part 1

Lecture 22 - Quality Education - Part 2

Lecture 23 - Gender Equality - Part 1

Lecture 24 - Gender Equality - Part 2

Lecture 25 - Clean Water and Sanitation

Lecture 26 - Affordable and Clean Energy - Part 1

Lecture 27 - Affordable and Clean Energy - Part 2

Lecture 28 - Decent Work and Economic Growth - Part 1

Lecture 29 - Decent Work and Economic Growth - Part 2

Lecture 30 - Industry, Innovation and Infrastructure - Part 1

Lecture 31 - Industry, Innovation and Infrastructure - Part 2

Lecture 32 - Reduced Inequality

Lecture 33 - Reduced Inequality

Lecture 34 - Sustainable Cities and Communities - Part 1

Lecture 35 - Sustainable Cities and Communities - Part 2

Lecture 36 - Sustainable Cities and Communities - Part 3

Lecture 37 - Responsible Consumption and Production - Part 1

Lecture 38 - Responsible Consumption and Production - Part 2

Lecture 39 - Climate Action - Part 1

Lecture 40 - Climate Action - Part 2

Lecture 41 - Life Below Water - Part 1

Lecture 42 - Life Below Water - Part 2

Lecture 43 - Life on Land - Part 1

Lecture 44 - Life on Land - Part 2

Lecture 45 - Peace and Justice Strong Institutions

Lecture 46 - Partnerships to achieve the Goal - Part 1

Lecture 47 - Partnerships to achieve the Goal - Part 2

Lecture 48 - Analyzing SDG connections, grouped into People, Ecological, and Spiritual categories - Part 1

Lecture 49 - Analyzing SDG connections, grouped into People, Ecological, and Spiritual categories - Part 2

Lecture 50 - Analyzing SDG connections, grouped into People, Ecological, and Spiritual categories - Part 3

Lecture 51 - Analyzing SDG connections, grouped into People, Ecological, and Spiritual categories - Part 4

Lecture 52 - SDGs and Socio Ecological Systems: Economy SDGs ; Society SDGs ; Biosphere SDGs

Lecture 53 - Financing the SDGs and Global Funds, Implementation Planning, Capacity Building and Finance - Part 1

Lecture 54 - Financing the SDGs and Global Funds, Implementation Planning, Capacity Building and Finance - Part 2

Lecture 55 - Financing the SDGs and Global Funds, Implementation Planning, Capacity Building and Finance - Part 3

Lecture 56 - Financing the SDGs and Global Funds, Implementation Planning, Capacity Building and Finance - Part 4

Lecture 57 - Financing the SDGs and Global Funds, Implementation Planning, Capacity Building and Finance - Part 5

Lecture 58 - Key Climate Conferences and Summits: Rio 92, Kyoto 95, Paris 15, COP26 - Part 1

Lecture 59 - Key Climate Conferences and Summits: Rio 92, Kyoto 95, Paris 15, COP26 - Part 2

Lecture 60 - Key Climate Conferences and Summits: Rio 92, Kyoto 95, Paris 15, COP26 - Part 3

Lecture 61 - Key Climate Conferences and Summits: Rio 92, Kyoto 95, Paris 15, COP26 - Part 4

Lecture 62 - Key Climate Conferences and Summits: Rio 92, Kyoto 95, Paris 15, COP26 - Part 5

Lecture 63 - Case Studies from around the World, Implementation at International Level, Global Reports - Part 1

Lecture 64 - Case Studies from around the World, Implementation at International Level, Global Reports - Part 2

Lecture 65 - Case studies from India, Implementation at National Level, National Reports

Lecture 66 - Nodal Agency for Implementation in India

Lecture 67 - Indian implementation strategy: State reports, assessment, and effectiveness checks

Lecture 68 - Summary

NPTEL : NOC:Learning English in Hindi (Humanities and Social Sciences)

Co-ordinators : Prof. Rajesh

Lecture 1 - Sounds and Writing Symbols in Engish

Lecture 2 - Speech Sounds in English

Lecture 3 - Consonants and Consonant Clusters in English

Lecture 4 - Syllables and Words

Lecture 5 - Some Features of English Words

Lecture 6 - Plural Words in English

Lecture 7 - Parts of speech - 1

Lecture 2 - Anthropology: An Introduction

Lecture 3 - Theoretical Traditions in Sociology and Anthropology

Lecture 4 - Colonialism and Anthropology

Lecture 5 - Orientalism and the Politics of Knowledge Production - I

Lecture 6 - Orientalism and the Politics of Knowledge Production - II

Lecture 7 - Orientalism and the Politics of Knowledge Production - III

Lecture 8 - Orientalism and the Politics of Knowledge Production - IV

Lecture 9 - Orientalism and Its Critics

Lecture 10 - Ronald Inden: Orientalist Constructions of India - I

Lecture 11 - Ronald Inden: Orientalist Constructions of India - II

Lecture 12 - Development of Sociology and Anthropology in India

Lecture 13 - Sociological Traditions in India - I

Lecture 14 - Sociological Traditions in India - II

Lecture 15 - Indological Approach

Lecture 16 - G. S. Ghurye: Introduction

Lecture 17 - G. S. Ghurye: Features of Caste

Lecture 18 - Irawati Karve: Introduction

Lecture 19 - Radhakamal Mukerjee

Lecture 20 - D. N. Majumdar

Lecture 21 - Marxian Perspective: Historical Materialism

Lecture 22 - Marxian Theory of Social Change

Lecture 23 - Gail Omvedt: Towards a Historical Materialist Analysis of the Origin and Development of Caste - I

Lecture 24 - Gail Omvedt: Towards a Historical Materialist Analysis of the Origin and Development of Caste - II

Lecture 25 - Marxist Sociology of A. R. Desai

Lecture 26 - An Introduction to Structural Functionalism

Lecture 27 - Sociology of M. N. Srinivas

Lecture 28 - Sociology of M. N. Srinivas: Basic Concepts

Lecture 29 - Sociology of M. N. Srinivas: Varna and Jati

Lecture 30 - Andre Beteille: A Social Stratification Perspective to Indian Society

Lecture 31 - Introduction to Structuralism

Lecture 32 - Sociology of Louis Dumont: Homo Hierarchicus - I

Lecture 33 - Sociology of Louis Dumont: Homo Hierarchicus - II

Lecture 34 - Sociology of Louis Dumont: Homo Hierarchicus - III

Lecture 35 - Criticisms of Louis Dumont

Lecture 36 - Introducing Subaltern Studies - I

Lecture 37 - Introducing Subaltern Studies - II

Lecture 38 - Subaltern Studies as Postcolonial Criticism

Lecture 39 - Critique of Subaltern Studies - I

Lecture 40 - Critique of Subaltern Studies - II

Lecture 41 - Feminist Perspectives and Gender Studies in India - I

Lecture 42 - Feminist Perspectives and Gender Studies in India - II

Lecture 43 - Feminist Research: Redefining Methodology in the Social Sciences

Lecture 44 - Feminist Challenges to Sociology in India

Lecture 45 - Mapping and Marking Feminist Sociologies in India

Lecture 46 - Dalit Sociology and Indian Sociology: On Ambedkar's sociology of Caste

Lecture 47 - Introduction to Sociology of Dalits - I

Lecture 48 - Introduction to Sociology of Dalits - II

Lecture 49 - Dalit Women Talk Differently: Debate Between Gopal Guru and Sharmila Rege - I

Lecture 50 - Dalit Women Talk Differently: Debate Between Gopal Guru and Sharmila Rege - II

Lecture 51 - The Cracked Mirror: Introduction

Lecture 52 - The Cracked Mirror: How Egalitarian are the Social Sciences in India? - I

Lecture 53 - The Cracked Mirror: How Egalitarian are the Social Sciences in India? - II

Lecture 54 - The Cracked Mirror: Experience and Theory From Habermas to Guru - I

Lecture 55 - The Cracked Mirror: Experience and Theory From Habermas to Guru - II

Lecture 56 - Decolonialism in Sociology - I

Lecture 57 - Decolonialism in Sociology - II

Lecture 58 - Globalization and Sociology: Risk Society of Ulrich Beck

Lecture 59 - Globalization and Sociology: The Network Society of Manuel Castells

Lecture 60 - Conclusion

NPTEL : NOC:Human Movement Science (Humanities and Social Sciences)

Co-ordinators : Prof. Shruti Bhandurge, Prof. Subham Badhyal

Lecture 1 - Course Introduction

Lecture 2 - Learning outcomes and module design

Lecture 3 - Professional skillset development

Lecture 4 - Skeletal system

Lecture 5 - Muscular system

Lecture 6 - Neuromuscular System

Lecture 7 - Motor control and learning

Lecture 8 - Anatomical planes and axes of motion

Lecture 9 - Major joints and their actions - Part 1

Lecture 10 - Major joints and their actions - Part 2

Lecture 11 - Muscles and movement

Lecture 12 - Posture - static and dynamic

Lecture 13 - Implications of functional anatomy in HMS

Lecture 14 - Introduction to the concepts of biomechanics

Lecture 15 - Review of Basic - Mathematical Concepts

Lecture 16 - Linear Kinematics

Lecture 17 - Angular Kinematics

Lecture 18 - Linear Kinetics

Lecture 19 - Angular Kinetics - Part 1

Lecture 20 - Angular Kinetics - Part 2

Lecture 21 - Angular Kinetics - Part 3

Lecture 22 - Angular Kinetics - Part 4

Lecture 23 - Qualitative analysis - Intro, Data Collection

Lecture 24 - Qualitative analysis - Analysis and Injury

Lecture 25 - Quantitative analysis

Lecture 26 - Coaching implications in HMS

Lecture 27 - Fundamental movement skills - Part 1

Lecture 28 - Fundamental movement skills - Part 2

Lecture 29 - Fundamental movement skills - Part 3

Lecture 30 - Gait Analysis

Lecture 31 - Exercises - Part 1

Lecture 32 - Exercises - Part 2

Lecture 33 - Exercises - Part 3

Lecture 34 - Injury Patterns - Part 1

Lecture 35 - Injury Patterns - Part 2

Lecture 36 - Sports - Part 1

Lecture 37 - Sports - Part 2

Lecture 38 - Biomechanical characteristics of various sports - Part 1

Lecture 39 - Biomechanical characteristics of various sports - Part 2

Lecture 40 - Data Science

Lecture 41 - AI and ML

Lecture 42 - Technological advancements and Research in HMS - Part 1

Lecture 43 - Technological advancements and Research in HMS - Part 2

Lecture 44 - Career Opportunities

NPTEL : NOC:Sports and Performance Nutrition (Humanities and Social Sciences)

Co-ordinators : Prof. Geetha Ghaliyavar

Lecture 1 - Introduction to sports and performance nutrition

Lecture 2 - Introduction to energy availability

Lecture 3 - Fundamentals of carbohydrates

Lecture 4 - Carbohydrate manipulation for sports performance

Lecture 5 - Myths around carbohydrates

Lecture 6 - Dr Sola Athletes with celiac disease and gluten sensitivity

Lecture 7 - Importance of proteins in performance

Lecture 8 - Introduction to protein and protein supplements

Lecture 9 - Introduction to fats and its importance in performance

Lecture 10 - Hydration and electrolytes

Lecture 11 - Practical implications of hydration

Lecture 12 - Mineral - Iron

Lecture 13 - Minerals - Calcium, Magnesium Zinc and Selenium

Lecture 14 - Antioxidants

Lecture 15 - Water soluble vitamins

Lecture 16 - Fat soluble vitamins

Lecture 17 - Energy systems and biochemical pathways

Lecture 18 - Anabolic window period for nutrient intake

Lecture 19 - Introduction to nutrient periodization

Lecture 20 - Applied aspects of nutrient periodization

Lecture 21 - Competition nutrition

Lecture 22 - Carbohydrate loading for sports performance

Lecture 23 - Weight making and weight cycling

Lecture 24 - Travel guidelines for athletes

Lecture 25 - Supplements and ergogenic aids

Lecture 26 - Three R principal

Lecture 27 - Lifestyle practices to enhance recovery

Lecture 28 - Sleep hygiene

Lecture 29 - Immunity and gut health

Lecture 30 - Sports injury and dietary interventions

Lecture 31 - Vegetarian and vegan athletes

Lecture 32 - Diabetic athletes

Lecture 33 - Female athletes

Lecture 34 - Young and adolescent athletes

Lecture 35 - Food intolerances in athletes

Lecture 36 - Sports nutrition in Indian context

Lecture 37 - Nutrigenomics

Lecture 38 - Personal hygiene and sanitation

Lecture 39 - Connections of sports nutrition

Lecture 40 - Food psychology

NPTEL : NOC:Sports Psychology (Humanities and Social Sciences)

Co-ordinators : Prof. Chaitanya Sridhar, Prof. Nivedita Rajan, Prof. Priyanka Prabhakar

Lecture 1 - Becoming a Sport Psychologist: Lessons from the field An introduction to field of Sports Psychology

Lecture 2 - Becoming a Sport Psychologist: Lessons from the field Mental health issues in athletes

Lecture 3 - Lessons from the field Learning Sport Science - An integrated approach to learning Sport Psychology

Lecture 4 - Becoming a Sport Psychologist: Lessons from the field Challenges faced by sport psychologists

Lecture 5 - Becoming a Sport Psychologist: Lessons from the field Sport psychology - Working with coaches

Lecture 6 - Introduction to flow

Lecture 7 - Flow in sport and competition

Lecture 8 - Practical approach to flow state: Discussion

Lecture 9 - Developing a Champion mindset: Tools to aid competitive mindset

Lecture 10 - Discussion on Champion and Competitive Mindset

Lecture 11 - Psychological Skills training and Goal setting

Lecture 12 - Goal setting - Part 1

Lecture 13 - Goal setting - Part 2

Lecture 14 - Developing Goal setting systems

Lecture 15 - Discussion on Mental training and Goal setting

Lecture 16 - Imagery in sport - Introduction

Lecture 17 - Models of Imagery and usefulness of Imagery

Lecture 18 - Psychological factors important for PST

Lecture 19 - Imagery in Team - A practical demonstration

Lecture 20 - Discussion on Goal setting and Imagery in sports

Lecture 21 - Communication in sports

Lecture 22 - Intracommunication with self: instinct and animal lessons, body language and tactile communication

Lecture 23 - Discussion on communication and performance

Lecture 24 - Resilience in Sports Teams and Organizations

Lecture 25 - Resilience and Mindfulness in sports

Lecture 26 - Psychological factors in sport

Lecture 27 - Strategies to work with young athletes

Lecture 28 - Working with young children

Lecture 29 - Burnout in sports

Lecture 30 - Burnout in coaches, Discussion with coach

Lecture 31 - Building teams and team culture

Lecture 32 - Discussion on building high performance teams

Lecture 33 - Channeling emotions in sports

Lecture 34 - Discussion on transformational leadership

Lecture 35 - Stress management in sports

Lecture 36 - Psychology of Injury - Introduction

Lecture 37 - Psychological Strategies for Injury

Lecture 38 - Integrated approach to injury - A discussion

Lecture 39 - Career transition in sports - Sports retirement and coping

Lecture 40 - Discussion on Sports career transition

Lecture 41 - Conclusion Video

NPTEL : NOC:Strength and Conditioning for the Indian Population (Humanities and Social Sciences)

Co-ordinators : Prof. Varun Suresh Kumar, Prof. Deckline Leitao

Lecture 1 - Fundamentals of Sports Performance

Lecture 2 - Major Components of Fitness

Lecture 3 - Difference between Fitness and Sport

Lecture 4 - Defining S&C and Sports S&C

Lecture 5 - Defining S&C and Physios Roles and Responsibilities

Lecture 6 - Player Interview - Lakshya Sen

Lecture 7 - Player Interview - Avani Prashanth

Lecture 8 - Principle of Individuality

Lecture 9 - Principle of Progressive Overload

Lecture 10 - Principle of Specificity

Lecture 11 - Principle of -Indianization-

Lecture 12 - Principle of Reversibility

Lecture 13 - Sports Specific Training

Lecture 14 - Safety in the Gym

Lecture 15 - Exercise and the Female Athlete

Lecture 16 - Working with Female Athletes - Do's and Dont's

Lecture 17 - Training Youth Athletes - Part 1

Lecture 18 - Training Youth Athletes - Part 2

Lecture 19 - Training Masters Athletes

Lecture 20 - Training Para Athletes

Lecture 21 - Bodybuilding

Lecture 22 - Powerlifting

Lecture 23 - Weightlifting

Lecture 24 - Effective over Impressive Excercises

Lecture 25 - Anabolic Steriods, Muscle Building, and Sports Performance

Lecture 26 - Free Weight Training

Lecture 27 - Warm Up and Cool Down

Lecture 28 - Free Weights Training (Demonstration) - Part 1

Lecture 29 - Free Weights Training (Demonstration) - Part 2

Lecture 30 - Free Weights Training (Demonstration) - Part 3

Lecture 31 - Free Weights Training (Demonstration) - Part 4

Lecture 32 - Warm up Demonstration

Lecture 33 - Cool Down Demonstration

Lecture 34 - Weight Training Using Machines

Lecture 35 - Training with Machines (Demonstration) - Part 1

Lecture 36 - Training with Machines (Demonstration) - Part 2

Lecture 37 - Training with Machines (Demonstration) - Part 3

Lecture 38 - Training with Machines (Demonstration) - Part 4

Lecture 39 - Training with Machines (Demonstration) - Part 5

Lecture 40 - Bodyweight and Functional Training

Lecture 41 - Bodyweight and Functional Training Demonstration

Lecture 42 - Plyometrics Training

Lecture 43 - Plyometrics Demonstration

Lecture 44 - Cardiovascular Training

Lecture 45 - Cardiovascular Training Demonstration - Part 1

Lecture 46 - Cardiovascular Training Demonstration - Part 2

Lecture 47 - Cardiovascular Training Demonstration - Part 3

Lecture 48 - Stability and Endurance Training

Lecture 49 - Stability and Endurance Training Demonstration - Part 1

Lecture 50 - Stability and Endurance Training Demonstration - Part 2

Lecture 51 - Flexibility training and types of stretches - Part 1

Lecture 52 - Flexibility training and types of stretches - Part 2

Lecture 53 - Periodization of Indian Athlete

Lecture 54 - Sports Specific Program Design

Lecture 55 - Assessments- How, When, Why

Lecture 56 - Opportunities and Challenges of an S&C

Lecture 57 - Training Celebrities/Elite Athletes

Lecture 58 - Role of Social Media in Sport

Lecture 59 - Scope of Technology in Sport

NPTEL : NOC:Essentials of Sports Injury Prevention and Rehabilitation (Humanities and Social Sciences)

Co-ordinators : Prof. Col (Dr) Anup Krishnan (Retd), Prof. Wg Cdr (Dr) CS Guru, Prof. Lt Col (Dr) Atul Sharma

Lecture 1 - Sports Injuries and Prevention

Lecture 2 - Rehabilitation and Reconditioning

Lecture 3 - Joints of the Upper Limb

Lecture 4 - Joints of the Lower Limb

Lecture 5 - The Back In Sports

Lecture 6 - Pre Medical Examination

Lecture 7 - Lab Investigations

Lecture 8 - Flexibility

Lecture 9 - Conditioning

Lecture 10 - Anatomy of Upper Limb

Lecture 11 - Anatomy of Lower Limb

Lecture 12 - Common Injuries Of Lower Limb

Lecture 13 - Common Causes of Upper Limb and Lower Limb

Lecture 14 - Treatments for Various Injuries

Lecture 15 - Head, Face and Neck Injuries

Lecture 16 - Spine Injuries

Lecture 17 - Concussion in Sports

Lecture 18 - Management of Sports Concussion

Lecture 19 - Emergency Action Plan

Lecture 20 - Risk Factors in Injury

Lecture 21 - Prehabilitation and Rehabilitation

Lecture 22 - Periodisation of Rehabilitation - I

Lecture 23 - Periodisation of Rehabilitation - II

Lecture 24 - Team Roles in Sports Injuries

Lecture 25 - Sport-Specific Rehabilitation, Principles and Techniques - I

Lecture 26 - Sport-Specific Rehabilitation, Principles and Techniques - II

Lecture 27 - Sport-Specific Rehabilitation, Principles and Techniques - III

Lecture 28 - Rehabilitation

Lecture 29 - Management of common sports injuries

Lecture 30 - Injury prevention in adolescent athletes and Women athletes - Part 1

Lecture 31 - Injury prevention in adolescent athletes and Women athletes - Part 2

Lecture 32 - Injury prevention in adolescent athletes and Women athletes - Part 3

Lecture 33 - Injury prevention in adolescent athletes and Women athletes - Part 4

Lecture 34 - Injury prevention in adolescent athletes and Women athletes - Part 5

Lecture 35 - Psychological aspects of injury and Rehabilitation - Part 1

Lecture 36 - Psychological aspects of injury and Rehabilitation - Part 2

Lecture 37 - Return to sports and long term injury prevention - Part 1

Lecture 38 - Return to sports and long term injury prevention - Part 2

Lecture 39 - Return to sports and long term injury prevention - Part 3

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Exercise Physiology and Sports Performance (Humanities and Social Sciences)

Co-ordinators : Prof. Col (Dr) Anup Krishnan (Retd), Prof. Wg Cdr (Dr) CS Guru, Prof. Lt Col (Dr) Atul Sharma

Lecture 1 - Focus of Exercise and Sports Physiology

Lecture 2 - Evolution of Exercise Physiology

Lecture 3 - Acute and Chronic response to Exercise

Lecture 4 - Functional Anatomy of Skeletal muscle

Lecture 5 - Skeletal muscle and Exercise

Lecture 6 - Bioenergetics - Part 1

Lecture 7 - Bioenergetics - Part 2

Lecture 7 - Gods, Power, and Representation: Orientalism in The Mark of the Beast

Lecture 8 - Understanding Modernity: Ideas and Origins in the European Context

Lecture 9 - Civilizing Mission and Colonial Mimicry in Khushwant Singhâ€™s Karma

Lecture 10 - From Western to Alternative Modernity: Nationalist Reimaginings of the Modern

Lecture 11 - An Overview of the Lectures - Week 2

Lecture 12 - Negotiating Modernity: Tradition and the Public-Private Divide in Colonial India

Lecture 13 - Colonial Encounters with Classical Knowledge: Power, Authority, and Interpretation

Lecture 14 - Women and Reform: Empowerment or Patriarchal Continuity?

Lecture 15 - The Colonial Prison: Punishment, Power, and Institutional Transformation

Lecture 16 - Colonial Time and the Advent of Punctuality

Lecture 17 - An Overview of the Lectures - Week 3

Lecture 18 - Forging an Alternative Modernity: Reform and Cultural Synthesis

Lecture 19 - The Bhadramahila and the Nation: Gender, Reform, and Representation

Lecture 20 - Bhadramahila on Screen: Gender, Nation, and Modernity in Ghare Baire

Lecture 21 - Textile Prison: Shame, Femininity, and the Bhadramahila in Colonial Bengal

Lecture 22 - Modernity and the Remaking of the Domestic Sphere

Lecture 23 - An Overview of the Lectures - Week 4

Lecture 24 - The Social History of the Sari: Sartorial Politics in Colonial Bengal

Lecture 25 - Colonial Modernity and the Transformation of Friendship: Reading Sibnath Sastryâ€™s Autobiography

Lecture 26 - Colonialism and the Birth of the Indian Novel

Lecture 27 - The Paradox of Restoration: Nationalism and the Colonial Presence

Lecture 28 - Nationalism and the 'Good' Empire: Reading Lagaan and the Legacy of Colonial Administration

Lecture 29 - The Anglicistâ€“Orientalist Debate: A Shared Justification for Empire

Lecture 30 - Vande Mataram and the Making of Mother India

Lecture 31 - Language as Mother: Tamil, Nationalism, and Emotional Belonging

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Secularism and the Nation: Religion, Reform, and the State in Colonial and Postcolonial India

Lecture 33 - Secularism and the Postcolonial Indian State: Reform, Religion, and 'Principled Distance'

Lecture 34 - Caste and the Making of Nation

Lecture 35 - Subaltern Studies and Methods of Historiography

Lecture 36 - Dalit Politics and Dalit Historiography

Lecture 37 - Anti-Caste Movements and Jotirao Phule

Lecture 38 - Anti-Caste Movements and Dr. B.R. Ambedkar

Lecture 39 - Anti-Caste Movements and E.V.R. Periyar

Lecture 40 - Caste in Bengal

Lecture 41 - Women and Nation

Lecture 42 - Women's Autobiographies and Identity Formation

Lecture 43 - Women's Writing as Representation

Lecture 44 - Women in Politics

Lecture 45 - Women in Ambedkarite Movements

Lecture 46 - Women in Periyar's Self Respect Movement

Lecture 47 - Nation and Popular Culture

Lecture 48 - Nation and Representation

Lecture 49 - Nation and Queer Desire

Lecture 50 - Emergence of Publishing Houses

NPTEL : NOC:Introduction to Physical Medicine and Rehabilitation in Sports (Humanities and Social Sciences)

Co-ordinators : Col (Dr) Anup Krishnan, Wg Cdr (Dr) CS Guru

Lecture 1 - Introduction to Physical Medicine and Rehabilitation

Lecture 2 - Principles of Injury Prevention in Sports

Lecture 3 - Common Soft Tissue Sports Injuries

Lecture 4 - Overuse Injuries in Athletes

Lecture 5 - Rehabilitation for Common Sports Injuries

Lecture 6 - Overview of the Musculoskeletal System

Lecture 7 - Functional Anatomy of Lower extremity

Lecture 8 - Functional Anatomy of Upper extremity

Lecture 9 - Introduction to Biomechanics and Injury Mechanism

Lecture 10 - Common Mechanism of acute and overuse injuries

Lecture 11 - Acute Sports injuries and the Injury assessment protocol

Lecture 12 - Immediate treatment and first aid in sports injuries

Lecture 13 - Imaging techniques in Sports injuries

Lecture 14 - Clinical and functional testing in sports injuries

Lecture 15 - Advances in Diagnostic technologies in Sports injuries

Lecture 16 - Overview of Phases of Rehabilitation

Lecture 17 - Acute Phase of Rehabilitation - Goals and Strategies

Lecture 18 - Subacute and Functional Phases of Rehabilitation

Lecture 19 - Introduction to Physical Therapy in Sports Rehabilitation

Lecture 20 - Adavanced Physical Therapy Techniques

Lecture 21 - Foundation of Strength Training

Lecture 22 - Periodization in Strength Training

Lecture 23 - Strength Training for Different Sports

Lecture 24 - Key components of Sports Conditioning

Lecture 25 - Designing a Sports specific Conditioning Program

Lecture 26 - Flexibility and Its Role in Athletic Performance

Lecture 27 - Types of Stretching and Their Effect on Injury Prevention

Lecture 28 - Joint Mobility and Flexibility: Difference and Significance

Lecture 29 - Techniques for Improving Joint Mobility

Lecture 30 - Assessing and Monitoring Joint Mobility

Lecture 31 - Physical Modalities in Rehabilitation

Lecture 32 - Electrical Stimulation and Ultrasound in Rehabilitation

Lecture 33 - Alternative Therapies in Sports Rehabilitation

Lecture 34 - Acupuncture and Dry Needling in Sports Rehabilitation

Lecture 35 - Integrating Complementary Therapies into Rehab Programs

Lecture 36 - Principles of Injury Prevention in sports

Lecture 37 - Designing a Sports-specific Injury Prevention Program

Lecture 38 - Role of monitoring and load management in injury Prevention

Lecture 39 - Psychological impact of Sports Injuries

Lecture 40 - Strategies for psychological rehabilitation post-injury

NPTEL : NOC:Time value of money-Concepts and Calculations (Humanities and Social Sciences)

Co-ordinators : Dr.Bikash Mohanty

Lecture 1 - Introduction

Lecture 2 - Interest Rate

Lecture 3 - Simple interest

Lecture 4 - Compounding techniques - I & II

Lecture 5 - Discrete annually compounding - I & II

Lecture 6 - Continuous compounding

Lecture 7 - Comparison of all compounding methods

Lecture 8 - Present value

Lecture 9 - Future Value

Lecture 10 - Annuities - I & II

Lecture 11 - Perpetuity

Lecture 12 - Amortization

Lecture 13 - Multiple cash flow - I & II

Lecture 14 - Valuation of bond - I & II

Lecture 15 - Valuation of ordinary shares

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Depreciation, Alternate Investment and Profitability Analysis (Humanities and Social Sciences)

Co-ordinators : Prof. Bikash Mohanty

Lecture 1 - Introduction to course

Lecture 2 - Introduction to depreciation and Straight line method

Lecture 3 - Declining balance method

Lecture 4 - Double-declining balance method

Lecture 5 - Sum-of-the-digits method

Lecture 6 - Sinking fund method and Repair provision method

Lecture 7 - Accelerated cost recovery method - I

Lecture 8 - Accelerated cost recovery method - II

Lecture 9 - Introduction to alternate investment: Annual cost method-I

Lecture 10 - Introduction to alternate investment: Annual cost method

Lecture 11 - Present worth method

Lecture 12 - Rate of return method

Lecture 13 - Incremental rate of return

Lecture 14 - Perpetuity method

Lecture 15 - Minimum return as cost

Lecture 16 - Introduction to profitability analysis and Payback period

Lecture 17 - Return on investment

Lecture 18 - Net Return

Lecture 19 - Discounted cash flow - I

Lecture 20 - Discounted cash flow - II

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:Soft Skills (Humanities and Social Sciences)

Co-ordinators : Prof. Binod Mishra

Lecture 1 - Introduction to Soft Skills

Lecture 2 - Aspects of Soft Skills

Lecture 3 - Effective Communication Skills

Lecture 4 - Classification of Communication

Lecture 5 - Personality Development

Lecture 6 - Positive Thinking

Lecture 7 - Telephonic Communication Skills - Part I

Lecture 8 - Telephonic Communication Skills - Part II

Lecture 9 - Communicating Without Words

Lecture 10 - Paralanguage

Lecture 11 - Proxemics

Lecture 12 - Haptics: The Language of Touch

Lecture 13 - Meta-communication

Lecture 14 - Listening Skills

Lecture 15 - Types of Listening

Lecture 16 - Negotiation Skills - I

Lecture 17 - Negotiation Skills - II

Lecture 18 - Culture as Communication

Lecture 19 - Communicating across Cultures

Lecture 20 - Organizational Communication

Lecture 21 - Communication Breakdown - Part I

Lecture 22 - Communication Breakdown - Part II

Lecture 23 - Advanced Writing Skills

Lecture 24 - Principles of Business Writing

Lecture 25 - Types of Business Writing - Part I

Lecture 26 - Types of Business Writing - Part II

Lecture 27 - Business Letters

Lecture 28 - Business Letters: Format and Style

Lecture 29 - Types of Business Letters - Part I

Lecture 30 - Types of Business Letters - Part II

Lecture 31 - Report Writing

Lecture 32 - Types of Reports

Lecture 33 - Strategies for Report Writing - Part I

Lecture 34 - Strategies for Report Writing - Part II

Lecture 35 - Evaluation and Organization of Data

Lecture 36 - Structure of Reports - Part I

Lecture 37 - Structure of Reports - Part II

Lecture 38 - Report Style - Part I

Lecture 39 - Report Style - Part II

Lecture 40 - Group Communication

Lecture 41 - Leadership Skills

Lecture 42 - Group Discussion - Part I

Lecture 43 - Group Discussion - Part II

Lecture 44 - Meeting Management

Lecture 45 - Adaptability and Work Ethics

Lecture 46 - Advanced Speaking Skills

Lecture 47 - Oral Presentations, Speeches, and Debates

Lecture 48 - Combating Nervousness

Lecture 49 - Patterns and Methods of Presentation

Lecture 50 - Oral Presentation: Planning and Preparation

Lecture 51 - Making Effective Presentations

Lecture 52 - Speeches for Various Occasions

Lecture 53 - Interviews

Lecture 54 - Planning and Preparation - Part I

Lecture 55 - Planning and Preparation - Part II

Lecture 56 - Drafting an Effective RÃ©sumÃ©

Lecture 57 - Facing Job Interviews - Part I

Lecture 58 - Facing Job Interviews - Part II

Lecture 59 - Emotional Intelligence and Critical Thinking

Lecture 60 - Applied Grammar

NPTEL : NOC:Sociology of Science (Humanities and Social Sciences)

Co-ordinators : Dr. Aninday Jayant Mishra

Lecture 39 - Meena Kandasamy

Lecture 40 - Summary

NPTEL : NOC:Exploring Survey Data on Health Care (Humanities and Social Sciences)

Co-ordinators : Prof. Pratap C. Mohanty

Lecture 1 - Problem Statement and Research Questions

Lecture 2 - Data, Measurement and Scaling

Lecture 3 - Understanding Healthcare Database: NSSO

Lecture 4 - Understanding Healthcare Database: NFHS

Lecture 5 - Understanding Healthcare Database: LASI

Lecture 6 - Understanding Sampling Base and Design

Lecture 7 - Preparing Schedule and Questionnaire

Lecture 8 - Sample Size Determination - Observational Study

Lecture 9 - Sample Size Determination and Probability Proportional to Size Sampling

Lecture 10 - Focus Group Discussion (FGD)

Lecture 11 - Pre-testing of Sample

Lecture 12 - Weights and Representative Sampling

Lecture 13 - Normalizing Data

Lecture 14 - Deal with Missing Values

Lecture 15 - Validity, Reliability, Accuracy and Precision of Sample

Lecture 16 - Basic Understanding of STATA

Lecture 17 - Syntax and Do File

Lecture 18 - Making Dictionary File

Lecture 19 - Data Browse and Basic Statistics - I

Lecture 20 - Data Browse and Basic Statistics - II

Lecture 21 - Basic Understanding of SPSS and Data Filtration in STATA

Lecture 22 - Data Extraction from ASCII Format

Lecture 23 - Merging Blocks of Information after Extraction

Lecture 24 - Composite Index

Lecture 25 - Measure of Variation- r2, R2, Adjusted R2, Pseudo R2

Lecture 26 - Regression Models of Quantitative Healthcare Variables

Lecture 27 - Regression Models of Qualitative Dependent Variables

Lecture 28 - Relative Risk Ratio Estimation

Lecture 29 - Generalized Linear Model

Lecture 30 - Independence of Irrelevant ALternatives

Lecture 31 - Balanced and Unbalanced Panel in Healthcare

Lecture 32 - Common Constant Model in Healthcare

Lecture 33 - Fixed Effect Model in Healthcare

Lecture 34 - Random Effect Model in Healthcare

Lecture 35 - Construction of Pseudo Panel

Lecture 36 - Need for Evaluation

Lecture 37 - Propensity Score Matching (PSM)

Lecture 38 - Difference-in-Difference Method (DID)

Lecture 39 - Randomized Control Trial (RCT)

Lecture 40 - Regression Discontinuity Method

NPTEL : NOC:Contextualizing Gender (Humanities and Social Sciences)

Co-ordinators : Prof. Rashmi Gaur

Lecture 1 - Introduction, Aims and Objectives

Lecture 2 - Introduction to Gender Studies

Lecture 3 - Feminist Consciousness and Gendered Experiences in Simone de Beauvoir

Lecture 4 - Gender Perspectives in Simone de Beauvoirs The Second Sex (Volume 1)

Lecture 5 - Gender Perspectives in Simone de Beauvoirs The Second Sex (Volume 2)

Lecture 6 - Gender and Race Consciousness - I

Lecture 7 - Gender and Race Consciousness - II

Lecture 8 - Intersectionality

Lecture 9 - Gender and Power Politics in bell hooks

Lecture 10 - Gender and Power Politics in Audre Lorde

Lecture 11 - Gender-Blurring in Toni Morrison - I

Lecture 12 - Gender-Blurring in Toni Morrison - II

Lecture 13 - Gender-Blurring in Toni Morrison - III

Lecture 14 - Unmasking Heterosexual Assumptions in Nancy Chodorow

Lecture 15 - Technologies of Gender in Teresa de Lauretis

Lecture 16 - Introduction to Queer Theory

Lecture 17 - Sex/Gender System in Gayle Rubin

Lecture 18 - Thinking Gender and Homosexuality in Gayle Rubin

Lecture 19 - Queer Theory and Literature in Eve Sedgwick

Lecture 20 - Eve Sedgwicks Epistemology of the Closet

Lecture 21 - Introduction to Queer Literature

Lecture 22 - 21st Century Queer Fiction

Lecture 23 - Queer Cinema - I

Lecture 24 - Queer Cinema - II

Lecture 25 - Queer Representation in OTT Platforms

Lecture 26 - Introduction to Judith Butler

Lecture 27 - Gender Trouble - I

Lecture 28 - Gender Trouble - II

Lecture 29 - Bodies that Matter - I

Lecture 30 - Bodies that Matter - II

Lecture 31 - Speech and Subjectivity

Lecture 32 - Gender in Translation

Lecture 33 - Undoing Gender - I

Lecture 34 - Undoing Gender - II

Lecture 35 - Judith Butler and the Unaccountable Subject

Lecture 36 - Performativity, Precarity and Sexual Politics

Lecture 37 - Gender Politics and the Right to Appear

Lecture 38 - Global Gender Movements

Lecture 39 - Mapping the Theories of Social Movements

Lecture 40 - #MeToo and the Politics of Social Change

Lecture 41 - Hegemonic Masculinity: Rethinking the Concept - I

Lecture 42 - Hegemonic Masculinity: Rethinking the Concept - II

Lecture 43 - Feminism and Men/Masculinities Scholarship by Chris Beasley

Lecture 44 - Postcolonial Masculinities by Fataneh Farahani and Suruchi Thapar-Bjorkert

Lecture 45 - Engaging Men for Gender Justice by Tal Peretz

Lecture 46 - Cyborg and Feminism in Anne Balsamos Technologies of the Gendered Body - I

Lecture 47 - Cyborg and Feminism in Anne Balsamos Technologies of the Gendered Body - II

Lecture 48 - Female Bodybuilding, Cosmetic Surgery and New Imaging Technologies in Anne Balsamo

Lecture 49 - The Virtual body in Anne Balsamos Technologies of the Gendered Body

Lecture 50 - Feminist Cultural Studies of Science and Technology in Anne Balsamo

Lecture 51 - Introduction to Biopolitics and Gender by Jemima Repo

Lecture 52 - Women or Womankind? by Jemima Repo - I

Lecture 53 - Women or Womankind? by Jemima Repo - II

Lecture 54 - Gender for a Marxist Dictionary from Simians, Cyborgs and Women by Donna J. Haraway

Lecture 55 - Biopolitics, Gender Representation and Video Games

Lecture 56 - Introduction to the Literary Posthuman: Narratives of Becoming Post

Lecture 57 - A Cyborg Manifesto by Donna Harroway

Lecture 58 - Ex-Machina and The Female Cyborg

Lecture 59 - Re-figuring the Subject by Rosi Braidotti

Lecture 60 - A Gender Perspective on COVID-19 Pandemic

NPTEL : NOC:Public Speaking (Humanities and Social Sciences)

Co-ordinators : Prof. Binod Mishra

Lecture 1 - Introduction to Public Speaking

Lecture 2 - Communication Process and Roadblocks

Lecture 3 - Use of Rhetoric in Public Speaking

Lecture 4 - Role of Listening in Public Speaking

Lecture 5 - Role of Ethics in Public Speaking

Lecture 6 - Relevance of Public Speaking

Lecture 7 - Audience Awareness and Creating Credibility

Lecture 8 - Content Creation and Organization

Lecture 9 - Role of Personality in Public Speaking

Lecture 10 - Use of Technology in Public Speaking

Lecture 11 - Cultural Awareness in Public Speaking

Lecture 12 - Breaking the Ice: Impress to Express

Lecture 13 - Glossophobia

Lecture 14 - Emotional Intelligence

Lecture 15 - Role of Positivity in Public Speaking

Lecture 16 - Significance of Citations in Public Speaking

Lecture 17 - Digression: Usage and Concerns

Lecture 18 - Forms and Stages of Public Speaking - Part I

Lecture 19 - Forms and Stages of Public Speaking - Part II

Lecture 20 - Classroom Interaction

Lecture 21 - Classroom Lectures

Lecture 22 - Kinesics

Lecture 23 - Proxemics

Lecture 24 - Chronemics

Lecture 25 - Haptics

Lecture 26 - Paralanguage

Lecture 27 - Meta-communication

Lecture 28 - Conversation

Lecture 29 - Negotiations

Lecture 30 - Debates

Lecture 31 - Elocution and Recitation

Lecture 32 - Group Discussion

Lecture 33 - Speeches

Lecture 34 - Types of Speeches

Lecture 35 - Speeches for Special Occasions

Lecture 36 - Use of Humour in Speeches

Lecture 37 - Interviews

Lecture 38 - Types of Interviews - I

Lecture 39 - Types of Interviews - II

Lecture 40 - Preparing for Interviews

Lecture 41 - Facing the Interview

Lecture 42 - Conference Presentations - Part I

Lecture 43 - Conference Presentations - Part II

Lecture 44 - Meeting Management

Lecture 45 - Leadership Skills - Part I

Lecture 46 - Leadership Skills - Part II

Lecture 47 - Oral Presentation - Part I

Lecture 48 - Oral Presentation - Part II

Lecture 49 - Use of Visual Aids in Oral Presentation

Lecture 50 - Use of Connectives in Oral Presentation

Lecture 51 - Effective use of Language in Public Speaking

Lecture 52 - Handling Feedback and Criticism

Lecture 53 - Role of Creative Thinking in Pubic Speaking

Lecture 54 - Some Other Forums of Public Speaking

Lecture 55 - Etiquettes and Mannerisms in Public Speaking

Lecture 56 - Online Interactions and their Challenges

Lecture 57 - Sample Interviews

Lecture 58 - Analysis of Sample Interviews

Lecture 59 - Sample Speeches and their Analysis

Lecture 60 - Summary and Conclusion

NPTEL : NOC:Partition of India in Print Media and Cinema (Humanities and Social Sciences)

Co-ordinators : Prof. Sarbani Banerjee

Lecture 1 - History of the Partition of India - I

Lecture 2 - History of the Partition of India - II

Lecture 3 - History of the Partition of India - III

Lecture 4 - History of the Partition of India - IV

Lecture 5 - History of the Partition of India - V

Lecture 6 - History of the Partition of India - VI

Lecture 7 - History of the Partition of India - VII

Lecture 8 - History and Alternative Memory Writings - I

Lecture 9 - History and Alternative Memory Writings - II

Lecture 10 - History and Alternative Memory Writings - III

Lecture 11 - History and Alternative Memory Writings - IV

Lecture 12 - History and Alternative Memory Writings - V

Lecture 13 - Caste Politics and The Bengal Chapter - I

Lecture 14 - Caste Politics and The Bengal Chapter - II

Lecture 15 - Caste Politics and The Bengal Chapter - III

Lecture 16 - Caste Politics in Punjab Partition Micro-societies and Sub-Cultures

Lecture 17 - Womanhood and Motherhood - I

Lecture 18 - Womanhood and Motherhood - II

Lecture 19 - Womanhood and Motherhood - III

Lecture 20 - Womanhood and Motherhood - IV

Lecture 21 - Woman in the Context of Partition - I

Lecture 22 - Woman in the Context of Partition - II

Lecture 23 - Woman in the Context of Partition - III

Lecture 24 - Accounts of the Survivor - I

Lecture 25 - Accounts of the Survivor - II

Lecture 26 - Accounts of the Survivor - III

Lecture 27 - Accounts of the Survivor - IV

Lecture 28 - Accounts of the Survivor - V

Lecture 29 - Accounts of the Survivor - VI

Lecture 30 - Accounts of the Survivor - VII

Lecture 31 - Accounts of the Survivor - VIII

Lecture 32 - Accounts of the Survivor - IX

Lecture 33 - Home and Nostalgia - I

Lecture 34 - Home and Nostalgia - II

Lecture 35 - Home and Nostalgia - III

Lecture 36 - Home and Nostalgia - IV

Lecture 37 - Home and Nostalgia - V

Lecture 38 - Refugee, Desh and Nation - I

Lecture 39 - Refugee, Desh and Nation - II

Lecture 40 - Refugee, Desh and Nation - III

Lecture 41 - Refugee, Desh and Nation - IV

Lecture 42 - Refugee, Desh and Nation - V

Lecture 43 - Refugee, Desh and Nation - VI

Lecture 44 - Refugee, Desh and Nation - VII

Lecture 45 - Refugee, Desh and Nation - VIII - Agency/Lack thereof for the Immigrant Women

Lecture 46 - Displaced People, Abandoned Homes - I

Lecture 47 - Displaced People, Abandoned Homes - II

Lecture 48 - Displaced People, Abandoned Homes - III

Lecture 49 - Displaced People, Abandoned Homes - IV

Lecture 50 - Displaced People, Abandoned Homes - V

Lecture 51 - Displaced People, Abandoned Homes - VI

Lecture 52 - Refuge Women and Patriarchal Society - I

Lecture 53 - Refuge Women and Patriarchal Society - II

Lecture 54 - Refuge Women and Patriarchal Society - III

Lecture 55 - Refuge Women and Patriarchal Society - IV

Lecture 56 - Refuge Women and Patriarchal Society - V

Lecture 57 - Refuge Women and Patriarchal Society - VI

Lecture 58 - Partition Literature in the 21st Century - I

Lecture 59 - Partition Literature in the 21st Century - II

Lecture 60 - Immigrant Populace in the Diaspora - I

Lecture 61 - Immigrant Populace in the Diaspora - II

Lecture 62 - Immigrant Populace in the Diaspora - III

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Narrative Mode and Fiction (Humanities and Social Sciences)

Co-ordinators : Prof. Sarbani Banerjee

Lecture 1 - Genealogy of Genre - I

Lecture 2 - Genealogy of Genre - II

Lecture 3 - Genealogy of Genre - III

Lecture 4 - Fiction and Different Modes of Narrative - I

Lecture 5 - Fiction and Different Modes of Narrative - II

Lecture 6 - Fiction and Different Modes of Narrative - III

Lecture 7 - Fiction and Different Modes of Narrative - IV

Lecture 8 - Commentary on the Genre of Novel - I

Lecture 9 - Commentary on the Genre of Novel - II

Lecture 1 - Introduction: Why Study a Novel

Lecture 2 - The Art of Fiction

Lecture 3 - Classical Narrative Theory

Lecture 4 - Rhetorical Narrative Theory

Lecture 5 - Adaptation

Lecture 6 - How to Read a Novel

Lecture 7 - The Novel After Theory : Introduction

Lecture 8 - The Novel After Theory : Gender

Lecture 9 - The Novel After Theory : Class

Lecture 10 - Environment and Literature

Lecture 11 - Disability

Lecture 12 - Pride and Prejudice I : Scholarly Approaches

Lecture 13 - Pride and Prejudice II : Author Background and Context - I

Lecture 14 - Pride and Prejudice III : Author Background and Context - II

Lecture 15 - Pride and Prejudice IV : Theme, Form and Style - I

Lecture 16 - Pride and Prejudice V : Theme, Form and Style - II

Lecture 17 - Pride and Prejudice VI : Textual Analysis

Lecture 18 - Pride and Prejudice VII : Scholarly Approaches

Lecture 19 - Jane Eyre: Background (Author and Context)

Lecture 20 - Jane Eyre: Theme, Form and Style - I

Lecture 21 - Theme, Form and Style - II

Lecture 22 - Jane Eyre: Scholarly Debates

Lecture 23 - Jane Eyre: Textual Analysis

Lecture 24 - Intertextual Connections

Lecture 25 - Dracula by Bram Stoker : A Discussion - I

Lecture 26 - Dracula by Bram Stoker : A Discussion - II

Lecture 27 - Mrs Dalloway: Author Background and Context

Lecture 28 - Mrs Dalloway II : Theme, Form and Style

Lecture 29 - Mrs Dalloway III : Scholarly Debates

Lecture 30 - Mrs Dalloway IV : Textual Analysis - I

Lecture 31 - Mrs Dalloway V : Intertextual Connections - I

Lecture 32 - Mrs Dalloway VI : Textual Analysis - II

Lecture 33 - Mrs Dalloway VII : Intertextual Connections - II

Lecture 34 - Mrs Dalloway VIII : Textual Analysis - III

Lecture 35 - Atonement: Background (Author and Context)

Lecture 36 - Atonement: Theme, Form and Style

Lecture 37 - Atonement: Intertextual Connections

Lecture 38 - Atonement: Scholarly Debates

Lecture 39 - The Reluctant Fundamentalist I : Theme, Form and Style

Lecture 40 - The Reluctant Fundamentalist II : Textual Analysis

NPTEL : NOC:Memory (Humanities and Social Sciences)

Co-ordinators : Prof. M. K. Asthana

Lecture 1 - Introduction to Memory and Models of Memory

Lecture 2 - Introduction to Memory

Lecture 3 - Methods of Studying Memory - I

Lecture 4 - Methods of Studying Memory - II

Lecture 5 - Methods of Studying Memory - III

Lecture 6 - Neuropsychology of Memory, Research Methods in Memory

Lecture 7 - Neuropsychology of Memory - I

Lecture 8 - Neuropsychology of Memory - II

Lecture 9 - Research Methods in Memory

Lecture 10 - Methods in Memory Modulation

Lecture 11 - Retrieval of Memory - I

Lecture 12 - Retrieval of Memory - II

Lecture 13 - Retrieval of Memory - III

Lecture 14 - Retrieval of Memory - IV

Lecture 15 - Retrieval of Memory - V

Lecture 16 - Working Memory - I

Lecture 17 - Working Memory - II

Lecture 18 - Working Memory - III

Lecture 19 - Working Memory - IV

Lecture 20 - Episodic and Semantic Memory

Lecture 21 - Episodic Memory

Lecture 22 - Episodic Memory Processing

Lecture 23 - Semantic and Lexical Memory - I

Lecture 24 - Semantic and Lexical Memory - II

Lecture 25 - Forgetting - I

Lecture 26 - Forgetting - II

Lecture 27 - Forgetting - III

Lecture 28 - Forgetting - IV

Lecture 29 - Forgetting - V

Lecture 30 - Memory Disorders - Amnesia - I

Lecture 31 - Memory Disorders - Amnesia - II

Lecture 32 - Memory Disorders - Amnesia - III

Lecture 33 - Memory Disorders

Lecture 34 - Memory Disorders - Alzheimerâ€™s Disease

Lecture 35 - Eyewitness Testimony

Lecture 36 - Metamemory - I

Lecture 37 - Metamemory - II

Lecture 38 - Mnemonics

Lecture 39 - Memory Reconsolidation - I

Lecture 40 - Memory Reconsolidation - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Refugee, Migration, Diaspora (Humanities and Social Sciences)

Co-ordinators : Prof. Sarbani Banerjee

Lecture 1 - Introduction to Migration Studies

Lecture 2 - Theories Related with Migration Studies

Lecture 3 - Politics of Space in Migration

Lecture 35 - Theory of Production- long Run Production Analysis, Return to Scale, Isoquants

Lecture 36 - Theory of Production- Isocost, Optimal Combination of Inputs, Expansion path, Economic Region of Production

Lecture 37 - Theory of Production- Different kind of Production Functions: Cobb Douglas Production function, Optimal input combination

Lecture 38 - Theory of Production- Effect of Changes in Input Prices, Law of Diminishing returns, Return to Scale

Lecture 39 - Theory of Cost- Cost of Production, Types of Cost: Accounting/Economic Analysis

Lecture 40 - Theory of Cost- Cost-Output Relationship, Short run cost Analysis

Lecture 41 - Long Run Cost Analysis

Lecture 42 - Long-Run Marginal Cost Curve

Lecture 43 - Theory of Cost: Breakeven Analysis and Contribution Analysis

Lecture 44 - Theory of Cost: Profit Volume Ratio, Margin of Safety and Learning Curve

Lecture 45 - Theory of Cost: Application of Cost Analysis & Economies of Scale

Lecture 46 - Theory of Cost: Production Economies

Lecture 47 - Theory of Cost: Managerial and Transport Economies of Scale

Lecture 48 - Theory of Market: Introduction

Lecture 49 - Theory of Market: Perfect Competition

Lecture 50 - Theory of Market: Short-run Profit Maximization under Perfect Competition

Lecture 51 - Theory of Market: Short-run Market Supply and Firm Supply under Perfect Competition

Lecture 52 - Theory of Market: Long-run Profit Maximization under Perfect Competition

Lecture 53 - Theory of Market: Real World Application of Perfect Competition & Introduction to Monopoly

Lecture 54 - Theory of Market: Types of Monopoly

Lecture 55 - Theory of Market: Supply Curve of Monopoly Firm

Lecture 56 - Theory of Market: Effect of shift of Cost in case of Monopoly

Lecture 57 - Theory of Market: Social cost of Monopoly Power

Lecture 58 - Theory of Market: Regulation of Monopoly Power and Monopsony

Lecture 59 - Theory of Market: Bilateral Monopoly

Lecture 60 - Theory of Market: Monopolistic Competition

Lecture 61 - Theory of Market: Monopolistic Competition- Non-Price Competition and Introduction to Oligopoly

Lecture 62 - Theory of Market: Characteristics of Oligopoly Market

Lecture 63 - Theory of Market: Oligopoly Market (Continued...)

Lecture 64 - Theory of Market: Oligopoly Market- Stackelbergâ€™s Model

Lecture 65 - Theory of Market: Collusive Oligopoly

Lecture 66 - Theory of Market: Collusive Oligopoly (Continued...)

Lecture 67 - Theory of Market: Collusive Oligopoly (Continued...)

Lecture 68 - Theory of Market: Collusive Oligopoly-Price Leadership Model

Lecture 69 - Oligopoly and Game Theory

Lecture 70 - Oligopoly and Game Theory (Continued...)

Lecture 71 - Oligopoly and Game Theory- Nash Equilibrium

Lecture 72 - Oligopoly and Game Theory â€“ The Prisonerâ€™s Dilemma and Types of Games

Lecture 73 - Applications of Game Theory in Economics

Lecture 74 - Product pricing- Price Discrimination

Lecture 75 - Product pricing- Price Discrimination (Continued...)

Lecture 76 - Types of Product pricing

Lecture 77 - Types of Product pricing (Continued...1)

Lecture 78 - Types of Product pricing (Continued...2)

Lecture 79 - Types of Product pricing (Continued...3)

Lecture 80 - Summary of Course

NPTEL : NOC:Quality Control and Improvement with MINITAB (Management)

Co-ordinators : Prof. Indrajit Mukherjee

Lecture 1 - Introduction of Quality

Lecture 2 - Voice of the Customer and Kano Model

Lecture 3 - Quality Function Deployment

Lecture 4 - Critical to Quality Characteristics

Lecture 5 - Data Visualization for Quality Control and Improvement

Lecture 6 - Importance of Pareto Chart and Cause and Effect Diagram

Lecture 7 - Design Failure Mode and Effect Analysis

Lecture 8 - Introduction to Statistical Process Control

Lecture 9 - X-bar and R Chart

Lecture 10 - X-bar and S Chart

Lecture 11 - Individual Moving Range Chart and Attribute Chart

Lecture 12 - Attribute Control Charts and Process Capability

Lecture 13 - Process Capability Index

Lecture 14 - Process Performance and Sigma Level

Lecture 15 - Process Capability for Attribute data

Lecture 16 - Basic Statistics and Confidence Interval

Lecture 17 - Hypothesis Testing

Lecture 18 - One-sample t Test

Lecture 19 - Two-sample t Test

Lecture 20 - Paired t Test and ANOVA

Lecture 21 - One-way ANOVA

Lecture 22 - One-way ANOVA (Continued...)

Lecture 23 - ANCOVA and Nonparametric Test

Lecture 24 - Linear Regression

Lecture 25 - Linear Regression (Continued...) and Multiple Regression

Lecture 26 - Best Subset Regression, Multicollinearity

Lecture 27 - Multicollinearity, Best Subset Regression, Multiple Regression, Basics on Design of Experiment

Lecture 28 - Design of Experiment, One-factor-at-a-time experiment

Lecture 29 - Two-factor asymmetric Design, Symmetric Factorial Design, Two-way ANOVA

Lecture 30 - Two-factor symmetric Design, Robust setting, Two-way ANOVA

Lecture 31 - Measurement System Analysis

Lecture 32 - Measurement System Analysis (Continued...)

Lecture 33 - Measurement System Analysis (Continued...), Introduction to Factorial Experiments

Lecture 34 - Factorial Experiments

Lecture 35 - Factorial Experiments (Continued...)

Lecture 36 - Factorial Experiments (Continued...)

Lecture 37 - Blocking in Factorial Design.

Lecture 38 - Multiple response Optimization and RSM

Lecture 39 - Fractional Factorial Design

Lecture 40 - Taguchi Method

NPTEL : NOC:Business and Sustainable Development (Management)

Co-ordinators : Prof. Trupti Mishra

Lecture 1 - Introduction to Sustainable Development and Sustainability

Lecture 2 - Evolution of Sustainable Development

Lecture 3 - Importance of Sustainability

Lecture 4 - Sustainability - A mega trend

Lecture 5 - Environment, Human and Economy

Lecture 6 - Robert Solowâ€™s Conceptualization of Sustainability

Lecture 7 - Introduction to Firmâ€™s Response

Lecture 8 - Sustainable Products

Lecture 9 - Cleaner Production

Lecture 10 - Cleaner Production Illustrations

Lecture 11 - Life Cycle Assessment

Lecture 12 - Understanding LCA Through Examples

Lecture 13 - Design for Environment

Lecture 14 - Sustainability Reporting

Lecture 15 - Current Status of ESG in Indian Companies

Lecture 16 - Corporate Strategy

Lecture 17 - Competitive Environment Strategies

Lecture 18 - Eco-Branding

Lecture 19 - Competitive Environmental Strategy Matrix

Lecture 20 - CSR and Social Sustainability

Lecture 21 - Sustainable Development Goal (SDG)

Lecture 22 - Sustainability Standards

Lecture 23 - Sustainability Standards

Lecture 24 - Green Supply Chain

Lecture 25 - Examples of Green Supply Chain

Lecture 26 - Environmental Regulations and Policy Instruments

Lecture 27 - Market based instruments in India

Lecture 28 - Environmental Laws and Disclosure Regulations

Lecture 29 - Risks and Opportunities

Lecture 30 - Sustainable financial product and services

Lecture 31 - Sustainable Value Framework

Lecture 32 - Course Summary

NPTEL : NOC:Advances in Strategic Human Resource Management (Management)

Co-ordinators : Prof. Ashish Pandey

Lecture 1 - The Evolution and Role of HR Function

Lecture 2 - Evolution and Nature of Strategic Human Resource Management

Lecture 3 - Contributions of and Trends in HR Function

Lecture 4 - Measuring Effectiveness of HR Function

Lecture 5 - Competence Maturity Model and People Competence Maturity Model

Lecture 6 - Organizational Healing: An Introduction

Lecture 7 - Working with Remote Teams

Lecture 8 - Restoring Social and Psychological Well-being

Lecture 9 - Employee Assistance Program

Lecture 10 - Talent Management: An Introduction

Lecture 11 - Potential Matrix: A Tool for Talent Management

Lecture 12 - HR Digitization for Talent Management

Lecture 13 - Positive Employee Relation: The Introduction

Lecture 14 - Positive Work Practices in Organization

Lecture 15 - Humanistic Management Model

Lecture 16 - Link of Humanistic Model and HR Processes

Lecture 17 - Process to make organization great place to work

Lecture 18 - Diversity Management: The Introduction

Lecture 19 - Significance of a Diverse and Inclusive Workplace

Lecture 20 - Significance of a Diverse and Inclusive Workplace

Lecture 21 - Biases in Organization and Ways of their Resolution

Lecture 22 - Intergenerational Relationships in Organization: The Introduction

Lecture 23 - Classifications of Generations at Workforce

Lecture 24 - Types and Attributes of Generations at Workplace

Lecture 25 - Ways of Synergizing Across Generations

Lecture 26 - Ways of enhancing Intergeneration Synergy

Lecture 27 - Intergenerational Relationships in Organization: The Introduction

Lecture 28 - Classifications of Generations at Workforce

Lecture 29 - Types and Attributes of Generations at Workplace

Lecture 30 - Ways of Synergizing Across Generations

Lecture 31 - Intergenerational Relationships in Organization: The Introduction

Lecture 32 - Classifications of Generations at Workforce

Lecture 33 - Types and Attributes of Generations at Workplace

Lecture 34 - Ways of Synergizing Across Generations

Lecture 35 - Role and Challenges of Sustainable HRM

Lecture 36 - Contribution of HRM in Corporate Sustainability and Corporate Social Responsibility

Lecture 37 - Ways to integrate Corporate Sustainability and Corporate Social Responsibility with HRM

Lecture 38 - Important HR Metrics and Ratios in HRM Function

Lecture 39 - HR Analytics explained through Case Examples

Lecture 40 - Tools for Effective Decision Making and Factors for Success in Future at Work

NPTEL : NOC:Yoga and Positive Psychology for Managing Career and Life (Management)

Co-ordinators : Prof. Ashish Pandey

Lecture 1 - Why the Course on Managing Self and Career

Lecture 2 - Present Context of Professional Work

Lecture 3 - State of Wellbeing of Indian Youth

Lecture 4 - Link between Self-Management and Career Management

Lecture 5 - Journey of Positive Psychology

Lecture 6 - Can there be a Universal Positive Psychology ?

Lecture 7 - Difference in Good Life and Life Satisfaction

Lecture 8 - Why Yoga with Positive Psychology ?

Lecture 9 - Genesis of this Course

Lecture 10 - Using Stories to Understand Optimal Experiences

Lecture 11 - Fundamental Questions in Positive Psychology

Lecture 12 - What Positive Psychology is Not

Lecture 13 - Positive-Negative Dialects of Well-Being

Lecture 14 - Positive Psychology: The Second Wave

Lecture 15 - Positivity and Human Potential in Yogic Traditions

Lecture 16 - Holistic Life Goals

Lecture 17 - Embracing Emotions and Positive Behavior

Lecture 18 - Discovering Dharma

Lecture 19 - Distinction with Negative Human Potential

Lecture 20 - Positive Events: 16 Sanskaras

Lecture 21 - Four Ashrams or Stations in Life

Lecture 22 - Yagna - Positive Event

Lecture 23 - Positive Institutions

Lecture 24 - Family - A Positive Institution

Lecture 25 - Yoga and Governance

Lecture 26 - Positive Governance

Lecture 27 - Macro and Micro Integration in Yogic Perspective

Lecture 28 - Self and Society

Lecture 29 - Point for Action and Reflection

Lecture 30 - Health and Wellbeing

Lecture 31 - How does wellbeing affect life ?

Lecture 32 - Yogic Perspectives of Health and Wellbeing

Lecture 33 - Doshas

Lecture 34 - Mind-body Complex

Lecture 35 - Diseases in Yogic Perspective

Lecture 36 - Panch Kosha or Five Layers of Self

Lecture 37 - Managing Mind

Lecture 38 - Factors to Enhance Well-being

Lecture 39 - Self-Realization - The Ultimate Joy

Lecture 40 - What is the Indian Worldview ?

Lecture 41 - Ways of Attaining Well-Being

Lecture 42 - TattvaBodh and Wisdom

Lecture 43 - Indriyajaya or Self-Control

Lecture 44 - Indriyajaya in Positive Psychology

Lecture 45 - Dharmic Drishti (Vision)

Lecture 46 - Dharmic Desires and Pursuits

Lecture 47 - Dharmahkriya in Positive Psychology

Lecture 48 - Sukhayu-Hitayu

Lecture 49 - DharmahKriya, Sukhayu-Hitayu and Career Success ?

Lecture 50 - What is our real nature ?

Lecture 51 - How the Mind Works: A Yogic Perspective

Lecture 52 - Obstacles in Attaining Wellbeing

Lecture 53 - Reflection on Functioning of the Mind

Lecture 54 - How to avoid Klisht Vrittis ?

Lecture 55 - Crossing Obstacles to Well-Being

Lecture 56 - Six Inner Treasures

Lecture 57 - How are the Six Inner Treasures Valuable

Lecture 58 - Mental, Vital and Physical Consciousness

Lecture 59 - Major Forms of Yoga in Indian Tradition

Lecture 60 - Ashtanga Yoga or Raj Yoga

Lecture 61 - Yoga for Panch Koshas

Lecture 62 - Three Pillars of Health

Lecture 63 - Spiritual Significance of Food

Lecture 64 - Eight Factors about Food

Lecture 65 - Seasons with Revolving Sun and Impact on Physiology

Lecture 66 - Contemporary Knowledge about Food and Mental Health

Lecture 67 - Food and Activities during the Cycle of the Day

Lecture 68 - Yogasanas to Integrate Body and Emotions

Lecture 69 - Interoception, Asanas and Well-Being

Lecture 70 - Characteristics of Asanas

Lecture 71 - Process for Moving into Posture

Lecture 72 - Asanas for Different Body Constitution

Lecture 73 - Notes on Pranayama

Lecture 74 - Contemporary Evidences of Prana

Lecture 75 - Prana Vayu, Nadi System and Chakras

Lecture 76 - Pranayama Practices and Conscious Breathing

Lecture 77 - Process and Benefits of Diaphragmatic Breathing

Lecture 78 - Guidelines for Pranayama

Lecture 79 - Nadi Shodhana Pranayama (Alternate Nostril Breathing)

Lecture 80 - Tranquilizing Pranayamas

Lecture 81 - Organizational Suffering and Dysfunctional Behaviors

Lecture 82 - Introduction to Pratyahara

Lecture 83 - Indriya-Pratyahara: Control of the Senses

Lecture 84 - Methods of Pratyahara

Lecture 85 - Understanding Emotional Intelligence

Lecture 86 - Emotional Intelligence and its Relation to Everyday Behavior

Lecture 87 - How Yoga Helps in Emotional Balance

Lecture 88 - Positive and Negative Emotions

Lecture 89 - Dealing with Negative Emotions

Lecture 90 - How Yoga Helps in Equanimity of Mind

Lecture 91 - What are the 7 Stages of Wisdom

Lecture 92 - What Yoga does for Balancing Emotions and Cognitions

Lecture 93 - How Yoga Impacts Student's Performance: Empirical Studies

NPTEL : NOC:Business Fundamentals for Entrepreneurs (Part 1: Internal Operation) (Management)

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Supply Chain Digitization (Management)

Co-ordinators : Prof. Priyanka Verma, Prof. Sushmita Narayana, Prof. Debabrata Das

Lecture 1 - Introduction of Supply Chain Management

Lecture 2 - Fundamentals of Supply Chain Management

Lecture 3 - Supply Chain Drivers

Lecture 4 - Supply Chain Processes - I

Lecture 5 - Supply Chain Processes - II

Lecture 6 - Supply Chain Challenges

Lecture 7 - Need/Strategies

Lecture 8 - Push Vs Pull

Lecture 9 - Case Study on Product Segmentation

Lecture 10 - Case Study on Inventory Segmentation

Lecture 11 - Link between Corporate and Supply Chain Strategy

Lecture 12 - Interface between Operations and Finance

Lecture 13 - Procurement Strategy (Make Vs Buy)

Lecture 14 - Procurement Strategy (Kraljic Matrix) - I and II

Lecture 15 - Procurement Strategy (Kraljic Matrix) - I and II

Lecture 16 - Introduction to Platform Economy

Lecture 17 - Introduction to Platform Economy - Example

Lecture 18 - Introduction to Channel Structures and Supply Chain Coordination

Lecture 19 - Newsvendor Case Example (Deterministic Setting) - I and II

Lecture 20 - Newsvendor Case Example (Deterministic Setting) - I and II

Lecture 21 - Newsvendor Case (Probabilistic Setting and Contracts) - I and II

Lecture 22 - Newsvendor Case (Probabilistic Setting and Contracts) - I and II

Lecture 23 - Channel Structure Designs in Supply Chains (Brick and Mortar)

Lecture 24 - Channel Structure Designs in Supply Chains (Dual Channels)

Lecture 25 - Channel Structure Designs in Supply Chains (Multi and Omni Channels)

Lecture 26 - Introduction to Analytics and Big Data

Lecture 27 - Different Types of Analytics and its Applications in Supply Chain Management

Lecture 28 - Predictive Analytics: Case Study on Predictive Maintenance

Lecture 29 - Predictive Analytics: Classification Tree Model

Lecture 30 - Predictive Analytics: Building Classification Tree Model using Python

Lecture 31 - Role of AI/ML in Forecasting and Demand Analytics

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Demand Forecasting using AI/ML: A Case Study

Lecture 33 - Demand Forecasting using AI/ML: Regression Tree Model

Lecture 34 - Demand Forecasting using AI/ML: Building Regression Tree Model using Python

Lecture 35 - Demand Forecasting using AI/ML: Random Forest Regression Model

Lecture 36 - Supply Chain Network Optimization: Break even analysis

Lecture 37 - Supply Chain Network Optimization: Facility location using Centre of Gravity

Lecture 38 - Supply Chain Network Optimization: Case on Capacitated Plant Location Model

Lecture 39 - Case on Supply Chain Network Design - I

Lecture 40 - Case on Supply Chain Network Design - II

Lecture 41 - Location of Distribution Centers using Clustering Technique: A Case Study

Lecture 42 - Steps of building K-Means Clustering Algorithm: A Case Study

Lecture 43 - Location of Distribution Centers: Building K-Means Clustering Model using Python

Lecture 44 - Measuring Efficiency of Manufacturing Facilities: A DEA Model - I

Lecture 45 - Measuring Efficiency of Manufacturing Facilities: A DEA Model - II

Lecture 46 - Role of Product Tracking and Traceability

Lecture 47 - Track and Trace Systems - I and II

Lecture 48 - Track and Trace Systems - I and II

Lecture 49 - ERP, WMS and TMS - I and II

Lecture 50 - ERP, WMS and TMS - I and II

Lecture 51 - Introduction to Supply Chain Digital Twin

Lecture 52 - Supply Chain Digital Twin: Greenfield Analysis - A Case Study - I

Lecture 53 - Supply Chain Digital Twin: Greenfield Analysis - A Case Study - II

Lecture 54 - Supply Chain Digital Twin: Network Optimization - A Case Study

Lecture 55 - Network Optimization with Capacity Constraints and Control Tower

Lecture 56 - Digital Infrastructure for Supply Chains: Industry 4.0

Lecture 57 - Industry 4.0 - IIoT, Cloud Computing, Horizontal and Vertical System Integration

Lecture 58 - Industry 4.0 - Cybersecurity, Big Data Analytics, Simulation, AR, Robots, AM

Lecture 59 - Blockchain

Lecture 60 - Supply Chain and Industry 4.0

NPTEL : NOC:Business Forecasting (Management)

Co-ordinators : Prof. Pankaj Dutta

Lecture 1 - Introduction to Business Forecasting

Lecture 2 - Data Driven Decision Making and Essentials of Predictive Analytics

Lecture 3 - Data Driven Decision Making and Essentials of Predictive Analytics

Lecture 4 - Types of Forecasting: Qualitative Approaches and Quantitative Approaches

Lecture 5 - Components of a Time Series and Measures of Forecast Accuracy

Lecture 6 - Components of a Time Series and Measures of Forecast Accuracy

Lecture 7 - Moving Average Methods: Simple, Weighted, and Exponential Moving Average

Lecture 8 - Moving Average Methods: Simple, Weighted, and Exponential Moving Average

Lecture 9 - Exponential Smoothing

Lecture 10 - Trend Projections and Holt Model

Lecture 11 - Simple Linear Regression and Measure of Goodness and Standard Error

Lecture 12 - Simple Linear Regression and Measure of Goodness and Standard Error

Lecture 13 - Simple Linear Regression and Measure of Goodness and Standard Error

Lecture 14 - Multiple Linear Regression and Multicollinearity

Lecture 15 - Multiple Linear Regression and Multicollinearity

Lecture 16 - Multiple Linear Regression and Multicollinearity

Lecture 17 - Seasonality, Seasonal Index, and Quarterly Average Method

Lecture 18 - Seasonality, Seasonal Index, and Quarterly Average Method

Lecture 19 - Seasonality and Trend: Winter's Holt Method

Lecture 20 - Seasonality and Trend: Winter's Holt Method

Lecture 21 - Multiplicative Decomposition Method

Lecture 22 - Autocorrelation Function (ACF) and Partial Autocorrelation Function (PACF)

Lecture 23 - ARIMA: Auto-Regressive (AR) Process

Lecture 24 - ARIMA: Moving Average (MA) Process

Lecture 25 - ARIMA: Auto-Regressive Moving Average (ARMA) Process

Lecture 26 - Auto-Regressive Integrated Moving Average (ARIMA) Model

Lecture 27 - Introduction to Machine Learning

Lecture 28 - Introduction to Machine Learning

Lecture 29 - Logistic Regression

Lecture 30 - Logistic Regression

Lecture 31 - Human Judgment in Time Series Analysis

Lecture 32 - Monte Carlo Simulation: Discrete Case

Lecture 33 - Monte Carlo Simulation: Discrete Case

Lecture 34 - Monte Carlo Simulation: Continuous case

Lecture 35 - System Dynamics (Additional Learning)

Lecture 36 - Predictive Analytics using @Risk Software

Lecture 22 - Gender mainstreaming and Gender budgeting

Lecture 23 - In Conclusion

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:Organizational Behaviour: Individual Dynamics in Organization (Management)

Co-ordinators : Prof. Abraham Cyril Issac

Lecture 1 - Understanding organizational behaviour:Tracing the evolution - 1

Lecture 2 - Understanding organizational behaviour:Tracing the evolution - 2

Lecture 3 - Individual in the organization: The building blocks

Lecture 4 - Understanding individual differences - 1

Lecture 5 - Understanding individual differences - 2

Lecture 6 - Diverse workforce, inclusive mindset - 1

Lecture 7 - Diverse workforce, inclusive mindset - 2

Lecture 8 - Perception of diversity and inclusion

Lecture 9 - Ableism and inclusion

Lecture 10 - Diversity management

Lecture 11 - The perceptual process

Lecture 12 - Factors that influence perception

Lecture 13 - Perception and decision making

Lecture 14 - What affects decisions?

Lecture 15 - Ethical decision making

Lecture 16 - Affect and emotions

Lecture 17 - Affective events theory

Lecture 18 - Emotional intelligence

Lecture 19 - Understanding stress

Lecture 20 - Emotions and moods: Application at workplace

Lecture 21 - Understanding self and personality

Lecture 22 - Types and theories of personality

Lecture 23 - Measuring personality

Lecture 24 - Personality traits relevant to organization

Lecture 25 - Assessing personality: caveats and concerns

Lecture 26 - Values and its importance

Lecture 27 - Sources and types of values

Lecture 28 - Values that cut across cultures

Lecture 29 - Person-job fit

Lecture 30 - Person-organization fit

Lecture 31 - Motivation: Basic understanding and definition

Lecture 32 - Tracing the roots: Early theories - 1

Lecture 33 - Tracing the roots: Early theories - 2

Lecture 34 - Keeping up with times: Contemporary theories - 1

Lecture 35 - Keeping up with times: Contemporary theories - 2

Lecture 36 - Job Design and job characteristics model

Lecture 37 - Employee involvement

Lecture 38 - Motivating the employees: Strategies for organization - 1

Lecture 39 - Motivating the employees: Strategies for organization - 2

Lecture 40 - Organizational justice and employee motivation

Lecture 41 - Defining learning

Lecture 42 - How do individuals learn?

Lecture 43 - Theories of learning - 1

Lecture 44 - Theories of learning - 2

Lecture 45 - Learning in an organizational setting

Lecture 46 - Understanding creativity

Lecture 47 - Stages of individual creativity

Lecture 48 - Creativity and problem solving

Lecture 49 - Defining psychological capital

Lecture 50 - Using Psychological capital and mindfulness at work

Lecture 51 - Understanding knowledge sharing

Lecture 52 - Understanding knowledge hiding - what it is and what it is not

Lecture 53 - Individual factors affecting knowledge hiding

Lecture 54 - Integrating knowledge sharing and hiding behavior

Lecture 55

Lecture 56 - Understanding employee voice and silence

Lecture 57 - Individual factors affecting voice behavior

Lecture 58 - Individual factors affecting silence

Lecture 59 - Can silence be strategic?

Lecture 60 - Strategies for fostering safe environment at work

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Labour Welfare and Industrial Relations (Management)

Co-ordinators : Prof. Abraham Cyril Issac

Lecture 1 - Background, IR in the post-independence period, functions of IR

Lecture 2 - Approaches towards IR, models of IR

Lecture 3 - Introduction to trade unions, labour legislations, worker's participation

Lecture 4 - Employers' Federation and their role in IR

Lecture 5 - Sailent features of IR in India

Lecture 6 - Birth and evolution of the trade union movement in India

Lecture 7 - Objectives, Theories, Bases of TUs

Lecture 8 - TU federations, Presence of local TUs, Reasons for growth, Compulsory Unionism

Lecture 9 - Trade Unions Act 1926: Aim, scope, registration, Rights and Responsibilities of TUs

Lecture 10 - Size and Finance of TUs, TU rivalry and recognition

Lecture 11 - Industrial Disputes: Meaning, Causes, Interests and Right Disputes

Lecture 12 - Strikes ,Forms, and Effects of Strike

Lecture 13 - Industrial Dispute Act 1947: Disputes Settlement Machineries

Lecture 14 - Statutory and Non-Statutory measures of Settlement

Lecture 15 - Collective Bargaining : Importance, Theories, Hurdles to CB in India

Lecture 16 - Introduction, objectives, classifications

Lecture 17 - Intra mural labour welfare services

Lecture 18 - Extra mural labour welfare services

Lecture 19 - Evolution of social security measures, Mention of welfare provisions of few labour laws

Lecture 20 - Social Security, Convention (No.102) ILO

Lecture 21 - Social security legislations: Evolution and Growth

Lecture 22 - Provision for old age and against unemployment and Gratuity, exisiting social security laws

Lecture 23 - Issues in Labour Welfare and Social Security, Review of welfare amenities

Lecture 24 - Role of Welfare officer, problems in enforcement of welfare amenities

Lecture 25 - Employees Compensation Act 1923: Occupational diseases, Compensation

Lecture 26 - Right to compensation in presence of Employees' State Insurance Act

Lecture 27 - Evolution of Provident Fund legislation in India, Central Government Health Scheme, 1954

Lecture 28 - Employees Provident Fund and Miscellaneous Provisions Act, 1952: scope, definitions

Lecture 29 - Employees' Provident Fund, Deposit Linked Insurance Schemes

Lecture 30 - Employee Pension Scheme 1995, Miscellaneous Provisions

Lecture 31 - Payment of Gratuity Act 1972: Enactment, Scope and Coverage

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Payment of Gratuity Act 1972: Main Provisions, Compulsory Insurance, Other Provisions

Lecture 33 - Maternity Benefit Act 1961: Growth, Definitions, Main Provisions, and Other Provisions

Lecture 34 - Child labour (Prohibition& Regulation)Act,1986: Objectives

Lecture 35 - Prohibition of Employment and Regulation of Conditions of children in certain occupations

Lecture 36 - Central Board of Workers' Education Scheme : Rational, Schemes, Composition of Board

Lecture 37 - Five Year Plans and Workers' Education

Lecture 38 - Factories Act 1948: definitions, authorities

Lecture 39 - Health, safety, provisions relating to hazardous processes

Lecture 40 - Welfare, working hours of adults

Lecture 41 - Employment of young persons, annual leave with wages and Penalties and procedure,other provisions

Lecture 42 - Payment of Wages Act, 1936: Objective, Scope

Lecture 43 - Wage legalities, Authorized deductions, miscellaneous provisions

Lecture 44 - Minimum Wages Act 1948: Scope, Fixation of minimum wages

Lecture 45 - Procedure for fixing minimum wages, mode of payment, miscellaneous provisions

Lecture 46 - Equal Remuneration Act 1976: Scope, definations, provisions

Lecture 47 - Workers' Participation in Management

Lecture 48 - Degree and Forms of Labour Participation

Lecture 49 - Workers Committee, Joint management Councils

Lecture 50 - Employee's Participation in PSUs Participation in Private sector

Lecture 51 - The participation of workers in Management Bill 1990

Lecture 52 - Labour Welfare and Industrial Relations: Case Laws

Lecture 53 - Introduction, Labour reforms undertaken

Lecture 54 - Code on Wages 2019

Lecture 55 - Occupational Safety, Health and Working Conditions Code, 2020

Lecture 56 - Industrial Relations Code, 2020

Lecture 57 - Code on Social Security, 2020

Lecture 58 - Labour Welfare and Industrial Relations: A Bird's Eye View

NPTEL : NOC:AI in Human Resource Management (Management)

Co-ordinators : Prof. Abraham Cyril Issac

Lecture 1 - Deploying AI in HR Practices

Lecture 2 - Introduction to AI Tools

Lecture 3 - Leveraging AI for Diversity Management

Lecture 4 - Decision Making

Lecture 5 - Adopting AI in Administrative task automation, Recruitment, and Talent acquisition

Lecture 6 - HR Metrics

Lecture 7 - Role of AI in Performance Management

Lecture 8 - Application of AI in Onboarding

Lecture 9 - Using AI in Person-Job Fit

Lecture 10 - HR Analytics

Lecture 11 - People Analytics using AI

Lecture 12 - HR Administration application

Lecture 13 - SMART HRM

Lecture 14 - Using AI For Employee Retention

Lecture 15 - Using AI for Performance Appraisal

Lecture 16 - Using AI In Employee Training

Lecture 17 - Using AI in Workforce Planning

Lecture 18 - Ethical Concerns in Using AI in Various Functions of HRM

Lecture 19 - AI-Augmented HRM

Lecture 20 - Learning and Development Programmes

Lecture 21 - Disruptive Innovation in HRM: Future of HRM

Lecture 22 - HRM in the Era of Generative AI

Lecture 23 - Building Organizational Capabilities through AI-Driven HRM

Lecture 24 - Metaverse in HRM

Lecture 25 - Challenges of AI Adoption in HRM

Lecture 26 - HRM Digitalization Success and Future Opportunities

Lecture 27 - AI in Career Succession Planning of Employees

Lecture 28 - AI in Sustaining Green HRM

Lecture 29 - Emerging Trends of AI Based HRM

Lecture 30 - Benefits of Synergizing AI and HRM

Lecture 31 - AI in Compensation and Benefits

Lecture 32 - AI In Compliance

Lecture 33 - AI-Mediated Knowldege Management

Lecture 34 - AI in SHRM

Lecture 35 - HRP and HR Chatbots

Lecture 36 - Using AI in Enhancing Employee Experience

Lecture 37 - HR and Company Culture - Part 1

Lecture 38 - HR and Company Culture - Part 2

Lecture 39 - Adopting AI in Managing Company Culture - Part 1

Lecture 40 - Adopting AI in Managing Company Culture - Part 2

Lecture 41 - Boon or Curse: Co-existence of HR and AI - Part 1

Lecture 42 - Boon or Curse: Co-existence of HR and AI - Part 2

Lecture 43 - Birds Eye View of AI in HRM

NPTEL : NOC:Learning and Development in Organizations (Management)

Co-ordinators : Prof. Abraham Cyril Issac

Lecture 1 - Learning and Development: An Introduction - I

Lecture 2 - Learning and Development: An Introduction - II

Lecture 3 - Defining Learning and Development

Lecture 4 - Individual in the Organization: The need for Learning

Lecture 5 - Emerging Developments

Lecture 6 - Appreciating the Importance of Learning and Development

Lecture 7 - Personal Performance

Lecture 8 - Context of Learning and Development - 1

Lecture 9 - Context of Learning and Development - 2

Lecture 10 - Summarizing and Thinking Ahead

Lecture 11 - Business Environment

Lecture 12 - Human Resource Management Strategy Concept and Model - I

Lecture 13 - Human Resource Management Strategy Concept and Model - II

Lecture 14 - International Human Resource Development

Lecture 15 - The Stakeholders

Lecture 16 - Vision, Mission, and Values: Three Pillars of Organization

Lecture 17 - Organization Capabilities

Lecture 18 - Learning Organizations

Lecture 19 - High Performance Organizations

Lecture 20 - Challenges for the Learning and Development Function

Lecture 21 - How Learning and Development Works - I

Lecture 22 - How Learning and Development Works - II

Lecture 23 - Individual Differences in Learning

Lecture 24 - Diagnosing the Learning and Development Needs

Lecture 25 - Practitioner's Perspective

Lecture 26 - Learning and Development Interventions

Lecture 27 - Introducing Knowledge Management

Lecture 28 - Components of Knowledge Management

Lecture 29 - Individual Behavior and Knowledge Transfer

Lecture 30 - Learning Knowledge Management Strategies

Lecture 31 - Psychological Contract

Lecture 32 - The Theory of Psychological Contract

Lecture 33 - Mapping the External Factors, Messages, Social Cues

Lecture 34 - Encoding, Decoding, and Individual Predispositions

Lecture 35 - Managing Group Development

Lecture 36 - Theory to Application - Introduction

Lecture 37 - Need Identification

Lecture 38 - Problem Identification and Solution Design

Lecture 39 - Sourcing Interventions

Lecture 40 - Evaluation and Diagnostic Questionnairs

Lecture 41 - Planning and Action

Lecture 42 - Roles and Responsibilities for Learning and Development

Lecture 43 - Sources of Expertise

Lecture 44 - Blended Learning

Lecture 45 - Sample Interventions

Lecture 46 - Technological Advances in Learning Interventions

Lecture 47 - New Skills and Behaviors

Lecture 48 - Diagnostic Questionnaires for Senior Managers - I

Lecture 49 - Diagnostic Questionnaires for Senior Managers - II

Lecture 50 - Diagnostic Questionnaires for Learning Interventions

Lecture 51 - Evaluating Learning and Development - I

Lecture 52 - Evaluating Learning and Development - II

Lecture 53 - Models of Evaluations

Lecture 54 - Evaluation of Coaching

Lecture 55 - Utility of Learning and Development Interventions

Lecture 56 - Learning and Development: Ongoing trends and approaches

Lecture 57 - Technology, Learning and Development - I

Lecture 58 - Technology, Learning and Development - II

Lecture 59 - Tools and Techniques for Learning and Development

Lecture 60 - Learning and Development's Impact on Organizational Results

NPTEL : Strategic Marketing - Contemporary Issues (Management)

NPTEL : NOC:Strategy: An Introduction to game Theory (Management)

Co-ordinators : Prof. Aditya K. Jagannatham, Dr. Vimal Kumar

Lecture 1 - Introduction Examples: Markets / Politics / Auctions

Lecture 2 - Prisonersâ€™ Dilemma

Lecture 3 - Best Response and Nash Equilibrium

Lecture 4 - Another Example: Markets

Lecture 5 - Dominant Strategies

Lecture 6 - Stag Hunt â€“ Coordination and Bank Runs

Lecture 7 - Battle of Sexes and Multiple Nash Equilibria

Lecture 8 - Tragedy of Commons

Lecture 9 - Tragedy of Commons

Lecture 10 - Cournot Duopoly

Lecture 11 - Cournot Duopoly

Lecture 12 - Mixed Strategies

Lecture 13 - Battle of Sexes

Lecture 14 - Battle of Sexes: Best Response Dynamic

Lecture 15 - Paying Taxes

Lecture 16 - Portfolio Management Game

Lecture 17 - Rationality, Choice and Common Knowledge

Lecture 18 - Lterated Elimination of Domination Strategies

Lecture 19 - Auction

Lecture 20 - Auction: As a Normal Form Game

Lecture 21 - Traffic at Equilibrium and Braesss Paradox

Lecture 22 - Linear Markets

Lecture 23 - Extensive Form Games

Lecture 24 - Game Tree and Information Sets

Lecture 25 - Strategies in Extensive from Games

Lecture 26 - Extensive from Games with Simultaneous Moves and Their Normal From Representation

Lecture 27 - Sub Game Perfect Equilibrium Part-I

Lecture 28 - Sub Game Perfect Equilibrium Part-II

Lecture 29 - The Art of War: Lesson 1

Lecture 30 - Ultimatum Game

Lecture 31 - Stackelberg Model

Lecture 32 - Bayesian Games

Lecture 33 - Bayesian Game: BoS

Lecture 34 - Bayesian Nash Equilibrium

Lecture 35 - Yield vs Fight

Lecture 36 - Yield vs. Fight: Bayesian NE

Lecture 37 - Bayesian Cournot Game

Lecture 38 - Bayesian Games with mixed strategies

Lecture 39 - Auctions

Lecture 40 - Sealed Bid First Price Auction

Lecture 41 - Expected Revenue

Lecture 42 - Bayesian Second Price Auction

Lecture 43 - Expected Revenue: Second Price Auction

Lecture 44 - All Pay Auction

Lecture 45 - A Hawk-Dove Game

Lecture 46 - Evolutionary Biology

Lecture 47 - Evolutionary stable Strategy (ESS)

Lecture 48 - ESS and NE

Lecture 49 - Repeated Games

Lecture 50 - Finitely Repeated Game having Multiple Equilibriums

Lecture 51 - Chain-Store Paradox

Lecture 52 - Infinitely Repeated Game

Lecture 53 - Non Cooperative Bargaining

Lecture 54 - Axiomatic Bargaining

Lecture 55 - Extensive Form Game with Incomplete Information

Lecture 56 - Introduction to perfect Bayesian Equilibrium

Lecture 57 - Obtaining PBE

Lecture 58 - Gift Game

NPTEL : NOC:Managing Services (Management)

Lecture 63 - Understanding the implications of performance and reward management in present organizational dynamics through case studies (Continued...)

NPTEL : NOC:The Ethical Corporation (Management)

Co-ordinators : Prof. Chhanda Chakraborti

Lecture 1 - What is a Corporation

Lecture 2 - Ethical Corporation

Lecture 3 - What is Ethics

Lecture 4 - Law and Ethics, and Responsibilities

Lecture 5 - Why should a Corporation be Ethical

Lecture 6 - Normative Ethical Theories : Utilitarianism

Lecture 7 - Normative Ethical Theories : Deontological Ethics

Lecture 8 - Normative Ethical Theories : Rights and Justice

Lecture 9 - Normative Ethical Theories : Virtue Ethics

Lecture 10 - Normative Ethical Theories : Care Ethics

Lecture 11 - Managing Ethics within the Corporation

Lecture 12 - Managing Ethics within the Organization : Formal Approach

Lecture 13 - Managing Ethics within a Corporation : Formal and Informal Approach

Lecture 14 - How to Manage Inter - Personal Ethical Misconduct at Workplace

Lecture 15 - How to Apply Ethics

Lecture 16 - Understanding Corporate Governance

Lecture 17 - Conflicts and Key Elements in Corporate Governance

Lecture 18 - Specific Areas of Concern in Corporate Governance and Countermeasures - I

Lecture 19 - Specific Areas of Concern in Corporate Governance and Countermeasures - II

Lecture 20 - Concluding Session on Corporate Governance

Lecture 21 - Investing in Human relations: Employees as stakeholders and Investors of Human Capital

Lecture 22 - Employer-employee: Duties and rights from both sides

Lecture 23 - Organization model and employer-employee relation

Lecture 24 - Some specific issues in employer-employee relationship

Lecture 25 - Employees All Over the World

Lecture 26 - The Ethical Corporation : Natural Environment

Lecture 27 - Corporate Obligations to Natural Environment through the Laws

Lecture 28 - Corporate Obligations to Natural Environment through Appeal to Business Sense and Strategy

Lecture 29 - Corporate Obligations to Natural Environment on Ethical Grounds

Lecture 30 - Environmental Obligations : What Can an Ethical Corporation Do?

Lecture 31 - Consumers as Stakeholders and Consumer Protection

Lecture 32 - Ethics of Consumer Protection

Lecture 33 - Consumer ethics: Duty of a Corporation in marketing communication and promotion

Lecture 34 - Consumer ethics: Ethical issues in Marketing Management

Lecture 35 - Consumer Ethics: Duty of the Consumers

Lecture 36 - Competitors as Stakeholders and Fiar Competition

Lecture 37 - What is NOT Fair Competition

Lecture 38 - Competitors as Stakeholders; Global Competition

Lecture 39 - Suppliers as Stakeholders : Ethics in Supply Chain

Lecture 40 - Competitors and Suppliers : What can an Ethical Corporation Do?

NPTEL : NOC:Intellectual Property Rights and Competition Law (Management)

Co-ordinators : Prof. Niharika Sahoo Bhattacharya

Lecture 1 - Concept of Intellectual Property Law Patents

Lecture 2 - Trademark

Lecture 3 - Geographical Indications

Lecture 4 - Copyright

Lecture 5 - Industrial Designs

Lecture 6 - Integrated Circuits Layout Designs

Lecture 7 - Trade Secrets or Undisclosd Information

Lecture 8 - Information Competition Law

Lecture 9 - Introduction to Competition Law (Continued...)

Lecture 10 - Introduction Competieion Low Anti-Competitive Practices

Lecture 11 - Bid-Rigging

Lecture 12 - Introduction Competition Law - Vertical Agreements

Lecture 13 - Abuse of Dominance, Combinations

Lecture 14 - Regulation of Combinations

Lecture 15 - Economic Theory of Ip And Competition

Lecture 16 - Interface Between Ip And Competition

Lecture 17 - The United States Anti-Trust Law

Lecture 18 - Tying Arrangements And Intellectual Property Under Sharman Act

Lecture 19 - Unites States Jurisprudence: Unilateral Refusal To License Or Deal

Lecture 20 - Price Fixing And Antitrust Law

Lecture 21 - Market Allocation And Ipr

Lecture 22 - Vertical Restraints

Lecture 23 - Vertical Restraints (Contd)

Lecture 24 - Enforcement of Anti-Trust Law in United States

Lecture 25 - Introduction To EU Competition Policy And IPR

Lecture 26 - IP Based Conduct under Article 101

Lecture 27 - IP Based Conduct under Article 102

Lecture 28 - IP Based Conduct under Article 102

Lecture 29 - Technology Transfer Agreements

Lecture 30 - TTBER and safe harbor provisions

Lecture 31 - Standard Essential Patents and FRAND Terms

Lecture 32 - Introduction to Competition Law in India (Continued...)

Lecture 33 - Introduction to Competition Law in India (Continued...)

Lecture 34 - Introduction to Competition Law in India (Continued...)

Lecture 35 - IP Licensing and Indian Competition Law

Lecture 36 - IP Licensing and Indian Competition Law (Continued...)

Lecture 37 - IP Licensing and Indian Competition Law (Continued...)

Lecture 38 - IP Licensing and Indian Competition Law (Continued...)

Lecture 39 - Patent and Competition Law

Lecture 40 - Trademark, Copyright and Competition Law

Lecture 41 - TRIPS and Competition Law

Lecture 42 - TRIPS and Competition Law (Continued...)

Lecture 43 - Summary

NPTEL : NOC:Patent Search for Engineers and Lawyers (Management)

Co-ordinators : Prof. Shreya Matilal

Lecture 1 - Introduction to IPR

Lecture 2 - IP-Economic Rationale

Lecture 37 - Thermal Balance Equation and Heat Stress

Lecture 38 - Quality of Thermal Environment, Evaluation of Thermal Environment

Lecture 39 - Whole Body Vibration and Sources of Vibration Discomfort

Lecture 40 - Design guidelines for hand tools

Lecture 41 - Auditory Environment and Human Performance, Measurement of Sound and Noise Exposure

Lecture 42 - Noise Exposure and Hearing Loss, Noise Analysis and Noise Reduction using Engineering

Lecture 43 - Effects of Noise on Performance, Broadbent and Poulton Theories, Interference of Noise

Lecture 44 - Octave bands and examples

Lecture 45 - Ergonomic design ofauditory environmentin different workplaces

Lecture 46 - Concepts of Design for Manufacturing (DFM), Design for Assembly (DHA), and Design

Lecture 47 - Product Design Assessment and Important Measures, Manual Assembly Design Efficiency

Lecture 48 - Assembly Time Determination with PMTS Methods, Human Factors Principles in DHA

Lecture 49 - Maintenance in Manufacturing/Production System - Important Ergonomic Design Issues - Part I

Lecture 50 - Maintenance in Manufacturing/Production System - Important Ergonomic Design Issues - Part II

Lecture 51 - Definition of Shift Work, Problems with Shift Work, Effect on Circadian Rhythms

Lecture 52 - Problems of shift workers, Shift Work and Human Performance

Lecture 53 - Recommended Shift Work Schedules

Lecture 54 - Major Ergonomic Issues and Problems in Shift Work Design - Part 1

Lecture 55 - Major Ergonomic Issues and Problems in Shift Work Design - Part 2

Lecture 56 - Concepts of Ergonomic Performance and its Indicators

Lecture 57 - EPI Assessment Tool Development

Lecture 58 - Factors and their level of assessment

Lecture 59 - Application of EPI Model in Different Worksystems

Lecture 60 - Epilogue

Lecture 21 - Operator and task assignment continued

Lecture 22 - Static and dynamic Operator allocation, Multiple products and incremental cells

Lecture 23 - Cell scheduling and sequencing

Lecture 24 - Cell scheduling and sequencing continued

Lecture 25 - Single piece transportation

Lecture 26 - Cell Layout, Introduction to Just-in-time manufacturing

Lecture 27 - Cell control and JIT

Lecture 28 - Basic elements of JIT, Kanban systems

Lecture 29 - Role of basic elements, Critical success factors

Lecture 30 - Models in JIT

Lecture 31 - Models in JIT continued

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - CONWIP, Introduction to synchronous manufacturing

Lecture 33 - Theory of constraints, Product mix problem

Lecture 34 - Statistical Fluctuations, Random events, principles of SM

Lecture 35 - Scheduling in SM

Lecture 36 - Drum Buffer Rope system

Lecture 37 - Flexible Manufacturing System, Part selection problem

Lecture 38 - FMS Loading problem

Lecture 39 - FMS Loading, multiple batches and changeover times

Lecture 40 - FMS Loading and scheduling, Summary of the course contents

NPTEL : Operations and Supply Chain Management (Management)

Co-ordinators : Prof. G. Srinivasan

Lecture 1 - Introduction - (Challenges, Methodologies)

Lecture 2 - Forecasting - Time series models - Simple Exponential smoothing

Lecture 3 - Forecasting - Linear Models, Regression, Holtâ€™s , seasonality

Lecture 4 - Forecasting - Winterâ€™s model, causal models, Goodness of forecast, Aggregate Planning, Tabular method

Lecture 5 - Aggregate Planning, Tabular method, Linear Programming

Lecture 6 - Aggregate Planning, Transportation model

Lecture 7 - Aggregate Planning, Dynamic Programming, backordering

Lecture 8 - Aggregate Planning, Quadratic model, Demand and capacity planning

Lecture 9 - Inventory Models - Costs, EOQ model

Lecture 10 - Inventory - EOQ model graphs, with backordering

Lecture 11 - Inventory - Models for all quantity and marginal quantity Discount

Lecture 12 - Multiple Quantity Discount, Multiple item inventory - Constraint on numbers of orders

Lecture 13 - Multiple item inventory - Constraint on money value, space, equal number of orders

Lecture 14 - Multiple item inventory - combining orders, production consumption model

Lecture 15 - Inventory - Production consumption model with backordering, Economic lot scheduling problem

Lecture 16 - Economic lot scheduling problem, Supply Chain inventory

Lecture 17 - Lot sizing

Lecture 18 - Lot sizing - heuristics

Lecture 19 - Disaggregation

Lecture 20 - Disaggregation - time varying demand, Safety stock - ROL for discrete demand distribution

Lecture 21 - Safety stock - ROL for normal distribution of lead time demand

Lecture 22 - Integrated model, ROL for normal distribution of LTD and given mean

Lecture 23 - Safety stock reduction â€“ delayed Product differentiation, substitution. MOM

Lecture 24 - Sequencing and scheduling â€“ Assumptions, objectives and shop settings

Lecture 25 - Single machine sequencing. Two machine flow shop â€“ Johnsonâ€™s algorithm

Lecture 26 - Flow shop scheduling - Three machines, Johnsonâ€™s algorithm and Branch and bound algorithm

Lecture 27 - Flow shop scheduling - heuristics â€“ Palmer, Campbell Dudek Smith algorithm

Lecture 28 - Job shop scheduling - Gantt chart, Different dispatching rules

Lecture 29 - Job shop scheduling - Shifting bottleneck heuristic

Lecture 30 - Job shop scheduling - Shifting bottleneck heuristic. Line Balancing

Lecture 31 - Line Balancing

Lecture 32 - Location problems - p median problem, Fixed charge problem

Lecture 33 - Location allocation problems in supply chain. Layout

Lecture 34 - Quantitative models for layout, Summary

Lecture 35 - Introduction to Supply Chain Management

Lecture 36 - Location Problems

Lecture 37 - Transportation and Distribution Models

Lecture 38 - Transportation and Distribution Models(continued)

Lecture 39 - Bin Packing and Travelling Salesman Problems

Lecture 40 - Vehicle Routeing Problems

Lecture 41 - Value of Information

NPTEL : Business Analysis for Engineers (Management)

Co-ordinators : Dr. S. Vaidhyasubramaniam

Lecture 1 - Introduction to Business Analysis for Engineers

Lecture 2 - Introduction to Accounting

Lecture 3 - Accounting Principles - 1

Lecture 4 - Balance Sheet Fundamentals

Lecture 5 - Balance Sheet Fundamentals

Lecture 6 - Accounting Principles - 2

Lecture 7 - Introduction to Income Statement & Double Entry

Lecture 8 - Double Entry Examples - 1

Lecture 9 - Double Entry Examples - 2

Lecture 10 - Preparation of Financial Statement

Lecture 11 - Cash Flow Statement - 1

Lecture 12 - Cash Flow Statement - 2

Lecture 13 - Special Accounts Illustrations

Lecture 14 - Final Illustrative Example

Lecture 15 - Summary of Financial Accounting

Lecture 16 - Introduction to Management Accounting & Behaviour of Cost

Lecture 17 - Cost-Volume Relationship

Lecture 18 - Cost-Objects & Variance

Lecture 19 - Labour & Over Heads Variance Analysis

Lecture 20 - Cash Conversion Cycle

Lecture 21 - Inventory Management

Lecture 22 - What is Strategy?

Lecture 23 - Poter's Diamond Model

Lecture 24 - Industry Analysis

Lecture 25 - Industry Analysis & Sources of Strategy

Lecture 26 - The Need for Value

Lecture 27 - Value Chain Analysis

Lecture 28 - Corporate Portfolio Analysis

Lecture 29 - External & Internal Environ Analysis

Lecture 30 - Models for Strategy,Ansoff matrix

Lecture 31 - Porter's Generic Strategy

Lecture 32 - Prahlad's Core Competency

Lecture 33 - Case study to understand strategy

Lecture 34 - Case study to understand strategy

Lecture 35 - Blue ocean and conclusion

Lecture 36 - Introduction to Economics

Lecture 37 - Introduction to GDP

Lecture 38 - Supply vs Demand

Lecture 39 - Price & Income Elasticity and Utility

Lecture 40 - Macroeconomic Variables

Lecture 41 - Fiscal & Monetary Policy

Lecture 42 - Union Budget & Conclusion

NPTEL : NOC:Introduction to Operations Research (Management)

Co-ordinators : Prof. G. Srinivasan

Lecture 1 - Linear Programming Introduction and formulations - Product Mix problem and Notations

Lecture 2 - Linear Programming Introduction and formulations - Manpower and Production planning formulations

Lecture 3 - Linear Programming Introduction and formulations - Media selection problem and Bicycle problem

Lecture 4 - Linear Programming Introduction and formulations - Caterer problem

Lecture 5 - Linear Programming Introduction and formulations - Maximum flow and bin packing problems

Lecture 6 - Graphical and Algebraic methods - Graphical method (maximization)

Lecture 7 - Graphical and Algebraic methods - Graphical method (minimization)

Lecture 8 - Graphical and Algebraic methods - Algebraic method (maximization)

Lecture 9 - Graphical and Algebraic methods - Algebraic method (minimization)

Lecture 10 - Graphical and Algebraic methods - Comparing graphical and algebraic methods

Lecture 11 - Simplex Algorithm - Algebraic form of simplex algorithm

Lecture 12 - Simplex Algorithm - Tabular form of simplex (maximization)

Lecture 13 - Simplex Algorithm - Tabular form (minimization)

Lecture 14 - Simplex Algorithm - Unboundedness

Lecture 15 - Simplex Algorithm - Infeasibility

Lecture 16 - Dual - Motivation to the dual

Lecture 17 - Dual - Writing the dual for a general LP

Lecture 18 - Dual - Writing the dual for a general LP (Continued...)

Lecture 19 - Dual - Duality theorems

Lecture 20 - Dual - Complimentary slackness theorem

Lecture 21 - Primal dual relationships - Dual solution using complimentary slackness

Lecture 22 - Primal dual relationships - Dual solution from simplex table; economic interpretation of dual

Lecture 23 - Primal dual relationships - Economic Interpretation of the dual; Dual Simplex algorithm

Lecture 24 - Primal dual relationships - Solving LPs with mixed type of constraints

Lecture 25 - Primal dual relationships - Matrix method for LP problems

Lecture 26 - Introducing the transportation problem

Lecture 27 - North West corner Rule and minimum cost method

Lecture 28 - Penalty cost method

Lecture 29 - Stepping stone method and Modified Distribution method

Lecture 30 - MODI method; Dual of the transportation problem and the optimality of the MODI method

Lecture 31 - Introducing the Assignment problem

Lecture 32 - Solving the Assignment problem

Lecture 33 - Hungarian algorithm; Alternate optimum

Lecture 34 - Unequal number of rows and columns; Dual of the assignment problem

Lecture 35 - Optimality of the Hungarian algorithm

Lecture 36 - Setting up the problem and solving simple LP problems

Lecture 37 - Unboundedness and infeasibility

Lecture 38 - Solving other formulations

Lecture 39 - Solving a transportation problem

Lecture 40 - Solving an assignment problem

NPTEL : NOC:Introduction to Data Analytics (Management)

Co-ordinators : Dr. Nandan Sudarsanam, Dr. Balaraman Ravindran

Lecture 1 - Course Overview

Lecture 2 - Course Overview (Continued...)

Lecture 3 - Descriptive Statistics - Graphical Approaches

Lecture 4 - Descriptive Statistics - Measures of Central Tendency

Lecture 5 - Descriptive Statistics - Measures of Dispersion

Lecture 6 - Random Variables and Probability Distributions

Lecture 7 - Probability Distributions (Continued...)

Lecture 8 - Probability Distributions (Continued...)

Lecture 9 - Inferential Statistics - Motivation

Lecture 10 - Inferential Statistics - Single sample tests

Lecture 11 - Two Sample tests

Lecture 12 - Type 1 and Type 2 Errors

Lecture 13 - Confidence Intervals

Lecture 14 - ANOVA and Test of Independence

Lecture 15 - Short Introduction to Regression

Lecture 16 - Introduction to Machine Learning

Lecture 17 - Supervised Learning

Lecture 18 - Unsupervised Learning

Lecture 19 - Ordinary Least Squares Regression

Lecture 20 - Simple and Multiple Regression in Excel and Matlab

Lecture 21 - Regularization/ Coefficients Shrinkage

Lecture 22 - Data Modelling and Algorithmic Modelling Approaches

Lecture 23 - Logistic Regression

Lecture 24 - Training a Logistic Regression Classifier

Lecture 25 - Classification and Regression Trees

Lecture 26 - Classification and Regression Trees (Continued...)

Lecture 27 - Bias Variance Dichotomy

Lecture 28 - Model Assessment and Selection

Lecture 29 - Support Vector Machines

Lecture 30 - Support Vector Machines (Continued...)

Lecture 31 - Support Vector Machines for Non Linearly Separable Data

Lecture 32 - Support Vector Machines and Kernel Transformations

Lecture 33 - Ensemble Methods and Random Forests

Lecture 34 - Artificial Neural Networks

Lecture 35 - Artificial Neural Networks (Continued...)

Lecture 36 - Deep Learning

Lecture 37 - Associative Rule Mining

Lecture 38 - Association Rule Mining (Continued...)

Lecture 30 - Recap and way forward

Lecture 31 - Introduction to Ledger

Lecture 32 - Process of Ledger Posting - Part 1

Lecture 33 - Process of Ledger Posting - Part 2

Lecture 34 - Process of Ledger Posting - Part 3

Lecture 35 - Balancing the Accounts

Lecture 36 - Debit and Credit Balances

Lecture 37 - Tutorial - Identifying balances - Part 1

Lecture 38 - Tutorial - Identifying balances - Part 2

Lecture 39 - Tutorial - Identifying balances - Part 3

Lecture 40 - Tutorial - Identifying balances - Part 4

Lecture 41 - Practice Problem - I

Lecture 42 - Practice Problem - II

Lecture 43 - Practice Problem - III

Lecture 44 - Recap and way forward

Lecture 45 - Introduction to Trial Balance

Lecture 46 - Preparation of Trial Balance

Lecture 47 - Practice Problem - 1

Lecture 48 - Practice Problem - 2

Lecture 49 - Errors in Trial Balance

Lecture 50 - Recap and way forward

Lecture 51 - Introduction to Final Accounts

Lecture 52 - Tutorial - Identifying direct and indirect expenses

Lecture 53 - Tutorial - Mapping operating and non operating items to direct and indirect items

Lecture 54 - Preparation of Final Accounts

Lecture 55 - Tutorial - Preparation of Final Accounts

Lecture 56 - Tutorial - Preparation of Trading Account

Lecture 57 - Tutorial - Preparation of P&L Account

Lecture 58 - Tutorial - Preparation of Balance Sheet

Lecture 59 - Practice Problem

Lecture 60 - Adjustments in Final Accounts

Lecture 61 - Transactions to be adjusted in Final Accounts - Part 1

Lecture 62 - Transactions to be adjusted in Final Accounts - Part 2

Lecture 63 - Tutorial - Adjustments in Final Accounts

Lecture 64 - Tutorial - Calculating Cost of Goods Sold

Lecture 65 - Tutorial - Outstanding Expenses

Lecture 66 - Tutorial - Prepaid Expenses

Lecture 67 - Validating the learning - Balance Sheet

Lecture 68 - Validating the learning - Income Statement

Lecture 69 - Recap and way forward

Lecture 70 - Introduction to Financial Statement Analysis

Lecture 71 - Liquidity Ratios

Lecture 72 - Tutorial - Liquidity Ratios

Lecture 73 - Solvency Ratios

Lecture 74 - Tutorial - Solvency Ratios

Lecture 75 - Profitability Ratios

Lecture 76 - Tutorial - Profitability Ratios - Part 1

Lecture 77 - Tutorial - Profitability Ratios - Part 2

Lecture 78 - Efficiency Ratios

Lecture 79 - Tutorial - Efficiency Ratios

Lecture 80 - Validating the learning - Walkthrough of RIL's Annual Report

Lecture 81 - Online Resources for Financial Analysis

Lecture 82 - Practice Problem - Liquidity Position

Lecture 83 - Practice Problem - Solvency Position

Lecture 84 - Practice Problem - Profitability Position

Lecture 85 - Practice Problem - Profitability Position

Lecture 86 - Practice Problem - Interpretation of Ratios

Lecture 87 - Practice Problem - Arithmetic problems

Lecture 88 - Recap and way forward

Lecture 89 - Types of Cash Flows

Lecture 90 - Tutorial - Types of Cash Flows

Lecture 91 - Walkthough of Cash Flow Statement of RIL

Lecture 92 - Profit and Loss Appropriation Account

Lecture 93 - Cash Flows from Operating Activities - Part 1

Lecture 94 - Cash Flows from Operating Activities - Part 2

Lecture 95 - Tutorial - Changes in working capital

Lecture 96 - Tutorial - Cash Flows from Operating Activities - Part 1

Lecture 97 - Cash Flows from Investing Activities

Lecture 98 - Tutorial - Cash Flows from Investing Activities

Lecture 99 - Cash Flows from Financing Activities

Lecture 100 - Tutorial - Cash Flows from Financing Activities

Lecture 101 - Preparing Cash Flow Statement

Lecture 102 - Identifying hidden information - Part 1

Lecture 103 - Identifying hidden information - Part 2

Lecture 104 - Identifying hidden information - Part 3

Lecture 105 - Practice Problem - Part 1

Lecture 106 - Practice Problem - Part 2

Lecture 107 - Need of Break Even Analysis

Lecture 108 - Understanding the nature of costs

Lecture 109 - Contribution Margin

Lecture 110 - Tutorial - Contribution

Lecture 111 - Break Even Point

Lecture 112 - Tutorial - Break Even Point

Lecture 113 - Tutorial - Break Even Point

Lecture 114 - Visualizing the Break Even Point

Lecture 115 - Tutorial - Break Even Analysis

Lecture 116 - Case - Break Even Analysis

Lecture 117 - Introduction to Inventory Management

Lecture 118 - Economic Order Quantity

Lecture 119 - ABC Analysis

Lecture 120 - Methods of stock valuation

NPTEL : NOC:Technology Forecasting for Strategic Decision Making - An Introduction (Management)

Co-ordinators : Prof. Dmitry Kucharavy, Prof. Bala Ramadurai

Lecture 1 - Introduction to Tech Forecasting for Strategic Decision Making

Lecture 2 - Famous forecasts which missed the mark

Lecture 3 - Why do we need technology forecasts? - Innovation vs Invention Efficiency vs Effectiveness

Lecture 5 - Why do we need technology forecasts? - Limiting Resources

Lecture 6 - Why do we need technology forecasts? - Why is it difficult to forecast?

Lecture 7 - Why do we need technology forecasts? - General stages of forecasting?

Lecture 9 - Failure and Success Startup Stories

Lecture 10 - Strategic, Tactical and Operational Decision Making

Lecture 11 - Quiz about Strategic, Tactical and Operational decision making

Lecture 12 - Answer to the quiz on Strategic, Tactical and operational decision making

Lecture 13 - Introduction to Vacuum forming case study and FORMAT handbook

Lecture 14 - Quiz on systems and set

Lecture 15 - Quiz on functions

Lecture 16 - Technology Lifecycle - Example case study - Transportation

Lecture 17 - Technology Lifecycle - Seasons, Clockspeed - Part 1

Lecture 18 - Technology Lifecycle - Seasons, Clockspeed - Part 2

Lecture 19 - Technology Lifecycle - Seasons, Clockspeed - Part 3

Lecture 20 - Technology Lifecycle - Seasons, Clockspeed - Part 4

Lecture 21 - Technology Lifecycle - Seasons, Clockspeed - Part 5

Lecture 22 - Aryabhata's experience in modeling and Live Solar Eclipse

Lecture 23 - Alternatives to forecasting in scope of technology management

Lecture 24 - Alternatives to forecasting in scope of technology management - Q&A

Lecture 25 - Element-Name-Value Model

Lecture 26 - System Operator

Lecture 27 - How to collect problems for mapping

Lecture 28 - How to formalize our knowledge about problems?

Lecture 29 - System function - What's function 1 Energy for cooking

Lecture 30 - System function - What's the function 2 Mosquito repellant

Lecture 31 - System function - What's the function 3 Pancake (Dosa) batter

Lecture 32 - Technological roadmaps

Lecture 33 - Maps of contradiction for forecasting

Lecture 34 - Quantitative forecasting

Lecture 35 - Demo of S-curve fitting software

Lecture 36 - Forecasting and Forecast

Lecture 52 - Public Management through Collaboration - II

Lecture 53 - Public Management through Collaboration - III

Lecture 54 - Public Management through Collaboration - IV

Lecture 55 - Public Management through Collaboration - V

Lecture 56 - Innovation in Public Sector Organization - I

Lecture 57 - Innovation in Public Sector Organization - II

Lecture 58 - Innovation in Public Sector Organization - III

Lecture 59 - Innovation in Public Sector Organization - IV

Lecture 60 - Innovation in Public Sector Organization - V

NPTEL : Research for Marketing Decisions (Management)

Co-ordinators : Prof. Vaibhav Chawla

Lecture 1 - What is Market and Marketing ?

Lecture 2 - Research, Marketing Research and its Types

Lecture 3 - Introduction to Marketing Research Process

Lecture 4 - Step #1 - Problem Definition: Discussion with Decision Maker

Lecture 5 - Problem Defn: Problem Audit, Interview with Experts, Qualitative Research, and Secondary Data Analysis

Lecture 6 - Step #1 - Problem Definition: Marketing Research Problem and an Example

Lecture 7 - Step #2 - Developing an approach to the problem: Understanding a Theory

Lecture 8 - Step #2 - Developing an approach to the problem: Components of an approach

Lecture 9 - Step #2 - Developing an approach to the problem: Examples

Lecture 10 - Case Studies for Problem Definition Process

Lecture 11 - Research Design: An Introduction

Lecture 12 - Exploratory and Descriptive Research Design: An Introduction

Lecture 13 - Exploratory Research Techniques: Secondary Data and Thematic Analysis

Lecture 14 - Exploratory Research Techniques: Secondary Data and Qualitative Research - Focus Group Discussion

Lecture 15 - Exploratory Research Techniques: Focus Group Discussion Videos

Lecture 16 - Exploratory Research Techniques: Depth Interviews

Lecture 17 - Exploratory Research Techniques: Projective Techniques

Lecture 18 - Descriptive Research Techniques

Lecture 19 - Causal Research Design: Experiments and Confounding Variables

Lecture 20 - Causal Research Design: Experiments and Related Terminologies

Lecture 21 - Causal Research Design: Experiments and its Types

Lecture 22 - Measurement and Scaling: Levels of Measurement

Lecture 23 - Measurement and Scaling: Comparative and Non-Comparative Scaling

Lecture 24 - Measurement and Scaling: Non-Comparative Scaling - Likert-Item Scales

Lecture 25 - Measurement and Scaling: Semantic Differential Scale and Other Scale Decisions

Lecture 26 - Measurement and Scaling: Multi-item Scales

Lecture 27 - Measurement and Scaling: Multi-item Scales, Conceptual and Operational Definitions

Lecture 28 - Questionnaire Design: Initial Steps (1 to 5)

Lecture 29 - Questionnaire Design: Steps 6 onwards and Other Issues

Lecture 30 - Questionnaire Design: Framing Common Demographic and Screener Questions

Lecture 31 - Data Analysis using SPSS: Entering the Data

Lecture 32 - Data Analysis using SPSS: Data Cleaning and Descriptive Statistics

Lecture 33 - Data Analysis using SPSS: Charts, Outliers, and Descriptive Statistics

Lecture 34 - Data Analysis using SPSS: Cross-Tabs

Lecture 35 - Data Analysis using SPSS: Hypothesis Testing for Association

Lecture 36 - SPSS:Hypothesis Testing for Differences in Means (P-value, Sampling Distribution, One-sample t-test)

Lecture 37 - Data Analysis using SPSS: Hypothesis Testing for Differences in Means (Independent Sample T-test)

Lecture 38 - Analysis using SPSS: Hypothesis Testing for Differences in Means (Paired Sample T-test,One-way ANOVA)

NPTEL : NOC:Financial Statement Analysis and Reporting (Management)

Co-ordinators : Prof. Anil K. Sharma

Lecture 1 - Introduction

Lecture 2 - Accounting Process

Lecture 3 - Accounting Concepts

Lecture 4 - Trial Balance and its Relevance

Lecture 5 - Relevant Accounting Statements

Lecture 6 - Journal (Part-I) - The first and original book of accounting

Lecture 7 - Journal (Part-II) - The first and original book of accounting

Lecture 8 - Ledger-The second book of accounts

Lecture 9 - Financial Statements

Lecture 10 - Financial Statements - Income Statement

Lecture 11 - Financial Statements - Balance Sheet

Lecture 12 - Financial Statements with Adjustments (Part-1)

Lecture 13 - Financial Statements with Adjustments (Part-2)

Lecture 46 - Multiple Regression Analysis in SPSS - II

Lecture 47 - Stepwise Regression and Hierarchical Regression

Lecture 48 - Hierarchical Regression and Dummy Variable Regression

Lecture 49 - Logistic Regression Analysis

Lecture 50 - Discriminant Analysis in SPSS

Lecture 51 - Factor Analysis in SPSS - I

Lecture 52 - Factor Analysis in SPSS - II

Lecture 53 - Exploratory Factor Analysis in SPSS

Lecture 54 - Confirmatory Factor Analysis in SPSS - I

Lecture 55 - Confirmatory Factor Analysis in SPSS - II

Lecture 56 - Confirmatory Factor Analysis in SPSS - III

Lecture 57 - Structural Equation Modelling in SPSS

Lecture 58 - Mediation and Moderation Analysis in SPSS

Lecture 59 - Cluster Analysis in Practice - I

Lecture 60 - Cluster Analysis in Practice - II

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Business Statistics (Management)

Co-ordinators : Prof. Mukesh Kumar Barua

Lecture 1 - Introduction to Statistics and Data

Lecture 2 - Types of Statistics, types of Data and sources of Data, Population vs Sample

Lecture 3 - Scales of Measurement

Lecture 4 - Data representation techniques - Part 1

Lecture 5 - Data representation techniques - Part 2 and measures of central tendency - Part 1

Lecture 6 - Measures of Central Tendency - Part 2

Lecture 7 - Examples of introduction to data and data representation techniques

Lecture 8 - Measures of Variation

Lecture 9 - Applications of Measures of Central Tendency and Measures of Variation

Lecture 10 - Chapter concepts- Measures of central tendency and measures of variation, Outliers, and shape of a distribution

Lecture 11 - Numerical Descriptive Measures

Lecture 12 - Covariance and Coefficient of Correlation, Introduction to Probability

Lecture 13 - Probability - Part 1

Lecture 14 - Probability - Part 2

Lecture 15 - Probability - Part 3

Lecture 16 - Probability Distributions - Part 1

Lecture 17 - Probability Distributions - Part 2

Lecture 18 - Probability Distributions - Part 3

Lecture 19 - Examples for Standardized Normal Distribution

Lecture 20 - Evaluating Normality, Exponential Probability Distribution

Lecture 21 - Chapter Concepts - Probability Distributions

Lecture 22 - Sampling and Sampling Techniques

Lecture 23 - Sampling Distribution - I

Lecture 24 - Sampling Distribution - II

Lecture 25 - Sampling Distribution - III

Lecture 26 - Method of Estimation

Lecture 27 - Interval Estimation

Lecture 28 - Confidence Interval - I

Lecture 29 - Confidence Interval - II

Lecture 30 - Types of Hypothesis Testing

Lecture 31 - Hypothesis Testing Process - I

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Hypothesis Testing Process - II

Lecture 33 - Hypothesis Testing Examples

Lecture 34 - Hypothesis Testing of Proportions - I

Lecture 35 - Hypothesis Testing of Proportions - II

Lecture 36 - Hypothesis Testing-One sample Test

Lecture 37 - Hypothesis Testing using Minitab

Lecture 38 - Hypothesis Testing of Proportions using Minitab

Lecture 39 - Hypothesis Testing Two Sample Test - I

Lecture 40 - Hypothesis Testing Two Sample Test - II

Lecture 41 - Hypothesis Testing Two sample Test - III

Lecture 42 - Paired Sample Test

Lecture 43 - Hypothesis Testing of Proportion

Lecture 44 - Example of Hypothesis Testing

Lecture 45 - Design of Experiment

Lecture 46 - Analysis of variance - I

Lecture 47 - Analysis of variance - II

Lecture 48 - Analysis of variance - III

Lecture 49 - Tukey Kramer test

Lecture 50 - Randomized Blocked Design

Lecture 51 - A Factorial Design - I

Lecture 52 - A Factorial Design - II

Lecture 53 - Chi-square test goodness of fit - I

Lecture 54 - Chi-square test goodness of fit - II

Lecture 55 - Chi-square test of independence

Lecture 56 - Simple linear regression - I

Lecture 57 - Simple linear regression - II

Lecture 58 - Assumption of Regression

Lecture 59 - Multiple Regression

Lecture 60 - Example of multiple Regression

NPTEL : NOC:MCDM Techniques Using R (Management)

Co-ordinators : Dr. Gaurav Dixit

Lecture 1 - Introduction to MCDM Techniques - Part I

Lecture 2 - Introduction to MCDM Techniques - Part II

Lecture 3 - Introduction to MCDM Techniques - Part III

Lecture 4 - Analytic Hierarchy Process (AHP) - Part I

Lecture 5 - Analytic Hierarchy Process (AHP) - Part II

Lecture 6 - Analytic Hierarchy Process (AHP) - Part III

Lecture 7 - Analytic Hierarchy Process (AHP) - Part IV

Lecture 8 - ELECTRE - Part I

Lecture 9 - ELECTRE - Part II

Lecture 10 - ELECTRE - Part III

Lecture 11 - ELECTRE - Part IV

Lecture 12 - ELECTRE - Part V

Lecture 13 - Introduction of TOPSIS - Part I

Lecture 14 - TOPSIS - Part II

Lecture 15 - VIKOR - Part I

Lecture 16 - VIKOR - Part II

Lecture 17 - Introduction of Fuzzy Sets

Lecture 18 - Fuzzy AHP - Part I

Lecture 19 - Fuzzy AHP - Part II

Lecture 20 - Sensitivity Analysis

NPTEL : NOC:Manufacturing Strategy (Management)

Co-ordinators : Prof. Rajat Agarwal

Lecture 1 - Output of Manufacturing

Lecture 2 - Operations Systems

Lecture 3 - Operations Strategy

Lecture 4 - Functional Strategy Within Context of a Firm

Lecture 5 - Functional Dominance within Corporate Strategy

Lecture 6 - World Class Manufacturing Organization

Lecture 7 - Ps of Manufacturing Strategy

Lecture 8 - Contribution of Skinner and Hayes and Wheelwright

Lecture 9 - Alternative Paradigm of Manufacturing Strategy

Lecture 10 - Some Generic Manufacturing Strategies - I

Lecture 11 - Developing Manufacturing Strategy

Lecture 12 - Understanding Markets

Lecture 13 - Concept of Order Winner and Qualifiers

Lecture 14 - Basic Characteristics and Specific Dimensions of Order Winners and Qualifiers

Lecture 15 - Some Specific Order Winners and Qualifiers - I

Lecture 16 - Some Specific Order Winners and Qualifiers - II

Lecture 17 - Some Specific Order Winners and Qualifiers - III

Lecture 18 - Some Specific Order Winners and Qualifiers (non operation related criteria)

Lecture 19 - Developing an Operations Strategy: Methodology

Lecture 20 - Developing an Operations Strategy

Lecture 21 - Developing an Operations Strategy: Roth and Miller Classification

Lecture 22 - Enlightened View of Manufacturing

Lecture 23 - Manufacturing Strategy Taxonomy: Some Evidences from China

Lecture 24 - Quality Management and Manufacturing Excellence

Lecture 25 - Total Quality Management and Manufacturing Excellence

Lecture 26 - Deming's Approach to Quality

Lecture 27 - Business Excellence Awards

Lecture 28 - Process Choice

Lecture 29 - Process Choice: 3 Dimensional View

Lecture 30 - Product Profiling

Lecture 31 - Critical Success Factor for World Class Manufacturing

Lecture 32 - Value Added Engineering

Lecture 33 - Total Employee Involvement

Lecture 34 - HR Theories for Operation Strategy

Lecture 35 - Flexible Manufacturing System

Lecture 36 - Concept of Focus

Lecture 37 - Toyota Production System - I

Lecture 38 - Toyota Production System - II

Lecture 39 - World Class Manufacturing and India

Lecture 40 - Achieving World Class Status

NPTEL : NOC:Training of Trainers (Management)

Co-ordinators : Prof. Santosh Rangnekar

Lecture 1 - Introduction to training - 1

Lecture 2 - Introduction to training - 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Partial Differential Equations (Mathematics)

Co-ordinators : Prof. Sivaji Ganesh

Lecture 1 - Partial Differential Equations - Basic concepts and Nomenclature

Lecture 2 - First Order Partial Differential Equations- How they arise? Cauchy Problems, IVPs, IBVPs

Lecture 3 - First order Partial Differential Equations - Geometry of Quasilinear equations

Lecture 4 - FOPDE's - General Solutions to Linear and Semilinear equations

Lecture 5 - First order Partial Differential Equations- Lagrange's method for Quasilinear equations

Lecture 6 - Relation between Characteristic curves and Integral surfaces for Quasilinear equations

Lecture 7 - Relation between Characteristic curves and Integral surfaces for Quasilinear equations

Lecture 8 - FOPDE's - Method of characteristics for Quasilinear equations - 1

Lecture 9 - First order Partial Differential Equations - Failure of transversality condition

Lecture 10 - First order Partial Differential Equations - Tutorial of Quasilinear equations

Lecture 11 - FOPDE's - General nonlinear equations 1 - Search for a characteristic direction

Lecture 12 - FOPDE's - General nonlinear equations 2 - Characteristic direction and characteristic strip

Lecture 13 - FOPDE's - General nonlinear equations 3 - Finding an initial strip

Lecture 14 - FOPDE's - General nonlinear equations 4 - Local existence and uniqueness theorem

Lecture 15 - First order Partial Differential Equations - Tutorial on General nonlinear equations

Lecture 16 - First order Partial Differential Equations - Initial value problems for Burgers equation

Lecture 17 - FOPDE's - Conservation laws with a view towards global solutions to Burgers equation

Lecture 18 - Second Order Partial Differential Equations - Special Curves associated to a PDE

Lecture 19 - Second Order Partial Differential Equations - Curves of discontinuity

Lecture 20 - Second Order Partial Differential Equations - Classification

Lecture 21 - SOPDE's - Canonical form for an equation of Hyperbolic type

Lecture 22 - SOPDE's - Canonical form for an equation of Parabolic type

Lecture 23 - SOPDE's - Canonical form for an equation of Elliptic type

Lecture 24 - Second Order Partial Differential Equations - Characteristic Surfaces

Lecture 25 - SOPDE's - Canonical forms for constant coefficient PDEs

Lecture 26 - Wave Equation - A mathematical model for vibrating strings

Lecture 27 - Wave Equation in one space dimension - d'Alembert formula

Lecture 28 - Tutorial on One dimensional wave equation

Lecture 29 - Wave Equation in d space dimensions - Equivalent Cauchy problems via Spherical means

Lecture 30 - Cauchy problem for Wave Equation in 3 space dimensions - Poisson-Kirchhoff formulae

Lecture 31 - Cauchy problem for Wave Equation in 2 space dimensions - Hadamard's method of descent

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Nonhomogeneous Wave Equation - Duhamel principle

Lecture 33 - Wellposedness of Cauchy problem for Wave Equation

Lecture 34 - Wave Equation on an interval in? - Solution to an IBVP from first principles

Lecture 35 - Tutorial on IBVPs for wave equation

Lecture 36 - IBVP for Wave Equation - Separation of Variables Method

Lecture 37 - Tutorial on Separation of variables method for wave equation

Lecture 38 - Qualitative analysis of Wave equation - Parallelogram identity

Lecture 39 - Qualitative analysis of Wave equation - Domain of dependence, domain of influence

Lecture 40 - Qualitative analysis of Wave equation - Causality Principle, Finite speed of propagation

Lecture 41 - Qualitative analysis of Wave equation - Uniqueness by Energy method

Lecture 42 - Qualitative analysis of Wave equation - Huygens Principle

Lecture 43 - Qualitative analysis of Wave equation - Generalized solutions to Wave equation

Lecture 44 - Qualitative analysis of Wave equation - Propagation of waves

Lecture 45 - Laplace equation - Associated Boundary value problems

Lecture 46 - Laplace equation - Fundamental solution

Lecture 47 - Dirichlet BVP for Laplace equation - Green's function and Poisson's formula

Lecture 48 - Laplace equation - Weak maximum principle and its applications

Lecture 49 - Laplace equation - Dirichlet BVP on a disk in R2 for Laplace equations

Lecture 50 - Tutorial 1 on Laplace equation

Lecture 51 - Laplace equation - Mean value property

Lecture 52 - Laplace equation - More qualitative properties

Lecture 53 - Laplace equation - Strong Maximum Principle and Dirichlet Principle

Lecture 54 - Tutorial 2 on Laplace equation

Lecture 55 - Cauchy Problem for Heat Equation - 1

Lecture 56 - Cauchy Problem for Heat Equation - 2

Lecture 57 - IBVP for Heat equation Subtitle: Method of Separation of Variables

Lecture 58 - Maximum principle for heat equation

Lecture 59 - Tutorial on heat equation

Lecture 60 - Heat equation Subheading : Infinite speed of propagation, Energy, Backward Problem

NPTEL : NOC:An Introduction to Point-Set-Topology - Part I (Mathematics)

Lecture 20 - Examples of Discrete Time Markov Chain (Continued...)

Lecture 21 - Bernoulli Process

Lecture 22 - Poisson Process

Lecture 23 - Poisson Process (Continued...)

Lecture 24 - Simple Random Walk and Population Processes

Lecture 25 - Introduction to Discrete time Markov Chain

Lecture 26 - Introduction to Discrete time Markov Chain (Continued...)

Lecture 27 - Examples of Discrete time Markov Chain

Lecture 28 - Examples of Discrete time Markov Chain (Continued...)

Lecture 29 - Introduction to Chapman-Kolmogorov equations

Lecture 30 - State Transition Diagram and Examples

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Examples

Lecture 32 - Introduction to Classification of States and Periodicity

Lecture 33 - Closed set of States and Irreducible Markov Chain

Lecture 34 - First Passage time and Mean Recurrence Time

Lecture 35 - Recurrent State and Transient State

Lecture 36 - Introduction and example of Classification of states

Lecture 37 - Example of Classification of states (Continued...)

Lecture 38 - Example of Classification of states (Continued...)

Lecture 39 - Example of Classification of states (Continued...)

Lecture 40 - Introduction and Limiting Distribution

Lecture 41 - Example of Limiting Distribution and Ergodicity

Lecture 42 - Stationary Distribution and Examples

Lecture 43 - Examples of Stationary Distributions

Lecture 44 - Time Reversible Markov Chain and Examples

Lecture 45 - Definition of Reducible Markov Chains and Types of Reducible Markov Chains

Lecture 46 - Stationary Distributions and Types of Reducible Markov chains

Lecture 47 - Type of Reducible Markov Chains (Continued...)

Lecture 48 - Gambler's Ruin Problem

Lecture 49 - Introduction to Continuous time Markov Chain

Lecture 50 - Waiting time Distribution

Lecture 51 - Chapman-Kolmogorov Equation

Lecture 52 - Infinitesimal Generator Matrix

Lecture 53 - Introduction and Example Of Continuous time Markov Chain

Lecture 54 - Limiting and Stationary Distributions

Lecture 55 - Time reversible CTMC and Birth Death Process

Lecture 56 - Steady State Distributions, Pure Birth Process and Pure Death Process

Lecture 57 - Introduction to Poisson Process

Lecture 58 - Definition of Poisson Process

Lecture 59 - Superposition and Deposition of Poisson Process

Lecture 60 - Compound Poisson Process and Examples

Lecture 61 - Introduction to Queueing Systems and Kendall Notations

Lecture 62 - M/M/1 Queueing Model

Lecture 63 - Little's Law, Distribution of Waiting Time and Response Time

Lecture 64 - Burke's Theorem and Simulation of M/M/1 queueing Model

Lecture 65 - M/M/c Queueing Model

Lecture 66 - M/M/1/N Queueing Model

Lecture 67 - M/M/c/K Model, M/M/c/c Loss System, M/M/? Self Service System

Lecture 68 - Transient Solution of Finite Birth Death Process and Finite Source Markovian Queueing Model

Lecture 69 - Queueing Networks Characteristics and Types of Queueing Networks

Lecture 70 - Tandem Queueing Networks

Lecture 71 - Stationary Distribution and Open Queueing Network

Lecture 72 - Jackson's Theorem, Closed Queueing Networks, Gordon and Newell Results

Lecture 73 - Wireless Handoff Performance Model and System Description

Lecture 74 - Description of 3G Cellular Networks and Queueing Model

Lecture 75 - Simulation of Queueing Systems

Lecture 76 - Definition and Basic Components of Petri Net and Reachability Analysis

Lecture 77 - Arc Extensions in Petri Net, Stochastic Petri Nets and examples

Lecture 78 - Generalized Stochastic Petri Net

Lecture 79 - Generalized Stochastic Petri Net (Continued...)

Lecture 80 - Conditional Expectation and Examples

Lecture 81 - Filtration in Discrete time

Lecture 82 - Remarks of Conditional Expectation and Adaptabilty

Lecture 83 - Definition and Examples of Martingale

Lecture 84 - Examples of Martingale (Continued...)

Lecture 85 - Examples of Martingale (Continued...)

Lecture 86 - Doob's Martingale Process, Sub martingale and Super Martingale

Lecture 87 - Definition of Brownian Motion

Lecture 88 - Definition of Brownian Motion (Continued...)

Lecture 89 - Properties of Brownian Motion

Lecture 90 - Processes Derived from Brownian Motion

Lecture 91 - Processes Derived from Brownian Motion (Continued...)

Lecture 92 - Processes Derived from Brownian Motion (Continued...)

Lecture 93 - Stochastic Differential Equations

Lecture 94 - Stochastic Differential Equations (Continued...)

Lecture 95 - Stochastic Differential Equations (Continued...)

Lecture 96 - Ito Integrals

Lecture 97 - Ito Integrals (Continued...)

Lecture 98 - Ito Integrals (Continued...)

Lecture 99 - Renewal Function and Renewal Equation

Lecture 100 - Renewal Function and Renewal Equation (Continued...)

Lecture 101 - Renewal Function and Renewal Equation (Continued...)

Lecture 102 - Generalized Renewal Processes and Renewal Limit Theorems

Lecture 103 - Generalized Renewal Processes and Renewal Limit Theorems (Continued...)

Lecture 104 - Generalized Renewal Processes and Renewal Limit Theorems (Continued...)

Lecture 105 - Markov Renewal and Markov Regenerative Processes

Lecture 106 - Markov Renewal and Markov Regenerative Processes (Continued...)

Lecture 107 - Markov Renewal and Markov Regenerative Processes (Continued...)

Lecture 108 - Markov Renewal and Markov Regenerative Processes (Continued...)

Lecture 109 - Non Markovian Queues

Lecture 110 - Non Markovian Queues (Continued...)

Lecture 111 - Non Markovian Queues (Continued...)

Lecture 112 - Stationary Processes

Lecture 113 - Stationary Processes (Continued...)

Lecture 114 - Stationary Processes (Continued...)

Lecture 115 - Stationary Processes (Continued...) and Ergodicity

Lecture 116 - G1/M/1 queue

Lecture 117 - G1/M/1 queue (Continued...)

Lecture 118 - G1/M/1/N queue and examples

Lecture 119 - Galton-Watson Process

Lecture 120 - Examples and Theorems

Lecture 121 - Theorems and Examples (Continued...)

Lecture 122 - Markov Branching Process

Lecture 123 - Markov Branching Process Theorems and Properties

Lecture 124 - Markov Branching Process Theorems and Properties (Continued...)

NPTEL : NOC:Chaotic Dynamical Systems (Mathematics)

Co-ordinators : Dr. Anima Nagar

Lecture 1 - The beginning

Lecture 2 - Elementary Concepts

Lecture 3 - Elementary Concepts (Continued...)

Lecture 4 - More on orbits

Lecture 5 - Peiods of Periodic Points

Lecture 6 - Scrambled Sets

Lecture 7 - Sensitive Dependence on Initial Conditions

Lecture 8 - A Population Dynamics Model

Lecture 9 - Bifurcations

Lecture 10 - Nonlinear Systems

Lecture 11 - Horseshoe Attractor

Lecture 12 - Dynamics of the Horseshoe Attractor

Lecture 13 - Recurrence

Lecture 14 - Recurrence (Continued...)

Lecture 15 - Transitivity

Lecture 16 - Devaneyâ€™s Chaos

Lecture 17 - Transitivity = Chaos on Intervals

Lecture 18 - Stronger forms of Transitivity

Lecture 19 - Chaotic Properties of Mixing Systems

Lecture 20 - Weakly Mixing and Chaos

Lecture 21 - Strongly Transitive Systems

Lecture 22 - Strongly Transitive Systems (Continued...)

Lecture 23 - Introduction to Symbolic Dynamics

Lecture 24 - Shift Spaces

Lecture 25 - Subshifts of Finite Type

Lecture 26 - Subshifts of Finite Type (Continued...), Chatoic Dynamical Systems

Lecture 27 - Measuring Chaos - Topological Entropy

Lecture 28 - Topological Entropy - Adlerâ€™s Version

Lecture 29 - Bowenâ€™s Definition of Topological Entropy

Lecture 30 - Equivalance of the two definitions of Topological Entropy

Lecture 31 - Linear Systems in Two Dimentions

Lecture 32 - Asymptotic Properties of Orbits of Linear Transformation in IR2

Lecture 33 - Hyperbolic Toral Automorphisms

Lecture 34 - Chaos in Toral Automorphisms

Lecture 35 - Chaotic Attractors of Henon Maps

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Probability Theory and Stochastic Processes (Mathematics)

Co-ordinators : Dr. S. Dharmaraja

Lecture 1 - Random experiment, sample space, axioms of probability, probability space

Lecture 2 - Random experiment, sample space, axioms of probability, probability space (Continued...)

Lecture 3 - Random experiment, sample space, axioms of probability, probability space (Continued...)

Lecture 4 - Conditional probability, independence of events.

Lecture 5 - Multiplication rule, total probability rule, Bayes's theorem.

Lecture 6 - Definition of Random Variable, Cumulative Distribution Function

Lecture 7 - Definition of Random Variable, Cumulative Distribution Function (Continued...)

Lecture 8 - Definition of Random Variable, Cumulative Distribution Function (Continued...)

Lecture 9 - Type of Random Variables, Probability Mass Function, Probability Density Function

Lecture 10 - Type of Random Variables, Probability Mass Function, Probability Density Function (Continued...)

Lecture 11 - Distribution of Function of Random Variables

Lecture 12 - Mean and Variance

Lecture 13 - Mean and Variance (Continued...)

Lecture 14 - Higher Order Moments and Moments Inequalities

Lecture 15 - Higher Order Moments and Moments Inequalities (Continued...)

Lecture 16 - Generating Functions

Lecture 17 - Generating Functions (Continued...)

Lecture 18 - Common Discrete Distributions

Lecture 19 - Common Discrete Distributions (Continued...)

Lecture 20 - Common Continuous Distributions

Lecture 21 - Common Continuous Distributions (Continued...)

Lecture 22 - Applications of Random Variable

Lecture 23 - Applications of Random Variable (Continued...)

Lecture 24 - Random vector and joint distribution

Lecture 25 - Joint probability mass function

Lecture 26 - Joint probability density function

Lecture 27 - Independent random variables

Lecture 28 - Independent random variables (Continued...)

Lecture 29 - Functions of several random variables

Lecture 30 - Functions of several random variables (Continued...)

Lecture 31 - Some important results

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Order statistics

Lecture 33 - Conditional distributions

Lecture 34 - Random sum

Lecture 35 - Moments and Covariance

Lecture 36 - Variance Covariance matrix

Lecture 37 - Multivariate Normal distribution

Lecture 38 - Probability generating function and Moment generating function

Lecture 39 - Correlation coefficient

Lecture 40 - Conditional Expectation

Lecture 33 - Calculus of Variations and Integral Equations

Lecture 34 - Calculus of Variations and Integral Equations

Lecture 35 - Calculus of Variations and Integral Equations

Lecture 36 - Calculus of Variations and Integral Equations

Lecture 37 - Calculus of Variations and Integral Equations

Lecture 38 - Calculus of Variations and Integral Equations

Lecture 39 - Calculus of Variations and Integral Equations

Lecture 40 - Calculus of Variations and Integral Equations

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Linear programming and Extensions (Mathematics)

Co-ordinators : Prof. Prabha Sharma

Lecture 1 - Introduction to Linear Programming Problems

Lecture 2 - Vector space, Linear independence and dependence, basis

Lecture 3 - Moving from one basic feasible solution to another, optimality criteria

Lecture 4 - Basic feasible solutions, existence & derivation

Lecture 5 - Convex sets, dimension of a polyhedron, Faces, Example of a polytope

Lecture 6 - Direction of a polyhedron, correspondence between bfs and extreme points

Lecture 7 - Representation theorem, LPP solution is a bfs, Assignment 1

Lecture 8 - Development of the Simplex Algorithm, Unboundedness, Simplex Tableau

Lecture 9 - Simplex Tableau & algorithm ,Cycling, Blandâ€™s anti-cycling rules, Phase I & Phase II

Lecture 10 - Big-M method,Graphical solutions, adjacent extreme pts and adjacent bfs

Lecture 11 - Assignment 2, progress of Simplex algorithm on a polytope, bounded variable LPP

Lecture 12 - LPP Bounded variable, Revised Simplex algorithm, Duality theory, weak duality theorem

Lecture 13 - Weak duality theorem, economic interpretation of dual variables, Fundamental theorem of duality

Lecture 14 - Examples of writing the dual, complementary slackness theorem

Lecture 15 - Complementary slackness conditions, Dual Simplex algorithm, Assignment 3

Lecture 16 - Primal-dual algorithm

Lecture 17 - Problem in lecture 16, starting dual feasible solution, Shortest Path Problem

Lecture 18 - Shortest Path Problem, Primal-dual method, example

Lecture 19 - Shortest Path Problem-complexity, interpretation of dual variables, post-optimality analysis-changes in the cost vector

Lecture 20 - Assignment 4, postoptimality analysis, changes in b, adding a new constraint, changes in {aij} , Parametric analysis

Lecture 21 - Parametric LPP-Right hand side vector

Lecture 22 - Parametric cost vector LPP

Lecture 23 - Parametric cost vector LPP, Introduction to Min-cost flow problem

Lecture 24 - Mini-cost flow problem-Transportation problem

Lecture 25 - Transportation problem degeneracy, cycling

Lecture 26 - Sensitivity analysis

Lecture 27 - Sensitivity analysis

Lecture 28 - Bounded variable transportation problem, min-cost flow problem

Lecture 29 - Min-cost flow problem

Lecture 30 - Starting feasible solution, Lexicographic method for preventing cycling ,strongly feasible solution

Lecture 31 - Assignment 6, Shortest path problem, Shortest Path between any two nodes,Detection of negative cycles

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Min-cost-flow Sensitivity analysis Shortest path problem sensitivity analysis

Lecture 33 - Min-cost flow changes in arc capacities , Max-flow problem, assignment 7

Lecture 34 - Problem 3 (assignment 7), Min-cut Max-flow theorem, Labelling algorithm

Lecture 35 - Max-flow - Critical capacity of an arc, starting solution for min-cost flow problem

Lecture 36 - Improved Max-flow algorithm

Lecture 37 - Critical Path Method (CPM)

Lecture 38 - Programme Evaluation and Review Technique (PERT)

Lecture 39 - Simplex Algorithm is not polynomial time- An example

Lecture 40 - Interior Point Methods

Co-ordinators : Prof. Prabha Sharma

Lecture 1 - Basic principles of counting

Lecture 2 - Sample space, events, axioms of probability

Lecture 3 - Conditional probability, Independence of events

Lecture 4 - Random variables, cumulative density function, expected value

Lecture 5 - Discrete random variables and their distributions

Lecture 6 - Discrete random variables and their distributions

Lecture 7 - Discrete random variables and their distributions

Lecture 8 - Continuous random variables and their distributions

Lecture 9 - Continuous random variables and their distributions

Lecture 10 - Continuous random variables and their distributions

Lecture 11 - Function of random variables, Momement generating function

Lecture 12 - Jointly distributed random variables, Independent r. v. and their sums

Lecture 13 - Independent r. v. and their sums

Lecture 14 - Chi â€“ square r. v., sums of independent normal r. v., Conditional distr

Lecture 15 - Conditional disti, Joint distr. of functions of r. v., Order statistics

Lecture 16 - Order statistics, Covariance and correlation

Lecture 17 - Covariance, Correlation, Cauchy- Schwarz inequalities, Conditional expectation

Lecture 18 - Conditional expectation, Best linear predictor

Lecture 19 - Inequalities and bounds

Lecture 20 - Convergence and limit theorems

Lecture 21 - Central limit theorem

Lecture 22 - Applications of central limit theorem

Lecture 23 - Strong law of large numbers, Joint mgf

Lecture 24 - Convolutions

Lecture 25 - Stochastic processes: Markov process

Lecture 26 - Transition and state probabilities

Lecture 27 - State prob., First passage and First return prob

Lecture 28 - First passage and First return prob. Classification of states

Lecture 29 - Random walk, periodic and null states

Lecture 30 - Reducible Markov chains

Lecture 31 - Time reversible Markov chains

Lecture 32 - Poisson Processes

Lecture 33 - Inter-arrival times, Properties of Poisson processes

Lecture 34 - Queuing Models: M/M/I, Birth and death process, Littleâ€™s formulae

Lecture 35 - Analysis of L, Lq ,W and Wq , M/M/S model

Lecture 36 - M/M/S , M/M/I/K models

Lecture 37 - M/M/I/K and M/M/S/K models

Lecture 38 - Application to reliability theory failure law

Lecture 39 - Exponential failure law, Weibull law

Lecture 40 - Reliability of systems

Lecture 16 - Several variable calculus

Lecture 17 - Regular surfaces in real three dimensional space

Lecture 18 - Examples of regular surfaces

Lecture 19 - Regular Value, Critical Value of a differentiable map

Lecture 20 - Regular surface locally graph of a differentiable function

Lecture 21 - Change of parametrizations in regular surfaces

Lecture 22 - Differentiable function on surfaces

Lecture 23 - Surface of Revolution, Torus, Higher genus surfaces

Lecture 24 - Tangent Plane and Tangent Vectors

Lecture 25 - Examples of Tangent Planes

Lecture 26 - Differential Map between Tangent Spaces

Lecture 27 - Orientation of Surfaces and Normal Vector Field

Lecture 28 - First Fundamental Form on Surfaces

Lecture 29 - Change of Parametrization in First Fundamental Form and Area

Lecture 30 - Area of Some Surfaces and Gradient on Surfaces

Lecture 31 - Isometries, local isometries, conformal maps

Lecture 32 - Gauss Map and its Fundamental Properties

Lecture 33 - Self Adjoint Operator

Lecture 34 - Second Fundamental Form and normal Curvature

Lecture 35 - Examples for second fundamental form

Lecture 36 - Principal curvatures and Principal Directions

Lecture 37 - Examples for principal curvatures and principal directions

Lecture 38 - Gaussian Curvature and Mean Curvature

Lecture 39 - Christoffel Symbols and The Gauss's Remarkable Theorem

Lecture 40 - Invariance of Gaussian Curvature and Examples of Christoffel Symbols

Lecture 41 - Vector Field and Covariant Derivative

Lecture 42 - Vector Field along a curve, parallel vector field and geodesics

Lecture 43 - Geodesics and its equations

Lecture 44 - Simplicial Complex, Triangulation and Euler Characteristics

Lecture 45 - Gauss Bonnet Theorem

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 7 - Crisp relation and fuzzy relation Extension principle Fuzzy arithmetic numbers and operations

Lecture 8 - Fuzzy relation and operations Fuzzy multi-valued logic Fuzzy implications

Lecture 9 - Fuzzy relation and fuzzy implications Fuzzy multi-valued logic Defuzzification

Lecture 10 - Defuzzification

Lecture 11 - Fuzzy rules Generalised Modus Ponens Generalised Modus Tollens

Lecture 12 - Fuzzy rules Fuzzy inference system

Lecture 13 - Fuzzy inference system Mamdanis, Sugenos and Tsukamoto type inferences

Lecture 14 - Fuzzy inference systems with examples

Lecture 15 - Numerical examples

Lecture 16 - Introduction of Genetic Algorithm Darwinâ€™s Principle

Lecture 17 - Working principle and flow chart of Genetic Algorithm Important terms of Genetic Algorithm

Lecture 18 - Working procedure of Genetic Algorithm Initial population of Genetic Algorithm

Lecture 19 - Basic Concepts of Genetic Algorithm Some encoding technique of Genetic Algorithm

Lecture 20 - Working principle of Genetic Algorithm Population Set Encoding Techniques

Lecture 21 - Selection operator Population diversity and Selection Pressure Exploration and Exploitation

Lecture 22 - Population diversity and Selection Pressure Exploration and Exploitation Selection Methods

Lecture 23 - Selection Methods and Crossover Techniques

Lecture 24 - Selection Methods Crossover techniques Crossover Probability and Mutation Probability

Lecture 25 - Crossover techniques

Lecture 26 - Numerical Examples by using Genetic Algorithm

Lecture 27 - Numerical Examples

Lecture 28 - Numerical Examples (Continued...)

Lecture 29 - Numerical Examples (Continued...)

Lecture 30 - Numerical Examples (Continued...)

Lecture 31 - Introduction of Multi-objective optimization

Lecture 32 - Weighted Sum Method Epsilon-Constraint Method

Lecture 33 - Weighted Distance Metric Method Lexicographic Ordering Method Reference point method

Lecture 34 - Few Methods to solve problems of Multi-objective optimization

Lecture 35 - Introduction of Multi objective GAsVEGA Method

Lecture 36 - Vector Optimized Evolution Strategy (VOES) Weight-Based Genetic Algorithm (WBGA)

Lecture 37 - NSGA and NSGA - II

Lecture 38 - Numerical examples by using NSGA - II

Lecture 39 - Concepts on non-domination Ranking Crowding distance operator NSGA - II

Lecture 40 - Introduction of SPEA and SPEA 2

Lecture 41 - Introduction Rough Set theory

Lecture 42 - Introduction Rough Set theory Indiscernibility Relation

Lecture 43 - Indiscernibility Relation Lower Approximations Upper Approximations

Lecture 44 - Lower Approximations Upper Approximations Boundary Regions

Lecture 45 - Properties of Approximations and Basic classes of Rough Set theory with Numerical examples

Lecture 46 - Rough membership function Dependency of Attributes

Lecture 47 - Dependency of Attributes Reduct and Core

Lecture 48 - Indispensable and Dispensable Attributes Reduct and Core

Lecture 49 - Reduct and Core Discernibility Matrix and Function

Lecture 50 - Numerical examples of Discernibility Matrix and Function

Lecture 51 - Some concepts on Rough set theory Introduction to Rule Generation

Lecture 52 - Rule Generation based on Reduct and Core

Lecture 53 - Some Problems of Rule Generations

Lecture 54 - Fuzzy-Rough Sets

Lecture 55 - Some problems of Fuzzy-Rough sets

Lecture 56 - Introduction to Artificial Neural Networks

Lecture 57 - Numerical example of Backpropagation Algorithm

Lecture 58 - Intelligent Systems Introduction to Neuro-Fuzzy system

Lecture 59 - Adaptive Neuro-Fuzzy Systems

Lecture 60 - Ant colony optimization techniques

NPTEL : NOC:Basics of Nonparametric Tests with Applications by R (Mathematics)

Lecture 6 - Understanding the Zariski Topology on the Affine Line; The Noetherian property in Topology and in Algebra

Lecture 7 - Basic Algebraic Geometry : Varieties, Morphisms, Local Rings, Function Fields and Nonsingularity

Lecture 8 - Topological Dimension, Krull Dimension and Heights of Prime Ideals

Lecture 9 - The Ring of Polynomial Functions on an Affine Variety

Lecture 10 - Geometric Hypersurfaces are Precisely Algebraic Hypersurfaces

Lecture 11 - Why Should We Study Affine Coordinate Rings of Functions on Affine Varieties ?

Lecture 12 - Capturing an Affine Variety Topologically From the Maximal Spectrum of its Ring of Functions

Lecture 13 - Analyzing Open Sets and Basic Open Sets for the Zariski Topology

Lecture 14 - The Ring of Functions on a Basic Open Set in the Zariski Topology

Lecture 15 - Quasi-Compactness in the Zariski Topology; Regularity of a Function at a point of an Affine Variety

Lecture 16 - What is a Global Regular Function on a Quasi-Affine Variety?

Lecture 17 - Characterizing Affine Varieties; Defining Morphisms between Affine or Quasi-Affine Varieties

Lecture 18 - Translating Morphisms into Affines as k-Algebra maps and the Grand Hilbert Nullstellensatz

Lecture 19 - Morphisms into an Affine Correspond to k-Algebra Homomorphisms from its Coordinate Ring of Functions

Lecture 20 - The Coordinate Ring of an Affine Variety Determines the Affine Variety and is Intrinsic to it

Lecture 21 - Automorphisms of Affine Spaces and of Polynomial Rings - The Jacobian Conjecture; The Punctured Plane is Not Affine

Lecture 22 - The Various Avatars of Projective n-space

Lecture 23 - Gluing (n+1) copies of Affine n-Space to Produce Projective n-space in Topology, Manifold Theory and Algebraic Geometry; The Key to the Definition of a Homogeneous Ideal

Lecture 24 - Translating Projective Geometry into Graded Rings and Homogeneous Ideals

Lecture 25 - Expanding the Category of Varieties to Include Projective and Quasi-Projective Varieties

Lecture 26 - Translating Homogeneous Localisation into Geometry and Back

Lecture 27 - Adding a Variable is Undone by Homogenous Localization - What is the Geometric Significance of this Algebraic Fact ?

Lecture 28 - Doing Calculus Without Limits in Geometry ?

Lecture 29 - The Birth of Local Rings in Geometry and in Algebra

Lecture 30 - The Formula for the Local Ring at a Point of a Projective Variety Or Playing with Localisations, Quotients, Homogenisation and Dehomogenisation !

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - The Field of Rational Functions or Function Field of a Variety - The Local Ring at the Generic Point

Lecture 32 - Fields of Rational Functions or Function Fields of Affine and Projective Varieties and their Relationships with Dimensions

Lecture 33 - Global Regular Functions on Projective Varieties are Simply the Constants

Lecture 34 - The d-Uple Embedding and the Non-Intrinsic Nature of the Homogeneous Coordinate Ring of a Projective Variety

Lecture 35 - The Importance of Local Rings - A Morphism is an Isomorphism if it is a Homeomorphism and Induces Isomorphisms at the Level of Local Rings

Lecture 36 - The Importance of Local Rings - A Rational Function in Every Local Ring is Globally Regular

Lecture 37 - Geometric Meaning of Isomorphism of Local Rings - Local Rings are Almost Global

Lecture 38 - Local Ring Isomorphism,Equals Function Field Isomorphism, Equals Birationality

Lecture 39 - Why Local Rings Provide Calculus Without Limits for Algebraic Geometry Pun Intended!

Lecture 40 - How Local Rings Detect Smoothness or Nonsingularity in Algebraic Geometry

Lecture 41 - Any Variety is a Smooth Manifold with or without Non-Smooth Boundary

Lecture 42 - Any Variety is a Smooth Hypersurface On an Open Dense Subset

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 30 - Free Groups - IV

Lecture 31 - Problem Solving/Examples

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Generators and relations for symmetric groups â€“ I

Lecture 33 - Generators and relations for symmetric groups â€“ II

Lecture 34 - Definition of a Ring

Lecture 35 - Euclidean Domains

Lecture 36 - Gaussian Integers

Lecture 37 - The Fundamental Theorem of Arithmetic

Lecture 38 - Divisibility and Ideals

Lecture 39 - Factorization and the Noetherian Condition

Lecture 40 - Examples of Ideals in Commutative Rings

Lecture 41 - Problem Solving/Examples

Lecture 42 - The Ring of Formal Power Series

Lecture 43 - Fraction Fields

Lecture 44 - Path Algebra of a Quiver

Lecture 45 - Ideals In Non-Commutative Rings

Lecture 46 - Product of Rings

Lecture 47 - Ring Homomorphisms

Lecture 48 - Quotient Rings

Lecture 49 - Problem solving

Lecture 50 - Tensor and Exterior Algebras

Lecture 51 - Modules: definition

Lecture 52 - Modules over polynomial rings $K[x]$

Lecture 53 - Modules: alternative definition

Lecture 54 - Modules: more examples

Lecture 55 - Submodules

Lecture 56 - General constructions of submodules

Lecture 57 - Problem Solving

Lecture 58 - Quotient modules

Lecture 59 - Homomorphisms

Lecture 60 - More examples of homomorphisms

Lecture 61 - First isomorphism theorem

Lecture 62 - Direct sums of modules

Lecture 63 - Complementary submodules

Lecture 64 - Change of ring

Lecture 65 - Problem solving

Lecture 66 - Free Modules (finitely generated)

Lecture 67 - Determinants

Lecture 68 - Primary Decomposition

Lecture 69 - Problem solving

Lecture 70 - Finitely generated modules and the Noetherian condition

Lecture 71 - Counterexamples to the Noetherian condition

Lecture 72 - Generators and relations for Finitely Generated Modules

Lecture 73 - General Linear Group over a Commutative Ring

Lecture 74 - Equivalence of Matrices

Lecture 75 - Smith Canonical Form for a Euclidean domain

Lecture 76 - solved_problems1

Lecture 77 - Smith Canonical Form for PID

Lecture 78 - Structure of finitely generated modules over a PID

Lecture 79 - Structure of a finitely generated abelian group

Lecture 80 - Similarity of Matrices

Lecture 81 - Deciding Similarity

Lecture 82 - Rational Canonical Form

Lecture 83 - Jordan Canonical Form

NPTEL : NOC:Computational Commutative Algebra (Mathematics)

Co-ordinators : Prof. Manoj Kummini

Lecture 1 - Definitions

Lecture 2 - Homomorphisms

Lecture 3 - Quotient rings

Lecture 4 - Noetherian rings

Lecture 5 - Monomials

Lecture 6 - Initial ideals

Lecture 7 - Division algorithm

Lecture 8 - Grobner basis

Lecture 9 - Solving Polynomial Equations

Lecture 10 - Nullstellensatz - Part 1

Lecture 11 - Nullstellensatz - Part 2

Lecture 12 - Buchberger criterion

Lecture 13 - Monomial basis

Lecture 14 - Elimination

Lecture 15 - Modules - Part 1

Lecture 16 - Modules - Part 2

Lecture 17 - Localisation

Lecture 18 - Nakayama Lemma

Lecture 19 - Spectrum - Part 1

Lecture 20 - Spectrum - Part 2

Lecture 21 - Associated primes

Lecture 22 - Primary Decomposition

Lecture 23 - Support of a module

Lecture 24 - Associated primes

Lecture 25 - Prime avoidance

Lecture 26 - Saturation - Part 1

Lecture 27 - Saturation - Part 2

Lecture 28 - Saturation - Part 3

Lecture 29 - Morphisms - Part 1

Lecture 30 - Morphisms - Part 2

Lecture 31 - Integral extensions

Lecture 32 - Noether normalisation lemma

Lecture 33 - Noether normalisation lemma

Lecture 34 - Polynomial rings

Lecture 35 - Going up theorem

Lecture 36 - Artinian rings

Lecture 37 - Graded modules

Lecture 38 - Hilbert polynomial

Lecture 39 - Hilbert-Samuel polynomial

Lecture 40 - Artin Rees Lemma

Lecture 41 - Degree of Hilbert-Samuel polynomial

Lecture 42 - Dimension of noetherian local rings - Part 1

Lecture 43 - Dimension of noetherian local rings - Part 2

Lecture 44 - Dimension of polynomial rings

Lecture 45 - Algebras over a field

Lecture 46 - Graded rings - Part 1

Lecture 47 - Graded rings - Part 2

Lecture 48 - Polynomial rings over fields

Lecture 49 - Hilbert series - Part 1

Lecture 50 - Hilbert series - Part 2

Lecture 51 - Proj of a graded ring

Lecture 52 - Homogenization - Part 1

Lecture 53 - Homogenization - Part 2

Lecture 54 - More on graded rings

Lecture 55 - Free resolutions

Lecture 56 - Computing syzygies

Lecture 57 - Koszul complex

Lecture 58 - More on Koszul complexes

Lecture 59 - Castelnuovo Mumford regularity

Lecture 60 - Castelnuovo Mumford regularity

NPTEL : NOC:Laplace Transform (Mathematics)

Co-ordinators : Prof. Indrava Roy

Lecture 1 - Introduction and Motivation for Laplace transforms - Part 1

Lecture 2 - Introduction and Motivation for Laplace transforms - Part 2

Lecture 3 - Improper Riemann integrals: Definition and Existence - Part 1

Lecture 4 - Improper Riemann integrals: Definition and Existence - Part 2

Lecture 5 - Existence of Laplace transforms and Examples

Lecture 6 - Properties of Laplace transforms-I - Part 1

Lecture 7 - Properties of Laplace transforms-I - Part 2

Lecture 8 - Existence of Laplace transforms for functions with vertical asymptote at the Y-axis - Part 1

Lecture 9 - Existence of Laplace transforms for functions with vertical asymptote at the Y-axis - Part 2

Lecture 10 - Properties of Laplace transforms-II - Part 1

Lecture 11 - Properties of Laplace transforms-II - Part 2

Lecture 12 - Laplace transform of Derivatives - Part 1

Lecture 13 - Laplace transform of Derivatives - Part 2

Lecture 14 - Laplace transform of Periodic functions and Integrals - I

Lecture 15 - Laplace transform of Integrals-II - Part 1

Lecture 16 - Laplace transform of Integrals-II - Part 2

Lecture 17 - Inverse Laplace transform and asymptotic behaviour - Part 1

Lecture 18 - Inverse Laplace transform and asymptotic behaviour - Part 2

Lecture 19 - Methods of finding Inverse Laplace transform-I- Partial Fractions

Lecture 20 - Methods of finding Inverse Laplace transform-II- Convolution theorem

Lecture 21 - Convolution theorem for Laplace transforms

Lecture 22 - Applications of Laplace transforms

Lecture 23 - Applications of Laplace Transform to physical systems

Lecture 24 - Solving Linear ODE's with polynomial coefficients

Lecture 25 - Integral and Integro-differential equation

Lecture 26 - Further application of Laplace transforms - Part 1

Lecture 27 - Further application of Laplace transforms - Part 2

NPTEL : NOC:Measure Theory (Prof. Indrava Roy) (Mathematics)

Co-ordinators : Prof. Indrava Roy

Lecture 1 - Finite Sets and Cardinality

Lecture 2 - Infinite Sets and the Banach-Tarski Paradox - Part 1

Lecture 3 - Infinite Sets and the Banach-Tarski Paradox - Part 2

Lecture 4 - Elementary Sets and Elementary measure - Part 1

Lecture 5 - Elementary Sets and Elementary measure - Part 2

Lecture 6 - Properties of elementary measure - Part 1

Lecture 7 - Properties of elementary measure - Part 2

Lecture 8 - Uniqueness of elementary measure and Jordan measurability - Part 1

Lecture 9 - Uniqueness of elementary measure and Jordan measurability - Part 2

Lecture 10 - Characterization of Jordan measurable sets and basic properties of Jordan measure - Part 1

Lecture 11 - Characterization of Jordan measurable sets and basic properties of Jordan measure - Part 2

Lecture 12 - Examples of Jordan measurable sets-I

Lecture 13 - Examples of Jordan measurable sets-II - Part 1

Lecture 14 - Examples of Jordan measurable sets-II - Part 2

Lecture 15 - Jordan measure under Linear transformations - Part 1

Lecture 16 - Jordan measure under Linear transformations - Part 2

Lecture 17 - Connecting the Jordan measure with the Riemann integral - Part 1

Lecture 18 - Connecting the Jordan measure with the Riemann integral - Part 2

Lecture 19 - Outer measure - Motivation and Axioms of outer measure

Lecture 20 - Comparing Inner Jordan measure, Lebesgue outer measure and Jordan Outer measure

Lecture 21 - Finite additivity of outer measure on Separated sets, Outer regularity - Part 1

Lecture 22 - Finite additivity of outer measure on Separated sets, Outer regularity - Part 2

Lecture 23 - Lebesgue measurable class of sets and their Properties - Part 1

Lecture 24 - Lebesgue measurable class of sets and their Properties - Part 2

Lecture 25 - Equivalent criteria for lebesgue measurability of a subset - Part 1

Lecture 26 - Equivalent criteria for lebesgue measurability of a subset - Part 2

Lecture 27 - The measure axioms and the Borel-Cantelli Lemma

Lecture 28 - Properties of the Lebesgue measure: Inner regularity,Upward and Downwar Monotone convergence theorem, and Dominated convergence theorem for sets - Part 1

Lecture 29 - Properties of the Lebesgue measure: Inner regularity,Upward and Downwar Monotone convergence theorem, and Dominated convergence theorem for sets - Part 2

Lecture 30 - Lebesgue measurability under Linear transformation, Construction of Vitali Set - Part 1

Lecture 31 - Lebesgue measurability under Linear transformation, Construction of Vitali Set - Part 2

Lecture 32 - Abstract measure spaces: Boolean and Sigma-algebras

Lecture 33 - Abstract measure and Caratheodory Measurability - Part 1

Lecture 34 - Abstract measure and Caratheodory Measurability - Part 2

Lecture 35 - Abstrsct measure and Hahn-Kolmogorov Extension

Lecture 36 - Lebesgue measurable class vs Caratheodory extension of usual outer measure on R^d

Lecture 37 - Examples of Measures defined on R^d via Hahn Kolmogorov extension - Part 1

Lecture 38 - Examples of Measures defined on R^d via Hahn Kolmogorov extension - Part 2

Lecture 39 - Measurable functions: definition and basic properties - Part 1

Lecture 40 - Measurable functions: definition and basic properties - Part 2

Lecture 41 - Egorov's theorem: abstract version

Lecture 42 - Lebesgue integral of unsigned simple measurable functions: definition and properties

Lecture 43 - Lebesgue integral of unsigned measurable functions: motivation, definition and basic properties

Lecture 44 - Fundamental convergence theorems in Lebesgue integration: Monotone convergence theorem, Tonelli's theorem and Fatou's lemma

Lecture 45 - Lebesgue integral for complex and real measurable functions: the space of L^1 functions

Lecture 46 - Basic properties of L^1-functions and Lebesgue's Dominated convergence theorem

Lecture 47 - L^1 functions on R^d: Egorov's theorem revisited (Littlewood's third principle)

Lecture 48 - L^1 functions on R^d: Statement of Lusin's theorem (Littlewood's second principle), Density of simple functions, step functions, and continuous compactly supported functions in L^1

Lecture 49 - L^1 functions on R^d: Proof of Lusin's theorem, space of L^1 functions as a metric space

Lecture 50 - L^1 functions on R^d: the Riesz-Fischer theorem

Lecture 51 - Various modes of convergence of measurable functions

Lecture 52 - Easy implications from one mode of convergence to another

Lecture 53 - Implication map for modes of convergence with various examples

Lecture 54 - Uniqueness of limits across various modes of convergence

Lecture 55 - Some criteria for reverse implications for modes of convergence

Lecture 56 - Riesz Representation theorem- Motivation

Lecture 57 - Basics on Locally compact Hausdorff spaces

Lecture 58 - Borel and Radon measures on LCH spaces

Lecture 59 - Properties of Radon measures and Lusin's theorem on LCH spaces

Lecture 60 - Riesz Representation theorem - Complete statement and proof - Part 1

Lecture 61 - Riesz Representation theorem - Complete statement and proof - Part 2

Lecture 62 - Examples of measures constructed using RRT

Lecture 63 - Theorems of Tonelli and Fubini- interchanging the order of integration for repeated integrals: motivation and discussion of product measure spaces

Lecture 64 - Product measures

Lecture 65 - Tonelli's theorem for sets - Part 1

Lecture 66 - Tonelli's theorem for sets - Part 2

Lecture 67 - Fubini-Tonelli theorem: interchanging order of integration for measurable and L^1 functions on sigma-finite measure spaces

Lecture 68 - Lebesgue's differentiation theorem: introduction and motivation

Lecture 69 - Lebesgue's differentiation theorem: statement and proof - Part 1

Lecture 70 - Lebesgue's differentiation theorem: statement and proof - Part 2

Lecture 71 - DIfferentiation theorems: Almost everywhere differentiability for Monotone and Bounded Variation functions - Part 1

Lecture 72 - DIfferentiation theorems: Almost everywhere differentiability for Monotone and Bounded Variation functions - Part 2

Lecture 73 - Riesz's Rising Sun Lemma

Lecture 74 - Differentiation theorem for monone continuous functions

Lecture 75 - Differentation theorem for general monotone functions and Second fundamental theorem of calculus for absolutely continuous functions

NPTEL : NOC:Complex Analysis (Mathematics)

Co-ordinators : Prof. Pranav Haridas

Lecture 1 - Field of Complex Numbers

Lecture 2 - Conjugation and Absolute value

Lecture 3 - Topology on Complex plane

Lecture 4 - Topology on Complex Plane (Continued...)

Lecture 5 - Problem Session

Lecture 6 - Isometries on the Complex Plane

Lecture 7 - Functions on the Complex Plane

Lecture 8 - Complex differentiability

Lecture 9 - Power Series

Lecture 4 - An infinite flock of Pigeons

Lecture 5 - Basic Counting - the sum and product rules

Lecture 6 - Examples of basic counting

Lecture 7 - Examples: Product and Division rules

Lecture 8 - Binomial theorem and bijective counting

Lecture 9 - Counting lattice paths

Lecture 10 - Multinomial theorem

Lecture 11 - Applying Multinomial theorem

Lecture 12 - Integer compositions

Lecture 13 - Set partitions and Stirling numbers

Lecture 14 - Stirling and Hemachandra recursions

Lecture 15 - Integer partitions

Lecture 16 - Young's diagram and Integer partitions

Lecture 17 - Principle of Inclusion and Exclusion

Lecture 18 - Applications of PIE

Lecture 19 - The twelvefold way

Lecture 20 - Inclusion exclusion: Linear algebra view

Lecture 21 - Partial Orders

Lecture 22 - Mobius Inversion Formula

Lecture 23 - Product theorem and applications of Mobius Inversion

Lecture 24 - Formal power series, ordinary generating functions

Lecture 25 - Application of Ordinary generating functions

Lecture 26 - Product of Generating functions

Lecture 27 - Composition of generating functions

Lecture 28 - Exponential Generating Function

Lecture 29 - Composition of EGF

Lecture 30 - Euler pentagonal number theorem

Lecture 31 - Graphs - introduction

Lecture 32 - Paths Walks, Cycles

Lecture 33 - Digraphs and functional digraphs

Lecture 34 - Componenets, Connectivity, Bipartite graphs

Lecture 35 - Acyclic graphs

Lecture 36 - Graph colouring

Lecture 37 - Mycielski graphs

Lecture 38 - Product of graphs

Lecture 39 - Menger's theorem

Lecture 40 - System of Distinct representatives

Lecture 41 - Planar graphs

Lecture 42 - Euler identity

Lecture 43 - Map colouring problem - History

Lecture 44 - The Discharging Method - Part 1

Lecture 45 - The Discharging Method - Part 2

Lecture 46 - Introduction to Group actions

Lecture 47 - Colouring and symmetries - examples

Lecture 48 - Bursides lemma

Lecture 49 - Proof of Bursides lemma

Lecture 50 - Polya's theorem

Lecture 51 - Species of structures- definitions and examples

Lecture 52 - Associated seris and Product of species

Lecture 53 - Species: Substitution and Derivative

Lecture 54 - Species: Pointing and countilg labelled trees

Lecture 55 - Review and Further directions

Lecture 56 - More on further topics

Lecture 57 - Linear Algebra method: Ultra short introduction

Lecture 58 - Probabiistic Method: Ultra short introduction

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 37 - Some Examples, Open Immersions and Closed Immersions

Lecture 38 - Product of Quasi-affine Varieties

Lecture 39 - Diagonal Morphisms, Abstract Varieties

Lecture 40 - Tutorial 6 : Normal Varieties and Normalization of a Variety

Lecture 41 - Projective Varieties Revisited - Part 1

Lecture 42 - Projective Varieties Revisited - Part 2

Lecture 43 - Global Regular Functions on ProjectiveVarieties are Constants - Part 1

Lecture 44 - Global Regular Functions on ProjectiveVarieties are Constants - Part 2

Lecture 45 - Product of Prevarieties - Part 1

Lecture 46 - Product of Prevarieties - Part 2

Lecture 47 - Tutorial 7 : A Result on Tensor Products of k-algebras

Lecture 48 - Morphisms of Prevarieties - Part 1

Lecture 49 - Morphisms of Prevarieties - Part 2

Lecture 50 - Finite Morphisms - Part 1

Lecture 51 - Finite Morphisms - Part 2

Lecture 52 - Fiber Products

Lecture 53 - Tutorial 8 : Finite Morphisms

Lecture 54 - Immersions

Lecture 55 - Fiber Products, Separatedness

Lecture 56 - Criterion of Separatedness

Lecture 57 - Proper Morphisms and Complete Varieties

Lecture 58 - Tutorial 9 : Closed Immersions and Graph of a Morphism

Lecture 59 - Projective Varieties are Complete

Lecture 60 - Zariski Tangent Space, Singular and Nonsingular Points

Lecture 61 - Smooth Points Form a Non-empty Open Subset

Lecture 62 - Blow-Ups, Rational Maps and Birational Maps

Lecture 63 - Tutorial 10 : Zariski Tangent Space at a Point of an Affine Variety

Lecture 64 - Blow-Ups (Continued...)

Lecture 65 - Smooth Morphisms

Lecture 66 - Bertini's Theorem

Lecture 67 - Sard's Theorem

Lecture 68 - Tutorial 11 : Dimension of fiber of a morphism

Lecture 69 - Introduction to Affine Schemes - Spectrum of a Ring

Lecture 70 - Introduction to Affine Schemes - Topology on Spec A

Lecture 71 - Introduction to Affine Schemes - Topology on Spec A (Continued...)

Lecture 72 - Introduction to Affine Schemes - Sheaf Structure on Spec A

Lecture 73 - Abstract Non-singular Curves - Part 1

Lecture 74 - Abstract Non-singular Curves - Part 2

Lecture 75 - Tutorial 12 : Extension of Regular Functions

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

Lecture 58 - Structure theory of finite abelian p-groups

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Introduction to Lie Algebras (Mathematics)

Co-ordinators : Prof. R. Venkatesh

Lecture 1 - An Introduction to Lie Algebras

Lecture 2 - Lie subalgebra and Homomorphism

Lecture 3 - Some Problems

Lecture 4 - Ideals and Quotient algebras

Lecture 5 - Isomorphism theorems

Lecture 6 - Correspondence between ideals

Lecture 7 - Low dimensional Lie algebra - 1

Lecture 8 - Low dimensional Lie algebra - 2

Lecture 9 - Some more definitions

Lecture 10 - Solvable and nilpotent Lie algebra

Lecture 11 - Nilpotent Lie algebra

Lecture 12 - The invariance Lemma

Lecture 13 - Engel's and Lie's Theorem

Lecture 14 - Engel's and Lie's Theorem (Continued...)

Lecture 15 - Lie's Theorem

Lecture 16 - Basics of Representation Theory

Lecture 17 - Basics of Representation Theory (Continued...)

Lecture 18 - Schur's lemma

Lecture 19 - Finite dimensional representations of of sl2(C)

Lecture 20 - Classification of finite dimensional representations of sl2(C)

Lecture 21 - Complete reducibility of finite dimensional representation of sl2(C) - Part 1

Lecture 22 - Complete reducibility of finite dimensional representation of sl2(C) - Part 2

Lecture 23 - Applications of Lie's and Engel's theorem

Lecture 24 - Applications of Weyl's Theorem for sl2(C)

Lecture 25 - New representations form given representations

Lecture 26 - Primary decomposition Theorem and Jordan-Chevalley decomposition

Lecture 27 - Cartan's criteria for solvability

Lecture 28 - Cartan's criteria for semisimplicity and its consequences

Lecture 29 - Abstract Jordan decomposition in semisimple Lie algebras

Lecture 30 - Casimir element of a representation of a semisimple Lie algebra

Lecture 31 - Weyl's Theorem of complete reducibility for semisimple Lie algebras

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Root space decomposition of semisimple Lie algebras

Lecture 33 - Centralizer of a maximal toral subalgebra

Lecture 34 - Properties of roots

Lecture 35 - More properties of roots

Lecture 36 - Rationality of roots

Lecture 37 - Abstract root system and Weyl groups

Lecture 38 - Isomorphism of Root systems and dual root systems

Lecture 39 - Root systems of Ranks 1 and 2

Lecture 40 - Classification of rank 2 root systems

Lecture 41 - Base of a root system

Lecture 42 - Classification of bases

Lecture 43 - Basic properties of simple roots

Lecture 44 - Characterization of length function

Lecture 45 - Decomposition of root systems

Lecture 46 - Root lengths, Cartan Matrices

Lecture 47 - Cartan matrices and Dynkin diagrams

Lecture 48 - Classification of Root systems

Lecture 49 - Classification of Root systems (Continued...)

Lecture 50 - Concrete description of root systems

Lecture 51 - Uniqueness of root systems

Lecture 52 - Isomorphism theorem

Lecture 53 - Isomorphism theorem (Continued...)

Lecture 54 - Generators and relations

Lecture 55 - Serre presentation

NPTEL : NOC:Representation Theory of General Linear Lie Algebra (Mathematics)

Co-ordinators : Prof. R. Venkatesh

Lecture 1 - Basic Theory of Lie algebras

Lecture 2 - Basic Theory of Lie algebras (Continued...)

Lecture 3 - Basic Theory of Lie algebras (Continued...)

Lecture 4 - Representation Theory of Lie algebras

Lecture 5 - Representation Theory of Lie algebras (Continued...)

Lecture 6 - Representation of Lie algebras

Lecture 7 - Classification of 2 dimensional representation of two dimensional non-abelian Lie algebra

Lecture 8 - Isomorphism Theorem

Lecture 9 - Characterization of completely reducible module

Lecture 10 - Representation theory of sl2(C)

Lecture 11 - Irreducible representation of sl2(C)

Lecture 12 - Irreducible representation of sl2(C) (Continued...)

Lecture 13 - Complete reducibility of sl2(C)

Lecture 14 - Complete reducibility of sl2(C) (Continued...)

Lecture 15 - Representation theory of sl2(C)-basic observation

Lecture 16 - Application of sl2(C) representation theory in combinatorics

Lecture 17 - Constructions of new representations

Lecture 18 - Construction of universal algebras - I

Lecture 19 - Construction of universal algebras - II

Lecture 20 - Non-degenerate and invariant bilinear forms

Lecture 21 - SchurÃ¢â‚¬â„¢s lemma and Killing form

Lecture 22 - Killing form of general and special linear Lie algebras

Lecture 23 - The universal enveloping algebra

Lecture 24 - Properties of the universal enveloping algebra

Lecture 25 - The Casimir operator for representations of gln(C) and sln(C)

Lecture 26 - Weylâ€™s theorem of complete reducibility

Lecture 27 - The structure of sln+1(C)

Lecture 28 - Representations of sln+1(C) - I

Lecture 29 - Representations of sln+1(C) - II

Lecture 30 - Representations of sln+1(C) - III

Lecture 31 - Casimir operator and highest weight modules - I

Lecture 32 - Casimir operator and highest weight modules - II

Lecture 33 - Irreducible representations of sln+1(C)

Lecture 34 - Verma module and its irreducible quotient

Lecture 35 - Verma modules and standard cyclic irreducible modules

Lecture 36 - Finite dimensional standard cyclic irreducible modules

Lecture 37 - Standard cyclic irreducible modules

Lecture 38 - Character Theory - I

Lecture 39 - Character Theory - II

Lecture 40 - Deniminator Identity - Prep 1

Lecture 41 - Deniminator Identity - Prep 2

Lecture 42 - Proof of the denominator identity

Lecture 43 - Freudenthal's formula

Lecture 44 - The Weyl character formula

Lecture 45 - The Laplacian operator and the Weyl Character Formula

Lecture 46 - Proof of the Weyl Character Formula

Lecture 47 - Applications of Weyl Character formula

Lecture 48 - The Weyl dimension formula, Schur polynomials

Lecture 49 - Semi-standard Young Tableaux

Lecture 50 - BGG resolution

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Algebraic Number Theory (Mathematics)

Co-ordinators : Prof. Mahesh Kakde

Lecture 1 - Overview and Motivation

Lecture 2 - Algebraic Numbers

Lecture 3 - The ring of integers

Lecture 4 - Lattices

Lecture 5 - Properties of ring of integers

Lecture 6 - Discriminant

Lecture 7 - Dedekind Domains (DD)

Lecture 8 - Algebraic properties of DD

Lecture 9 - Unique Factorization of Ideals - 1

Lecture 10 - Unique Factorization of Ideals - 2

Lecture 11 - Ring of Integers is a DD

Lecture 12 - Ideal Class Group

Lecture 13 - Integral Ideal in an ideal class

Lecture 14 - Finiteness of ideal class group

Lecture 15 - Geometry of numbers - 1

Lecture 16 - Geometry of numbers - 2

Lecture 17 - Dirichlet's Unit Theorem - 1

Lecture 18 - Dirichlet's Unit Theorem - 2

Lecture 19 - Relative extension - 1

Lecture 20 - Relative extension - 2

Lecture 21 - Decomposition Group

Lecture 22 - Inertia Group

Lecture 23 - The Artin map

Lecture 24 - Valuations

Lecture 25 - Archimedean valuations

Lecture 26 - Non-archimedean valuations

Lecture 27 - p-adic numbers

Lecture 28 - p-adic completion of a Number field

Lecture 29 - Product formula

Lecture 30 - Hensel's lemma

Lecture 31 - Finite extensions of local fields

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Factorisation of conorm of a prime ideal in a finite extension - I

Lecture 33 - Factorisation of conorm of a prime ideal in a finite extension - II

Lecture 34 - Different - I

Lecture 35 - Different - II

Lecture 36 - Different - III

Lecture 37 - Ramification and different ideal

Lecture 38 - Quadratic Fields

Lecture 39 - Binary quadratic forms - I

Lecture 40 - Binary quadratic forms - II

Lecture 41 - Reduced binary quadratic forms

Lecture 42 - Class group of imaginary quadratic fields and binary quadratic forms - 1

Lecture 43 - Class group of imaginary quadratic fields and binary quadratic forms - 2

Lecture 44 - Computation of Class group of imaginary quadratic fields using binary quadratic forms

Lecture 45 - Order two elements in Class group of imaginary quadratic fields

Lecture 46 - Pure cubic fields - 1

Lecture 47 - Pure cubic fields - 2

Lecture 48 - Pell's equation - 1

Lecture 49 - Pell's equation - 2

Lecture 50 - Biquadratic fields - 1

Lecture 51 - Biquadratic fields - 2

Lecture 52 - Cyclotomic fields - 1

Lecture 53 - Cyclotomic fields - 2

Lecture 54 - Compuation of class groups - 1

Lecture 55 - Compuation of class groups - 2

Lecture 56 - Compuation of class groups - 3

Lecture 57 - Compuation of class groups - 4

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Convective Heat and Mass Transfer (Mechanical Engineering)

Co-ordinators : Prof. A.W. Date

Lecture 1 - Introduction

Lecture 2 - Flow Classifications

Lecture 3 - Laws of Convection

Lecture 4 - Scalar Transport Equations

Lecture 5 - Laminar Boundary Layers

Lecture 6 - Similarity Method

Lecture 7 - Similaity Solns Velocity BL

Lecture 8 - Similaity Solns Temperature BL - I

Lecture 9 - Similaity Solns Temperature BL - II

Lecture 10 - Integral BL Equations

Lecture 11 - Integral Solns Laminar Velocity BL

Lecture 12 - Integral Solns Laminar Temperature BL

Lecture 13 - Superposition Theory

Lecture 14 - Laminar Internal Flows

Lecture 15 - Fully-Developed Laminar Flows - 1

Lecture 16 - Fully-Developed Laminar Flows - 2

Lecture 17 - Fully-Developed Laminar Flows Heat Transfer - 1

Lecture 18 - Fully-Developed Laminar Flows Heat Transfer - 2

Lecture 19 - Laminar Internal Developing Flows Heat Transfer

Lecture 20 - Superposition Technique

Lecture 21 - Nature of Turbulent Flows

Lecture 22 - Sustaining Mechanism of Turbulence - 1

Lecture 23 - Sustaining Mechanism of Turbulence - 1

Lecture 24 - Sustaining Mechanism of Turbulence - 2

Lecture 25 - Near-Wall Turbulent Flows - 1

Lecture 26 - Near-Wall Turbulent Flows - 2

Lecture 27 - Turbulence Models - 1

Lecture 28 - Turbulence Models - 2

Lecture 29 - Turbulence Models - 3

Lecture 30 - Prediction of Turbulent Flows

Lecture 31 - Prediction of Turbulent Heat Transfer

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Convective Mass Transfer

Lecture 33 - Stefan Flow Model

Lecture 34 - Couette Flow Model

Lecture 35 - Reynolds Flow Model

Lecture 36 - Boundary Layer Flow Model

Lecture 37 - Evaluation of g and Nw

Lecture 38 - Diffusion Mass Transfer Problems

Lecture 39 - Convective MT Couette Flow

Lecture 40 - Convective MT Reynolds Flow Model - 1

Lecture 41 - Convective MT Reynolds Flow Model - 2

Lecture 42 - Natural Convection

Lecture 43 - Diffusion Jet Flames

NPTEL : Cryogenic Engineering (Mechanical Engineering)

Co-ordinators : Prof. M.D. Atrey

Lecture 1 - Introduction to Cryogenic Engineering

Lecture 2 - Properties of Cryogenic Fluids - I

Lecture 3 - Properties of Cryogenic Fluids - II

Lecture 4 - Properties of Cryogenic

Lecture 5 - Material Properties at Low Temperature - I

Lecture 6 - Material Properties at Low Temperature - II

Lecture 7 - Material Properties at Low Temperature - III

Lecture 8 - Gas Liquefaction and Refrigeration Systems - I

Lecture 9 - Gas Liquefaction and Refrigeration Systems - II

Lecture 10 - Gas Liquefaction and Refrigeration Systems - III

Lecture 11 - Gas Liquefaction and Refrigeration Systems - IV

Lecture 12 - Gas Liquefaction and Refrigeration Systems - V

Lecture 13 - Gas Liquefaction and Refrigeration Systems - VI

Lecture 14 - Gas Liquefaction and Refrigeration Systems - VII

Lecture 15 - Gas Liquefaction and Refrigeration Systems - VIII

Lecture 16 - Gas Liquefaction and Refrigeration Systems - IX

Lecture 17 - Gas Liquefaction and Refrigeration Systems - X

Lecture 18 - Gas Separation - I

Lecture 19 - Gas Separation - II

Lecture 20 - Gas Separation - III

Lecture 21 - Gas Separation - IV

Lecture 22 - Gas Separation - V

Lecture 23 - Gas Separation - VI

Lecture 24 - Gas Separation - VII

Lecture 25 - Gas Separation - VIII

Lecture 26 - Cryocoolers

Lecture 27 - Cryocoolers Ideal Stirling Cycle - I

Lecture 28 - Cryocoolers Ideal Stirling Cycle - II

Lecture 29 - Cryocoolers Ideal Stirling Cycle - III

Lecture 30 - Cryocoolers Ideal Stirling Cycle - IV

Lecture 31 - Cryocoolers Ideal Stirling Cycle - V

Lecture 32 - Cryocoolers

Lecture 33 - Cryogenic Insulation - I

Lecture 34 - Cryogenic Insulation - II

Lecture 35 - Cryogenic Insulation - III

Lecture 36 - Vacuum Technology - I

Lecture 37 - Vacuum Technology - II

Lecture 38 - Vaccum Technology - III

Lecture 39 - Instrumentation in Cryogenics - I

Lecture 40 - Instrumentation in Cryogenics - II

Lecture 41 - Instrumentation in Cryogenics - III

Lecture 42 - Safety in Cryogenics

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Advanced Strength of Materials (Mechanical Engineering)

Co-ordinators : Prof. S.K. Maiti

Lecture 1 - Stress and Strain Tensor

Lecture 2 - Stress and Strain Tensor (Continued) and Cauchy Formula for Traction

Lecture 3 - Examples on Calculation of Strains and Tractions, Principal Stresses and Directions

Lecture 4 - Example on Calculation of Principal Stresses and Directions, Orthogonality of Principal Directions, Principal Stresses are all Real

Lecture 5 - Maximum Shear Stress and Octahedral Shear Stress, Deviatoric and Hydrostatic Stresses

Lecture 6 - Transformation of Stresses and Mohr Circle in 3-D

Lecture 7 - Mohr Circle (Continued)

Lecture 8 - Deformation, Rotation and Strain Tensors, Principal Strains,Deviatoric and Hydrostatic Strains

Lecture 9 - Strain Transformations, Strains in Polar Coordinates, Equilibrium Equations in 2-D

Lecture 10 - Equilibrium Equations in 2-D Polar Coordinates Plane Stress and Plane Strain Conditions

Lecture 11 - Stress-Strain Relations for Isotropic, Orthotropic and Anisotropic Materials Stress-Strain-Temperature Relations

Lecture 12 - Relation between Elastic Constants and Strain Energy Densities Recap of Lectures 1 to 11

Lecture 13 - Stress Distribution in Thick Cylinder

Lecture 14 - Stresses due to Shrink Fitting

Lecture 15 - Stresses in Rotating Disc

Lecture 16 - Examples on Shrink Fitting and Rotating Disc

Lecture 17 - Torsion of Non-Circular Shaft

Lecture 18 - Torsion of Non-Circular Shaft (Continued)

Lecture 19 - Membrane Analogy for Torsion

Lecture 20 - Torsion of Thin Box Sections

Lecture 21 - Torsion of Box and Open Sections

Lecture 22 - Bending of Curved Bars

Lecture 23 - Bending of Curved Bars (Continued)

Lecture 24 - Theories of Failure

Lecture 25 - Theories of Failure (Continued)

Lecture 26 - Theories of Failure (Continued) and Their Applications, Griffith Theory of Brittle Fracture

Lecture 27 - Application of Griffith Theory, Irwin-Orowan Modification of Griffith Theory, Assessment of Effect of Dynamic Loading

Lecture 28 - Theorems of Elasticity

Lecture 29 - Theorems of Elasticity (Continued)

Lecture 30 - Thermal Stress Distribution in Rectangular Sheet due to Symmetric and Asymmetric Temperature Fields

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 31 - Thermal Stress Distribution in Cylinders

Lecture 32 - Unsymmetrical Bending

Lecture 33 - Shear Centre

Lecture 34 - Plate Bending

Lecture 35 - Plate Bending (Continued)

Lecture 36 - Examples on Plate Bending

Lecture 37 - Approximate Solutions for Bending of Rectangular and Circular Plates

Lecture 38 - Thin Shells of Revolution

Lecture 39 - Beam on Elastic Foundation

Lecture 40 - Application of Beam on Elastic Foundation Analysis to Pressure Vessels for Calculation of Discontinuity Stresses

NPTEL : Heat and Mass Transfer (Mechanical Engineering)

Co-ordinators : Prof. S.P. Sukhatme, Prof. U.N. Gaitonde

Lecture 1 - Introduction to Heat and Mass Transfer

Lecture 2 - Introduction

Lecture 3 - Introduction

Lecture 4 - Heat Conduction - 1

Lecture 5 - Heat Conduction - 2

Lecture 6 - Heat Conduction - 3

Lecture 7 - Heat Conduction - 4

Lecture 8 - Heat Conduction - 5

Lecture 9 - Heat Conduction - 6

Lecture 10 - Thermal Radiation - 1

Lecture 11 - Thermal Radiation - 2

Lecture 12 - Thermal Radiation - 3

Lecture 13 - Thermal Radiation - 4

Lecture 14 - Thermal Radiation - 5

Lecture 15 - Thermal Radiation - 6

Lecture 16 - Review Of Fluid Mechanics - 1

Lecture 17 - Review Of Fluid Mechanics - 2

Lecture 18 - Forced Convection - 1

Lecture 19 - Forced Convection - 2

Lecture 20 - Forced Convection - 3

Lecture 21 - Forced Convection - 4

Lecture 22 - Natural Convection - 1

Lecture 23 - Natural Convection - 2

Lecture 24 - Natural Convection - 3

Lecture 25 - Heat Exchangers - 1

Lecture 26 - Heat Exchangers - 2

Lecture 27 - Heat Exchangers - 3

Lecture 28 - Heat Exchangers - 4

Lecture 29 - Boiling and Condensation - 1

Lecture 30 - Boiling and Condensation - 2

Lecture 31 - Boiling and Condensation - 3

Lecture 32 - Boiling and Condensation - 4

Lecture 33 - Introduction to Mass Transfer - 1

Lecture 34 - Introduction to Mass Transfer - 2

Lecture 35 - Introduction to Mass Transfer - 3

NPTEL : Robotics (Mechanical Engineering)

Co-ordinators : Prof. P. Seshu, Prof. P.S. Gandhi, Prof. K. Kurien Issac, Prof. B. Seth, Prof. C. Amarnath

Lecture 1 - Introduction to Robotics

Lecture 2 - Technologies in Robots

Lecture 3 - Industrial Robots

Lecture 4 - Industrial Manipulators and its Kinematics

Lecture 5 - Parallel Manipulators

Lecture 6 - Grippers manipulators

Lecture 7 - Electric Actuators

Lecture 8 - Actuators - Electric, Hydraulic, Pneumatic

Lecture 9 - Internal State Sensors

Lecture 10 - Internal State Sensors

Lecture 11 - External State Sensors

Co-ordinators : Prof. S.R kale

Lecture 1 - Thermodynamic Concepts: Applications of thermodynamics

Lecture 2 - Thermodynamic Concepts: System definition,Heat, Work and Mass Flow

Lecture 3 - Thermodynamic Concepts: Questions and Answers

Lecture 4 - Thermodynamic Concepts: Properties,State and Equilibrium

Lecture 5 - Thermodynamic Concepts: Process, Cycles and Applications

Lecture 6 - Thermodynamic Concepts: Steady state, Reversible and Irreversible processes

Lecture 7 - Thermodynamic Concepts: Causes of irreversibility

Lecture 8 - Thermodynamic Concepts: Thermal reservoirs

Lecture 9 - Thermodynamic Concepts: Pressure and temperature

Lecture 10 - Thermodynamic Concepts: Revision and Summary

Lecture 11 - Laws Of Thermodynamics: Mass flow rate, Conservation of mass, Flow work

Lecture 12 - Laws Of Thermodynamics: Zeroth Law

Lecture 13 - Laws Of Thermodynamics: First Laws Of Thermodynamics, 1st law for Control Mass, Internal Energy, enthalpy

Lecture 14 - Laws Of Thermodynamics: 1st law for Control Volume

Lecture 15 - Laws Of Thermodynamics: Revision, Cycles, Second Law statements, Clausius inequality

Lecture 16 - Laws Of Thermodynamics: Introduction to carnot Cycle

Lecture 17 - Laws Of Thermodynamics: Entropy,Entropy change for a system

Lecture 18 - Laws Of Thermodynamics: Thermodynamics relations,Bernoulli's equation

Lecture 19 - Laws Of Thermodynamics: Devices, Cycles

Lecture 20 - Properties of a Pure Substance: Thermodynamic behaviour of a pure substance

Lecture 21 - Properties of a Pure Substance: Saturated states, Subcooled liquid, Superheated vapour

Lecture 22 - Properties of a Pure Substance: Vapour pressure curve, Reference state

Lecture 23 - Properties of a Pure Substance: Saturated states

Lecture 24 - Properties of a Pure Substance: p-h diagram

Lecture 25 - Properties of a Pure Substance: T-s diagram, h-s diagram

Lecture 26 - Properties of a Pure Substance: Critical state, Compressibility factor

Lecture 27 - Properties of a Pure Substance: Ideal gas behaviour, Equations of state, Specific heat

Lecture 28 - Properties of a Pure Substance: Ideal gas processes

Lecture 29 - Properties of a Pure Substance: Gibbs energy, Helmholtz function, Property relations

Lecture 30 - Properties of a Pure Substance: Process analysis, Summary

Lecture 31 - Laws of Thermodynamics: Carnot Cycle Realization

Lecture 32 - Applications, Problem Solving: Devices, Schematic/Flow Diagrams

Lecture 33 - Applications, Problem Solving: Positive Displacement Devices

Lecture 34 - Applications, Problem Solving: Heat Exchangers

Lecture 35 - Applications, Problem Solving: Compressors, Fans and Blowers, Pumps

Lecture 36 - Applications, Problem Solving: Turbines

Lecture 37 - Applications, Problem Solving: Nozzle, Diffuser, Expansion Valve, Pipe/duct flow

Lecture 38 - Applications, Problem Solving: De-Superheater, Deaerator, Separation

Lecture 39 - Applications, Problem Solving: Unsteady processes, Filling, Evacuation

Lecture 40 - Applications, Problem Solving: Realization of Carnot cycle, Practical cycles, Air-standard cycles

Lecture 41 - Applications, Problem Solving: Materials, Compressible flow

Lecture 42 - Applications, Problem Solving: Otto cycle, Diesel cycle

Lecture 43 - Applications, Problem Solving: Closed system

Lecture 44 - Applications, Problem Solving: Open System

Lecture 45 - Properties of Ideal Gas Mixtures: Introduction to mixtures properties

Lecture 46 - Properties of Ideal Gas Mixtures: Equation of state, Conservation equations

Lecture 47 - Gas-Vapour Mixtures: Psychrometry, Moist air Properties,

Lecture 48 - Gas-Vapour Mixtures: Properties, Conservation of Mass and Energy

Lecture 49 - Gas-Vapour Mixtures: Psychrometric chart, Applications

Lecture 50 - Thermodynamics of Reacting sytems: Introduction to reacting systems and combustion

Lecture 51 - Thermodynamics of Reacting sytems: Flames, Stoichiometry

Lecture 52 - Thermodynamics of Reacting sytems: Analysis of Closed and Open Systems, Enthalpy of Formation

Lecture 53 - Phase and Chemical Equilibrium: Introduction. Chemical equilibrium. Gibbs function

Lecture 54 - Phase and Chemical Equilibrium: Equilibrium constant. Phase equilibrium

Lecture 19 - Incremental harmonic balance method and Intrinsic multiple scale harmonic balance method

Lecture 20 - Modified Lindstedt Poincareâ€™ technique

Lecture 21 - Stability and Bifurcation of Fixed-point response - 1

Lecture 22 - Stability and Bifurcation of Fixed-point response - 2

Lecture 23 - Stability and Bifurcation of Fixed-point response - 3

Lecture 24 - Stability and Bifurcation of Fixed-point response - 4

Lecture 25 - Stability Analysis of Periodic response

Lecture 26 - Bifurcation of Periodic response And Introduction to quasi-periodic and Chaotic response

Lecture 27 - Quasi-Periodic and Chaotic response

Lecture 28 - Numerical methods to obtain roots of characteristic equation and time response

Lecture 29 - Numerical methods to obtain time response

Lecture 30 - Numerical methods to obtain frequency response

Lecture 31 - Free Vibration of Single degree of freedom Nonlinear systems with Cubic and quadratic nonlinearities

Lecture 32 - Free Vibration of Single degree of freedom Nonlinear systems with Cubic and quadratic nonlinearities: effect of damping

Lecture 33 - Free Vibration of multi- degree of freedom Nonlinear systems with Cubic and quadratic nonlinearities

Lecture 34 - Forced nonlinear Vibration Single degree of freedom Nonlinear systems with Cubic nonlinearities:

Lecture 35 - Forced nonlinear Vibration Single and multi- degree of freedom Nonlinear systems

Lecture 36 - Nonlinear Forced-Vibration of Single and Multi Degree-of-Freedom System

Lecture 37 - Analysis of Multi- degree of freedom system

Lecture 38 - Nonlinear Vibration of Parametrically excited system: Axially loaded sandwich beam

Lecture 39 - Nonlinear Vibration of Parametrically excited system: Elastic and Magneto-elastic beam

Lecture 40 - Nonlinear Vibration of Parametrically excited system with internal resonance

NPTEL : Theory and Practice of Rotor Dynamics (Mechanical Engineering)

Co-ordinators : Prof. Rajiv Tiwari

Lecture 1 - Introduction

Lecture 2 - A Brief History of Rotor Dynamics

Lecture 3 - The State of the Art of Rotor Dynamics

Lecture 4 - Simple Rotor Models with Rigid Bearings

Lecture 5 - Jeffcott Rotor Model

Lecture 6 - Variant of Jeffcott Rotor Model

Lecture 7 - Rigid Rotor Mounted on Simple Anistropic Springs as Bearings

Lecture 8 - Rigid Rotor Mounted on Complex Anisotropic Bearings

Lecture 9 - Flexible Shaft with a Rigid Disc Mounted on Anistropic Supports

Lecture 10 - Gyroscopic Effects : Synchronous whirl of a Rotor Systems with a thin Disc

Lecture 11 - Gyroscopic Effects : Synchronous and Asynchronous pure wobbling motions

Lecture 12 - Gyroscopic Effects : Asynchronous whirl of a Rotor system with a thin Disc

Lecture 13 - Gyroscopic Effects : Asynchronous whirl analysis with Dynamic Approach

Lecture 14 - Torsional Vibrations: Simple Rotor Systems

Lecture 15 - Three Disc Rotor System

Lecture 16 - Transfer Matrix Approach - Part I

Lecture 17 - Transfer Matrix Approach - Part II

Lecture 18 - Transfer Matrix Approach - Part III

Lecture 19 - Geared and Branched Systems

Lecture 20 - Continuous System and Finite Element Method

Lecture 21 - Finite Element Method

Lecture 22 - Finite Element Analysis

Lecture 23 - Finite Element Analysis - Part III

Lecture 24 - Influence Coefficient Method

Lecture 25 - Transfer Matrix Method - Part I

Lecture 26 - Transfer Matrix Method - Part II

Lecture 27 - Transfer Matrix Method - Part III

Lecture 28 - Continuous System Approach

Lecture 29 - Finite Element Method - Part I

Lecture 30 - Finite Element Method - Part II

Lecture 31 - Finite Element Method - Part III

Lecture 32 - Instability in Rotor Systems: Bearings

Lecture 33 - Fluid-Film Bearings

Lecture 34 - Internal Damping & Asymmetrical Shaft

Lecture 35 - Steam Whirl and Seals

Lecture 36 - Subcritical Speed Whirl

Lecture 37 - Introduction to Rigid Rotor Balancing

Lecture 38 - Dynamic Balancing of Rotors: Rigid Rotor Balancing

Lecture 39 - Dynamic Balancing of Rotors:Flexible Rotor Model Balancing

Lecture 40 - Dynamic Balancing of Rotors:Influence Coefficient Method for Flexible Rotor

Lecture 41 - Common Faults & Vibration signatures

Lecture 42 - Condition Based Monitoring

NPTEL : Engineering Mechanics (Mechanical Engineering)

Co-ordinators : Prof. U.S. Dixit, Dr. G. Saravana Kumar

Lecture 1 - Fundamentals Of Engineering Mechanics

Lecture 2 - Equations of Equilibrium

Lecture 3 - Truss Analysis - Part 1

Lecture 4 - Truss Analysis - Part 2

Lecture 5 - Analysis of Frames Machines

Lecture 6 - Internal Forces

Lecture 7 - Internal Forces in Beams

Lecture 8 - Cables

Lecture 9 - Friction

Lecture 10 - Application of Friction - Part 1

Lecture 11 - Application of Friction - Part 2

Lecture 12 - Application of Friction - Part 3

Lecture 13 - Centroids Center of Mass

Lecture 14 - Centroids Area of Moments

Lecture 15 - Product of Inertia, Rotation of Axis and Principle Moments of Inertia

Lecture 16 - Principle Mass Moments of Inertia

Lecture 17 - Second Moment of Mass

Lecture 18 - Virtual Work of Ideal System

Lecture 19 - Principle of Virtual Work

Lecture 20 - Systems with Friction

Lecture 21 - Potential Energy

Lecture 22 - Stability of Equilibrium

Lecture 23 - Kinematics of a Particles

Lecture 24 - Kinematics of a Particle Moving on a Curve

Lecture 25 - Relative Motion

Lecture 26 - Plane Kinematics of Rigid Bodies

Lecture 27 - Kinematics of a Particle

Lecture 28 - Work and Energy

Lecture 29 - Impulse and Momentum

Lecture 30 - Direct and Oblique Impulse

Lecture 31 - Plane Kinetics of Rigid Bodies

Lecture 32 - Kinetics of a Body

Lecture 33 - Method of Momentum and Analysis of Robot Manipulator

Lecture 34 - Kinematics in 3D

Lecture 35 - Kinetics in 3D

Lecture 36 - Free Vibration

Lecture 37 - Forced Vibration Damped Undamped

Lecture 38 - Vibration of Rigid Bodies - Part 1

Lecture 39 - Vibration of Rigid Bodies - Part 2

Lecture 40 - Some Problems of Vibration

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Mechanical Vibrations (Mechanical Engineering)

Co-ordinators : Prof. S.K. Dwivedy, Prof. Rajiv Tiwari

Lecture 1 - Overview of the Course, Practical and Research Trends

Lecture 2 - Harmonic and Periodic Motions, Vibration Terminology

Lecture 3 - Vibration Model, Equation of Motion-Natural Frequency

Lecture 4 - Energy Method, Principle of Virtual Work

Lecture 5 - Viscously Damped Free Vibration Special Cases: Oscillatory

Lecture 6 - Logarithmic Decrement Experimental Determination of Damping Coefficient Hystersis Loop

Lecture 7 - Coulomb Damping other Damping Models

Lecture 8 - Forced Harmonic Vibration, Magnification Factor

Lecture 9 - Laplace Transform, Superposition Theorem

Lecture 10 - Rotor Unbalance and Whirling of Shaft, Transmissibility

Lecture 11 - Support Motion, Vibration Isolation

Lecture 12 - Sharpness of Resonance, Vibration Measuring Instruments

Lecture 13 - Generalized and Principle Coordinates, Derivation of Equation of Motion

Lecture 14 - Lagranges's Equation

Lecture 15 - Coordinate Coupling

Lecture 16 - Forced Harmonic Vibration

Lecture 17 - Tuned Absorber, Determination of Mass Ratio

Lecture 18 - Tuned and Damped Absorber, Untuned Viscous Damper

Lecture 19 - Derivation of Equations of Motion, Influence Coefficient Method

Lecture 20 - Properties of Vibrating Systems: Flexibility & Stiffness Matrices, Reciprocity Theorem

Lecture 21 - Modal Analysis: Undamped

Lecture 22 - Modal Analysis: Damped

Lecture 23 - Simple Systems With One Two or Three Discs Geared System

Lecture 24 - Multi-Degree of Freedom Systems-Transfer Matrix Method Branched Systems

Lecture 25 - Derivation of Equations of Motion Part 1 - Newton

Lecture 26 - Derivation of Equations of Motion Part 2 - Newton

Lecture 27 - Vibration of Strings

Lecture 28 - Longitudinal and Torsional Vibration of Rods

Lecture 29 - Transverse Vibration of Beams, Equations of Motion and Boundary Conditions

Lecture 30 - Transverse Vibration of Beams: Natural Frequencies and Mode Shapes

Lecture 31 - Rayleigh's Energy Method

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Matrix Iteration Method

Lecture 33 - Durkerley, Rayleigh-Ritz and Galerkin Method

Lecture 34 - Finite Element Formulation for Rods, Gear Train and Branched System

Lecture 35 - Finite Element Formulation for Beams: Galerkin

Lecture 36 - Global Finite Element Assembly and Imposition of Boundary Conditions

Lecture 37 - Vibration Testing Equipments: Signal Measurements

Lecture 38 - Vibration Testing Equipments: Signal Analysis

Lecture 39 - Field Balancing of Rotors

Lecture 40 - Condition Monitoring

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Advanced Machining Processes (Mechanical Engineering)

Co-ordinators : Prof. Manas Das

Lecture 1 - Introduction to advanced machining processes

Lecture 2 - Ultrasonic machining - Part I

Lecture 3 - Ultrasonic machining - Part II

Lecture 4 - Abrasive jet machining

Lecture 5 - Water jet cutting and Abrasive water jet machining

Lecture 6 - Magnetic abrasive finishing

Lecture 7 - Abrasive Flow Finishing

Lecture 8 - Magnetorheological Finishing

Lecture 9 - Magnetorheological Abrasive Flow Finishing - Part I

Lecture 10 - Magnetorheological Abrasive Flow Finishing - Part II

Lecture 11 - Magnetorheological Abrasive Flow Finishing - Part III

Lecture 12 - Electric discharge machining (EDM)

Lecture 13 - Electric Discharge Grinding, Electric Discharge Diamond Grinding and Wire Electric Discharge Machining

Lecture 14 - Electrochemical Machining (ECM)

Lecture 15 - Electrochemical Grinding, Electrostream Drilling, Shaped Tube Electrolytic Machining

Lecture 16 - Plasma Arc Machining (PAM)

Lecture 17 - Electron Beam Machining (EBM) Edit Lesson

Lecture 18 - Laser Beam Machining (LBM)

Lecture 19 - Chemical Machining (ChM)

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

NPTEL : NOC:Fundamentals of Nuclear Power Generation (Mechanical Engineering)

Co-ordinators : Prof. Dipankar N. Basu

Lecture 1 - Introduction of nuclear energy

Lecture 2 - Binding energy and mass defect

Lecture 3 - Radioactivity and radioactive decay

Lecture 4 - Different types of nuclear transmutation

Lecture 5 - Artificial radioactivity and neutron-nucleus interactions

Lecture 6 - Energy and momentum conservation

Lecture 7 - Fission and role of neutron energy

Lecture 8 - Theory of elastic scattering

Lecture 9 - Neutron multiplication factor

Lecture 10 - Neutron diffusion theory

Lecture 11 - Solution of one-group diffusion equation

Lecture 12 - Simple reactor theory

Lecture 13 - Nuclear fuel and simple energy consideration

Lecture 14 - Axial temperature distribution and heat transfer coefficient

Lecture 15 - Prompt and delayed neutrons

Lecture 16 - Delayed neutron kinetics

Lecture 17 - Different control mechanisms and various effects

Lecture 18 - Classical reactor designs

Lecture 19 - Evolution of reactors from Gen-I to Gen-IV

Lecture 20 - The concept of breeding

Lecture 21 - Fuel cycles and FBR

Lecture 22 - Gen-IV FBR designs

Lecture 23 - Hydrogen fusion reactions

Lecture 24 - Coulomb barrier and other critical factors

Lecture 25 - Radiation dose and gross biological effects

Lecture 26 - Stochastic and deterministic effects of human cells

Lecture 27 - Lessons from TMI and Chernobyl

Lecture 28 - Defence-in-depth Philosophy

Lecture 29 - Waste classification and Disposal of Mill Tailings

Lecture 30 - Disposal methodologies for HLW and IMW

NPTEL : NOC:Advances in Welding and Joining Technologies (Mechanical Engineering)

Co-ordinators : Prof. Swarup bag

Lecture 1 - Fundamentals of Welding and Joining - Part I

Lecture 2 - Fundamentals of Welding and Joining - Part II

Lecture 3 - Fundamentals of Welding and Joining - Part III

Lecture 4 - Fundamentals of Welding and Joining - Part IV

Lecture 5 - Fundamentals of Welding and Joining - Part V

Lecture 6 - Laser and Electron Beam Welding - Part I

Lecture 7 - Laser and Electron Beam Welding - Part II

Lecture 8 - Solid State Welding Processes - Part I

Lecture 9 - Solid State Welding Processes - Part II

Lecture 10 - Solid State Welding Processes - Part III

Lecture 11 - Computational Welding Mechanics - Part I

Lecture 12 - Computational Welding Mechanics - Part II

Lecture 13 - Computational Welding Mechanics - Part III

Lecture 14 - Micro and Nano Joining Processes - Part I

Lecture 15 - Micro and Nano Joining Processes - Part II

Lecture 16 - Micro and Nano Joining Processes - Part III

Lecture 17 - Welding Metallurgy - Part I

Lecture 18 - Welding Metallurgy - Part II

Lecture 19 - Welding Metallurgy - Part III

Lecture 20 - Welding Metallurgy - Part IV

Lecture 21 - Welding and Joining of Non-Metals - Part I

Lecture 22 - Welding and Joining of Non-Metals - Part II

Lecture 23 - Metal Transfer in Welding and Metal Printing

NPTEL : NOC:Introduction to Machining and Machining Fluids (Mechanical Engineering)

Co-ordinators : Prof. Mamilla Ravi Sankar

Lecture 1 - Introduction

Lecture 2 - Introduction and Importance of Machining

Lecture 3 - Principles of Machining or Metal Cutting

Lecture 4 - Cutting Tools

Lecture 5 - Forces in Machining

Lecture 6 - Tribology in Machining

Lecture 7 - Lubrication surface roughness in Machining

Lecture 8 - Machinability and Thermal Aspects

Lecture 9 - Tool Wear and Tool life - Part 1

Lecture 10 - Tool Wear and Tool life - Part 2

Lecture 11 - Tool Wear and Tool life - Part 3

Lecture 12 - Tool Materials and Coatings

Lecture 13 - Machining Fluids / Cutting Fluids and its Additives - Part 1

Lecture 14 - Machining Fluids / Cutting Fluids and its Additives - Part 2

Lecture 15 - Machining Fluids / Cutting Fluids and its Emissions

Lecture 16 - Eco Friendly Cutting Fluids - Part 1

Lecture 17 - Eco Friendly Cutting Fluids - Part 2

Lecture 18 - Rheology and Thermal Characterization of Machining / Cutting Fluids

Lecture 19 - Bio-degradation Studies of Machining / Cutting Fluids

Lecture 20 - Cutting Fluid Application in Machining Region

Lecture 21 - Practical Machining Processes - 1

Lecture 22 - Practical Machining Processes - 2

Lecture 23 - Introduction to Abrasive Processes - Grinding

Lecture 24 - Cutting fluids in Grinding Process

Lecture 25 - Unbonded Conventional Abrasive Processes

Lecture 26 - Advances in Metal Cutting_Machining Processes

Lecture 27 - Advances in Metal Cutting_Machining Processes - 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Mechanics of Machining (Mechanical Engineering)

Co-ordinators : Dr. Uday S. Dixit

Lecture 1 - Deformation of Metals

Lecture 2 - Mechanism of Plastic Deformation

Lecture 3 - Machining Processes: Single Edge Tool, Types of Chips

Lecture 4 - Tool Geometry: Single Point Cutting Tool Specifications

Lecture 5 - Tool Specifications, Conversion Of Tool Angles, Multi-Point Cutting Tools

Lecture 6 - Mechanics of Orthogonal Cutting, Force Relationships

Lecture 7 - Determination of Stress, Strain, and Strain Rate

Lecture 8 - Measurement of Shear Angle

Lecture 9 - Other Analysis for Force Relationships

Lecture 10 - Mechanics of Oblique Cutting

Lecture 11 - Measurement of Cutting Forces

Lecture 12 - Thermal Aspects Of Machining: Temperatures in Orthogonal Cutting

Lecture 13 - Tool Wear and Tool Life and Tool Life Equations

Lecture 14 - Economics in Machining

Lecture 15 - Practical Machining Operations: Turning And Shaping and Planning Operation

Lecture 16 - Practical Machining Operations: Milling And Drilling

Lecture 17 - Grinding of Metals and Mechanics of Grinding Process

Lecture 18 - Abrasive Machining and Finishing Operations

Lecture 19 - CNC Machines and CNC Programming

Lecture 20 - Introduction to Advanced Machining Processes

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Principle of Hydraulic Machines and System Design (Mechanical Engineering)

Co-ordinators : Prof. Pranab K. Mondal

Lecture 1 - Introduction to hydraulic machines: classifications and operational principles

Lecture 2 - Euler equation for turbomachines: net head developed by the pump/turbines

Lecture 3 - Velocity triangles of pumps, effect of inlet swirl on pump operation

Lecture 4 - Velocity triangles of pumps, effect of inlet swirl on pump operation

Lecture 5 - Pump casings, Efficiencies and Problems - I

Lecture 6 - Pump casings, Efficiencies and Problems - II

Lecture 7 - Pump casings, Efficiencies and Problems - III

Lecture 8 - Axial flow pump, HQ curve, System Resistance Curve - I

Lecture 9 - Axial flow pump, HQ curve, System Resistance Curve - II

Lecture 10 - HQ Curve, System Resistance Curve - I

Lecture 11 - HQ Curve, System Resistance Curve - II

Lecture 12 - Introduction to Cavitation

Lecture 13 - Condition for Cavitation and NPSH

Lecture 14 - Net Positive Suction Head (NPSH)

Lecture 15 - Suction number and Introduction to off design condition

Lecture 16 - Cavitation: The effect of off-design Conditions

Lecture 17 - Cavitation: Preventive Measures

Lecture 18 - Cavitation: Preventive Measures, Effect on Pump Characteristic

Lecture 19 - Problems on Cavitation

Lecture 20 - Introduction to Slip : Stodola Slip Model

Lecture 21 - Departure from Euler theory

Lecture 22 - Slip Velocity - I

Lecture 23 - Slip Velocity - II

Lecture 24 - Problem on slip

Lecture 25 - Degree of reaction of pump

Lecture 26 - Degree of reaction and axial pump design

Lecture 27 - Testing of radial flow pump - I

Lecture 28 - Testing of radial flow pump - II

Lecture 29 - Problem on radial flow pump testing

Lecture 30 - Radial equilibrium of axial flow pump - I

Lecture 31 - Radial equilibrium of axial flow pump - II

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Pump operation: series and parallel connection

Lecture 33 - Series and parallel operation of dissimilar pumps

Lecture 34 - Pumping system design

Lecture 35 - Design of parellel pumping system

Lecture 36 - Numerical problem on pumps - I

Lecture 37 - Numerical problem on pumps - II

Lecture 38 - Numerical problem on pumps - III

Lecture 39 - Working principle and Indicator diagram of PD pump

Lecture 40 - Working principle and Indicator diagram of PD pump (Continued...)

Lecture 41 - Modified indicator diagram and Head-Discharge curve

Lecture 42 - Analysis and Head-Discharge curve of PD pump

Lecture 43 - Analysis and efficiencies of PD pump

Lecture 44 - Requirement of air chamber in PD pump

Lecture 45 - Numerical problem on PD pump with air chamber

Lecture 46 - Similarity and dimensional analysis of hydraulic machines

Lecture 47 - Dimensional analysis of hydraulic machines: Buckingham's theorem

Lecture 48 - Buckingham's theorem: Specific speed of hydraulic machines

Lecture 49 - Turbine Classification and Operational principle of Pelton wheel

Lecture 50 - Velocity Tiangles and analysis

Lecture 51 - Operational Principle of Reaction turbine

Lecture 52 - Degree of Reaction and Introduction to axial flow turbine

Lecture 53 - Kaplan Turbine: Operational Principle, Turbine efficiencies

Lecture 54 - Draft Tube for Reaction Turbine and Cavitation

Lecture 55 - Energy Balance and NPSH

Lecture 56 - Thoma Cavitation Factor

Lecture 57 - Reaction Turbine: Design aspects and Characteristic Curves

Lecture 58 - Problems on Impulse and Reaction Turbines

NPTEL : NOC:Introduction to Abrasive Machining and Finishing Processes (Mechanical Engineering)

Co-ordinators : Prof. Mamilla Ravi Sankar

Lecture 1 - Introduction to Abrasive Machining and Finishing Processes

Lecture 2 - Grinding Process

Lecture 3 - Grinding Fluids and Its Additives

Lecture 4 - Grinding Fluids and its Emissions

Lecture 5 - Sustainable Grinding Process: Biodegradation of Grinding Fluids

Lecture 6 - Sustainable Grinding Process: MQL in Grinding Process

Lecture 7 - Honing Process

Lecture 8 - Lapping Process

Lecture 9 - Super Finishing and Sand Blasting

Lecture 10 - Vibratory Bowl Finishing,Rotary Barrel Finishing or Tumbling

Lecture 11 - Drag Finishing, Ice-bonded Abrasive Finishing, Pitch Polishing, Pad Polishing

Lecture 12 - Introduction to Surface Texture in abrasive Process

Lecture 13 - Representation of Surface Roughness

Lecture 14 - Abrasive Jet Machining (AJM)

Lecture 15 - Abrasive Water Jet Machining (AWJM)

Lecture 16 - Ultrasonic Machining (USM)

Lecture 17 - EDM, Wire-EDM, EDG, EDDG, AW-EDG

Lecture 18 - Elastic Emission Machining

Lecture 19 - PMEDM and ECD and ELID, ECH

Lecture 20 - Abrasive Flow Finishing: Part 1

Lecture 21 - Abrasive Flow Finishing: Part 2

Lecture 22 - Magnetic Field Assisted Abrasive Finishing: MAF, MADe, MFP

Lecture 23 - Magneto Rheological Finishing and BE-MRF

Lecture 24 - Magnetic Field Assisted Abrasive Finishing:CNP,CMMRF,MRAFF,R-MRAFF

Lecture 25 - Summary of the Course

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Theory of Rectangular Plates - Part 1 (Mechanical Engineering)

Co-ordinators : Prof. Poonam Kumari

Lecture 1 - Basic of Solid Mechanics

Lecture 2 - Enegry Principles

Lecture 3 - Classification of Plate Theories and Some Basics

Lecture 4 - Tutorial: Transformation of Tensors

Lecture 5 - Governing Equation for Plate - 1

Lecture 6 - Governing Equation for Plate - 2

Lecture 7 - Tutorial: Reduced Stiffness and Plate Stiffness

Lecture 8 - Navier Solution + Levy solution

Lecture 9 - Levy Solution

Lecture 10 - Tutorial: Load Matrices Calculation

Lecture 11 - EKM and buckling of plates

Lecture 12 - 3D Solutions

Lecture 13 - Matlab Coding + ABAQUS

Lecture 14 - Tutorial: Levy Solutions

Lecture 27 - Hybrid welding, residual stress and distortion

Lecture 28 - Cooling and solidification at different casting processes

Lecture 29 - Powder metallurgy

Lecture 30 - Principle of surface and coating technologies

Lecture 31 - Principle and development of additive manufacturing technologies - 1

Lecture 32 - Principle and development of additive manufacturing technologies - 2

Lecture 33 - Fundamentals of heat treatment

Lecture 34 - Evaluation of microstructural properties and residual stress

Lecture 35 - Down-scaling of conventional manufacturing processes and Micro-to-nano manufacturing

Lecture 36 - Packaging, micro-finishing and micro-manufacturing processes

Lecture 37 - Processing and shaping of non-metals and bio-materials

Lecture 38 - Principle of glass and ceramics processing and their shaping

NPTEL : NOC:Two-Phase flow with phase change in Conventional and Miniature Channels (Mechanical Engineering)

Co-ordinators : Prof. Manmohan Pandey

Lecture 1 - Introduction and Notation

Lecture 2 - Flow Regimes and Flow Regime Maps

Lecture 3 - The Homogeneous Model

Lecture 4 - The Separated Flow Model

Lecture 5 - The Separated Flow Model (Continued...)

Lecture 6 - The Drift Flux Model

Lecture 7 - Estimation of pressure drop in two phase flow

Lecture 8 - Two phase flow and pressure drop in miniature channels

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Applied Thermodynamics for Engineers (Mechanical Engineering)

Co-ordinators : Prof. Dipankar N. Basu

Lecture 1 - Overview of thermodynamic system and state

Lecture 2 - First and second laws of thermodynamics

Lecture 3 - Concept of entropy and entropy generation

Lecture 4 - Concept of exergy and exergy destruction

Lecture 5 - Thermodynamic potentials and Maxwell relations

Lecture 6 - Generalized relations for entropy and specific heats

Lecture 7 - Joule-Thomson coefficient and Clapeyron equation

Lecture 8 - Liquid-vapor phase-change process

Lecture 9 - Use of property tables

Lecture 10 - Equations-of-state and Compressibility factor

Lecture 11 - Ideal cycles for reciprocating engines

Lecture 12 - Otto, Diesel and Dual combustion cycles

Lecture 13 - Stirling and Ericsson cycles

Lecture 14 - Fuel-air cycle

Lecture 15 - Numerical exercise on Fuel-air cycles

Lecture 16 - Losses in actual cycle and valve-timing diagram

Lecture 17 - Ideal Brayton cycle

Lecture 18 - Intercooling and reheating in Brayton cycle

Lecture 19 - Regeneration in Brayton cycle

Lecture 20 - Ideal Rankine cycle

Lecture 21 - Improvements and modifications in Rankine cycle

Lecture 22 - Regenerative Rankine cycle

Lecture 23 - Binary vapor power cycle

Lecture 24 - Combined gas-steam power plant

Lecture 25 - Different arrangments in combined cycles

Lecture 26 - Vapor compression refrigeration cycle

Lecture 27 - SSS cycles and refrigerants

Lecture 28 - Modifications in VCR systems

Lecture 29 - Vapor absorption refrigeration cycle

Lecture 30 - P-v-T behavior of gas mixtures

Lecture 31 - Numerical examples

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Properties of moist air

Lecture 33 - Psychrometric chart and various psychrometric processes

Lecture 34 - Sensible heat factor and bypass factor

Lecture 35 - Theoretical and actual combustion process

Lecture 36 - Thermodynamic analyses of reacting systems

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Fundamentals of Conduction and Radiation (Mechanical Engineering)

Co-ordinators : Prof. Dipankar N. Basu

Lecture 1 - Relationship of Thermodynamics with Heat transfer

Lecture 2 - Modes of heat transfer

Lecture 3 - Fourier's law and thermal conductivity

Lecture 4 - Generalized heat diffusion equation

Lecture 5 - Heat diffusion equation in curvilinear coordinates

Lecture 6 - Concept of thermal resistance

Lecture 7 - Use of network of resistances in wall and cylinder

Lecture 8 - Critical thickness of insulation

Lecture 9 - Conduction with energy generation - I

Lecture 10 - Conduction with energy generation - II

Lecture 11 - General Heat Transfer Analysis

Lecture 12 - Fins with uniform cross-section area - I

Lecture 13 - Fins with uniform cross-section area - II

Lecture 14 - Fins with non-uniform cross-section area

Lecture 15 - Method of Separation of Variables

Lecture 16 - Graphical approach

Lecture 17 - Method of Superposition

Lecture 18 - Lumped capacitance approach - I

Lecture 19 - Lumped capacitance approach - II

Lecture 20 - Semi-infinite Solid

Lecture 21 - Steady Heat Conduction

Lecture 22 - Unsteady Heat Conduction

Lecture 23 - Problem solving using Energy Balance Method

Lecture 24 - Introduction to radiative heat fluxes

Lecture 25 - Spectral and directional definitions

Lecture 26 - Blackbody radiation

Lecture 27 - Emissivity

Lecture 28 - Irradiation of real surfaces

Lecture 29 - View factor

Lecture 30 - Blackbody radiation exchange

Lecture 31 - Radiation networks

Lecture 32 - Gas radiation

Lecture 33 - Radiative Transfer Equation

NPTEL : NOC:Steam Power Engineering (Mechanical Engineering)

Co-ordinators : Dr. Vinayak Kulkarni

Lecture 1 - Review of thermodynamics

Lecture 2 - Rankine cycle

Lecture 3 - Performance estimation of steam power cycles

Lecture 4 - Carnot cycle examples

Lecture 5 - Rankine cycle with superheat

Lecture 6 - Rankine cycle with reheat theory and example

Lecture 7 - Examples of Rankine cycle

Lecture 8 - Examples of reheat Rankine cycle

Lecture 9 - Rankine cycle with regeneration

Lecture 10 - Feedwater heaters

Lecture 11 - Cogeneration of power and process heat

Lecture 12 - Examples of regeneration

Lecture 13 - Examples of regenerative Rankine cycle

Lecture 14 - Binary/multi-fluid cycles

Lecture 15 - Low temperature power cycles

Lecture 16 - Examples of binary cycles

Lecture 17 - Types of boilers

Lecture 18 - Boiler accessories

Lecture 19 - Practice examples

Lecture 20 - Stagnation conditions and Nozzle flow

Lecture 21 - Nozzle flow

Lecture 22 - Examples of Nozzle

Lecture 23 - Impulse Turbine - 1

Lecture 24 - Impulse Turbine - 2

Lecture 25 - Examples on Impulse Turbine

Lecture 26 - Reaction Turbine

Lecture 27 - Reheat Factor

Lecture 28 - Examples on Turbine - 1

Lecture 29 - Examples on Turbine - 2

Lecture 30 - Gas Mixture

Lecture 31 - Psychrometry - 1

Lecture 32 - Psychrometry - 2

Lecture 33 - Condensers

NPTEL : NOC:Dynamic Behaviour of Materials (Mechanical Engineering)

Co-ordinators : Prof. Prasenjit Khanikar

Lecture 1 - Introduction to Dynamic Behaviour of Materials - I

Lecture 2 - Introduction to Dynamic Behaviour of Materials - II

Lecture 3 - Introduction to Waves

Lecture 4 - Quasi-static vs Dynamic Deformation

Lecture 5 - Elastic Wave and its Classification

Lecture 6 - Propagation of Elastic Waves in Continuum

Lecture 7 - Wave Reflection, Refraction and Interaction

Lecture 8 - General Solution of Elastic Wave Equation

Lecture 9 - Additional Considerations of Elastic Wave in Cylindrical Bar

Lecture 10 - Introduction to Plastic Waves

Lecture 11 - Plastic Waves of Uniaxial Stress

Lecture 12 - Plastic Waves of Combined Stress

Lecture 13 - Taylor's Experiment for Plastic Wave Propagation - 1

Lecture 14 - Taylor's Experiment for Plastic Wave Propagation - 2

Lecture 15 - Taylor's Experiment: Wilkins-Guinan Analysis

Lecture 16 - Introduction to Shock Waves - I

Lecture 17 - Introduction to Shock Waves - II

Lecture 18 - Shock Wave: Rankine Hugonoit Treatment

Lecture 19 - Rankine Hugonoit Treatment and Shock Wave under Impact

Lecture 20 - Shock Wave under Impact

Lecture 21 - Equations of States (Shock Waves) : Experimental Methods

Lecture 22 - Equations of States (Shock Waves) : Theoretical Calculations

Lecture 23 - Complex Problems of Shock Waves and Temperature Rise under Shock Wave

Lecture 24 - Shock Wave Attenuation, Interaction and Reflection - I

Lecture 25 - Shock Wave Attenuation, Interaction and Reflection - II

Lecture 26 - Shock Wave Interaction and Reflection

Lecture 27 - Fundamentals of Materials Science and Engineering

Lecture 28 - Shock Wave Induced Phase Transformations - 1

Lecture 29 - Shock Wave Induced Phase Transformations - 2

Lecture 30 - Shock Wave Induced Phase Transformations - 3

Lecture 31 - Shock Wave Induced Phase Transformations - 4

Lecture 32 - Experimental Techniques for Dynamic Deformation - 1

Lecture 33 - Experimental Techniques for Dynamic Deformation - 2

Lecture 34 - Plastic Deformation at High Strain Rates - 1

Lecture 35 - Plastic Deformation at High Strain Rates - 2

Lecture 36 - Plastic Deformation at High Strain Rates - 3

Lecture 37 - Plastic Deformation at High Strain Rates - 4

Lecture 38 - Plastic Deformation at High Strain Rates - 5

Lecture 39 - Plastic Deformation Under Shock Waves - 1

Lecture 40 - Plastic Deformation Under Shock Waves - 2

Lecture 41 - Plastic Deformation Under Shock Waves - 3

Lecture 42 - Shear Band - 1

Lecture 43 - Shear Band - 2

Lecture 44 - Dynamic Fracture - 1

Lecture 45 - Dynamic Fracture - 2

NPTEL : NOC:Plastic Working of Metallic Materials (Mechanical Engineering)

Co-ordinators : Prof. P.S. Robi

Lecture 1 - Introduction to Plastic Working of Metals

Lecture 2 - Uniaxial Tension Test Analysis

Lecture 3 - Temperature effects in metal forming

Lecture 4 - Friction and Lubrication

Lecture 5 - Friction and Lubrication (Continued...)

Lecture 6 - Deformation zone + worked examples

Lecture 7 - Stresses at point and Theory of Plasticity

Lecture 8 - Slab Analysis

Lecture 9 - Slip Line Field Theory - Part 1

Lecture 10 - Slip Line Field Theory - Part 2

Lecture 11 - Upper Bound Theorem

Lecture 12 - Plasticity equations

Lecture 13 - Forging

Lecture 14 - Analysis of Forging

Lecture 15 - Analysis of Forging (Continued...)

Lecture 16 - Forging Die Design consideration

Lecture 17 - Forging Load

Lecture 18 - Rolling of Metals

Lecture 19 - Analysis of Rolling

Lecture 20 - Analysis of Rolling (Continued...)

Lecture 21 - Strain rate in the deformation zone

Lecture 22 - Rolling mills

Lecture 23 - Prblem on rolling

Lecture 24 - Drawing of Rods, Wires and Tubes

Lecture 25 - Drawing of Rods, Wires and Tubes (Continued...)

Lecture 21 - Fully developed flow through circular pipe with uniform wall temperature

Lecture 22 - Thermally developing flow through circular pipe with uniform wall heat flux

Lecture 23 - Thermally developing flow through circular pipe with uniform wall temperature

Lecture 24 - Heat transfer in plane Couette flow

Lecture 25 - Solutions of example problems

Lecture 26 - Introduction and scale analysis

Lecture 27 - Natural convection over a vertical plate: Similarity Solution

Lecture 28 - Natural convection over a vertical plate: Similarity solution of energy equation

Lecture 29 - Natural convection over a vertical plate: Integral solution

Lecture 30 - Natural convection over inclined plate and mixed convection

Lecture 31 - Natural convection inside enclosures

Lecture 32 - Solution of example problems

Lecture 33 - Basics of finite difference method

Lecture 34 - Solution of Navier-Stokes equations

Lecture 35 - Solution of energy equation

Lecture 36 - Derivation of Reynolds Averaged Navier-Stokes Equations

Lecture 37 - External Turbulent Flow

Lecture 38 - Integral solution for turbulent boundary layer flow over a flat plate

Lecture 39 - Convection in turbulent pipe flow

Lecture 40 - Boiling regimes and boiling curve

Lecture 41 - Laminar film condensation on a vertical plate

Lecture 42 - Laminar film condensation on horizontal tube

Lecture 43 - Solution of example problems

NPTEL : NOC:Theory of Composite Shells (Mechanical Engineering)

Co-ordinators : Prof. Poonam Kumari

Lecture 1 - Introduction to composite materials

Lecture 2 - Basic terminology in Shell

Lecture 3 - Derivation of fundamental theorem of surfaces

Lecture 4 - Derivative of unit vectors and various theorems

Lecture 5 - Classification of shells

Lecture 6 - Derivation of strain-displacement relation

Lecture 7 - Derivation of shell governing equations - 1

Lecture 8 - Derivation of shell governing equations - 2

Lecture 9 - Derivation of shell governing equations - 3

Lecture 10 - Derivation of special cases

Lecture 11 - Derivation of shell constitutive relations

Lecture 12 - Solved examples on membrane theory and moment shell theory

Lecture 13 - Shell of revolution problems

Lecture 14 - Derivation of Navier solution for infinite shell panel

Lecture 15 - Basics of MATLAB coding

Lecture 16 - Derivation of Navier solution for finite shell panel

Lecture 17 - ABAQUS Modelling

Lecture 18 - Extended Kanatrovich method for shell panel

Lecture 19 - Free Vibration solution of shell panels under Navier and Levy supports - 1

Lecture 20 - Free Vibration solution of shell panels under Navier and Levy supports - 2

Lecture 21 - Basics of Buckling of shells

Lecture 22 - Buckling of cylindrical shells

Lecture 23 - Buckling of Levy-type cylindrical shells

Lecture 24 - 3D Bending

Lecture 25 - 3D Free vibration

Lecture 26 - 3D Buckling

Lecture 27 - Advanced Material

Lecture 28 - Free vibration of a composite cylindrical shell

NPTEL : NOC:Finite Element Modeling of Welding Processes (Mechanical Engineering)

Co-ordinators : Prof. Swarup bag

Lecture 1 - Properties, Modelling approaches, Process modelling and Optimization

Lecture 2 - Fusion welding - 1

Lecture 3 - Fusion welding - 2

Lecture 4 - Soldering, Brazing, Solid-state welding processes

Lecture 5 - Advanced welding processes

Lecture 6 - Advances in laser microwelding

Lecture 7 - Additive manufacturing processes

Lecture 8 - Elastic stress analysis - I

Lecture 9 - Elastic stress analysis - II and Potential energy method

Lecture 10 - Three-Dimensional element

Lecture 11 - Weighted residual method

Lecture 12 - Material nonlineaity - I

Lecture 13 - Material nonlineaity - II

Lecture 14 - Fluid flow and Natural coordinate system - I

Lecture 15 - Natural coordinate system in 3D and XFEM

Lecture 16 - Introduction to heat source model

Lecture 17 - Heat source models in welding - I

Lecture 18 - Heat source models in welding - II

Lecture 19 - Heat source model for Keyhole mode and solid state welding

Lecture 20 - Implementation of FEM in fusion welding processes

Lecture 21 - Implementation of FEM for fluid flow in fusion welding processes

Lecture 22 - FEM modeling of EBW and RSW

Lecture 23 - FEM modeling of FSW and hybrid FSW

Lecture 24 - Demonstration of thermal model development using commercial software

Lecture 25 - Fluid flow modeling in welding processes

Lecture 26 - Heat transfer and fluid flow analysis in quasi-steady state

Lecture 27 - Prediction of free surface profile

Lecture 28 - Principle stress, Hydrostatic and Deviatoric Components of Stress

Lecture 29 - Yield Function, Von Mises Yield Surface and Hardening rule

Lecture 30 - Material models, Residual stress and distortion

Lecture 31 - Phase transformation effect on Residual stress and distortion

Lecture 32 - Demonstration of thermo-mechanical model development using commercial software

Lecture 33 - Fundamentals of metal transfer in arc welding

Lecture 34 - FE-based modelling approaches

Lecture 35 - Theoretical development of heat transfer model

Lecture 36 - Heating of nano-film

Lecture 37 - Theoretical development of stress analysis model

Lecture 38 - Fundamentals of wire arc additive manufacturing processes - I

Lecture 39 - Fundamentals of wire arc additive manufacturing processes - II

Lecture 40 - Modelling approaches of additive manufacturing

NPTEL : NOC:Nonlinear Vibration (Mechanical Engineering)

Co-ordinators : Prof. S. K. Dwivedy

Lecture 1 - Introduction to mechanical systems

Lecture 2 - Superposition rule, Commonly used nonlinear equations

Lecture 3 - Equilibrium points: potential function

Lecture 4 - Force and moment based Approach, Lagrange Principle

Lecture 5 - Extended Hamiltonâ€™s principle

Lecture 6 - Use of scaling and book-keeping parameter for ordering

Lecture 7 - Numerical solution, Analytical solutions: Harmonic Balance method

Lecture 8 - Straight forward expansion

Lecture 9 - Lindstd-Poincareâ€™ method

Lecture 10 - Method of Averaging

Lecture 11 - Method of multiple scales

Lecture 12 - Method of generalized Harmonic Balance method

Lecture 13 - Free vibration of undamped and damped SDOF systems with quadratic and cubic nonlinearity

Lecture 14 - Super and sub harmonic resonance conditions

Lecture 15 - Bifurcation analysis of fixed-point response

Lecture 16 - Nonlinear system with hard excitations

Lecture 17 - Super and sub harmonic resonance conditions

Lecture 18 - Bifurcation analysis of fixed-point response

Lecture 19 - Floquet theory, Hill's infinite determinant, Resonance in parametrically excited systems

Lecture 20 - Parametrically excited pneumatic artificial muscle

Lecture 21 - Parametric instability of sandwich plate

Lecture 22 - Analysis of periodic, quasi-periodic and chaotic systems

Lecture 23 - Stability and bifurcation analysis of periodic and quasi-periodic response

Lecture 24 - Analysis of chaotic system

Lecture 25 - Numerical methods for finding roots and solutions of ODE

Lecture 26 - Time response, phase portraits, frequency response

Lecture 27 - Poincare section, FFT, Lyapunov exponent

Lecture 28 - Pasive and active vibration absorber with displacement and acceleration feedback

Lecture 29 - Active vibration absorber with time delay acceleration feedback by HBM

Lecture 30 - Application of Active vibration absorber with combination feedback

Lecture 31 - Cantilever beam with tip mass for principal parametric resonance

Lecture 32 - Cantilever beam with tip mass for combination resonance

Lecture 33 - Cantilever beam based piezoelectric based energy harvestor

Lecture 34 - Nonlinear dynamics of turning operation with delay and internal resonance

Lecture 35 - Chatter in rolling mills and dynamic analysis of artificial pneumatic muscle

Lecture 36 - Chaotic systems and control of chaos

NPTEL : NOC:Evolutionary Computation for Single and Multi Objective Optimization (Mechanical Engineering)

Co-ordinators : Prof. Deepak Sharma

Lecture 1 - Introduction to Optimization

Lecture 2 - Introduction to Evolutionary Computation

Lecture 3 - Binary-Coded Genetic Algorithm (BGA)

Lecture 4 - Operators and Simulations of Binary-Coded Genetic Algorithm

Lecture 5 - Real-Coded Genetic Algorithm (RGA)

Lecture 6 - Operators and Simulations of Real-Coded Genetic Algorithm

Lecture 7 - Algorithmic Implementation of BGA and RGA

Lecture 8 - Particle Swarm Optimization (PSO)

Lecture 9 - Simulations and Algorithmic Implementation of Particle Swarm Optimization

Lecture 10 - Differential Evolution (DE)

Lecture 11 - Simulations and Algorithmic Implementation of Differential Evolution

Lecture 12 - Constrained Optimization: Introduction and Optimality

Lecture 13 - Penalty Function Methods for Evolutionary Computing Techniques

Lecture 14 - Evolutionary Computing Techniques: Separation of Objective Function and Constraints

Lecture 15 - Simulations of Constraint Handling Techniques - Part 1

Lecture 16 - Simulations of Constraint Handling Techniques - Part 2

Lecture 17 - Introduction to Multi-Objective Optimization - Part 1

Lecture 18 - Introduction to Multi-Objective Optimization - Part 2

Lecture 19 - Multi-Objective Optimization: Ranking and Diversity

Lecture 20 - Classical Multi-Objective Optimization Methods

Lecture 21 - Non-Dominated Genetic Algorithm: NSGA-II: Introduction

Lecture 22 - Non-Dominated Genetic Algorithm: NSGA-II: Simulations

Lecture 23 - Strength Pareto Evolutionary Algorithm: SPEA2: Introduction

Lecture 24 - Strength Pareto Evolutionary Algorithm: SPEA2: Simulations

Lecture 25 - Performance Assessment of Multi-Objective EC Techniques

Lecture 26 - Closure of EC for Single and Multi-Objective Optimization

NPTEL : NOC:Viscous Fluid Flow (Mechanical Engineering)

Co-ordinators : Prof. Amaresh Dalal

Lecture 1 - Preliminary concepts

Lecture 2 - Fluid Kinematics

Lecture 3 - Derivation of incompressible Navier-Stokes equations

Lecture 4 - Initial and Boundary Conditions

Lecture 5 - Plane Couette Flow

Lecture 6 - Plane Poiseuille Flow

Lecture 7 - Plane Poiseuille Flow with Slip and Thin Film Flow

Lecture 8 - Combined Couette - Poiseuille Flow

Lecture 9 - Example Problems

Lecture 10 - Hagen - Poiseuille Flow

Lecture 11 - Thin Film Flow and Annular Flow

Lecture 12 - Steady Flow Between Rotating Cylinders

Lecture 13 - Flow near a plate suddenly set in motion

Lecture 9 - Basics of fluid flow - 2

Lecture 10 - Solidification processing - 1

Lecture 11 - Solidification processing - 2

Lecture 12 - Casting and welding - 1

Lecture 13 - Casting and welding - 2

Lecture 14 - Casting and welding - 3

Lecture 15 - Casting and welding - 4

Lecture 16 - Material forming

Lecture 17 - Material forming: Numerical problem

Lecture 18 - Processing of metal: Casting Process - I

Lecture 19 - Processing of metal: Casting Process - II

Lecture 20 - Processing of polymer: Thermoplastic and thermosets

Lecture 21 - Processing of polymer: Extrusion

Lecture 22 - Processing of polymer: Injection molding

Lecture 23 - Processing of polymer: Blow molding

Lecture 24 - Processing of polymer: Thermosets

Lecture 25 - Processing of ceramics - I

Lecture 26 - Processing of ceramics - II

Lecture 27 - Processing of galss and fused depostion modeling

Lecture 28 - Arc wellding processes

Lecture 29 - Welding of polymers

Lecture 30 - Laser and electron beam welding processes

Lecture 31 - Advanced welding processes

Lecture 32 - Welding solidification

Lecture 33 - Metallic wire additive manufacturing

Lecture 34 - Mechanical responses of metals and polymers

Lecture 35 - Hot working and cold working

Lecture 36 - Types of metal forming processes - I

Lecture 37 - Types of metal forming processes - II

Lecture 38 - Types of metal forming processes - III and Hot rolling of steel

Lecture 39 - Solid state deformation - 1

Lecture 40 - Solid state deformation - 2

Lecture 41 - Powder processing - 1

Lecture 42 - Powder processing - 2

Lecture 43 - Powder processing - 3

Lecture 44 - Ceramic processing: Dry pressing and plastic forming methods

Lecture 45 - Ceramic processing: Colloidal processing, casting, and coating techniques

Lecture 46 - Introduction to steel making and single crystal production

Lecture 47 - Integrated Analysis of Steel Solidification, Fluid Flow, and Prodder Processing Technologies

Lecture 48 - Processing of electronics Materials, A case Study: semiconductor measurements

Lecture 49 - Processing of magnetic materials and Processing of magnetic materials for advanced materials

Lecture 50 - Processing of optics materials and pertaining case study

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Engine System and Performance (Mechanical Engineering)

Co-ordinators : Prof. Pranab K. Mondal

Lecture 1 - Introduction to Engine Systems and Its Types: A Focus on Ignition System

Lecture 2 - A Focus on Lubrication and Cooling Systems

Lecture 3 - Engine Classifications and Nomenclature

Lecture 4 - Analysis of Basic Cycles

Lecture 5 - Description of Engine Components

Lecture 6 - Design and Constructional Features of Engine Hardware

Lecture 7 - Shape and Material of Engine Components

Lecture 8 - Concept of Hybrid Engines and Working Principle

Lecture 9 - Types of Hybrid Arrangements

Lecture 10 - Description of Energy Transfer Mechanism

Lecture 11 - Components Involved: Energy Transfer

Lecture 12 - Components Involved and Numerical Problems: Energy Transfer

Lecture 13 - Introduction to Electronic Control Unit (ECU) and its functions

Lecture 14 - Description of Electronic Control Unit (ECU) and types of control system: Open-loop and Close loop

Lecture 15 - Memory-based and Adaptive-based control systems

Lecture 16 - Control system layout and types of sensors: Coolant temperature sensor and Crankshaft position sensor

Lecture 17 - Manifold Absolute Pressure sensor (MAP) and Throttle Position Sensor (TPS)

Lecture 18 - Actuators in control system: Solenoids, Piezoelectric and Stepper motor

Lecture 19 - Key elements of ECU: Microprocessor and Memory chips

Lecture 20 - Introduction to electronic devices and circuits

Lecture 21 - Introduction to Transistors

Lecture 22 - Introduction to Digital circuits

Lecture 23 - Functional layout of Electronic Control Unit (ECU)

Lecture 24 - Electronic ignition system

Lecture 25 - Electronic Fuel-Injection System: Injection schemes

Lecture 26 - An overview of injection duration calculation

Lecture 27 - Modes for fuel control, Integrated engine control system

Lecture 28 - Introduction to Engine performance and its measurement

Lecture 29 - Measurement of fuel flow rate, air flow rate and needle lift in a CI engine

Lecture 30 - Measurement of indicated work, Numerical problem

Lecture 31 - Measurement of torque: Power output from engine, Numerical problem

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Measurement of volumetric efficiency

Lecture 33 - SI engine performance curves and Performance characteristics

Lecture 34 - Performance map, Analytical method of performance estimation

Lecture 35 - CI engine performance, factors affecting engine performance

Lecture 36 - Introduction to Superchargers

Lecture 37 - Performance Map of Superchargers and Numerical Problems

Lecture 38 - Introduction to Turbocharger and Phenomenon of Turbo-lag in Turbochargers

Lecture 39 - Introduction to Variable Geometry Turbine

Lecture 40 - Numerical Problems on Turbocharger

Lecture 41 - Engine heat balance

Lecture 42 - Measurement of heat losses in engines and Numerical problem

Lecture 43 - Speed control of IC engines

Lecture 44 - Mechanical and Electronic governor

Lecture 45 - Trend of recent technologies to achieve better performance and reduce pollution

NPTEL : NOC:Fundamentals of Thermo-Mechanical and Fatigue Analysis of Welded Structure (Mechanical Engineering)

Co-ordinators : Prof. Pankaj Biswas

Lecture 1 - Weld Induced Thermal History (Basics of Heat Flow in Welding)

Lecture 2 - Weld Induced Thermal History (Basics of Heat Flow in Welding)

Lecture 3 - Weld Induced Thermal History (Basics of Heat Flow in Welding)

Lecture 4 - Weld Induced Thermal History (Basics of Heat Flow in Welding)

Lecture 5 - Weld Induced Thermal History (2D-3D Heat Flow and Cooling Rate)

Lecture 6 - Weld Induced Thermal History (2D-3D Heat Flow and Cooling Rate)

Lecture 7 - Common Heat Treatment Processes (Types, Preheating, Inter-pass Temperature, PWHT)

Lecture 8 - Common Heat Treatment Processes (Types, Preheating, Inter-pass Temperature, PWHT)

Lecture 9 - Common Heat Treat Treatment Processes (PWHT)

Lecture 10 - Common Heat Treat Treatment Processes (PWHT)

Lecture 11 - Fundamental of Different Types of Welding Heat Sources

Lecture 12 - Fundamental of Different Types of Welding Heat Sources

Lecture 13 - Fundamental of Different Types of Welding Heat Source

Lecture 14 - Fundamental of Different Types of Welding Heat Sources

Lecture 15 - Designing of Welded Joints Subjected to Combined Loads

Lecture 16 - Designing of Welded Joints Subjected to Combined Loads

Lecture 17 - Design of Welds Subjected to Combined Stresses

Lecture 18 - Design of Welds Subjected to Combined Stresses

Lecture 19 - Design of Welds Subjected to Combined Stresses

Lecture 20 - Design of Welds Subjected to Combined Stresses

Lecture 21 - Fundamental of Creep on Welded Joints

Lecture 22 - Fundamental of Creep on Welded Joints

Lecture 23 - Basics of Fatigue Analysis

Lecture 24 - Basics of Fatigue Analysis

Lecture 25 - Basics of Fatigue Life Prediction

Lecture 26 - Basics of Fatigue Life Prediction

Lecture 27 - Some Problems on Fatigue Life Prediction of Welded Joints

Lecture 28 - Some Problems on Fatigue Life Prediction of Welded Joints

Lecture 29 - Fatigue Analysis, Design and Life Estimation Procedures

Lecture 30 - Fatigue Analysis, Design and Life Estimation Procedures

Lecture 31 - Examples of Fatigue Design Methods

Lecture 32 - Examples of Fatigue Design Methods

Lecture 33 - Rainflow Counting Method

Lecture 34 - Rainflow Counting Method

Lecture 35 - Cumulative Fatigue Damage and Palmgren-Miner's Rule

Lecture 36 - Cumulative Fatigue Damage and Palmgren-Miner's Rule

Lecture 37 - Fatigue Design and Analysis due to Fluctuating Stresses and Fatigue Failure Criteria

Lecture 38 - Fatigue Design and Analysis due to Fluctuating Stresses and Fatigue Failure Criteria

Lecture 39 - Modified Goodman Diagrams and Examples

Lecture 40 - Modified Goodman Diagrams and Examples

Lecture 41 - Modified Goodman Diagrams for Fluctuating Torsional Shear Stresses and Examples

Lecture 42 - Modified Goodman Diagrams for Fluctuating Torsional Shear Stresses and Examples

Lecture 43 - Basquin's and Coffin's Law of Fatigue and Mean Stress Corrections in Fatigue

Lecture 44 - Basquin's and Coffin's Law of Fatigue and Mean Stress Corrections in Fatigue

Lecture 45 - Example of Basquin's Law of Fatigue and Linear Elastic FractureMechanics Approach

Lecture 46 - Example of Basquin's Law of Fatigue and Linear Elastic FractureMechanics Approach

Lecture 47 - Linear Elastic Fracture Mechanics Approach (Paris-Erdogan's Law)

Lecture 48 - Linear Elastic Fracture Mechanics Approach (Paris-Erdogan's Law)

Lecture 49 - Weld Fatigue Life Estimation Procedures (Nominal Stress Method)

Lecture 50 - Weld Fatigue Life Estimation Procedures (Nominal Stress Method)

Lecture 51 - Weld Fatigue Life Estimation Procedures (Nominal Stress Method)

Lecture 52 - Weld Fatigue Life Estimation Procedures (Nominal Stress Method)

Lecture 53 - Hot Spot Stress Approach

Lecture 54 - Hot Spot Stress Approach

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Industrial Engineering and Operations Research (Mechanical Engineering)

Co-ordinators : Prof. Uday Shanker Dixit

Lecture 1 - Industrial Engineering and Operations Research

Lecture 2 - Production Planning and Control, Aggregate production planning

Lecture 3 - Product Design - Part 1

Lecture 4 - Product Design - Part 2

Lecture 5 - Job, Batch, and Flow Production methods

Lecture 6 - Work study: Enhancing Productivity through Methods and Measurement

Lecture 7 - Work Sampling and Ergonomics

Lecture 8 - Inventory Management - Part 1

Lecture 9 - Inventory Management - Part 2

Lecture 10 - Supply chain Management

Lecture 11 - Total Quality Management

Lecture 12 - Application of Statistics in TQM

Lecture 13 - Acceptance Sampling

Lecture 14 - Control Charts

Lecture 15 - Taguchi's Method, Six Sigma, ISO9001

Lecture 8 - Taguchi's Method

Lecture 9 - Failure mode and effects analysis

Lecture 10 - Problem Solving : Failure mode and effects analysis - 1

Lecture 11 - Problem solving : Failure mode and effects analysis - 2

Lecture 12 - Product quality improvement methods

Lecture 13 - Quality tools - Part 1

Lecture 14 - Quality Tools - Part 2

Lecture 15 - Different types of control charts

Lecture 16 - Mean, Variance and Standard deviation

Lecture 17 - X bar chart, R-chart

Lecture 18 - Plotting methods for control charts

Lecture 19 - Six Sigma - Part 1

Lecture 20 - Six Sigma - Part 2

Lecture 21 - Theory of probability

Lecture 22 - Determining the defective products using Probability

Lecture 23 - Sampling based on Permutations and Combinations

Lecture 24 - Bionomial distribution

Lecture 25 - Poisson distribution

Lecture 26 - Poisson distribution

Lecture 27 - Normal Distribution

Lecture 28 - Overview of control charts and different types of distribution

Lecture 29 - Fundamental of Robotics and its applications in Automated Systems

Lecture 30 - Joint configuration systems of Robot

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Basics of Finite Element Analysis (Mechanical Engineering)

Co-ordinators : Prof. Nachiketa Tiwari

Lecture 1 - Introduction to Finite Element Analysis(FEA)

Lecture 2 - Introduction of FEA, Nodes, Elements and Shape Functions

Lecture 3 - Nodes, Elements and Shape Functions

Lecture 4 - Polynomials as Shape Functions, Weighted Residuals, Elements and Assembly Level Equations

Lecture 5 - Types of Errors in FEA, Overall FEA Process and Convergence

Lecture 6 - Strengths of FE Method, Continuity conditions at Interfaces

Lecture 7 - Key concepts and terminologies

Lecture 8 - Weighted integral statements

Lecture 9 - Integration by parts - Review

Lecture 10 - Gradient and Divergence Theorems-Part - I

Lecture 11 - Gradient and Divergence Theorems Part - II

Lecture 12 - Functionals

Lecture 13 - Variational Operator

Lecture 14 - Weighted Integral and Weak Formulation

Lecture 15 - Weak Formulation

Lecture 16 - Weak Formulation and Weighted Integral : Principle of minimum potential energy

Lecture 17 - Variational Methods : Rayleigh Ritz Method

Lecture 18 - Rayleigh Ritz Method

Lecture 19 - Method of Weighted Residuals

Lecture 20 - Different types of Weighted Residual Methods - Part I

Lecture 21 - Different types of Weighted Residual Methods - Part II

Lecture 22 - FEA formulation for 2nd order BVP - Part I

Lecture 23 - FEA formulation for 2nd order BVP - Part II

Lecture 24 - Element Level Equations

Lecture 25 - 2nd Order Boundary Value Problem

Lecture 26 - Assembly of element equations

Lecture 27 - Assembly of element equations and implementation of boundary conditions

Lecture 28 - Assembly process and the connectivity matrix

Lecture 29 - Radially Symmetric Problems

Lecture 30 - One dimensional heat transfer

Lecture 31 - 1D-Heat conduction with convective effects : examples

Lecture 38 - Evolution of TTT and CCT diagram from f vs. t plots

Lecture 39 - TTT, CCT continue and hardenability of steel

Lecture 40 - Importance of heat treatment practices in real life (with examples)

NPTEL : NOC:Phase Transformation in Materials (Mechanical Engineering)

Co-ordinators : Dr. Krishanu Biswas

Lecture 1 - Brief Introduction

Lecture 2 - Define Phase, Equilibrium

Lecture 3 - Free Energy, Stability of Phases

Lecture 4 - Gibbs Free Energy of Binary Solution

Lecture 5 - Ideal Solution and Chemical Potential

Lecture 6 - Thermodynamics of solid solutions

Lecture 7 - G vs X curves

Lecture 8 - Solid solutions: Types

Lecture 9 - Heterogeneous phase equilibria

Lecture 10 - G vs X curves for eutectic system

Lecture 11 - G-X plot for peritectic system

Lecture 12 - Effect of temperature of solid solubility, Influence of interfaces on Equilibrium

Lecture 13 - Introduction of Diffusion

Lecture 14 - Mechanism of Diffusion, Fick's I law

Lecture 15 - Fick's II law

Lecture 16 - Fick's II law (Continued...), Diffusion and Temperature

Lecture 17 - Interfacial Free Energy,Solid/Vapor Interface

Lecture 18 - Boundaries in single phase solids

Lecture 19 - High angle grain boundaries, Equilibrium in poly-crystalline materials, Interphase interfaces in solids

Lecture 20 - Interphase interfaces in solids (Continued...)

Lecture 21 - CSL Boundaries

Lecture 22 - Types of Nucleations

Lecture 23 - Homogeneous Nucleation

Lecture 24 - Homogeneous Nucleation (Continued...)

Lecture 25 - Heterogeneous Nucleation

Lecture 26 - Heterogeneous nucleation (Continued...)

Lecture 27 - Growth

Lecture 28 - Atomic mechanism of growth

Lecture 29 - Dendritic Solidification

Lecture 30 - Growth rate for dendrite formation

Lecture 31 - Alloy solidification

Lecture 32 - Alloy solidification (Continued...)

Lecture 33 - Eutectic: Solidification

Lecture 34 - Eutectic: solidification (Continued...)

Lecture 35 - Solidification of casting / ingot

Lecture 36 - Precipitation hardenable alloy

Lecture 37 - Precipitation age- hardening alloy (Continued...)

Lecture 38 - Age hardening alloy

Lecture 39 - Eutectoid transformation

Lecture 40 - Eutectoid transformation (Continued....)

Lecture 41 - Eutectoid transformation in steel (Continued...)

Lecture 42 - Martensite

Lecture 43 - Martensite (Continued...)

Lecture 44 - Martensite (Continued...) and TTT curves

Lecture 45 - TTT diagram

Lecture 46 - Recovery, Recrystallization and Grain growth

Lecture 47 - Recovery

Lecture 48 - Recrystallization

Lecture 49 - Recrystallization (Continued...)

Lecture 50 - Introduction to spinodal decomposition

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Manufacturing of Composites (Mechanical Engineering)

Co-ordinators : Prof. J. Ramkumar

Lecture 1 - Introduction to Composites

Lecture 2 - Matrices

Lecture 3 - Fiber reinforcements

Lecture 4 - Fiber reinforcements (Continued...)

Lecture 5 - Composites properties

Lecture 6 - Composites testing

Lecture 7 - Selection of material

Lecture 8 - Selection of material (Continued...)

Lecture 9 - Design for Manufacturing

Lecture 10 - Design for Manufacturing (Continued...)

Lecture 11 - Composite Manufacturing Processes

Lecture 12 - Filament winding Processes

Lecture 13 - Resin transfer moulding

Lecture 14 - Pultrusion

Lecture 15 - Compression Moulding Process

Lecture 16 - Vacuum Impregnation Methods

Lecture 17 - Stacking of Composites

Lecture 18 - Thermoplastic Composites Manufacturing Processes - Part 1

Lecture 19 - Thermoplastic Composites Manufacturing Processes - Part 2 (Continued...)

Lecture 19 - Cutter Path Generation (Concluding Part) and Current Status - CNC Machining and Related Processes

Lecture 20 - Questions and Discussions on Curved Surface Machining

NPTEL : NOC:Non Traditional Abrasive Machining Processes - Ultrasonic, Abrasive Jet and Abrasive Water Jet Machining (Mechanical Engineering)

Co-ordinators : Prof. Asimava Roy Choudhury

Lecture 1 - Non-traditonal abrasive machining : Ultrasonic, Abrasive jet and abrasive water jet machining

Lecture 2 - Ultrasonic Machining

Lecture 3 - Ultrasonic Machining (Continued...)

Lecture 4 - Utrrasonic Machining - Free Impacts and Problem Solving

Lecture 5 - Ultrasonic Machining - Problems and MCQs

Lecture 6 - USM - Horn Design

Lecture 7 - USM - Horn Design (Continued...)

Lecture 8 - Ultrasonic Machining - Feed Mechanism, Head design and other aspects

Lecture 9 - Ultrasonic Machining - Effects of Various Inputs on the Output

Lecture 10 - Ultrasonic Machining - Numerical and MCQs

Lecture 11 - A JM (Abrasive jet machining)

Lecture 12

Lecture 13 - A JM - Numerical problems

Lecture 14 - A JM - Process Parameters and Response Characteristics take - home assignment discussing

Lecture 15 - A JM - MCQs

Lecture 16

Lecture 17 - AWJM - Equipment

Lecture 18 - AWJM - Numerical Problems

Lecture 19 - AWJM - Application Equipment Details

Lecture 20 - AWJM - MCQs

NPTEL : NOC:Introduction to Fluid Mechanics (Mechanical Engineering)

Co-ordinators : Dr. Suman Chakraborty

Lecture 1 - Lagrangian and Eulerian Approach, Types of fluid flow

Lecture 2 - Streamlines, Streakline and Pathline

Lecture 3 - Acceleration of fluid flow

Lecture 4 - Deformation and Conservation of mass of fluid a element

Lecture 5 - Angular deformation of a fluid element, vorticity and streamfunction and velocity potential

Lecture 6 - Eulerâ€™s equation

Lecture 7 - Bernoulli's Equation - Part I

Lecture 8 - Bernoulli's Equation - Part II

Lecture 9 - Reynolds Transport Theorem (RTT)

Lecture 10 - Application of Conservation of Mass

Lecture 11 - Application of RTT: Conservation of Linear Momentum

Lecture 12 - Application of RTT in Accelerating Reference Frames

Lecture 13 - Navier's Equation of Motion

Lecture 14 - Derivation of Navier-Stokes Equation

Lecture 15 - Derivation of Navier-Stokes Equation (Continued...)

Lecture 16 - Derivation of Navier-Stokes Equation (Continued...)

Lecture 17 - Fully developed flow between two parallel plates

Lecture 18 - Force on a surface immersed in fluid - Part III, Stability of solid bodies in fluid - Part I

Lecture 19 - Couette flow

Lecture 20 - Flow with interfaces

Lecture 21 - Thin film flow on an inclined plane and Hagen-Poiseuille flow

Lecture 22 - Hagen-Poiseuille flow (Continued...)

Lecture 23 - Flow between two rotating cylinders

Lecture 24 - Stokes 1st problem

Lecture 25 - Stokes 2nd problem

Lecture 26 - Introduction to turbulence: basic concepts

Lecture 27 - Eddies

Lecture 28 - Eddies (Continued...) and Vortex shredding

Lecture 29 - Statistical description of turbulent flows

Lecture 30 - Reynolds stress

Lecture 31 - Reynolds averaged Navier Stokes equation (RANS)

Lecture 32 - Bernoulliâ€™s equation - Part I

Lecture 33 - Bernoulliâ€™s equation - Part II

Lecture 34 - Bernoulliâ€™s equation - Part III

Lecture 35 - Eulerâ€™s equation in streamline coordinates

Lecture 36 - Flow over a fat plate: Blasius equation

Lecture 37 - Momentum integral method for boundary layer analysis

Lecture 38 - Approximate solution of the momentum integral equation

Lecture 39 - Displacement and Momentum thickness

Lecture 40 - Illustrative examples

Lecture 41 - Boundary layer separation

Lecture 42 - Resultant force on a body immersed in a fluid under motion

Lecture 43 - Potential flow

Lecture 44 - Examples of Potential flow

Lecture 45 - Some more examples of Potential flows, Lift and Drag force

Lecture 46 - Applications of lift and drag force

Lecture 47 - Some examples of flow past immersed bodies

Lecture 48 - Sports Ball aerodynamics

Lecture 49 - Introduction to compressible flows

Lecture 50 - Significance of Mach number

Lecture 51 - Navier-Stokes equation - Part I

Lecture 52 - Navier-Stokes equation - Part II

Lecture 53 - Navier-Stokes equation - Part III

Lecture 54 - Navier-Stokes equation - Part IV

Lecture 55 - Pipe Flow - Part I

Lecture 56 - Pipe Flow - Part II

Lecture 57 - Pipe Flow - Part III

Lecture 58 - Pipe Flow - Part IV

Lecture 59 - Principle of Similarity and Dynamical Analysis - Part I

Lecture 60 - Principle of Similarity and Dynamical Analysis - Part II

NPTEL : NOC:Spur and Helical Gear Cutting (Mechanical Engineering)

Co-ordinators : Prof. Asimava Roy Choudhury

Lecture 1 - Introduction

Lecture 2 - Simple Gear Calculations

Lecture 3 - Gear Geometry

Lecture 4 - Helical Gear Problems

Lecture 5 - Numerical Problem MCQ

Lecture 6 - Numerical Problem Milling of Helical Gears

Lecture 7 - Simple and Compound Indexing

Lecture 8 - Differential Indexing

Lecture 9 - Helical Gear Cutting on Milling Machine

Lecture 10 - Numerical Problems on Gear Milling

Lecture 11 - Gear Shaping - I

Lecture 12 - Gear Shaping - II

Lecture 13 - Gear Shaping - III

Lecture 14 - Gear Shaping - IV

Lecture 15 - Gear Hobbing - I

Lecture 16 - Gear Hobbing - II

Lecture 17 - Gear Hobbing - III

Lecture 18 - Gear Hobbing - IV

Lecture 19 - Gear Hobbing - V

Lecture 20 - Gear Hobbing - VI

NPTEL : NOC:Laws of Thermodynamics (Mechanical Engineering)

Co-ordinators : Prof. Suman Chakraborty, Prof. S.K. Som

Lecture 1 - Introduction, Definition of System, Properties and State of a System

Lecture 2 - Properties of pure substances

Lecture 3 - Properties of pure substances (Continued...)

Lecture 4 - Heat and Work

Lecture 5 - Tutorial 1: Properties of pure substances, heat and work

Lecture 6 - Zeroth Law of Thermodynamics

Lecture 7 - First law of thermodynamics for closed systems - Part I

Lecture 8 - First law of thermodynamics for closed systems - Part II, some examples

Lecture 9 - Tutorial 2: First law of thermodynamics for closed systems

Lecture 10 - First law of thermodynamics for open systems

Lecture 11 - Tutorial 3: First law of thermodynamics for open systems

Lecture 12 - Second law and its corollaries - Part I

Lecture 13 - Second law and its corollaries - Part II

Lecture 14 - Second law and its corollaries - Part III

Lecture 15 - Definition of entropy and entropy change in closed systems

Lecture 16 - Entropy change in closed systems (Continued...)

Lecture 17 - Tutorial 4: Entropy

Lecture 18 - Entropy and its transport

Lecture 19 - Tutorial 5: Entropy and its transport

Lecture 20 - Introduction to Third Law

Lecture 21 - Review of learning concepts

NPTEL : NOC:Energy Conservation and Waste Heat Recovery (Mechanical Engineering)

Co-ordinators : Prof. PK Das

Lecture 1 - Introduction to waste heat recovery

Lecture 2 - Introduction to waste heat recovery (Continued...)

Lecture 3 - Introduction to waste heat recovery (Continued...)

Lecture 4 - Introduction to waste heat recovery (Continued...)

Lecture 5 - Thermodynamic principles of waste heat recovery

Lecture 6 - Thermodynamic principles of waste heat recovery (Continued...)

Lecture 7 - Thermodynamic principles of waste heat recovery (Continued...)

Lecture 8 - Thermodynamic principles of waste heat recovery (Continued...)

Lecture 9 - Reversible Cycles

Lecture 10 - Reversible Cycles (Continued...)

Lecture 11 - Entropy

Lecture 12 - Entropy (Continued...)

Lecture 13 - Entropy (Continued...), Exergy

Lecture 14 - Exergy, Second Law efficiency

Lecture 15 - Second Law efficiency (Continued...)

Lecture 16 - Recapitulation of common power cycles

Lecture 17 - Recapitulation of common power cycles (Continued...)

Lecture 18 - Recapitulation of common power cycles (Continued...)

Lecture 19 - Recapitulation of common power cycles (Continued...)

Lecture 20 - Recapitulation of common power cycles (Continued...)

Lecture 21 - Recapitulation of common power cycles (Continued...)

Lecture 22 - Gas Turbine cycle

Lecture 23 - Combined cycle

Lecture 24 - Combined cycle (Continued...)

Lecture 25 - Combined Cycle (Continued...)

Lecture 26 - Heat recovery steam generator

Lecture 27 - Thermodynamic cycles for low temperature application

Lecture 28 - Thermodynamic cycles for low temperature application (Continued...), Cogeneration

Lecture 29 - Heat Exchanger

Lecture 30 - Heat Exchanger (Continued...)

Lecture 31 - Heat Exchanger (Continued...)

Lecture 32

Lecture 33

Lecture 34

Lecture 35

Lecture 36

Lecture 37 - Heat Pipe - Part I

Lecture 38 - Heat Pipe - Part II

Lecture 39 - Heat Pipe - Part III

Lecture 40 - Direct Conversion - Introduction to TEG

Lecture 41 - Thermoelectric Generators - Functioning and Applications

Lecture 42 - TEG - performance analysis

Lecture 43 - TEG - performance optimization

Lecture 44 - Direct Conversion - Magneto Hydro dynamics (MHD)

Lecture 45 - Direct Conversion - Thermo-Ionic generation

Lecture 46 - Direct Conversion - Thermo Photo Voltaic generation (TPV)

Lecture 47 - Heat Pumps - I

Lecture 48 - Heat Pumps - II

Lecture 49 - Heat Pumps - III

Lecture 50 - Waste Heat Recovery from Incinerator Plants

Lecture 51 - Energy Storage Systems - I

Lecture 52 - Energy Storage Systems - II

Lecture 17 - Illustrative examples of finite volume method

Lecture 18 - Illustrative examples of finite volume method (Continued...)

Lecture 19 - Basic rules of finite volume discretization

Lecture 20 - Implementation of boundary conditions in FVM

Lecture 21 - Implementation of boundary conditions in FVM (Continued...)

Lecture 22 - 1-D Unsteady state diffusion problem

Lecture 23 - 1-D Unsteady state diffusion problem (Continued...)

Lecture 24 - Consequences of Discretization of Unsteady State Problems

Lecture 25 - FTCS scheme

Lecture 26 - CTCS scheme (Leap frog scheme) and Dufort-Frankel scheme

Lecture 27 - Part 1: FV Discretization of 2-D Unsteady State Diffusion Type problems; Part 2: Solution to linear algebraic equations

Lecture 28 - Solution to linear algebraic equations (Continued...)

Lecture 29 - Elemination methods

Lecture 30 - Gaussian elemination and LU Decomposition methods

Lecture 31 - Illustrative example of elemination method

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Tri-Diagonal Matrix Algorithm (TDMA)

Lecture 33 - Elimination Methods: Error Analysis

Lecture 34 - Elimination Methods: Error Analysis (Continued...)

Lecture 35 - Iteration methods

Lecture 36 - Generalized analysis of Iteration method

Lecture 37 - Further discussion on Iterative methods

Lecture 38 - Illustrative examples of Iterative methods

Lecture 39 - Gradient Search based methods

Lecture 40 - Steepest descent method (Continued...)

Lecture 41 - Conjugate gradient method

Lecture 42 - Convection diffusion equation

Lecture 43 - Central difference scheme applied to convection-diffusion equation

Lecture 44 - Upwind scheme

Lecture 45 - Illustrative examples

Lecture 46 - Exact solution of 1-D steady state convection diffusion equation (Continued...)

Lecture 47 - Exponential scheme

Lecture 48 - Generalized convection diffusion formulation

Lecture 49 - 2-D convection diffusion problem

Lecture 50 - False (numerical) diffusion scheme and the QUICK scheme

Lecture 51 - Discretization of Navier Stokes equation

Lecture 52 - Discretization of Navier Stokes equation (Continued...)

Lecture 53 - Concept of staggered grid

Lecture 54 - SIMPLE algorithm

Lecture 55 - Salient features of SIMPLE algorithm

Lecture 56 - Illustrative examples on the use of SIMPLE algorithm

Lecture 57 - SIMPLER algorithm

Lecture 58 - Illustrative examples of SIMPLER algorithm

Lecture 59 - What is there in implementing a CFD Code

Lecture 60 - Some representative case studies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Concepts of Thermodynamics (Mechanical Engineering)

Lecture 32 - Variation of Mean Temperature in Internal Flows with Different Boundary Conditions

Lecture 33 - Mean Temperature and Convective Heat Transfer Coefficient Variation in Thermally Fully Developed Flow

Lecture 34 - Determination of Convective Heat Transfer Coefficient for Fully Developed Flow

Lecture 35 - Measuring Pressure and Temperature in Convective Heat Transfer

Lecture 36 - Introduction to Natural Convection

Lecture 37 - Governing Equation for Natural Convection over Vertical Flat Plate

Lecture 38 - Mixed Convection and Nusselt Number Correlations in Natural Convection

Lecture 39 - Phase Change Heat Transfer - Pool Boling

Lecture 40 - Phase Change Heat Transfer - Flow Boiling and Condensation

Lecture 41 - Heat Exchangers and their Classifications

Lecture 42 - Direct Transfer Heat Exchangers

Lecture 43 - Parallel and Counterflow Heat Exchangers, Overall Heat Transfer Coefficient

Lecture 44 - Heat Exchanger Analysis using Log Mean Temperature Difference - 1

Lecture 45 - Heat Exchanger Analysis using Log Mean Temperature Difference - 2

Lecture 46 - Heat Exchanger Analysis - LMTD Example and Effectiveness (Îµ) and NTU

Lecture 47 - Effectiveness (Îµ) and NTU Relation for Heat Exchangers (Continued...)

Lecture 48 - Introduction to Radiation Heat Transfer

Lecture 49 - Directional and Spectral Nature of Radiation

Lecture 50 - Laws of Thermal Radiation

Lecture 51 - Black, Grey and Real Surfaces- Surface Properties for Radiation

Lecture 52 - Problems involving Emission from Small Surfaces

Lecture 53 - Introduction to View Factor

Lecture 54 - Calculation of View Factor (Continued...)

Lecture 55 - Radiation Exchange between Surfaces - Black and Gray Bodies

Lecture 56 - Radiation Exchange between Gray Surfaces

Lecture 57 - Radiation Exchange in Two Surface Enclosures

Lecture 58 - Radiation Exchange in Enclosure Networks

Lecture 59 - Introduction to Mass Transfer

Lecture 60 - Governing equations in mass transfer and heat transfer analogy

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Advanced Gas Dynamics (Mechanical Engineering)

Co-ordinators : Dr. Rinku Mukherjee

Lecture 1 - Introduction to Gas Dynamics & Review of Basic Thermodynamics

Lecture 2 - Review of Basic Thermodynamics Continued

Lecture 3 - An introduction to Normal Shocks

Lecture 4 - The Mach Number and Compressible Flow

Lecture 5 - The relation of physical properties across a normal shock

Lecture 6 - Normal Shock in a duct: Throat and Reservoir conditions

Lecture 7 - Example Problems in Normal Shocks

Lecture 8 - An introduction to Oblique Shocks

Lecture 9 - The relation of physical properties across an oblique shock

Lecture 10 - Example Problems in Oblique Shocks

Lecture 11 - Pressure - Deflection relationship of Shocks

Lecture 12 - An introduction to Expansion waves

Lecture 13 - Area - Mach Relationship

Lecture 14 - Unsteady Shock Waves: The Shock Tube

Lecture 15 - The Shock Tube: Propagating Normal Shock and its reflection from end wall

Lecture 16 - A review of wave propagation

Lecture 17 - Wave propagation: Small Perturbation Theory

Lecture 18 - Finite Wave Theory: An introduction to the Method of Characteristics

Lecture 19 - The Shock Tube: Propagating Expansion Fan

Lecture 20 - The Method of Characteristics

Lecture 21 - Application of The Method of Characteristics: Design of a minimum length nozzle

Lecture 22 - Application of The Method of Characteristics: Flow through a diverging channel

Lecture 23 - Flow over a Wavy wall: Formulation using Perturbation Theory

Lecture 24 - Subsonic Flow over a Wavy wall

Lecture 25 - Supersonic Flow over a Wavy wall

Lecture 26 - Supersonic Flow past a 3D Cone: Axisymmetric/Quasi 2D Flow

Lecture 27 - Quasi 2D Flow - I

Lecture 28 - Quasi 2D Flow - II

Lecture 29 - Similarity Rules and Transformed Coordinate System

Lecture 30 - Critical Mach Number and Thin Airfoil Theory

Lecture 31 - Example Problem using Thin Airfoil Theory

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Example Problems - 1

Lecture 33 - Example Problems - 2

Lecture 34 - Example Problems - 3

Lecture 35 - Supersonic Flow past a 3D Cone at an angle of attack

Lecture 36 - Supersonic Flow past a 3D Cone at an angle of attack: Flow Visualization - I

Lecture 37 - Supersonic Flow past a 3D Cone at an angle of attack: Flow Visualization - II

Lecture 38 - Supersonic Flow past a 3D Cone at an angle of attack: Governing Equations

Lecture 39 - Supersonic Flow past a 3D Cone at an angle of attack: Numerical Procedure

Lecture 40 - Supersonic Flow past a 3D Bluff Body at an angle of attack

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Design and Optimization of Energy systems (Mechanical Engineering)

Co-ordinators : Prof. C. Balaji

Lecture 1 - Introduction to Optimization

Lecture 2 - System Design and Analysis

Lecture 3 - Workable system

Lecture 4 - System simulation

Lecture 5 - Information flow diagrams

Lecture 6 - Successive substitution method

Lecture 7 - Successive substitution method (Continued.)

Lecture 8 - Successive substitution method and Newton-Raphson method

Lecture 9 - Newton-Raphson method (Continued.)

Lecture 10 - Convergence characteristics of Newton-Raphson method

Lecture 11 - Newton-Raphson method for multiple variables

Lecture 12 - Solution of system of linear equations

Lecture 13 - Introduction to Curve fitting

Lecture 14 - Example for Lagrange interpolation

Lecture 15 - Lagrange interpolation (Continued.)

Lecture 16 - Best fit

Lecture 17 - Least Square Regression

Lecture 18 - Least Square Regression (Continued.)

Lecture 19 - Least Square Regression (Continued.)

Lecture 20 - Non-linear Regression (Gauss - Newton Algorithm)

Lecture 21 - Optimization- Basic ideas

Lecture 22 - Properties of objective function and cardinal ideas in optimization

Lecture 23 - Unconstrained optimization

Lecture 24 - Constrained optimization problems

Lecture 25 - Mathematical proof of the Lagrange multiplier method

Lecture 26 - Test for Maxima / Minima

Lecture 27 - Handling in-equality constraints

Lecture 28 - Kuhn-Tucker conditions (Continued.)

Lecture 29 - Uni-modal function and search methods

Lecture 30 - Dichotomous search

Lecture 31 - Fibonacci search method

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Reduction ratio of Fibonacci search method

Lecture 33 - Introduction to multi-variable optimization

Lecture 34 - The Conjugate gradient method

Lecture 35 - The Conjugate gradient method (Continued.)

Lecture 36 - Linear programming

Lecture 37 - Dynamic programming

Lecture 38 - Genetic Algorithms

Lecture 39 - Genetic Algorithms (Continued.)

Lecture 40 - Simulated Annealing and Summary

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Engineering Fracture Mechanics (Mechanical Engineering)

Co-ordinators : Prof. K. Ramesh

Lecture 1 - EFM Course Outline

Lecture 2 - Spectacular Failures

Lecture 3 - Lessons from Spectacular Failures

Lecture 4 - LEFM and EPFM

Lecture 5 - Fracture Mechanics is Holistic

Lecture 6 - Fatigue Crack Growth Model

Lecture 7 - Crack Growth and Fracture Mechanisms

Lecture 8 - Elastic Strain Energy

Lecture 9 - Fracture Strength by Griffith

Lecture 10 - Energy Release Rate

Lecture 11 - Utility of Energy Release Rate

Lecture 12 - Pop-in Phenomenon

Lecture 13 - Displacement and Stress Formulations

Lecture 14 - Forms of Stress Functions

Lecture 15 - Airyâ€™s Stress Function for Mode-I

Lecture 16 - Westergaard Solution of Stress Field for Mode-I

Lecture 17 - Displacement Field for Mode-I

Lecture 18 - Relation between KI and GI

Lecture 19 - Stress Field in Mode-II

Lecture 20 - Generalised Westergaard Approach

Lecture 21 - Williamâ€™s Eigen Function Approach

Lecture 22 - Multi-parameter Stress Field Equations

Lecture 23 - Validation of Multi-parameter Field Equations

Lecture 24 - Discussion Session - I

Lecture 25 - Evaluation of SIF for Various Geometries

Lecture 26 - SIF for Embedded Cracks

Lecture 27 - SIF for Surface Cracks

Lecture 28 - Modeling of Plastic Deformation

Lecture 29 - Irwinâ€™s Model

Lecture 30 - Dugdale Model

Lecture 31 - Fracture Toughness Testing

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Plane Strain Fracture Toughness Testing

Lecture 33 - Plane Stress Fracture Toughness Testing

Lecture 34 - Paris Law and Sigmoidal Curve

Lecture 35 - Crack Closure

Lecture 36 - Crack Growth Models

Lecture 37 - J-Integral

Lecture 38 - HRR Field and CTOD

Lecture 39 - FAD and Mixed Mode Fracture

Lecture 40 - Crack Arrest and Repair Methodologies

Lecture 41 - Discussion Session - II

NPTEL : Experimental Stress Analysis (Mechanical Engineering)

Co-ordinators : Prof. K. Ramesh

Lecture 1 - Overview of Experimental Stress Analysis

Lecture 2 - Optical Methods Work as Optical Computers

Lecture 3 - Stress, Strain and Displacement Fields

Lecture 4 - Physical Principle of Strain Gauges, Photoelasticity and MoirÃ©

Lecture 5 - Introduction to MoirÃ©, Brittle Coatings and Holography

Lecture 6 - Hologram Interferometry, Speckle Methods

Lecture 7 - Introduction to Shearography, TSA, DIC and Caustics

Lecture 8 - Fringe Patterns â€“ Richness of Qualitative Information

Lecture 9 - Multi-Scale Analysis in Experimental Mechanics

Lecture 10 - Selection of an Experimental Technique

Lecture 11 - Introduction to Transmission Photoelasticity

Lecture 12 - Ordinary and Extraordinary Rays

Lecture 13 - Light Ellipse, Passage of Light Through a Crystal Plate

Lecture 14 - Retardation Plates, Stress-optic Law

Lecture 15 - Plane Polariscope

Lecture 16 - Jones Calculus

Lecture 17 - Circular Polariscope

Lecture 18 - Determination of Photoelastic Parameters at an Arbitrary Point

Lecture 19 - Tardyâ€™s Method of Compensation

Lecture 20 - Calibration of Photo elastic Materials

Lecture 21 - Fringe Thinning Methodologies

Lecture 22 - Fringe Ordering in Photoelasticity

Lecture 23 - Miscellaneous Topics in Transmission Photoelasticity

Lecture 24 - Three Dimensional Photoelasticity

Lecture 25 - Overview of Digital Photoelasticity

Lecture 26 - Introduction to Photoelastic Coatings

Lecture 27 - Correction Factors for Photoelastic Coatings

Lecture 28 - Coating Materials, Selection of Coating Thickness, Industrial Application of Photoelastic Coatings

Lecture 29 - Calibration of Photoelastic Coatings, Introduction to Brittle Coatings

Lecture 30 - Analysis of Brittle Coatings

Lecture 31 - Introduction to Strain Gauges

Lecture 32 - Strain Sensitivity of a Strain Gauge, Bridge Sensitivity, Rosettes

Lecture 33 - Strain Gauge Alloys, Carriers and Adhesives

Lecture 34 - Performance of Strain Gauge System

Lecture 35 - Temperature Compensation, Two-wire and Three-wire Circuits

Lecture 36 - Strain Gauge Selection

Lecture 37 - Bonding of a Strain Gauge

Lecture 38 - Soldering, Accounting for Transverse Sensitivity Effects

Lecture 39 - Correction Factors for Special Applications

Lecture 40 - Special Gauges

Lecture 41 - Questions and Answers

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Rocket Propulsion (Mechanical Engineering)

Co-ordinators : Prof. K. Ramamurthi

Lecture 1 - Introduction

Lecture 2 - Motion in Space

Lecture 3 - Rotational Frame of Reference and Orbital Velocities

Lecture 4 - Velocity Requirements

Lecture 5 - Theory of Rocket Propulsion

Lecture 6 - Rocket Equation and Staging of Rockets

Lecture 7 - Review of Rocket Principles; Propulsion Efficiency

Lecture 8 - Examples Illustrating Theory of Rocket Propulsion and Introduction to Nozzles

Lecture 9 - Theory of Nozzles

Lecture 10 - Nozzle Shape

Lecture 11 - Area Ratio of Nozzles; Under-expansion and Over-expansion

Lecture 12 - Characteristic Velocity and Thrust Coefficient

Lecture 13 - Divergence Loss in Conical Nozzles and the Bell Nozzle

Lecture 14 - Unconventional Nozzles and Problems in Nozzles

Lecture 15 - Criterion for Choice of Chemical Propellants

Lecture 16 - Choice of Fuel-Rich Propellants

Lecture 17 - Performance Prediction Analysis

Lecture 18 - Dissociation of Products of Combustion

Lecture 19 - Shifting Equilibrium and Frozen Flow in Nozzles

Lecture 20 - Factors Influencing Choice of Chemical Propellants

Lecture 21 - Low Energy Liquid Propellants and Hybrid Propellants

Lecture 22 - Introduction to Solid Propellant Rockets

Lecture 23 - Burn Rate of Solid Propellants and Equilibrium Pressure in Solid Propellant Rockets

Lecture 24 - Design Aspects of Solid Propellant Rockets

Lecture 25 - Burning Surface Area of Solid Propellant Grains

Lecture 26 - Ignition of Solid Propellant Rockets

Lecture 27 - Review of Solid Propellant Rockets

Lecture 28 - Feed Systems for Liquid Propellant Rockets

Lecture 29 - Feed System Cycles for Pump Fed Liquid Propellant Rockets

Lecture 30 - Analysis of Gas Generator and Staged Combustion Cycles and Introduction to Injectors

Lecture 31 - Injectors, Cooling of Chamber and Mixture Ratio Distribution

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Efficiencies due to Mixture Ratio Distribution and Incomplete Vaporization

Lecture 33 - Pumps and Turbines; Propellant Feed System at Zero â€œgâ€ Conditions

Lecture 34 - Review of Liquid Bi-propellant Rockets and Introduction to Mono-propellant Rockets

Lecture 35 - Introduction to Hybrid Rockets and a Simple Illustration of Combustion Instability in Liquid Propellant Rockets

Lecture 36 - Combustion Instability in Solid Propellant and Liquid Propellant Rockets â€“ Bulk and Wave Modes

Lecture 37 - Wave modes of Oscillation

Lecture 38 - Mechanisms Causing Instabilities and Strategies for Avoiding Combustion Instability

Lecture 39 - Electric and Magnetic Fields and the Electrostatic Thruster

Lecture 40 - Electrical Thrusters

Lecture 41 - Advances in Rocket Propulsion

NPTEL : Advanced Finite Elements Analysis (Mechanical Engineering)

Co-ordinators : Dr. R. Krishnakumar

NPTEL : Convective Heat Transfer (Mechanical Engineering)

Co-ordinators : Dr. Arvind Pattamatta, Prof. Ajit K. Kolar

Lecture 1 - Introduction to convective heat transfer - Part 1

Lecture 2 - Introduction to convective heat transfer - Part 2

Lecture 3 - Continuity Equation

Lecture 4 - Momentum and Energy Equations

Lecture 5 - Energy Equation

Lecture 6 - Reynolds Transport Theorem

Lecture 7 - Entrophy Generation and streamfunction-vorticity formulation

Lecture 8 - Couette flow - Part 1

Lecture 9 - Couette flow - Part 2

Lecture 10 - Couette flow - Part 3

Lecture 11 - Boundary layer approximation

Lecture 12 - Laminar External flow past flat plate (Blasius Similarity Solution)

Lecture 13 - Numerical solution to the Blasius equation and similarity solution to heat transfer

Lecture 14 - Pohlhausen similarity solution and flows including pressure gradient (Falkner-Skan)

Lecture 15 - Falkner skan solutions for heat transfer

Lecture 16 - Similarity solution for flow and heat transfer with transpiration at walls

Lecture 17 - Thermal boundary layer in high speed flows

Lecture 18 - Approximate(Integral) methods for laminar external flow and heat transfer

Lecture 19 - Integral method for laminar external thermal boundary layer over isothermal surface

Lecture 20 - Integral method for flows with pressure gradient (von Karman-Pohlhausen method)

Lecture 21 - Integral method with pressure gradient: heat transfer

Lecture 22 - Heat transfer across a circular cylinder: Walz approximation

Lecture 23 - Duhamel's method for varying surface temperature

Lecture 24 - Laminar External heat transfer with non uniform surface temperature

Lecture 25 - Laminar internal forced convection - fundamentals

Lecture 26 - Hydrodynamically and thermally fully developed internal laminar flows

Lecture 27 - Fully developed laminar internal flow and heat transfer

Lecture 28 - Shooting method for fully developed heat transfer and thermal entry length problem

Lecture 29 - Thermal entry length problem with plug velocity profile: Graetz problem

Lecture 30 - Extended Graetz problem for parabolic velocity profile

Lecture 31 - Extended Graetz problem

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Extended Graetz problem with wall flux boundary condition

Lecture 33 - Approximate method for laminar internal flows

Lecture 34 - Integral method for thermal entry length problem

Lecture 35 - Introduction to Natural Convection Heat Transfer

Lecture 36 - Similarity Solution in Natural Convection for Vertical isothermal Plate - Part 1

Lecture 37 - Similarity Solution in Natural Convection for Vertical isothermal Plate - Part 2

Lecture 38 - Similarity Solution in Natural Convection for Vertical isoflux Plate

Lecture 39 - Approximate Method in Natural Convection Heat Transfer

Lecture 40 - Natural Convection in Other Configurations

Lecture 41 - Turbulent Convective Heat Transfer : RANS Equations - Part 1

Lecture 42 - Turbulent Convective Heat Transfer : RANS Equations - Part 2

Lecture 43 - Analogies in Turbulent Convective Heat Transfer - Part 1

Lecture 44 - Analogies in Turbulent Convective Heat Transfer - Part 2

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : Introduction to Explosions and Explosion Safety (Mechanical Engineering)

Co-ordinators : Prof. K. Ramamurthi

Lecture 1 - Loud Bang and Disruption

Lecture 2 - Blast Wave in an Explosion: Predictions from Dimensional Considerations

Lecture 3 - Typical Examples of Explosions and Classification

Lecture 4 - Shock Hugoniot and Rayleigh Line

Lecture 5 - Properties behind a Constant Velocity Shock

Lecture 6 - Blast waves:Concentration of Mass at the Front,Snow Plow Approximation,Energy conservation ina Blast wave

Lecture 7 - Blast waves: Decay of a strong Blast wave,Explosion Length, Sach's Scaling,Over pressure,Cranz Hopkinson Scaling law of Overpressure

Lecture 8 - Blast Waves: Overpressure and Impulse in the Near and Far Field, Examples,Introduction to Impulse

Lecture 9 - Blast Waves: Non-dimensional Impulse, Cranz -Hopkinson Scaling, Missiles, Fragments and Shrapnel, Craters, Examples

Lecture 10 - Blast Waves: Interaction with Objects, Reflection and Transmission of Blast Waves, Impedance

Lecture 11 - Blast Waves: Amplification of Reflected Blast Waves; Role of Impedance, Spalling, Damage to Organs containing Air, Mushroom Cloud in an Explosion, Examples

Lecture 12 - Blast Waves: Damage from Blast Waves, Examples, Multiple Spikes in an Impulse, Iso-damage Curve on an Overpressure- Impulse Diagram, Complex Structures

Lecture 13 - Energy Release in a Chemical Reaction: Moles, Internal Chemical Energy, Standard Heats of Formation

Lecture 14 - Energy Release: Stoichiometry, Equivalence Ratio and Heat Release in Fuel Rich and Oxidizer Rich Compounds

Lecture 15 - Energy Release: Examples of Energy Release Calculations, Higher and Lower Calorific Values, Internal Energy of Formation

Lecture 16 - Rate of Energy Release: Concentration, Activation Energy, Energy Release Profile

Lecture 17 - Thermal Theory of Explosion

Lecture 18 - Thermal Theory

Lecture 19 - Role of Chain Carriers in an Explosion

Lecture 20 - Combustion - I

Lecture 21 - Combustion - II

Lecture 22 - Case Histories of Explosions involving Volatile Liquids

Lecture 23 - Detonation

Lecture 24 - Structure of Detonations

Lecture 25 - Realizable States in a Detonation

Lecture 26 - One Dimensional Model of Detonation

Lecture 27 - Case Histories of Explosions involving Detonation or Quasi-Detonation

Lecture 28 - Explosions in Confined and Unconfined Geometries

Lecture 29 - Dust Explosions - I

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 30 - Dust Explosions - II

Lecture 31 - Physical Explosions

Lecture 32 - Rupture of Cryogenic Storage Vessels and Pressure Vessels

Lecture 33 - Condensed Phased Explosives Based on Hydrocarbons

Lecture 34 - Condensed Phase Explosives and their Properties

Lecture 35 - TNT Equivalence and Yield of an Explosion

Lecture 36 - Atmospheric Dispersion

Lecture 37 - Modeling Atmospheric Dispersion

Lecture 38 - Explosions Involving Atmospheric Dispersion

Lecture 39 - Quantification of Damages in an Explosion

Lecture 40 - Risk Analysis for an Explosion

NPTEL : Metrology (Mechanical Engineering)

Co-ordinators : Dr. K. Sadashivappa

Lecture 1 - Introduction to Metrology

Lecture 2 - Metrology terminologies

Lecture 3 - Measurement errors

Lecture 4 - Linear measuring instruments Â– 1 (Angle plate, steel rule, spring calipers)

Lecture 5 - Linear measuring instruments Â– 2 (Combination set, Vernier calipers)

Lecture 6 - Linear measuring instruments Â– 3 (Height gauge, Micrometers Â– 1)

Lecture 7 - Linear measuring instruments Â– 4 (Micrometers Â– 2, Bore gauge)

Lecture 8 - Linear measuring instruments Â– 5 (Dial indicators, thickness gauges, depth gauges)

Lecture 9 - Manufacturing tolerances and fits

Lecture 10 - Terminologies of limits fits and tolerances

Lecture 11 - Numerical problems on fit and tolerances

Lecture 12 - Selection of fits, Geometrical tolerances

Lecture 13 - Positional tolerances

Lecture 14 - Limit gauging - 1

Lecture 15 - Limit gauging - 2

Lecture 16 - Design of limit gauges

Lecture 17 - Measurement of straightness, flatness and squareness

Lecture 18 - Perpendicularity measurement

Lecture 19 - Basics of surface roughness

Lecture 20 - Surface finish parameters

Lecture 21 - Stylus type surface finish measuring instruments

Lecture 22 - Non-contact type surface finish measuring instruments

Lecture 23 - Screw thread production and terminology

Lecture 24 - Measurement of screw thread elements

Lecture 25 - Introduction to gears

Lecture 26 - Measurement of gear elements

Lecture 27 - Angle measurement - 1

Lecture 28 - Angle measurement - 2

Lecture 29 - Radius measurement, Contact angle measurement

Lecture 30 - Basics of interferometry

Lecture 31 - Interferometers

Lecture 32 - Introduction to comparators, Mechanical comparators

Lecture 33 - Electrical and electronic comparators, Optical comparators

Lecture 34 - Pneumatic comparators

Lecture 35 - Geometrical tests on lathe

Lecture 36 - Geometrical tests on pillar type drilling machine

Lecture 37 - Universal measuring machine (UMM) and Coordinate measuring machine (CMM)

Lecture 38 - CMM probes and CMM software

Lecture 39 - Feature measurement using CMM, Laser vision

Lecture 40 - In-process gauging and control

Lecture 41 - Stage position metrology

Lecture 42 - Micro and Nano stages, Nano technology instrumentation

Lecture 43 - Optical system design

Lecture 44 - Complex opto- mechanical assemblies, Metrology testing and certification services

NPTEL : NOC:Engineering Mechanics Statics and Dynamics (Mechanical Engineering)

Co-ordinators : Prof. Mahesh Panchagnula

Lecture 1 - Introduction to the course

Lecture 2 - Newton's laws

Lecture 3 - Equilibrium

Lecture 4 - Example 1 - Statics

Lecture 5 - Example 2 - Rigid Body Systems

Lecture 6 - Example 3 - Rigid Body Systems

Lecture 7 - Structural Systems with rigid bodies

Lecture 8 - Types of 1-D Structural Elements

Lecture 9 - Axial members

Lecture 10 - Analysis of the truss system

Lecture 11 - Stability of Structural systems

Lecture 12 - Beams - Example 1

Lecture 13 - Beams - BMD and SFD

Lecture 14 - Beams - Loading, Shear and Bending Moment Relations

Lecture 15 - Static Friction

Lecture 16 - Friction - Solving Problems

Lecture 17 - Particle Kinematics - 1

Lecture 29 - Role of Segregation - Part II

Lecture 30 - Deleterious Effect of Phosphorus

Lecture 31 - Strength of Solidifying Strand

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Brittle Zone Near Solidus

Lecture 33 - Strength and Toughness of Solid Shell

Lecture 34 - Role of Chemistry on Solidification Behaviour

Lecture 35 - Sticking vis-a-vis Depression Behaviour

Lecture 36 - Role of Chemistry on Bulging or Depression Tendency - Part I

Lecture 37 - Role of Chemistry on Bulging or Depression Tendency - Part II

Lecture 38 - Effect of Cast Grain Size

Lecture 39 - Brittle Temperature Regions

Lecture 40 - Typical Cracks and Defects - Part I

Lecture 41 - Typical Cracks and Defects - Part II

Lecture 42 - Remedial Measures to Control Defects - Part I

Lecture 43 - Remedial Measures to Control Defects - Part II

Lecture 44 - Remedial Measures to Control Defects - Part III

Lecture 45 - Grade - Specific Casting Parameters - Part I

Lecture 46 - Grade - Specific Casting Parameters - Part II

Lecture 47 - Identification of Genesis of Quality Problems Through Metallographic Investigation - Part I

Lecture 48 - Identification of Genesis of Quality Problems Through Metallographic Investigation - Part II

Lecture 49 - Identification of Genesis of Quality Problems Through Metallographic Investigation - Part III

NPTEL : NOC:X-ray Crystallography and Diffraction (Mechanical Engineering)

Co-ordinators : Prof. Ranjit Kumar Ray

Lecture 1 - Geometry of Crystals

Lecture 2 - Geometry of Crystals (Continued...)

Lecture 3 - Tutorial-1

Lecture 4 - Reciprocal Lattice

Lecture 5 - Stereographic Projection

Lecture 6 - Tutorial-2

Lecture 7 - Point Groups and Space Groups

Lecture 8 - Point Groups and Space Groups (Continued...)

Lecture 9 - Tutorial-3

Lecture 10 - Point Groups and Space Groups (Continued...)

Lecture 11 - Basics of X-Rays

Lecture 12 - Production and Detection of X-Rays

Lecture 13 - Production and Detection of X-Rays (Continued...)

Lecture 14 - Principles of X-Ray Diffraction

Lecture 15 - X-Ray Diffraction Methods

Lecture 16 - Debye Sherrer Camera

Lecture 17 - Diffractometer Measurements

Lecture 18 - Tutorial-4

Lecture 19 - Intensity of Diffracted Beams

Lecture 20 - Intensity of Diffracted Beams (Continued...)

Lecture 21 - Determination of Crystal Structures

Lecture 22 - Precise Lattice Parameter Determination

Lecture 23 - XRD - Lab Demonstration

Lecture 24 - Discussion - Based on Forum Queries - 1

Lecture 25 - Phase Diagram Determination

Lecture 26 - Ordered Disordered Transformation

Lecture 27 - Ordered Disordered Transformation (Continued...)

Lecture 28 - Qualitative Phase Analysis

Lecture 29 - Quantitative Phase Analysis - 1

Lecture 30 - Precise Lattice Parameter Determination - 1

Lecture 31 - Chemical Analysis by X-Ray Flourescence

Lecture 32 - Chemical Analysis by X-Ray Absorption

Lecture 33 - Effect of Crystallite Size on Diffracted X-Ray Intensity

Lecture 34 - Texture Determination by XRD

Lecture 35 - Particle Size Determination by XRD

Lecture 36 - Effect of Crystallite Size on Diffracted X-Ray Intensity

Lecture 37 - Determination of Single Crystal Orientation by X-Rays

Lecture 38 - Stress Analysis by X-Rays

Lecture 39 - Factors Contributing to Peak Broadening

Lecture 40 - Residual Stress Measurement by X-Rays

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Transport Phenomena in Materials (Mechanical Engineering)

Co-ordinators : Dr. G. Phanikumar

Lecture 1 - Subscript Notation - Part 1

Lecture 2 - Subscript Notation - Part 2

Lecture 3 - Coordinate Rotation

Lecture 4 - Introduction to Tensors

Lecture 5 - Symmetry of Properties

Lecture 6 - Material Derivative

Lecture 7 - Planar Flows

Lecture 8 - Reynolds Transport Theorem

Lecture 9 - Derivation of Navier-Stokes equation

Lecture 10 - Navier Stokes equations - Part 2

Lecture 11 - Flow problem statements

Lecture 12 - Simple cases in fluid flow : rectangular coordinate system

Lecture 13 - Simple cases in fluid flow : cylindrical coordinate system

Lecture 14 - Pipe flow and porous medium

Lecture 15 - Simple cases in fluid flow : spherical coordinate system

Lecture 16 - Friction factors and correlations

Lecture 17 - Energy Transport

Lecture 18 - Conduction cases - Steady state

Lecture 19 - Conduction cases - Transient state

Lecture 20 - Convective heat transfer

Lecture 21 - Mass Transfer Overview

Lecture 22 - Chemical Equilibrium

Lecture 23 - Reaction Equilibrium

Lecture 24 - Species Balance Equation

Lecture 25 - Solute Transfer Modelling - Part 1

Lecture 26 - Solute Transfer Modelling - Part 2

Lecture 27 - Solute Segregation Profile - Part 1

Lecture 28 - Solute Segregation Profile - Part 2

Lecture 29 - Problem Statements

Lecture 30 - Diffusion in Solid State

Lecture 31 - Transient Solute Diffusion in Solid State

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Mass Transfer in Fluids

Lecture 33 - Similarity Across Transport Phenomena

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Experimental Stress Analysis - An Overview (Mechanical Engineering)

Co-ordinators : Prof. K. Ramesh

Lecture 1 - Overview of Experimental Stress Analysis

Lecture 2 - Optical Methods Work as Optical Computers

Lecture 3 - Stress, Strain and Displacement Fields

Lecture 4 - Completeness of a numerical solution

Lecture 5 - Fringe Patterns - Richness of Qualitative Information

Lecture 6 - Multi-Scale Analysis in Experimental Mechanics

Lecture 7 - Selection of an Experimental Technique

Lecture 8 - Introduction to Transmission Photoelasticity

Lecture 9 - Ordinary and Extraordinary Rays

Lecture 10 - Light Ellipse, Passage of Light Through a Crystal Plate

Lecture 11 - Retardation Plates, Stress-optic Law

Lecture 12 - Plane Polariscope

Lecture 13 - Jones Calculus

Lecture 14 - Circular Polariscope

Lecture 15 - Determination of Photoelastic Parameters at an Arbitrary Point

Lecture 16 - Tardyâ€™s Method of Compensation

Lecture 17 - Calibration of Photoelastic Materials

Lecture 18 - Fringe Thinning Methodologies

Lecture 19 - Fringe Ordering in Photoelasticity

Lecture 20 - Miscellaneous Topics in Transmission Photoelasticity

Lecture 21 - Three Dimensional Photoelasticity

Lecture 22 - Overview of Digital Photoelasticity

Lecture 23 - Introduction to Photoelastic Coatings

Lecture 24 - Correction Factors for Photoelastic Coatings

Lecture 25 - Coating Materials, Selection of Coating Thickness, Industrial Application of Photoelastic Coatings

Lecture 26 - Calibration of Photoelastic Coatings, Introduction to Brittle Coatings

Lecture 27 - Analysis of Brittle Coatings

Lecture 28 - Introduction to Strain Gauges

Lecture 29 - Strain Sensitivity of a Strain Gauge, Bridge Sensitivity, Rosettes

Lecture 30 - Strain Gauge Alloys, Carriers and Adhesives

Lecture 31 - Performance of Strain Gauge System

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

Lecture 32 - Temperature Compensation, Two-wire and Three-wire Circuits

Lecture 33 - Strain Gauge Selection

Lecture 34 - Bonding of a Strain Gauge

Lecture 35 - Soldering, Accounting for Transverse Sensitivity Effects

Lecture 36 - Correction Factors for Special Applications

Lecture 37 - Special Gauges

NPTEL : NOC:Mechanics of Human Movement (Mechanical Engineering)

Co-ordinators : Prof. Sujatha Srinivasan

Lecture 1 - Basic Terminologies

Lecture 2 - Skeletal System

Lecture 3 - Axial and Appendicular Skeleton

Lecture 4 - Bones in the Human Body

Lecture 5 - Types of Joints

Lecture 6 - Movements about Joints

Lecture 7 - Levers in the Human Body

Lecture 8 - Skeletal Muscles: Functions

Lecture 9 - Skeletal Muscles: Structure - Part I

Lecture 10 - Skeletal Muscles: Structure - Part II

Lecture 11 - Mechanics and Modeling of Muscles

Lecture 12 - Muscle Action - Part I

Lecture 13 - Muscle Action - Part II

Lecture 14 - Principles of Statics

Lecture 15 - Static Analysis of Elbow - Part I

Lecture 16 - Static Analysis of Elbow - Part II

Lecture 17 - Static Analysis of Shoulder - Part I

Lecture 18 - Static Analysis of Shoulder - Part II

Lecture 19 - Static Analysis of Spine - Part I

Lecture 20 - Static Analysis of Spine - Part II

Lecture 21 - Static Analysis of Spine - Part III

Lecture 22 - Static Analysis of Hip - Part I

Lecture 23 - Static Analysis of Hip - Part II

Lecture 24 - Static Analysis of the Knee

Lecture 25 - Static Analysis of the Knee and Ankle

Lecture 26 - Kinetics: Linear Motion - Part I

Lecture 27 - Kinetics: Linear Motion - Part II

Lecture 28 - Kinetics: Linear Motion - Part III

Lecture 29 - Kinetics: Angular Motion - Part I

Lecture 30 - Kinetics: Angular Motion - Part II

Lecture 31 - Kinetics: Angular Motion - Part III

Lecture 32 - Kinetics: Angular Motion - Part IV

Lecture 33 - Kinetics of Arm Swinging during Walking

Lecture 34 - Inverse Dynamics Analysis

Lecture 35 - Biomechanics of Balance - Part I

Lecture 36 - Biomechanics of Balance - Part II

Lecture 37 - Biomechanics of Balance - Part III

Lecture 38 - Human Gait

Lecture 39 - Human Gait Terminologies

Lecture 40 - Characteristics of Normal Gait - Part I

Lecture 41 - Characteristics of Normal Gait - Part II

Lecture 42 - Characteristics of Normal Gait - Part III

Lecture 43 - Pathological Gait - Part I

Lecture 44 - Pathological Gait - Part II

Lecture 45 - Pathological Gait - Part III

Lecture 46 - Introduction to Assistive Devices for Mobility

Lecture 47 - Design Considerations: Prosthetic Foot

Lecture 48 - Design Considerations: Prosthesis and Orthosis

Lecture 49 - Design Considerations: Prosthetic Knee

Lecture 50 - Journey of Standing Wheelchair Development

NPTEL : NOC:Design for Quality, Manufacturing and Assembly (Mechanical Engineering)

Co-ordinators : Prof. Palaniappaan Ramu

Lecture 1 - Introduction to DfX

Lecture 2 - Introduction to Quality

Lecture 3 - Introduction to Robustness

Lecture 4 - Introduction to Six Sigma Concept

Lecture 5 - Recap and clarifications of basic concepts

Lecture 6 - Review of Six Sigma and Quality Loss Function (QLF)

Lecture 7 - Types of QLF and SN Ratio

Lecture 8 - Linking Quality and Robustness

Lecture 9 - Design for Six Sigma - Stages, Design of Experiments

Lecture 10 - Introduction To Design Of Experiments

Lecture 11 - Need for DoE and basic DoE methods

Lecture 12 - Factorial Design

Lecture 13 - Orthogonal Array- L4 and L8 example

Lecture 14 - Setting up an Orthogonal Array

Lecture 15 - Confounding OA and Resolution Table

Lecture 16 - Confounding Logic and Randomization of Experiments

Lecture 17 - Paper Helicopter Case Study - Part I

Lecture 18 - Paper Helicopter Case Study - Part II

Lecture 19 - Introduction To Injection Molding Process, Materials, Terminologies Related To Plastic Parts and Design Guidelines

Lecture 20 - Estimation of Mold Cost for Injection Molding (Dixon and Poli's Method)

Lecture 21 - Estimation of Mold Cost for Injection Molding (Dixon and Poli's Method) (Continued...)

Lecture 22 - Mold Cost Estimation - Tutorial

Lecture 23 - Design for Additive Manufacturing

Lecture 24 - Demo

Lecture 25 - Introduction to Sustainable Development and Sustainability Indicators - Part 1

Lecture 26 - Introduction to Sustainable Development and Sustainability Indicators - Part 2

Lecture 27 - Introduction to design process

Lecture 28 - Accounting for manufacturability and assembly in design - An overview

Lecture 29 - DfMA in product design

Lecture 30 - General design guidelines for manual assembly

Lecture 31 - Systematic DFA methodology

Lecture 32 - Alpha symmetry, Beta symmetry

Lecture 33 - Quantification of part size and thickness

Lecture 34 - Systematic DFA Case study - controller assembly

Lecture 35 - DFA examples and discussion

Lecture 36 - Xerox Producibility Index (XPI)

Lecture 37 - High Speed and Robotic Assembly

Lecture 38 - Sheet Metal Working

Lecture 39 - Overview of DoE Workflow

Lecture 40 - DFA Software

Lecture 41 - DFM Software and Case Studies

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Surrogates and Approximations in Engineering Design (Mechanical Engineering)

Co-ordinators : Prof. Palaniappaan Ramu

Lecture 1 - Overview and Motivation of Course

Lecture 2 - Basic Optimization Problem Formulation

Lecture 3 - Problem Formulation Example

Lecture 4 - Calculus related to Optimization

Lecture 5 - The big picture - Overview

Lecture 6 - Introduction to DOE - 1

Lecture 7 - Introduction to DOE - 2

Lecture 8 - Types of DOE - 1

Lecture 9 - Types of DOE - 2 and some examples

Lecture 10 - Introduction to surrogate modeling

Lecture 11 - Types of surrogate - Polynomial models

Lecture 12 - Radial basis function - 1

Lecture 13 - Radial basis function - 2

Lecture 14 - Kriging - 1

Lecture 15 - Kriging - 2

Lecture 16 - Metamodels for Safe and Efficient Automotive Structures

Lecture 17 - Exploration and Exploitation in Surrogates

Lecture 18 - Errors Based Exploration

Lecture 19 - Ensemble of Surrogates

HTML Links for 1,32,200+ NPTEL Video Lectures, Created by LinuXpert Systems, Chennai

DIGIMAT - The No.1 Learning Management Platform for Creative Learning

NPTEL : NOC:Steel Quality: Role of Secondary Refining and Continuous Casting (Mechanical Engineering)

Co-ordinators : Prof. Santanu Kr. Ray

Lecture 1 - Concept of Steel Quality

Lecture 2 - Typical Examples of Surface Defects

Lecture 3 - Origin of Common Quality Problems

Lecture 4 - Present Scenario on Quality Demands

Lecture 5 - Control of Residuals and Impact on Quality

Lecture 6 - Non-Metallic Inclusions

Lecture 7 - Evaluation of Residuals and Inclusions

Lecture 8 - Cleanliness Requirements for Different applications

Lecture 9 - Limitation of Primary Steelmaking and Importance of secondary Refining

Lecture 10 - Deoxidation

Lecture 11 - Prevention of Slag carryover

Lecture 12 - Desulphurisation

Lecture 13 - Degassing

Lecture 14 - Secondary Refining Processes

Lecture 15 - Injection of Calcium

Lecture 16 - Decarburisation

Lecture 17 - Cleanliness Measures in Ladle and Tundish

Lecture 18 - Cleanliness Measures in Mould

Lecture 19 - Different Routes and Temperature Control

Lecture 20 - Nature and Distribution of Entrapments in Casting

Lecture 21 - Sources of Exogenous Entrapments
